

THE COMMONWEALTH OF MASSACHUSETTS

RETURN

OF THE

CITY OF WESTFIELD GAS AND ELECTRIC

TO THE

DEPARTMENT OF PUBLIC UTILITIES

OF MASSACHUSETTS

For the Year Ended December 31,

2024

Name of Officer to whom correspondence should
be addressed regarding this report :

Jamie Naughton

Official Title:

Director of Finance

Office Address:

**100 Elm Street
Westfield, MA 01085**

Westfield Gas & Electric

TABLE OF CONTENTS

	<u>Page</u>
General Information	3
Schedule of Estimates	4
Customers in each City or Town	4
Appropriations Since Beginning of Year	5
Changes in the Property	5
Bonds	6
Town Notes	7
Cost of Plant	8-9A
Comparative Balance Sheet	10-11
Income Statement	12-13
Earned Surplus	12A
Cash Balances	14
Materials and Supplies	14
Depreciation Fund Account	14
Utility Plant - Electric	15-17
Production Fuel and Oil Stocks	18
Miscellaneous Nonoperating Income	21
Other Income Deductions	21
Miscellaneous Credits to Surplus	21
Miscellaneous Debits to Surplus	21
Appropriations of Surplus	21
Municipal Revenues	22
Purchased Power	22
Sales for Resale	22
Electric Operating Revenues	37
Sales of Electricity to Ultimate consumers	38
Electric Operation and Maintenance Expenses	39-42
Taxes Charged During Year	49
Other Utility Operating Income	50
Income from Merchandising, Jobbing and Contract Work	51
Sales for Resale	52-53
Purchased Power (except Interchange)	54-55
Interchange Power	56
Electric Energy Account	57
Monthly Peaks and Output	57
Generating Station Statistics	58-59
Steam Generating Stations	60-61
Hydroelectric Generating Stations	62-63
Combustion Engine and Other Generating Stations	64-65
Generating Statistics (Small Stations)	66
Transmission Line Statistics	67
Substations	68
Overhead Distribution Lines Operated	69
Electric Distribution Services, Meters and Line Transformers	69
Conduit, Underground Cable and Submarine Cable	70
Street Lamps	71
Rate Schedule Information	79
Signature Page	81

FOR GAS PLANTS ONLY:

	<u>Page</u>		<u>Page</u>
Utility Plant - Gas	19-20	Gas Generating Plant.....	74
Gas Operating Revenues	43	Boilers.....	75
Sales of Gas to Ultimate Consumers	44	Scrubbers, Condsr, Exhaust.....	75
Gas Operating & Maint. Expense	45-47	Purifiers.....	76
Sales for Resale	48	Holders.....	76
Sales of Residuals	48	Trans. and Dist. Mains.....	77
Purchased Gas	48	Gas Distribution Services,	
Record of Sendout for the Year in MCF.....	72-73	House Governors and Meters	78

PAGES INTENTIONALLY OMITTED: 23 to 36 and 80

Annual Report of:

For the year ended December 31, 2024

Westfield Gas & Electric**GENERAL INFORMATION**

1. Name of town (or city) making this report.
Westfield, Massachusetts

2. * If the town (or city) has acquired a plant,
Kind of plant, whether gas or electric: Gas and Electric
 * Owner from whom purchased, if so acquired: Westfield Gas & Electric
 * Date of votes to acquire a plant in accordance with the provisions of Chapter 164 of the General Laws:
 * Record of votes: First vote: Yes, 1466
 * Record of votes: First vote: No, 219
 * Record of votes: Second vote: Yes, 1306
 * Record of votes: Second vote: No, 445
 * Date when town (or city) began to sell gas and electricity June 1, 1899

3. Name and address of manager of municipal lighting:

 Thomas Flaherty
 79 Wildflower Circle
 Westfield, MA 01085

4. Name and address of mayor or selectmen:

 Mayor Michael A. McCabe
 8 Hawthorne Avenue
 Westfield, Ma 01085

5. Name and address of town (or city) treasurer:

 Matthew Barnes - 12 Eastview Dr - Westfield, Ma 01085

6. Name and address of town (or city) clerk:

 Kaitlyn Bruce - 188 Reservoir Ave - Westfield, Ma 01085

7. Names and addresses of members of municipal light board:

 Robert Goyette - 25 Tiffany Circle - Westfield, MA 01085
 Kevin Kelleher - 270 Prospect St Ext - Westfield, Ma 01085
 Bill Parks - 78 Granville Rd - Westfield, Ma 01085
 Dawn Renaudette - 106 Ridgeway Street - Westfield, Ma 01085
 Ramon Rivera - 16 Mechanic St - Westfield, Ma 01085
 Edward Roman - 419 Southwick Rd Q69 - Westfield, Ma 01085
 Robert Sacco - 65 Devon Terrace - Westfield, Ma 01085

8. Total valuation of estates in town (or city) according to last State valuation: \$4,729,795,432

9. Tax rate for all purposes during the year: Fiscal 2024
 Residential \$15.97
 Commercial \$31.39

10. Amount of manager's salary: \$320,000

11. Amount of manager's bond: \$5,000

12. Amount of salary paid to members of municipal light board annually: \$7,500

Annual Report of:

For the year ended December 31, 2024

Westfield Gas & Electric

SCHEDULE OF ESTIMATE

INCOME FROM PRIVATE CONSUMERS:

From sales of gas
From sales of electricity

Amount
24,782,296
57,202,014
TOTAL:
81,984,310

EXPENSES:

For operation, maintenance and repairs
For interest on bonds, notes or scrip
For depreciation fund (3.0 percent on \$ as per page 8 & 9)
For sinking fund requirements
For note payments
For bond payments

78,591,483
558,274
7,250,452
TOTAL:
86,400,209

For loss in preceding year

COST:

Of gas to be used for municipal buildings
Of gas to be used for street lights
Of electricity to be used for municipal bldgs..
Of electricity to be used for street lights ...
Total of the above items to be included in the
tax levy
New construction to be included in the tax levy

1,085,727
2,659,694
168,764
TOTAL:
3,914,185

Total amounts to be included in the tax levy ..

CUSTOMERS

GAS:

City or Town

Number of Customers
Meters, Dec. 31

Westfield

TOTAL: 10,926

ELECTRICITY:

City or Town

Number of Customers
Meters, Dec. 31

Westfield

TOTAL: 18,401

Westfield Gas & Electric**APPROPRIATIONS SINCE BEGINNING OF YEAR**

(Include also all items charged direct to tax
levy, even where no appropriation is made or required.)

