Mixed C&D Waste Composition 7% gypsum average

Source C&D Debris Townsend

Cutting through the data clutter My estimate

- ▶ 1,545,304 ton mixed waste
- 7% gypsum= 108,171 ton
- ► 1% Clean = 15,453
- ▶ 3% clean = 46,359 ton
- Recycled 1,406

Types of Gypsum Drywall

Demolition concerns

- ➤ Asbestos pre-1980
- ➤ Lead paint
- ➤ Wall covering -paint

100% Recyclable

- ➤ Gypsum core
- ➤ Paper facing
- ➤ Moisture not important

- Fiberglass Faced Exterior
- Impact resistant

Specialty Board

- FiberglassFacing brightcolors
- Impact resistant Mesh
- Inhouse
 quality control
 for incidental
 to load
 quantities

Mixed C&D Processing

Drywall positive picked from tip floor

Drywall cannot be removed efficiently from sort lines

Handling with grapples, Pre-shredding and screening reduces drywall to small pieces
