OTA Climate Change Resources for Toxics Users

Through a grant from the US Environmental Protection Agency, the Massachusetts Office of Technical Assistance (OTA) and seven Regional Planning Agencies (RPAs) are hosting trainings across the state to help businesses assess vulnerabilities and prevent severe weather-related chemical accidents by incorporating toxics use reduction into emergency preparedness plans. Come to one of these training to learn about developing tools and models to improve safety for your workers and community while reducing liability.

Protecting Your Business from Climate Change Weather-Related Industrial Accidents

OTA's free and confidential services can assist your business in incorporating toxics use reduction and decreasing the potential for climate change weather-related industrial accidents in the following ways:

Assessing Your Business' Climate Change Vulnerabilities

Providing Expertise and Training on State and Federal Environmental Regulations

Providing Expertise and Training on Toxic Chemicals

Ensuring That Your Facility is in Compliance with Regulations

Talking with Your Insurance Company about Decreased Liability

Educating Your Business on Toxics Use Reduction, Safer Chemical Storage, and Best Practices

Offering Free Trainings with Regional Planning Agencies
