ACCESS SERVICES

SECTION 4 – SWITCHED ACCESS RATES, (CONT'D.)

4.2 Rate Categories

4.2.1 There are several rate categories which apply to Switched Access Service

- * Switched Transport
- * Switching (Local End Office Switching or Tandem Switching)
- * 800 Data Base Access Service

Switched Transport

The Switched Transport cost category establishes the charges related to the transmission and tandem switching facilities between the Customer designated premises and the end office switch(es) where the Customer's traffic is switched to originate or terminate the Customer's communications. The Switched Transport includes Tandem Switched Transport-Facility and Termination.

The terminating Switched Transport rate schedules are bifurcated into "Affiliated Price Cap LEC End Office" and "All Other End Offices" rates which include 3rd party traffic. The Company bills the Affiliated Price Cap LEC End Office or the All Other End Office terminating Switched Transport rate schedule based on the rates the competing Price Cap LEC would charge for switched transport traffic delivered to the same terminating End Office. In other words, the Company mirrors the Switched Transport rates the Price Cap LEC would charge if it were the terminating Switched Transport provider rather than the Company.

(N)Switching - (Local End Office, Tandem or both)

The Switching cost category establishes the charges related to the use of office switching equipment the terminations in the office of lines, the terminations of calls at Company Intercept Operators or recordings, the Signaling Transfer Point (STP) costs, and the SS7 signaling function between the end switching office and the STP.
