

Weekly COVID-19 Public Health Report

The Weekly COVID-19 Public Health Report includes enhanced, more granular information to be updated on a weekly, or biweekly basis, including town-by-town case and testing information, cases and deaths in Long Term Care Facilities, updates on nursing facility audit results, and more.

Table of Contents

Count and Rate of Confirmed COVID-19 Cases and Tests Performed in MA by City/TownPage 3

Count and Rate of Confirmed COVID-19 Cases and Tests Performed in MA by CountyPage 23

Map of Average Daily Incidence Rate (per 100,000, PCR only) for COVID-19 in MA by City/Town Over Last Two Weeks.....Page 24

Map of Average Daily Testing Rate (per 100,000, PCR only) for COVID-19 in MA by City/Town Over Last Two WeeksPage 25

Map of Percent Positivity (PCR only) among Tests Performed for COVID-19 in MA by City/Town Over Last Two Weeks.....Page 26

Map of Rate (per 100,000) of New Confirmed COVID-19 Cases in Past 7 Days by Emergency Medical Services (EMS) Region.....Page 27

Massachusetts Residents Quarantined due to COVID-19.....Page 28

Massachusetts Residents Isolated due to COVID-19.....Page 29

MA Contact Tracing: Total Cases and Contacts and Percentage Outreach Completed.....Page 30

MA Contact Tracing: Case and Contact Outreach Outcomes.....Page 31

Cases and Case Rate by Age Group for Last Two Weeks.....Page 32

Cases and Case Rate by Sex for Last Two Weeks.....Page 33

Hospitalizations & Hospitalization Rate by Age Group for Last Two Weeks.....Page 34

Deaths and Death Rate by Age Group for Last Two Weeks.....Page 35

Deaths and Death Rate by County for Last Two Weeks.....Page 36

Daily and Cumulative COVID-19 Cases Associated with Higher Education Testing.....Page 37

Daily and Cumulative Total COVID-19 Molecular Tests Associated with Higher Education Testing.....Page 38

Percent Positive of Molecular Tests in MA Associated with Higher Education Testing and Percent of Confirmed Cases by Date

| Ashby | 18 | 0 | 0 | No Change | 826 | 119 | 1 | 0.84% | No Change |
| Ashfield | 6 | <5 | 8.3 | No Change | 464 | 97 | 2 | 2.06% | Higher |
| Ashland | 299 | 15 | 5.5 | Lower | 6688 | 1078 | 16 | 1.48% | Lower |
| Athol | 85 | <5 | 1.8 | Higher | 4390 | 533 | 5 | 0.94% | No Change |
| Attleboro | 787 | 47 | 7.3 | Higher | 13111 | 1814 | 50 | 2.76% | Higher |
| Auburn | 250 | 6 | 2.6 | Higher | 5946 | 976 | 7 | 0.72% | Higher |

Data are current as of 10am on 9/16/2020; For populations <50,000, <5 cases are reported as such or suppressed for confidentiality purposes. ¹ Gray:<5 reported cases in the last 14 days; Green: Average daily case rate over the last 14 days: <4 cases per 100,000 population; Yellow: Average daily case rate over the last 14 days: 4-8 cases per 100,000 population; Red: Average daily case rate over the last 14 days: >8 cases per 100,000 population. ²Number of new cases occurring over the current two-week period (8/30/2020 – 9/12/2020) compared to the previous two-week period (8/23/2020 – 9/5/2020). Higher=number of new cases in the current two-week period higher than the number of new cases during the last two-week period. Lower=number of new cases in the current two-week period lower than number of new cases during the last two-week period. No change=number of new cases in current two-week period is equal to the number of new cases during the last two-week period. ³Change in percent positivity compared to the previous week's (9/9/2020) report. No Change= <0.10% difference in the percent positivity. DPH calculates rates per 100,000 population using denominators estimated by the University of Massachusetts Donahue Institute using a modified Hamilton-Perry model (Strate S, et al. Small Area Population Estimates for 2011 through 2020, report, Oct 2016.) Please note: Data for these tables are based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

Average Daily Incidence Rate (per 100,000, PCR only) for COVID-19 in MA by City/Town Over Last Two Weeks

8/30/2020 - 9/12/2020

Average Daily Incidence Rate per 100,000 over last two weeks (State Daily Rate 4.60)

- Gray (<5 reported cases)
- Green (<4 cases per 100k)
- Yellow (4 - 8 cases per 100k)
- Red (>8 cases per 100k)

* Unknown Official City/Town (N = 32)
Cases are excluded when City/Town is unknown.

Bureau of Infectious Disease and Laboratory Sciences

* Data as of 16SEPT2020 and are subject to change.