FOR CONSTRUCTION OR PURCHASE OF PLANT:

*At meeting 19 , to be paid from
*At meeting 19 , to be paid from

TOTAL: \$0

**FOR THE ESTIMATED COST OF THE GAS OR ELECTRICITY
TO BE USED BY THE CITY OR TOWN FOR:**

1. Street lights	\$168,764
2. Municipal buildings	\$3,745,421

TOTAL: \$3,914,185

CHANGES IN THE PROPERTY

1. Describe briefly all the important physical
changes in the property during the last fiscal
period including additions, alterations or
improvements to the works or physical property
retired.

In electric property:

None

In gas property:

None

ELECTRIC OPERATING REVENUES (ACCOUNT 400)

1. Report below the amount of operating revenue for the year for each prescribed account and the amount of increase or decrease over the preceding year.
2. If increases and decreases are not derived from previously reported figures explain any inconsistencies.
3. Number of customers should be reported on the basis of number of meters, plus number of flat rate accounts, except that where separate meter readings are

added for billing purposes, one customer shall be counted for each group of meters so added. The average number of customers means the average of the 12 figures at the close of each month. If the customer count in the residential service classification includes customers counted more than once because of special services, such as water heating, etc., indicate in a footnote the number of such duplicate customers included in the classification.

4. Unmetered sales should be included below. the details of such sales should be given in a footnote.
5. Classification of Commercial and Industrial Sales Account 442, according to Small (or Commercial) and Large, (or Industrial) may be according to the basis of classification regularly used by the respondent if such basis of classification is not greater than 1000 Kw of demand. See Account 442 of the Uniform System of Accounts. Explain basis of classification.

19				
20	Total Electric Operation and Maintenance Expenses	\$51,259,824	\$5,075,396	\$56,335,220
21				

Ratio of Operating expenses to operating revenues (carry out decimal two places, e.g.: (0.00%). Compute by dividing Revenues (Acct.400) into the sum of Operation and Maintenance Expenses (Page 42, Line 20(d), Depreciation (Acct.403) and Amortization (Acct.407)

106.78%

Total Salaries and Wages of electric department for year, including amounts Charged to operating expenses, construction and other accounts

\$ 11,035,499

Total number of employees of electric department at end of year including administrative, operating, maintenance, construction and other employees (including part time employees)

90

Westfield Gas & Electric

SALES OF GAS TO ULTIMATE CONSUMERS

Report by account the M.C.F. sold, the amount derived and the number of customers under each filed schedule or contract. Municipal sales, contract sales and unbilled sales may be reported separately in total.

Line No.	Account No.	Schedule (a)	M.C.F. (1000 BTU) (b)	Revenue (c)	Average Revenue Per M.C.F. \$0.0000 (d)	Number of Customers (Per Bills Rendered)

1. This schedule is intended to give the account distribution of total taxes charged to operations and other final accounts during the year.
2. Do not include gasoline and other sales taxes which have been charged to accounts to which the material on which the tax was levied was charged. If the actual or estimated amounts of such taxes are known, they should be shown as a footnote and designated whether estimated or actual amounts.

3. The aggregate of each kind of tax should be listed under the appropriate heading of "Federal," "State," and "Local" in such manner that the total tax for each State and for all subdivisions can readily be ascertained.
4. The accounts to which the taxes charged were distributed should be shown in columns (c) to (h). Show both the utility department and number of account charged. For taxes charged to utility plant show the number of appropriate balance sheet plant account or subaccount.

5. For any tax which it was necessary to apportion to more than one utility department or account, state in a footnote the basis or apportioning such tax.

6. Do not include in this schedule entries with respect to deferred income taxes, or taxes collected through payroll deductions or otherwise pending transmittal of such taxes to the taxing authority.

4. If receipt of power is at a substation indicate ownership in column (e), thus: respondent owned or leased, RS; seller owned or leased, SS.

5. If a fixed number of kilowatts of maximum demand is specified in the power contract as a basis of billing, this number should be shown in column (f). The number of kilowatts of maximum demand to be shown in columns (g) and (h) should be actual based on monthly readings and

should be furnished whether or not used in the determination of demand charges. Show in column (i) type of demand reading (instantaneous, 15, 30, or 60 minutes integrated).

6. The number of kilowatt hours purchased should be the quantities shown by the power bills.

7. Explain any amount entered in column (n) such as fuel or other adjustments.

INTERCHANGE POWER (Included in Account 555)

1. Report below the kilowatt-hours received and delivered during the year and the net charge or credit under interchange power agreements.

2. Provide subheadings and classify interchanges as to (1) Associated Utilities, (2) Nonassociated Utilities, (3) Associated Nonutilities, (4) Other Nonutilities, (5) Municipalities, (6) R.E.A. Cooperatives, and (7) Other Public Authorities. For each interchange across a state line place an "x" in column (b).

3. Particulars of settlements for interchange power

shall be furnished in Part B, Details of Settlement for Interchange Power. If settlement for any transaction also includes credit or debit amounts other than for increment generation expenses, show such other component amounts separately, in addition to debit or credit for increment generation expenses, and give a brief explanation of the factors and principles under which such other component amounts were determined. If such settlement represents the net of debits and credits under an interconnection, power pooling,

coordination, or other such arrangement, submit a copy of the annual summary of transactions and billings among the parties to the agreement. If the amount of settlement reported in this schedule for any transaction does not represent all of the charges and credits covered by the agreement, furnish in a footnote a description of the other debits and credits and state the amounts and accounts in which such other amounts are included for the year.

MONTHLY PEAKS AND OUTPUT

1. Report hereunder the information called for pertaining to simultaneous peaks established monthly (in kilowatts) and monthly output (in kilowatt hours) for the combined sources of electric energy of respondent.

2. Monthly peak col. (b) should be respondent's maximum kw load as measured by the sum of its coincidental net generation and purchases plus or minus net interchange, minus temporary deliveries (not interchange) of emergency power to another system. Monthly peak including such emergency deliveries should be shown in a footnote with a brief explanation as to the nature of the emergency.

3. State type of monthly peak reading (instantaneous 15, 30, or 60 minutes integrated).

4. Monthly output should be the sum of respondent's net generation and purchases plus or minus net interchange and plus or minus net transmission or wheeling. Total for the year should agree with line 15 above.

5. If the respondent has two or more power systems not physically connected, the information called for below should be furnished for each system.

