Hi,

Please stop giving subsidies to Solar developers that are exploiting the last remaining upland forests of Southeastern Massachusetts. It is a profound short sighted tragedy what has taken place under current state leadership. The last remaining most climate resilient lands in the Tihonet region of Wareham are about to be lost because the state is driving these subsidies. These developments show the extreme lack of spatial awareness of the remaining privately owned forests in SE Mass. You must be more prudent on restricting the allowance if these solar proposals on valuable forest land.

I am for solar development but certainly not with careless abandon with what is happening on AD Makepeace lands and surrounding areas. It's obvious the Mass F&W is working in conjunction w Makepeace and engineers to allow these to go through justifying them with land takes.