Testing Rate (per 100,000, PCR only) for COVID-19 in MA by City/Town Over Last Two Weeks 8/30/2020 - 9/12/2020

Two Week Testing Rate (State = 8787.12)

- No Reported Persons Tested
- 682.78 - 3,686.71
- 3,686.72 - 4,450.29
- 4,450.30 - 5,132.42
- 5,132.43 - 5,887.16
- 5,887.17 - 7,210.82
- 7,210.83 - 77,584.44

* Unknown Official City/Town (N = 9,680)
Cases are excluded when City/Town is unknown.

Bureau of Infectious Disease and Laboratory Sciences

* Data as of 16SEPT2020
and are subject to change.

Percent Positivity (PCR only) among Tests Performed for COVID-19 in MA by City/Town Over Last Two Weeks 8/30/2020 - 9/12/2020

Two Week Percent Positivity (State = .90%)

- No Confirmed Cases Reported
- 0.05% - 0.31%
- 0.32% - 0.52%
- 0.53% - 0.78%
- 0.79% - 1.12%
- 1.13% - 1.88%
- 1.88% - 42.86%

1 inch = 20 miles

Bureau of Infectious Disease and Laboratory Sciences

* Unknown Official City/Town (N = 9,680)
Cases are excluded when City/Town is unknown.

* Data as of 16SEPT2020
and are subject to change.

Rate (per 100,000) of New Confirmed COVID-19 Cases in Past 7 Days by Emergency Medical Services (EMS) Region

7 Day Total of New Cases Through September 8, 2020

| EMS Region | New Cases Per 100,000 |
|------------|-----------------------|
| 1 | 15 |
| 2 | 21 |
| 3 | 41 |
| 4 | 31 |
| 5 | 23 |

Notes

- (1) Massachusetts is divided into five geographical EMS regions. For more information, please see <https://www.mass.gov/service-details/ems-regions-in-massachusetts>.
- (2) Cases per 100,000 for each EMS region are calculated as the number of new cases within a region divided by that region's population multiplied by 100,000.
- (3) Data source: MAVEN and Umass Donahue Institute Population Estimates.
- (4) Congregate care testing surveillance guidance requires facilities to take different action if their regional transmission is above or below 40 new cases per 100,000 residents.

Massachusetts Residents Quarantined due to COVID-19

Data are accurate as of 9/15/2020 at 5p.m.

| Massachusetts Residents Subject to COVID-19 Quarantine by Current Status as of September 16, 2020 | Number of Residents ▼ |
|---|-----------------------|
| Total of Individuals who have Completed Monitoring (no longer in Quarantine) | 82,683 |
| Total of Individuals Currently Undergoing Monitoring/Under Quarantine | 1,917 |
| Total of Individuals Subject to Quarantine | 84,600 |

Learn more about [quarantine or self monitoring](#).

Massachusetts Residents Isolated due to COVID-19

Status of all Confirmed COVID-19 Cases as of September 16, 2020

NOTE: Individuals who had a confirmed case of COVID-19 and are no longer in isolation are considered for purposes of this report to be recovered. As part of this definition, DPH is counting people as released from isolation after 21 days of illness or 21 days past the date of their test in all settings including nursing homes and state facilities.

MA Contact Tracing: Total Cases and Contacts and Percentage Outreach Completed

| | |

Average age of Total COVID-19 Cases for Last Two Weeks

36

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences, Population Estimates 2011-2018: Small Area Population Estimates 2011-2020, version 2018; Tables and Figures created by the Office of Population Health. Note: all data are current as of 8:00am on the date at the top of the page. Includes both probable and confirmed cases.

Cases and Case Rate by Sex for Last Two Weeks

This data covers 8/30/2020 to 9/12/2020

Total COVID-19 Cases by Sex for Last Two Weeks

Rate (per 100,000) of Total COVID-19 Cases by Sex for Last Two Weeks

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences, Population Estimates 2011-2018: Small Area Population Estimates 2011-2020, version 2018; Tables and Figures created by the Office of Population Health. Note: all data are current as of 8:00am on the date at the top of the page. Includes both probable and confirmed cases.

Hospitalizations & Hospitalization Rate by Age Group

for Last Two Weeks

This data covers 8/30/2020 to 9/12/2020

Total COVID-19 Cases Occurring in the Last Two Weeks who were Reported as Hospitalized* by Age Group

Rate (per 100,000) of Total COVID-19 Cases Occurring in the Last Two Weeks who were Reported as Hospitalized* by Age Group

Average Age of Total Cases Occurring in the Last Two Weeks Reported as Hospitalized*

60

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Population Estimates 2011-2018: Small Area Population Estimates 2011-2020, version 2018; Tables and Figures created by the Office of Population Health. Notes: all data are current as of 8:00am on the date at the top of the page; *Hospitalization refers to status at any point in time, not necessarily the current status of the patient, demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital surveys. Includes both probable and confirmed cases.

