

### Beach Width Fronting Coastal Banks Humarock Beach to Brant Rock

- Beach width was defined as the distance between the 2001 high-water shoreline and the 15-foot elevation contour from 2000 NOAA LIDAR data.
  - Length of bars illustrates relative magnitude of beach width.
  - Unknown stretches are from areas where LIDAR data is unavailable.
- White lines represent town boundaries and dashed black lines show littoral cell boundaries.