	Month (a)	Monthly Peak					Monthly Output (kwh) (see instr. 4) (g)
		Kilowatts (b)	Day of wk (c)	Day of Month (d)	Hour (e)	Type of Reading (f)

	TOTAL:						365,053,169

Annual Report of:

For Year Ended December 31, 2024

Westfield Gas & Electric**GENERATING STATION STATISTICS (Large Stations)**
(Except Nuclear, See Instruction 10)

1. Large stations for the purpose of this schedule are steam and hydro stations of 2,500 Hw* or more of installed capacity and other stations of 500 Kw* or more of installed capacity (name plate ratings). (*10,000 Kw and 2,500 Kw, respectively, if annual electric operating revenues of respondent are \$25,000,000 or more.)

2. If any plant is leased, operated under a license from the Federal Power Commission, or operated as a joint facility, indicate such facts by the use of asterisks and footnotes.

3. Specify if total plant capacity is reported in kva instead of kilowatts as called for on line 5.

4. If peak demand for 60 minutes is not available, give that which is available, specifying period.

5. If a group of employees attends more than one generating station, report on line 11 the approximate average number of employees assignable to each station.

6. If gas is used and purchased on a therm basis, the B.t.u. content of the gas should be given and the quantity of fuel consumed converted to M cu. ft.

7. Quantities of fuel consumed and the average cost per unit of fuel consumed should be consistent with charges to expense 501 and

Westfield Gas & Electric

GENERATING STATION STATISTICS (Large Stations) -- Continued
(Except Nuclear, See Instruction 10)

547 as shown on Line 24

8. The items under cost of plant and production expenses represents accounts or combinations of accounts prescribed by the Uniform System of Accounts. Production expenses, however, do not include Purchased Power, System Control and Load Dispatching, and Other Expenses classified as "Other Power Supply Expenses."

9. If any plant is equipped with combinations of steam, hydro, internal combustion engine or gas turbine equipment, each should be reported as a separate plant. However, if a gas turbine unit functions in a combined

operations with a conventional steam unit, the gas turbine should be included with the steam station.

10. If the respondent operates a nuclear power generating station submit: (a) a brief explanatory statement concerning accounting for the cost of power generated including any attribution of excess costs to research and development expenses; (b) a brief explanation of the fuel accounting specifying the accounting methods and types of cost units used with respect to the various components of the fuel cost, and (c) such additional information as may be informative concerning the type of plant, kind of fuel used, and other physical and operating characteristics of the plant.

COMBUSTION ENGINE AND OTHER GENERATING STATIONS -- Continued

(except nuclear stations)

ship by respondent, name of co-owner, basis of sharing output, expenses, or revenues, and how expenses and/or revenues are accounted for and accounts affected. Specify if lessor, co-owner, or other party is an associated company.

4. Designate any generating station or portion thereof leased to another company and give name of lessee, date and term of lease and annual rent and how determined.

Specify whether lessee is an associated company.

5. Designate any plant or equipment owned, not operated and not leased to another company. If such plant or equipment was not operated within the past year explain whether it has been retired in the books of account or what disposition of the plant or equipment and its book cost are contemplated.

SUBSTATIONS

1. Report below the information called for concerning substations of the respondent as of the end of the year.

2. Substations which serve but one industrial or street railway customer should not be listed hereunder.

3. Substations with capacities of less than 5000 Kva, except those serving customers with energy for resale, may be grouped according to functional character, but the number of such substations must be shown.

4. Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended.

5. Show in columns (i), (j), and (k) special equipment such as rotary converters, reflectors, condensers, etc. and auxiliary equipment for increasing capacity.

6. Designate substations or major items of equipment leased from others, jointly owned with others, or operated otherwise than by

reason of sole ownership by the respondent. For any substation or equipment operated under lease, give name of lessor, date and period of lease and annual rent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of sharing expenses of other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.

1. General

The following Rules and Regulations are applicable to and made a part of all rate schedules. Any such Terms and Conditions as are inconsistent with any specific provisions of any rate schedule shall not apply thereto.

2. Territory to which Rules and Regulations Apply

The Rules and Regulations are applicable to all customers, or potential customers, requiring natural gas service within the franchise area of the Westfield Gas & Electric Light Department, hereinafter referred to as the "Department".

3. Characteristics of Service

- 3.1. The supply of gas service is contingent upon the Department's ability to secure and retain the necessary locations for its distribution pipes and other apparatus. The Department will review existing and new proposed customer loads as provided by the customer to determine service size and delivery pressure. The typical delivery pressure shall be 7-8 in. w.c. It is the responsibility of the customer to obtain approval from the Department prior to any change in character of service or load requirements.
- 3.2. Such piping equipment and apparatus as may be necessary to utilize the service shall be provided, installed, maintained and used by the Customer in accordance with the requirements of the 248 CMR 4.0-Massachusetts Fuel Gas Code, and all the public authorities having jurisdiction of the same, and the requirements of the Department. The Department's requirements will be furnished during application and upon request.

4. Obtaining Service

- 4.1. Applications for gas service within the territory served by the Department will be received at the Customer Service office located at 100 Elm Street, first floor, through any duly authorized representative of the Department or through our on-line authorized application process. Prospective non-residential customers must make a written application through our written application or our on-line forms for service. Both residential and non-residential applications are available on-line, and customers can complete the electronic applications using the authorized forms located on the company website. In addition, customers may contact an authorized representative to process their application. New residential service is required to pay an electric meter deposit of \$125 for electric and \$300 for a combined gas & electric service. Residential meter deposits may be waived at the Department's discretion if the customer provides the property deed with the new service application to match the new account name. Nonresidential customers are required to pay the greater of \$500 for service or the equivalent of three months anticipated revenue. Nonresidential deposit requirements will be established based on consumption history for the service location. The Department may review the deposit on file at any future date based on actual load. The customer will then be required to meet the new deposit value. Service shall not commence

until the Department has received said application except that for an interim period pending the receipt of a duly executed application, the Department may accept an oral application for rate service from customers taking service under residential rate schedules. If an oral application is received by the Department from a person not currently a customer of record of the Department for service at a location where service is disconnected for non-payment, the Department may request an application be made in writing at the office of the Department as a precondition for service, unless otherwise ordered by the DPU. The Department reserves the right to refuse service, at any location, to an applicant who is indebted to the Department for any service previously furnished to such applicant.

