

THE DCR MIDDLESEX FELS RESERVATION

MALDEN, MEDFORD, MELROSE, STONEHAM, AND WINCHESTER, MASSACHUSETTS

FIGURE 2.4.2. SOIL SUITABILITY FOR PATHS AND TRAILS

NOTE:

A final determination of trail status has not been made. "Official" and "unofficial" trail designation may change before the trail map is finalized. "Unofficial" trails will not be shown on the final trail map and may be closed or blocked off by park staff.

DATA SOURCES:

Soil suitability was derived from an analysis of NRCS Soils Survey data.

Reservation road and trail data were collected using GPS by DCR contractors and staff using a DCR protocol. These data are in DRAFT format. All protected open space boundaries are also in DRAFT format.

All background geographic data supplied by the Office of Geographic and Environmental Information (MassGIS). Hydrography data is DEP 1:12,000 wetlands.

DCR GIS - 12/2011
