

Tobin Bridge/Chelsea Curves Rehabilitation Project

Route 1 Lane Closures Extend Evening of May 13, 2019

WHAT AND WHERE: MassDOT is closing one of three southbound lanes 24/7 and extending current northbound lane closures on Route 1 from the Tobin Bridge through the Chelsea Curves to the County Road Overpass (see the workzone below).

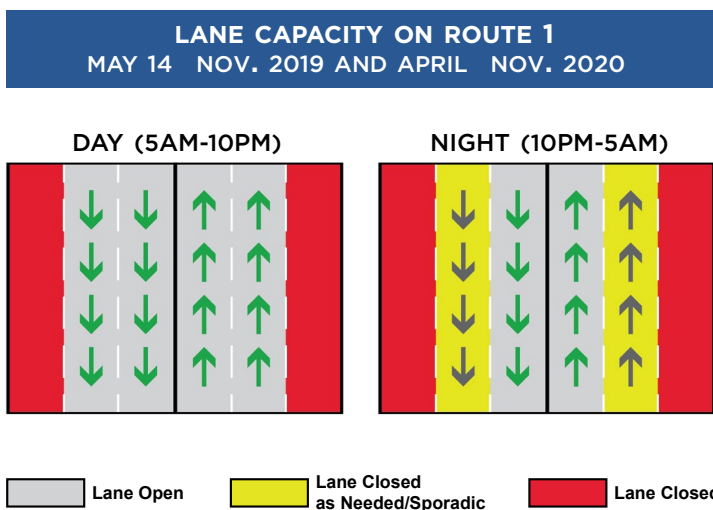

WHEN: On Monday evening, May 13, 2019, crews will mobilize in preparation for southbound lane closures which will be put in place on Tuesday morning, May 14, 2019.

WHY: To minimize the length of closures and construction, and reduce impacts like noise and night-work, for required maintenance and structural rehabilitation of Route 1 and the Tobin Bridge.

TRAVEL IMPACTS: Beginning Tuesday morning, May 14, 2019, increased travel times for drivers and MBTA bus passengers on sections of Route 1 North and South, especially during peak hours. All on- and off-ramps will remain open at this time.

ALTERNATE TRAVEL OPTIONS funded by MassDOT and available throughout construction:

- **Free inbound fares on the MBTA SL3 bus** at all stops in Chelsea
- **Additional Blue Line trains** to increase ridership capacity
- With a CharlieCard, **inbound and outbound travel on the Commuter Rail** between Chelsea Station and North Station