Deaths and Death Rate by Age Group for Last Two Weeks

This data covers 8/30/2020 to 9/12/2020

Deaths by Age Group in Total COVID-19 for Last Two Weeks

Rate (per 100,000) of Total COVID-19 Deaths by Age Group for Last Two Weeks

Average Age of Deaths in Total COVID-19 Cases for Last Two Weeks

79

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Population Estimates 2011-2018: Small Area Population Estimates 2011-2020, version 2018; Tables and Figures created by the Office of Population Health. Note: all data are current as of 8:00am on the date at the top of the page. Includes both probable and confirmed cases.

Deaths and Death Rate by County for Last Two Weeks

This data covers 8/30/2020 to 9/12/2020

Count of Deaths in Total COVID-19 Cases by County

Rate (per 100,000) of Total COVID-19 Deaths by County

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; County Population Estimates 2011-2018: Small Area Population Estimates 2011-2020, version 2018, Massachusetts Department of Public Health, Bureau of Environmental Health; Tables and Figures created by the Office of Population Health. Note: all data are current as of 8:00am on the date at the top of the page. Includes both probable and confirmed cases.

Massachusetts Department of Public Health COVID-19 Dashboard -Wednesday, September 16, 2020

Daily and Cumulative COVID-19 Cases Associated with Higher Education Testing (8/15/2020 to 9/15/2020)

New Confirmed COVID-19 Cases Associated with Higher Education Testing Since Last Week

168

Total Confirmed COVID-19 Cases Associated with Higher Education Testing

499

Confirmed COVID-19 Cases Associated with Higher Education Testing by Date Individual Tested

● New Higher Education Confirmed Cases ● Cumulative Higher Education Confirmed Cases

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health. Note: all data are current as of 8:00am on the date at the top of the page. **DPH is now providing this additional data on testing volumes, cases, percent positive and percent of new cases identified through testing by MA higher education institutions. These data will be compiled and included here weekly. Other colleges and universities may also be coordinating or conducting laboratory testing for their students, faculty and staff but not identifying that in the laboratory reports they send to DPH.**

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. ***Facility is closed. Data will continue to be included for completeness but will not change except for the result of data cleaning. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy.

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. ***Facility is closed. Data will continue to be included for completeness but will not change except for the result of data cleaning. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy.

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. ***Facility is closed. Data will continue to be included for completeness but will not change except for the result of data cleaning. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy.

Sources: MAVEN for confirmed cases; Individual facilities reported resident deaths to DPH Bureau of Health Care Safety and Quality's Health Care Facility Reporting System.

Long-Term Care Staff Surveillance Testing

- On June 30, the Commonwealth issued an evidence-based surveillance testing policy for long-term care facilities to further support the safe care of vulnerable residents in these settings
- **Nursing facilities and rest homes are required to comply with the surveillance testing regimen, and may be subject to financial sanctions for non-compliance**
- To determine the cadence of surveillance testing, nursing facilities and rest homes were required to perform baseline testing of at least 90% of staff by July 19
- Facilities are required to adhere to a surveillance testing regimen based on the results of the baseline testing and adapt such regimen based on the presence of new cases and regional transmission rates; specifically:
 - **If there are new COVID+ cases, the facility must test all staff weekly until there are no new cases for two weeks**
 - **If there are no new COVID+ cases, the facility must either test all staff, or 30% of staff, bi-weekly, depending on the transmission rates in the facility’s EMS region (included in this report)**
- This report includes information on what staff surveillance testing regimen each facility is required to adhere to, and the percentage of staff tested during the latest complete testing period

| | | |
|---|---|------------|
| | Total facilities required to submit testing data | 427 |
| Testing Results (Through 9/10) | In Compliance <i>(Total facilities attesting to achieving testing threshold)</i> | 82 |
| | Not in Compliance <i>(Total facilities not achieving testing threshold)</i> | 8 |
| | Not in Compliance Incomplete Reporting <i>(Total facilities that did not submit complete testing data)</i> | 3 |
| | In progress <i>(Total facilities that are currently in week 1 of a biweekly testing period)</i> | 334 |

Note: The figures presented in this publication were self-reported by nursing facilities and rest homes. Facilities were also required to submit a signed attestation form certifying compliance with [MassHealth Nursing Facility Bulletin 148](#) or [DPH Guidance for Rest Home Surveillance Testing](#). See these documents for more information on the period over which testing occurred and how staff counts were reported.