- 4.2. The Department reserves the right to reject any application for service if the amount or nature of the service applied for, or the distance of the premises to be served from existing, suitable gas distribution facilities, or the difficulty of access thereto is such that the estimated income from the service applied for is insufficient to yield a reasonable return to the Department, unless such application is accompanied by a cash payment or an undertaking satisfactory to the Department guaranteeing a stipulated revenue for a definite period of time, or both.
- 4.3. The Department may refuse gas service to any customer when the building piping does not meet the minimum standards prescribed by the "Massachusetts Fuel Gas Code." This regulation shall apply to any customer regardless of whether said customer is the owner of the building or occupies it as a tenant. The department may also discontinue gas service at any premises if the owner of said premises allows the internal piping and/or the appliances served to fall into a state of disrepair so that the continuance of gas service is no longer considered by the Gas Inspector or Department to be advisable. Approval will be needed by the Gas Inspector prior to allowing reconnection of gas service. Lastly, the Department may also discontinue gas service if access is not made available as noted in item 5.1 below.
- 4.4. Whenever the estimated expenditures necessary to supply Gas to a Customer or to resume service to a Customer after a discontinuance of service for over twelve (12) months, for reasons other than the needs of the Department, shall be of such an amount that the income to be derived from gas service at the applicable rates will, in the opinion of the Department, be insufficient to warrant such expenditures, the Department may, in addition to the payments for Gas under the applicable rates, require the Customer to pay the whole or a part of such expenditures, or make such other reasonable payments as the Department may deem necessary.
- 4.5. Any gas main expansion, system upgrades, or site work required to serve a new customer or an existing customer's increased gas supply needs will be fully funded at the Customer's expense.

5. Equipment on the Customer's Premises

- 5.1. The Customer shall furnish, without charge, suitable locations and enclosures upon his premises for such pipelines, meters and other apparatus and equipment

as the Department may install for the purpose of supplying service. All residential dwellings shall be serviced by a single service line. The Department shall have the right of access, at all reasonable times, to the premises of the Customer for the purpose of installing, reading, inspecting, testing and keeping in repair the apparatus and equipment of the Department or for discontinuing service, or for removing any or all of its apparatus and equipment, or for the purpose of obtaining the necessary information for the proper application of the rate or rates under which service supplied.

- 5.2. For the purpose of determining the amount of gas delivered, meters shall be installed by the Department at locations to be designated by the Department. The Department may at any time and for any reason change any of its meters, including but not limited to Massachusetts Department of Public Utilities mandates. This requirement is necessary regardless of infrastructure allowing for automated meter reading capabilities.
- 5.3. The Customer shall not injure, interfere, destroy, or tamper with the meter or other property of the Department, nor suffer or permit any person so to do. The Customer shall use all reasonable precautions to protect the property of the Department located on the premises of the Customer from damage and interference and shall be responsible for all damages to, or loss of, such property of the Department unless caused by circumstances beyond the Customer's control. The Customer shall so maintain and operate its gas equipment and apparatus as not to endanger or interfere with the service of the Department.
- 5.4. The Department shall not be liable for damage to the person or property of the Customer or any other person resulting from the use of gas or the presence of the Department's apparatus and equipment on the Customer's premises.

6. Meter Reading and Billing

- 6.1. All bills shall be due and payable upon presentation and shall be rendered monthly; however, the Department reserves the right to read meters and render bills on a bi-monthly basis. All bills of Commercial and Industrial accounts not paid within 28 days from the date of meter reading shall bear interest at 1.5% per month on the unpaid balance from the date thereof until the date of payment.
- 6.2. The Customer shall be responsible for payment for all gas consumed. When the Department becomes aware of an error as a result of: (1) a faulty meter (2) meter reading error (3) billing error, the Department shall notify the Customer immediately of the problem. Every effort will then be made on the part of the Department to rectify the problem. If the correct billing information is available, the customer will be invoiced accordingly, or the customer's usage will be estimated by the Department based on available data and the customer billed accordingly. Every attempt will be made to collect a monthly physical or remote read for billing. The Department shall have the right to collect for any underbilled amounts, unless due to the fault or negligence of the Department, pursuant to Massachusetts Department of Public Utilities regulations 220 C.M.R. § 25.00 et seq. Estimated usage due to a customer refusing to grant Department-

required access to the meter for more than three months shall also include a monthly fee of \$25 until access to the meter is granted.

- 6.3. Pursuant to the Massachusetts Department of Public Utilities regulations, all gas meters will be replaced for testing at least once every seven years. Customer may be subject to disconnection for refusal to allow access to the gas meter.
- 6.4. Municipal Lien Certificate (MLC) Estimation Policy: For purposes of issuing a Municipal Lien Certificate (MLC), an estimated amount due as of the closing date will be included in the MLC figure. This estimate accounts for any outstanding balances and projected usage since the last billing cycle.

If the total amount collected exceeds the actual charges owed, the overpayment will be refunded to the original owner. If the estimated amount is insufficient to cover the final charges, the outstanding balance will remain due and payable by the property owner.

7. Service Limitations

- 7.1. The Department shall not be responsible for any failure to supply gas service nor for interruption of the supply or any damage resulting from the restoration of service, if such failure, interruption, or damage is without willful default on its part.
- 7.2. Force Majeure: The Department shall not be considered to be in default hereunder and shall be excused from furnishing natural gas hereunder if and to the extent that it shall be prevented from doing so by an event of Force Majeure. Force Majeure shall include, but not be limited to, the following: (i) physical events such as acts of God, landslides, lightning, earthquakes, fires, storms or storm warnings, such as hurricanes, which result in evacuation of the affected area, floods, washouts, explosions, breakage or accident or necessity of repairs to machinery or equipment or lines of pipe; (ii) weather related events affecting an entire geographic region, such as low temperatures which cause freezing or failure of wells or lines of pipe; (iii) interruption and/or curtailment of Firm transportation and/or storage by Transporters; (iv) acts of others such as strikes, lockouts or other industrial disturbances, riots, sabotage, insurrections or wars; and (v) governmental actions such as necessity for compliance with any court order, law, statute, ordinance, regulation, or policy having the effect of law promulgated by a governmental authority having jurisdiction. The Department shall make reasonable efforts to avoid the adverse impacts of a Force Majeure and to resolve the event or occurrence once it has occurred in order to resume performance.

8. Applicable Laws

- 8.1. All such policies and regulations shall be consistent with the General Laws of the Commonwealth of Massachusetts, Chapter 164 in particular, and any other applicable regulations and orders of the Massachusetts Department of Public

Utilities. Massachusetts Code of Regulations 220 C.M.R. 25 shall govern the rules of disconnection applicable to this Tariff.

