

Dear Sirs:

I strongly support ANY measure the Governor can devise to protect our Ocean and Nantucket Sound and other contiguous Sounds -- our common heritage -- from free private confiscation for tax-subsidized private profit.

The sight and the siting of 130 40-story buildings in tiny Nantucket Sound -- more such tall buildings than in all of metro Boston! -- would assassinate a perfect natural treasure in the shameful name of unreliable, unusable and uneconomical electricity, and unbridled corporate greed.
