

SNAP Reimbursement Project Information Sessions

Low-income households benefit from the SNAP outreach and employment and training (E&T) services your organization provides. Did you know that these services MAY qualify for partial federal reimbursement?

The Department of Transitional Assistance (DTA), in partnership with UMass Medical School (UMass), manages two projects — **SNAP Outreach Partner Reimbursement** and **SNAP Path to Work Provider Reimbursement (E&T)**. One or both projects may apply to your nonprofit organization.

To learn more, DTA and UMass invite you to attend one of the information sessions being held at different locations around Massachusetts. These sessions are designed to walk you through the federal rules, including funding sources, allowable activities and the enrollment process.
