

Dear Commissioner Judson,

As a land owner, taxpayer and registered voter, I am extremely concerned about a provision in the proposed SMART program, Section 20.05(5)(e), which would penalize rural land owners like me for having our land designated as Chapter 61A land, as it relates to solar development.

We are land owners who could most benefit from this type of project. The supplemental revenue would provide the steady, secure income we desperately need to ensure that we are able to retain, protect and preserve our land, not only for for my lifetime, but for future generations of my family.

Please reconsider this provision.

Thank you for your consideration.