(*) Facility is closed. Data will continue to be included for completeness but will not change except for the result of data cleaning.

Infection Control Surveys

DPH serves as the State Survey Agency (SA) that submits COVID-19 nursing home data on behalf of Massachusetts to the Centers for Medicare & Medicaid Services (CMS). As outlined in the [June 1st CMS memorandum](#) CMS updated its COVID-19 reporting requirements to ensure 100% of Medicare- and Medicaid-certified nursing homes receive on-site review to mitigate the spread of COVID-19. Reporting requirements apply *only* to Medicare- and Medicaid-certified nursing homes, not *all* facilities in the state.

Multiple Surveys Explained: CMS requires states perform COVID-19 survey activities in addition to completing the required Focused Infection Control surveys of 100% of Medicare- and Medicaid-certified nursing homes by July 31, 2020. In addition, CMS requires states perform on-site infection control surveys within three-to-five days of identification of any nursing home with three or more new COVID-19 suspected and confirmed cases since their last National Healthcare Safety Network (NHSN) COVID-19 report or any nursing home in which one confirmed resident case is present in a facility that was previously COVID-free.

Deficiencies Explained:

- The **severity** level reflects the impact of the deficiency and is categorized by four levels of harm.
- The **scope** level of a deficiency reflects how many residents were affected by the deficiency.
- For each deficiency, the DPH survey team determines the level of harm (**severity**) to the resident or resident(s) involved and then determines the **scope** of the problem within the nursing home.
- The team assigns an alphabetical Severity and Scope value to the deficiency. In the report below, the alphabetical values are A through L. Values closer to A signify lower scope and severity. Values closer to L (i.e. G or higher) signify higher scope and severity.
- The key at the bottom of each page indicates the level of deficiencies reported, which corresponds to dots of different colors: **Green** = Deficiency-free survey; **Yellow** = D-level deficiency; **Pink** = E/F-level deficiency; **Red** = G or higher

372 facilities received a combined total of 767 Infection Control Surveys between June 1 and August 28.

Between August 24-28, 2020, 73 new surveys were mailed to facilities. Of those 73 new surveys:

| | |
|--|----------------------|
| New Surveys With 2 Deficiencies | 2 Facilities |
| New Surveys With 1 Deficiencies | 32 Facilities |
| New Surveys With 0 Deficiencies | 39 Facilities |

CMS Infection Control Surveys Conducted at Nursing Homes

The Centers for Medicare and Medicaid Services (CMS) requires infection control surveys to be conducted at all Medicare- and Medicaid-certified nursing homes as defined in the following link:
<https://www.cms.gov/files/document/qso-20-31-all.pdf>. DPH conducts these surveys on behalf of CMS.

Some facilities that meet certain CMS requirements have been surveyed more than once. Follow-up infection control surveys must be conducted within three-to-five days when: (1) one confirmed COVID-19 case is reported in a nursing home that previously did not have any COVID-19 cases, and (2) three or more new suspected and confirmed cases are reported in nursing homes in one week that had previously reported a case.

| Reflects surveys processed between June 1, 2020 and August 28, 2020 | | KEY: Green = Deficiency-free survey; Yellow = D-level deficiency; Pink = E/F-level deficiency; Red = G or higher | | | | |

Data Source: Self-Reported Data from ALRs to Office of Elder Affairs; * Includes staff and residents; Note: This list includes all Assisted Living Residences and their reported COVID-19 cases to date (staff and residents). The number of cases for a facility relies on the amount of testing conducted; facilities not included on this may have COVID-19 cases that have not yet been identified. Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence

Data Source: Self-Reported Data from ALRs to Office of Elder Affairs; * Includes staff and residents; Note: This list includes all Assisted Living Residences and their reported COVID-19 cases to date (staff and residents). The number of cases for a facility relies on the amount of testing conducted; facilities not included on this may have COVID-19 cases that have not yet been identified. Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence

Massachusetts Department of Public Health COVID-19 Dashboard - Wednesday, September 16, 2020

COVID Cases in Assisted Living Residences (5/5)

Cumulative data collected as of 9/16/2020 8:00am

| Facility | County | Maximum Capacity | Number of Confirmed Cases* |
|--|-------------------|------------------|----------------------------|
| Village at Willow Crossings | Bristol County | 118 | > 30 |
| Visiting Nurse Assisted Living | Middlesex County | 97 | 0 |
| Waltham Crossings | Middlesex County | 112 | > 30 |
| Waterstone at Wellesley | Norfolk County | 52 | 1-10 |