9. Purchased Cost of Gas

- 9.1. The Customer shall be liable for all rates, charges and adjustments allowed for in the Schedule of Rates related to services provided to each Customer individually.

City of Westfield
Gas and Electric Light Department

GAS ADJUSTMENT CHARGES SCHEDULE

APPLICABILITY:

A Gas Supply Charge shall be applied to each rate schedule in which reference is made to the Department's Gas Supply Charge.

A Gas Distribution Adjustment shall be applied to each rate schedule in which reference is made to the Department's Gas Distribution Adjustment.

ADJUSTMENT OF BILL:

The Gas Supply Charge ("GSC") will be adjusted for each gas rate schedule and contract of the Department and may be increased or decreased by an amount per CCF to the nearest one hundredth of a cent (\$0.0001). The GSC will be adjusted to ensure adequate recovery of annual gas supply, including transportation and any other gas supply expenses not recovered in base rates or in the Distribution Adjustment.

The Gas Distribution Adjustment ("GDA") will be adjusted for each gas rate schedule and contract of the Department and may be increased or decreased by an amount per CCF calculated to the nearest hundredth of a cent (\$0.0001). The Gas Transportation Charge will be adjusted using the GDA to ensure adequate recovery of base expenses and the estimated dollar amount necessary to meet the Department's fiduciary obligations and net income requirements as authorized for the Gas Division.

Adjustments will be made if the current rates lead to an annual over/under-recovery exceeding 15 percent of actual expenses and financial obligations as defined above. The annual period is the period of January 1 to December 31 of the present calendar year. As revenue and expenses change with actual values and updated projections, a variance assessment is conducted to determine projected excess or deficit in revenue compared to year end projected expenses. At least twice annually a variance assessment is conducted to assure the variance does not exceed a 15 percent deviation between actual and expected revenues. An adjustment is made if the variance exceeds this threshold during the variance assessment. In extreme market conditions, a business decision may be made to allow for a variance exceeding 15 percent. To the extent that any deviation is necessitated by market conditions, such deviation will be noted and communicated promptly by the General Manager to the Municipal Light Board.

In addition to adjustments to the GSC and Distribution Charge, an over recovery may result in a deferral being made from the current year into the following year.

Effective: August 1, 2023

Westfield Gas & Electric Light Department

RESIDENTIAL SERVICE GAS RATE - #61, #62

AVAILABILITY:

This rate schedule is available to all residential customers for natural gas service in a single family residence or individual apartment.

CHARACTER OF SERVICE:

The supply and delivery of natural gas containing approximately 1,000 BTU's per cubic foot.

RATE:

Customer Charge - \$13.00 per month

Transportation Charge -

November – April

First 20 CCF \$0.3072 per CCF

All over 20 CCF \$0.2072 per CCF

May – October

First 20 CCF \$0.2742 per CCF

All over 20 CCF \$0.1742 per CCF

Distribution Charge – An additional charge per CCF will apply to all delivered gas in accordance with the Gas Distribution Adjustment Schedule calculated for this rate schedule.

Gas Supply Charge – An additional charge per CCF will apply to all delivered gas in accordance with the Gas Supply Charge Schedule calculated for this rate schedule.

ENERGY CONSERVATION AND ENVIRONMENTAL CHARGE:

As may be in effect from time to time for the necessary recovery of certain energy conservation program costs and/or certain environmental related costs.

MINIMUM CHARGE:

The minimum charge per month is reflective of the actual costs incurred to support metering, meter reading, billing, customer service and a portion of maintenance and operations expenses.

RESIDENTIAL EARLY PAY DISCOUNT:

All residential customers who are in good financial standing (owing the current balance only) are entitled to up to a five percent (5%) discount off the bill if paid within fifteen (15) days.

FARM DISCOUNT:

Customers who meet the eligibility requirements for being engaged in the business of agriculture or farming as defined in M.G.L. Chapter 128, Section 1A at their service location are eligible for an additional discount from their distribution service rates. The discount will be calculated as 10% of the Customer's total bill for service provided by the Company before application of this discount. Customers who meet the requirements of this section must provide the Company with appropriate documentation of their eligibility under this provision.

TERMS AND CONDITIONS:

Bills are due and payable 28 days after the date of billing. Service is governed by the "Rules and Regulations of the Westfield Gas & Electric Light Department, City of Westfield, Massachusetts".

LARGE GENERAL SERVICE MUNICIPAL GAS RATE - #72

AVAILABILITY:

This rate schedule is available for natural gas service to municipal customers with annual usage equal to or greater than 5,001 CCF.

CHARACTER OF SERVICE:

The supply and delivery of natural gas containing approximately 1,000 BTU's per cubic foot.

RATE:

Customer Charge - \$ 50.25 per month

Transportation Charge -

November – April

First 500 CCF \$0.2681 per CCF

All over 500 CCF \$0.2191 per CCF

May – October

First 500 CCF \$0.2321 per CCF

All over 500 CCF \$0.1830 per CCF

Distribution Charge - An additional charge per CCF will apply to all delivered gas in accordance with the Gas Distribution Adjustment Schedule calculated for this rate schedule.

Gas Supply Charge - An additional charge per CCF will apply to all delivered gas in accordance with the Gas Supply Charge Schedule calculated for this rate schedule.

ENERGY CONSERVATION AND ENVIRONMENTAL CHARGE:

As may be in effect from time to time for the necessary recovery of certain energy conservation program costs and/or certain environmental related costs.

MINIMUM CHARGE:

The minimum charge per month is reflective of the actual costs incurred to support metering, meter reading, billing, customer service and a portion of maintenance and operations expenses.

OPTIONAL GAS SERVICE SCHEDULE - A

AVAILABILITY:

This rate is available for Industrial and large Commercial customers with gas dual fuel capability who are located adjacent to the Department's existing distribution mains, which have adequate capacity so that gas delivered hereunder will not impair service to other customers.

CHARACTER OF SERVICE:

A gas supply of not less than 1,000 BTU per cubic foot.

RATE – APPLIED MONTHLY:

On a periodic basis the Department may notify qualifying customers of the projected gas rate for the next succeeding period. The customer will have an option to receive gas at such rate specified by the Department. All gas purchased under this schedule shall vary monthly according to the Department's wholesale gas costs, gas transportation expenses, pipeline costs and revenue requirements. The price of all gas sold under this schedule may be modified as necessary to provide an appropriate benefit to the Department.

