

Attention Anglers!

Massachusetts Division of Marine Fisheries is conducting research on striped bass aggregations in state waters. Acoustic receivers will be deployed in the areas shown in the map below. Please be aware of the presence of these receivers and leave them undisturbed. Also, be on the look out for tagged striped bass. The pictures on the left show a tagged fish, how moorings will be rigged, and what receivers look like.

Caught a tagged striped bass?

1. Do NOT remove the external tag from released fish
2. Record the TAG NUMBER, DATE CAUGHT, LOCATION, LENGTH, and WEIGHT
3. If you keep a tagged fish, please save both internal and external tags
4. Call Bill Hoffman to receive a reward: (978) 282-0308 ext. 106

Found a lost receiver?

Please call Bill Hoffman at (978) 282-0308 ext. 106
