Out-of-State C&D Facility Conformance to MassDEP MPS requirements

Based on CY2025 Facility Annual Reports

Conformance to MassDEP MPS requirements as a C&D Processor

Facility	Parent Company	City/Town	Criterion #1:	Criterion #2:	Overall MPS Conformance	Comments
			Separate all 4 C&D WB mat'ls (#)	≥20% PSR min. threshold	(Y/N)	
J.R. Vinagro Recycling Corp.		Johnston, RI	4	25.4%	Y	
RWS-Epping	ReSource Waste Services	Epping, NH	3	19.8%	N	No gypsum; PSR < 20%
RWS-Salem	ReSource Waste Services	Salem, NH	4	18.2%	N	PSR < 20%
RWS-Lewiston	ReSource Waste Services	Lewiston, ME	3	18.5%	N	No gypsum; PSR < 20%
Shoham Road Transfer Center	USA Recycling	East Windsor, CT	4	34.6%	Y	
Willimantic Transfer Station	Casella	Willimantic, CT	4	30.5%	Y	

Based on CY2025 C&D Facility Annual Report Data provided by the out-of-state C&D Handling Facilities.

Excerpt from MPS: “If transferring material out-of-state, the C&D handling facility must be able to provide documentation that the out-of-state processor conforms to the MassDEP MPS performance criteria.”

Note 1: An out-of-state C&D handling facility that does not separate gypsum, but otherwise conforms to the MPS, can accept unprocessed or partially processed C&D materials from an in-state C&D handling facility provided the in-state facility first separates gypsum and other zero-tolerance items prior to transfer.

Note 2: An in-state C&D facility cannot accept C&D post-process residuals for disposal unless the facility of origin complies with both MPS performance criteria.
