Back by popular demand—for its third year—Massachusetts Attorney General Martha Coakley is hosting the 2014 National Cyber Crime Conference to be held *Monday, April 28th - Wednesday, April 30th* at the Four Points by Sheraton in Norwood. The conference will feature three tracks of instruction: a track for prosecutors, a track for investigators and a track for digital evidence forensic examiners. Each track will have multiple breakout sessions featuring instruction from nationally recognized experts in the field of cyber crime. All participants will be provided with an opportunity to receive hands-on instruction.

UPDATE—MICROSOFT

We are thrilled to announce that Microsoft Corporation, including Microsoft's Digital Crimes Unit, will once again be supporting our upcoming annual conference in April! A full schedule of Microsoft forensics sessions including Event Logging, Tracking Removable Media, Windows Attacks, and Xbox Forensics, as well as a Lab Room dedicated to hands-on lab courses with one-on-one professional lab support available, help to make this year's NCCC conference a must-attend event!

This year's NCCC 2014 forensics labs and sessions will be led by Microsoft's Global Business Support (GBS) Cybersecurity team. GBS Cybersecurity's mission is to provide proactive security education and reactive incident response to Microsoft customers in both commercial and public sector around the world. They provide a suite of offerings covering diverse topics in the areas of Security Assessment, Security Education, Security Solutions as well as the capability to deliver onsite Incident Response in under 24 hours.

In addition to the three-day schedule of investigative sessions, Microsoft Digital Crimes Unit (DCU) professionals will also be on hand to showcase the Digital Crimes Community Portal and share details about the recently launched Microsoft Cybercrime Center, a 16,800-square-foot crime-fighting headquarters that uniquely combines legal and technical expertise with cutting-edge tools and technology. The launch of the Microsoft Cybercrime Center marks a new era in effectively fighting crime on the Internet. Through cooperative efforts with customers, industry, academic, and criminal law enforcement organizations, and other industry partners, the DCU aims to utilize the Microsoft Cybercrime Center to protect consumers online and help make the Internet safer.   You can learn more about the launch of the Microsoft Cybercrime Center at http://www.microsoft.com/news/stories/cybercrime.

One of the unique aspects of the Cybercrime Center is the focus on bringing experts together to work in partnership with DCU. DCU's unique team of lawyers, investigators, business professionals, intelligence specialists, and forensic analysts deploys trailblazing techniques to fight a wide array of online criminal activity including:

- Malicious software crimes – malware and botnets
- IP crimes – counterfeit and piracy
- Technology-facilitated child-exploitation crimes – pornography, human trafficking and online sexual exploitation
