

18:15:10 From Lauren Woods : I cannot see the minot st access point
18:18:46 From Lauren Woods : a first responder theme would be great
18:23:30 From Lauren Woods : can we have an in person option for the next meeting?
18:23:52 From Charlie Conners : Replying to "can we have an in pe..."

Yes please

18:26:11 From Paul Barry : Will any trees be taken down?
18:26:12 From Elisabeth Mendrinis : Replying to "can we have an in pe..."

We pick concept A and Weather and Sky

18:26:59 From Paul Barry : Will you go over the Minot St approach again
18:29:16 From Dan Cushing : Replying to "Will you go over the..."

Yes! I'll bring us back to that slide after this comment.

18:31:19 From Jill LaMonica : I'd like us to get feedback from the teens on the concept options for the court. I can help organize that though the community center. -Jill, Dir. Leahy Holloran Community Center
18:31:35 From Lauren Woods : Reacted to "I'd like us to get..." with 👍
18:31:45 From Bob Griffin : Why does basketball court need a surrounding fence?
18:32:01 From Brenna Galvin : Replying to "I'd like us to get f..."

That would be great, Jill! I will reach out to you!

18:32:12 From Henry Doherty : Game table area #5 too close to residential area. Directly under residential window. Teens tend to be very loud for many hours. Homeless use the area as a sleeping area. Teens now attach loud speakers to their phone for hours of loud music. Maybe on the other side of the driveway? After dark the problem gets worse.
18:32:54 From Paul Barry : Will the walkway go around the whole park?
18:34:00 From Elisabeth Mendrinis : Put up a sign on Minot St entrance
18:34:12 From Lauren Woods : Reacted to "Put up a sign on M..." with 👍
18:34:28 From Patty Gaine to Dan Cushing(direct message) : Any lights going in
18:35:23 From Patrick Welch : why can't the minot st side be completely done to be welcoming from that entrance
18:35:31 From Elisabeth Mendrinis : Replying to "I'd like us to get f..."

Jill, we are interested in the concept options for the court.

18:37:24 From Paul Quinn : Id be for Plan B as giving young kids at an early age an opportunity to learn how to and get involved in working out, staying healthy and active , focused on school and feeling good physically is important. still leaves half court option for basketball too. serves 2 purposes with the space. ty.
18:38:04 From Elisabeth Mendrinis : Also, put a phone number on the signs. This is a DCR playground and not City of Boston. We need to know who to contact if there are issues
18:38:30 From craig & kara crowley : We like the plan b. Also like the idea asking some of the local kids to see what they might like to see in the new park
18:39:27 From Patrick Welch : is there any flexibility for there to be a concept c and a street hockey court that may be used more in the neighborhood
18:39:51 From Elisabeth Mendrinis : Teens play ball and younger kids play in the playground
18:39:58 From Lauren Woods : i agree i dont see many people using fitness equipment around the neighborhood. at garvey or dorchester park.
18:42:25 From Ryan Woods : Option A is great- need full court. Maybe consider adding kick boards on court so it can be multi-purpose (street hockey, kick ball etc)
18:42:40 From Lauren Woods : so just to be clear there will be a removal of fibar/woodchips and a new permeable pourous surface installed for playground?

18:42:52 From Ryan Woods : also double down on shade structures for youth softball players with the high temps
18:42:59 From Eric M : A street hockey court over a basketball court would be ideal. We have basketball courts all over the place but very few street hockey courts. The street hockey court at Garvey is in constant use and it's difficult for kids under 12 to get on the court
18:44:16 From Eric M : Eliminate the game tables. The reality is they will be used for teen drinking and homeless population
18:44:21 From craig & kara crowley : Agree with the hockey court. I know a lot of the kids who skate through toohig to go to Garvey. If they had a closer rink they would stay closer to the area
18:44:26 From Bob Griffin : If we go with option A could we put some fitness equipment behind home plate against b-ball/ street hockey court?
18:45:08 From Charlie Conners : Replying to "If we go with option..."
Good idea Bob. There is some dead space back there
18:46:11 From Elisabeth Mendrinos : the left side is very remote
18:46:36 From Nancy Buckley : Was there any thought given to a dog run as the field has been a gathering spot for dogs and owners? Dogs are mostly unleashed. A designated spot for dogs would be better for kids and families using the field and playground.
18:47:17 From Paul Barry : Can you stripe the basketball court for pickleball?
18:48:00 From Lauren Woods : Reacted to "If we go with opti..." with 👍
18:48:48 From Lauren Woods : the kids hang/hide closer to home plate /player benches at night. if you put tables back there they will have tables to play drinking games on
18:52:56 From Patty Gaine : What about a place for dogs since so many people use it for dogs daily. Try to keep them off the field for kids
18:55:34 From craig & kara crowley : I agree with something for the dogs. Almost every time we enter the area we get bombarded by dogs off leashes. I know they are just being playful mostly, but not ideal for them to be running up to us as we enter the area from minot entrance
18:56:18 From Lauren Woods : for the playground id like to see more "posts and platform" models rather than rope structures. the ropes dont always sustain constant wear and tear. also more than 2 regular swings for the 5+ area
18:58:05 From Charlie Conners : Dog owners don't use dog parks. Just look at Garvey
18:58:46 From Jill LaMonica : Replying to "I'd like us to get f..."

@Brenna Galvin - great!

18:58:59 From Jill LaMonica : Replying to "I'd like us to get f..."

@Elisabeth Mendrinos - great will stay in touch

19:03:31 From Charlie Conners : Ryan Woods ex park commish recommended kick boards on the fencing which would allow and help street hockey to be played but basketball pole would always be in the way
19:09:12 From Charlie Conners : We eliminated basketball at the tot lot and now toohig up for conversation couldn't disagree more on getting rid of the basketball court.
19:09:49 From Erin Walsh : Erin Walsh here from Rep Hunt's office. Can you put a project notification board on site for people that weren't able to make this meeting? We did leaflet neighbors with this meeting notice but know a lot of folks weren't able to make it on.
19:11:09 From Amanda, Cllr FitzGerald Office : Thanks Erin, I was just going to ask that!
19:11:11 From Ryan Woods : completely agree Sandra. The pickleball noise would be tough as it is so densely populated
19:13:10 From Damian O'Ceallaigh : Neighbor kids have made it to the NHL.....not sure anyone has made the NBA.....Hockey is the preferred sport
19:14:28 From James Walsh : My vote is for street hockey court. I like the idea of the work out equipment inside

the playground. Game tables will be used by teens for drinking.

19:15:37 From Paul Barry : Will you patch up the chain link fence behind the 3rd base side to make it more challenging for kids to pass through?

19:17:20 From Elisabeth Mendrinós : Replying to "Neighbor kids have m..."

10 kids can play a game of pickup basketball with a \$5 ball. To play hockey each kid needs to buy skates and a stick.

19:17:58 From Erin Walsh : Thank you

19:18:44 From Eric M : Replying to "Neighbor kids have m..."

you don't need skates to play street hockey. we run entire leagues on foot at Garvey

19:19:02 From Henry Doherty : The Stock Street Condominium Association mistakenly chose the strong plastic fence years ago. Every few years young men video-tape themselves kicking out the fence. It costs hundreds to reconstruct it. Could this project perhaps pay for a very strong mutual fence between Stock Street and Toohig Park?

19:21:54 From Lauren Woods : thank you for the meeting

19:22:27 From Patty Gaine : Thank you this was very nice

19:22:28 From Amanda, Cllr FitzGerald Office : Thank you!

19:23:07 From Patty Gaine : U2

19:23:08 From Elisabeth Mendrinós : Thank you!