MINIMUM CHARGE:

The minimum charge per month is reflective of the actual costs incurred to support metering, meter reading and billing.

UNAUTHORIZED USE OF GAS:

All gas taken by a customer on any day during a period of curtailment without the express permission of the Energy Supply Division and all gas taken by a customer on any day during a curtailment period in excess of the volume of gas authorized by the Energy Supply Division shall be paid for by the customer at a rate equivalent to the monthly peaking costs per CCF in addition to all other charges payable under this rate schedule. The General Manager may waive any such additional charges for unauthorized use of gas if the Department's cost of gas is not affected by the unauthorized use by the customer.

ENERGY CONSERVATION AND ENVIRONMENTAL CHARGE:

As may be in effect from time to time for the necessary recovery of certain energy conservation program costs and/or certain environmental related costs.

TERMS AND CONDITIONS:

Service under this rate shall be negotiated individually. If a customer wishes to terminate the optional gas service schedule, they must notify the Department in writing, two weeks prior to the normal meter reading date. The customer will then be placed automatically on its applicable gas rate schedule for the next billing period.

City of Westfield
Gas & Electric Light Department

Gas Contract Service Rate - B

AVAILABILITY:

This rate schedule is available to large or aggregated commercial, industrial and institutional customers that would enter into an agreement for gas service which, in the Department's sole discretion, would benefit both the customer and the Department. The minimum annual volume for a negotiated contract under this rate shall be at least 75,000 CCF. Gas service provided under this rate is for the customer's exclusive use and not for resale.

TERM:

For an agreement period not exceeding two years.

CHARACTER OF SERVICE:

The supply and delivery of natural gas containing approximately 1,000 BTU's per cubic foot.

RATE:

The negotiated rate shall be made up of any of the following component charges:

- | | |
|-------------------------------|--|
| Customer Charge - | A monthly administrative charge applicable to each meter. |
| Delivery/Distribution Charge- | An additional charge per CCF to recover costs associated with delivery of gas to the customer's meter and peaking costs when applicable. |
| Gas Supply Charge - | An additional charge per CCF to recover charges associated with gas supply |

The rates for gas service and terms and conditions under this rate schedule will be negotiated between the customer and the General Manager. In negotiating such rates and terms and conditions, the Manager shall consider, among other things, the following concerns and factors:

- a. Any benefits in utility gas supply planning that may arise as a result of the customer's contractual commitment;

- b. Whether the customer agrees to purchase from the Department either a certain minimum or maximum volume of gas or a certain minimum or maximum percentage of its energy needs in gas over the term of the contract;
- c. The cost of competing energy alternatives available to the customer, including the cost of any relevant alternative fuels;
- d. The projected cost of gas to the Department to supply the customer's needs over the term of the contract
- e. The projected revenues and margin that will be derived from the gas sales to the customer over the term of the contract;
- f. Consideration of any economic development factors;
- g. The customer's load factor; and
- h. Other projected benefits or disadvantages to the gas utility occurring as a result of the contract.

Utility bills rendered under this schedule shall be subject to any applicable utility tax.

UNAUTHORIZED USE OF GAS:

All gas taken by a customer on any day during a period of curtailment without the express permission of the Energy Supply Division and all gas taken by a customer on any day during a curtailment period in excess of the volume of gas authorized by the Energy Supply Division shall be paid for by the customer at a rate equivalent to the monthly peaking costs per CCF in addition to all other charges payable under this rate schedule. The General Manager may waive any such additional charges for unauthorized use of gas if the Department's cost of gas is not affected by the unauthorized use by the customer.

ENERGY CONSERVATION AND ENVIRONMENTAL CHARGE:

As may be in effect from time to time for the necessary recovery of certain energy conservation program costs and/or certain environmental related costs.

MINIMUM CHARGE:

The minimum charge per month is reflective of the actual costs incurred to support metering, meter reading and billing.

TERMS AND CONDITIONS:

Bills are due and payable 28 days after date of billing. Service is governed by the "Rules and Regulations of the Westfield Gas & Electric Light Department, City of Westfield, Massachusetts".

Effective: May 1, 2012

**WESTFIELD GAS AND ELECTRIC LIGHT DEPARTMENT
AUTOMATED REMOTE METERING OPT-OUT CHARGE**

APPLICABILITY:

This rate tariff is applicable to all residential customers who choose to forego the benefits of automated meter reading (AMR) and instead request to have their meter(s) manually read using a meter that does not contain wireless communication functionality.

MONTHLY CHARGES:

Customers who elect to opt-out of the Westfield Gas & Electric Automated Meter Reading Program and instead have their meter(s) manually read will be charged an additional \$18.00 fee per month for the first meter and \$2.00 per month for each additional meter at the same customer location.

All charges and provisions of the opt-out customer's otherwise applicable rate schedule(s) shall apply.

SPECIAL PROVISIONS:

By choosing to opt-out of automated meter reading and instead continue to have meter(s) manually read each month, the customer is required, if meter is located inside the premises, to have the meter moved, at customer's expense, to an accessible exterior location by a licensed technician within 90 days from the date the customer formally opts-out, by submitting an Opt-Out Request form to Westfield Gas & Electric. In the event the utility meter(s) located inside the premises have not been moved to an approved and accessible exterior location after 90 days from the date recorded on the Opt-Out Form, the customer is required to provide Westfield Gas & Electric access to the premises to install the AMR metering and related equipment necessary to provide automated meter reading.

TERMS AND CONDITIONS:

In addition to the terms set under this rate tariff, service is governed by the applicable Rules and Regulations of the Westfield Gas and Electric Light Department, City of Westfield, Massachusetts.

Effective: January 1, 2015

WESTFIELD GAS AND ELECTRIC LIGHT DEPARTMENT

RESIDENTIAL ELECTRIC SERVICE RATE

#11 AND #12

APPLICABILITY:

The rate is applicable to all residential customers for all uses of electricity in a single family residence or individual apartment.

MONTHLY RATE:

Delivery Services:

Customer Charge	\$12.25 per meter
Transmission Charge	\$0.02331 per kWh
Distribution Charge	\$0.04720 per kWh

Supplier Services:

Electric Supply Charge	\$0.05646 per kWh
------------------------	-------------------

RATE ADJUSTMENTS:

This rate may be adjusted as provided in the Company's Demand Side Management and Renewable Energy Programs.

DELIVERY SERVICES ADJUSTMENTS:

There shall be adjustments to the Transmission Charge and Distribution Charge in the above rate as provided, respectively, in the Department's Transmission Service Adjustment Clause and Distribution Service Adjustment Clause, each as calculated for this rate schedule and in effect at the time of delivery.

ELECTRIC SUPPLY SETTLEMENT:

There shall be an adjustment to the Electric Supply Charge in the above rate as provided in the Department's Electric Supply Charge Settlement Clause as calculated for this rate schedule and in effect from time to time.

MINIMUM CHARGE:

The minimum charge per month is reflective of the actual costs incurred to support metering, meter reading, billing, customer service and a portion of maintenance and operations expenses.

#11 AND #12
Page 2

RESIDENTIAL EARLY DISCOUNT:

All residential customers who are in good financial standing (owing the current balance only) are entitled to up to a five percent (5%) discount off the bill if paid within fifteen (15) days.

FARM DISCOUNT:

Customers who meet the eligibility requirements for being engaged in the business of agriculture or farming as defined in M.G.L. Chapter 128, Section 1A at their service location are eligible for an additional discount from their distribution service rates. The discount will be calculated as 10% of the Customer's total bill for service provided by the Company before application of this discount. Customers who meet the requirements of this section must provide the Company with appropriate documentation of their eligibility under this provision.

PASNY - HYDRO-ELECTRIC CREDIT:

There will a credit applied to all residential customers' bills for hydro power, based on savings between fossil fuels and hydro.

TERMS AND CONDITIONS:

Bills are due and payable no later than 28 days after date of billing. Service is governed by the Terms and Conditions of the Westfield Gas and Electric Light Department, City of Westfield, Massachusetts.

Issued: April 2019

Effective: May 1, 2019

WESTFIELD GAS AND ELECTRIC LIGHT DEPARTMENT

SMALL GENERAL SERVICE ELECTRIC RATE

#21, #22 and #23

APPLICABILITY:

The rate is applicable to all non-residential uses of electricity, where the customer's monthly kilowatt-hours do not exceed 4,000 kWh in any three consecutive months and the customer's Demand does not exceed 25 Kilowatts.

MONTHLY RATE:

Delivery Services:

Customer Charge	\$13.00 per meter
Transmission Charge	\$0.02312 per kWh
Distribution Charge	\$0.05952 per kWh

Supplier Services:

Electric Supply Charge	\$0.05083 per kWh
------------------------	-------------------

RATE ADJUSTMENTS:

This rate may be adjusted as provided in the Company's Demand Side Management and Renewable Energy Programs.

DELIVERY SERVICES ADJUSTMENTS:

There shall be adjustments to the Transmission Charge and Distribution Charge in the above rate as provided, respectively, in the Department's Transmission Service Adjustment Clause and Distribution Service Adjustment Clause, each as calculated for this rate schedule and in effect at the time of delivery.

ELECTRIC SUPPLY SETTLEMENT:

There shall be an adjustment to the Electric Supply Charge in the above rate as provided in the Department's Electric Supply Charge Settlement Clause as calculated for this rate schedule and in effect from time to time.

MINIMUM CHARGE:

The minimum charge per month is reflective of the actual costs incurred to support metering, meter reading, billing, customer service and a portion of maintenance and operations expenses.

POWER FACTOR REQUIREMENT:

#21, #22 and #23
Page 2

Customers are expected to maintain a power factor of not less than 90% lagging. The Department may require any customer not satisfying this power factor requirement to furnish, install and maintain, at no cost to the Department, such corrective equipment as the Department may deem necessary under the circumstances. Alternatively, the Department may elect to install such corrective equipment at the customer's expense.

FARM DISCOUNT:

Customers who meet the eligibility requirements for being engaged in the business of agriculture or farming as defined in M.G.L. Chapter 128, Section 1A at their service location are eligible for an additional discount from their distribution service rates. The discount will be calculated as 10% of the Customer's total bill for service provided by the Company before application of this discount. Customers who meet the requirements of this section must provide the Company with appropriate documentation of their eligibility under this provision.

TERMS AND CONDITIONS:

Bills are due and payable no later than 28 days after date of billing. Service is governed by the Terms and Conditions of the Westfield Gas and Electric Light Department, City of Westfield, Massachusetts.

Issued: April 2019

Effective: May 1, 2019

WESTFIELD GAS AND ELECTRIC LIGHT DEPARTMENT

GENERAL SERVICE ELECTRIC RATE

#31, #32, #33 and #34

APPLICABILITY:

The rate is applicable to all non-residential uses of electricity not specifically provided for by the Department's other electric rate schedules. All electricity delivered hereunder shall be measured through one meter.

MONTHLY RATE:

Delivery Services:

Customer Charge	\$95.00 per meter
Transmission Charge	\$0.02348 per kWh

Distribution Charge

All Kilowatts of Billing Demand	\$5.30 per kW
All Kilowatt-hours	\$0.03802 per kWh

Supplier Services:

Electric Supply Charge	\$0.06215 per kWh
------------------------	-------------------

RATE ADJUSTMENTS:

This rate may be adjusted as provided in the Company's Demand Side Management and Renewable Energy Programs.

DELIVERY SERVICES ADJUSTMENTS:

There shall be adjustments to the Transmission Charge and Distribution Charge in the above rate as provided, respectively, in the Department's Transmission Service Adjustment Clause and Distribution Service Adjustment Clause, each as calculated for this rate schedule and in effect at the time of delivery.

ELECTRIC SUPPLY SETTLEMENT:

There shall be an adjustment to the Electric Supply Charge in the above rate as provided in the Department's Electric Supply Charge Settlement Clause as calculated for this rate schedule and in effect from time to time.

MINIMUM CHARGE:

The minimum charge per month is reflective of the actual costs incurred to support metering, meter reading, billing, customer service and a portion of maintenance and operations expenses, plus \$5.30 per kW of Billing Demand, where the Billing Demand is defined as the customer's highest thirty-minute kilowatt demand occurring during the current and preceding eleven months.

#31, #32, #33 and #34
Page 2

POWER FACTOR REQUIREMENT:

Customers are expected to maintain a power factor of not less than 90% lagging. The Department may require any customer not satisfying this power factor requirement to furnish, install and maintain, at no cost to the Department, such corrective equipment as the Department may deem necessary under the circumstances. Alternatively, the Department may elect to install such corrective equipment at the customer's expense.

FARM DISCOUNT:

Customers who meet the eligibility requirements for being engaged in the business of agriculture or farming as defined in M.G.L. Chapter 128, Section 1A at their service location are eligible for an additional discount from their distribution service rates. The discount will be calculated as 10% of the Customer's total bill for service provided by the Company before application of this discount. Customers who meet the requirements of this section must provide the Company with appropriate documentation of their eligibility under this provision.

TERMS AND CONDITIONS:

Bills are due and payable no later than 28 days after date of billing. Service is governed by the Terms and Conditions of the Westfield Gas and Electric Light Department, City of Westfield, Massachusetts.

Effective: May 1, 2019

WESTFIELD GAS AND ELECTRIC LIGHT DEPARTMENT

LARGE POWER ELECTRIC RATE

#35 and #36

APPLICABILITY:

The rate is applicable to large commercial, industrial or municipal customers if the Department estimates that the customer's average monthly load factor will exceed 55% and the customer's monthly demand will exceed 100 kilowatts. All electricity delivered hereunder shall be measured through one meter.

MONTHLY RATE:

Delivery Services:

Customer Charge	\$165.00 per meter
Transmission Charge	\$0.02311 per kWh
Distribution Charge	
All Kilowatts of Billing Demand	\$6.00 per kW
All Kilowatt-hours	\$0.03179 per kWh

Supplier Services:

Electric Supply Charge	\$0.06148 per kWh
------------------------	-------------------

RATE ADJUSTMENTS:

This rate may be adjusted as provided in the Company's Demand Side Management and Renewable Energy Programs.

DELIVERY SERVICES ADJUSTMENTS:

There shall be adjustments to the Transmission Charge and Distribution Charge in the above rate as provided, respectively, in the Department's Transmission Service Adjustment Clause and Distribution Service Adjustment Clause, each as calculated for this rate schedule and in effect at the time of delivery.

ELECTRIC SUPPLY SETTLEMENT:

There shall be an adjustment to the Electric Supply Charge in the above rate as provided in the Department's Electric Supply Charge Settlement Clause as calculated for this rate schedule and in effect from time to time.

MINIMUM CHARGE:

The minimum charge per month is reflective of the actual costs incurred to support metering, meter reading, billing, customer service and a portion of maintenance and operations expenses, plus \$6.00 per kW of billing demand,

#35 AND #36
Page 2

where the Billing Demand is defined as the customer's highest thirty-minute kilowatt demand occurring during the current and preceding eleven months.

POWER FACTOR REQUIREMENT:

Customers are expected to maintain a power factor of not less than 90% lagging. The Department may require any customer not satisfying this power factor requirement to furnish, install and maintain, at no cost to the Department, such corrective equipment as the Department may deem necessary under the circumstances. Alternatively, the Department may elect to install such corrective equipment at the customer's expense.

FARM DISCOUNT:

Customers who meet the eligibility requirements for being engaged in the business of agriculture or farming as defined in M.G.L. Chapter 128, Section 1A at their service location are eligible for an additional discount from their distribution service rates. The discount will be calculated as 10% of the Customer's total bill for service provided by the Company before application of this discount. Customers who meet the requirements of this section must provide the Company with appropriate documentation of their eligibility under this provision.

TERMS AND CONDITIONS:

Bills are due and payable no later than 28 days after date of billing. Service is governed by the Terms and Conditions of the Westfield Gas and Electric Light Department, City of Westfield, Massachusetts.

Issued: April 2019

Effective: May 1, 2019

WESTFIELD GAS AND ELECTRIC LIGHT DEPARTMENT

TIME-OF-USE ELECTRIC RATE

#60

APPLICABILITY:

The rate is applicable to large power customers whose monthly demand requirements are at least 1,250 kilowatts and whose monthly load factor is 60% or greater. All electricity delivered hereunder shall be measured through one meter, except that, where the Electric Department deems it impractical to deliver electric service through one meter, measurement may be through two or more meters as determined by the Electric Department.

MONTHLY RATE:

Delivery Services:

Customer Charge	Customer Specific
Transmission Charge:	
All On-Peak kWh	\$0.02957 per kWh
All Off-Peak kWh	\$0.00000 per kWh
Distribution Charge:	
All On-Peak kWh	\$0.03027 per kWh
All Off-Peak kWh	\$0.01467 per kWh

Supplier Services:

Electric Supply Charge:	
All Kilowatts of Billing Demand	Customer Specific
All Kilowatt-Hours	\$0.07265 per kWh

RATE ADJUSTMENTS:

This rate may be adjusted as provided in the WG+E Policy Manual and/or the Company's Demand Side Management and Renewable Energy Programs.

SERVICES ADJUSTMENTS:

There shall be adjustments to the Electric Supply Charge, Transmission Charge and/or Distribution Charge in the above rate as provided, respectively, in the Department's Electric Adjustment Charges Schedule.

MINIMUM CHARGE:

The minimum charge per month is the Customer Charge.

CUSTOMER CHARGE:

The Customer Charge is calculated using the following formula:

$$\text{Cust}_{E60} = (1 - 0.2) \times [\text{Cust}_{E36} + (0.2 * T_{E36}) + (0.2 * D_{E36})]$$

Where:

Cust_{E60} = Calculated annual customer charge for each E60 customer. The monthly charge equals the calculated total divided by 12 months.

Cust_{E36} = Customer's annual customer charge calculated at the E36 rate for a 12-month period.

T_{E36} = Customer's annual transmission charges calculated at the E36 rate for the 12 months usage in the prior calendar year. If no data is available, the transmission charges will be calculated using estimated annual kWh usage.

D_{E36} = Customer's annual distribution charges calculated at the E36 rate for the 12 months usage in the prior calendar year. If no data is available, the distribution charges will be calculated using estimated annual kWh usage.

The Customer Charge is billed monthly as a stated rate determined by the formula above. The Department may review and adjust the Customer Charge as calculated above as it deems reasonably necessary to ensure the Charge is reflective of the customer's current usage and the load profile of the customer. The Department may adjust the Customer Charge within plus or minus 10% of the calculated total given a customer's load profile, usage patterns, or other material anomalies to further stabilize rates for the Customer and cost of service based revenue requirement of the Department.

DETERMINATION OF BILLING DEMAND:

The Billing Demand is the customer's highest 30-minute kilowatt registration measured during the month in the On-Peak Hours defined herein. However, the Billing Demand shall not be less than 50% of the highest 30-minute kilowatt

#60
Page 3

registration measured during the current and most recent eleven months, nor less than 50% of the contract demand.

The kW Demand Charge is calculated using the following formula:

$$\text{Demand}_{E60} = \{(1 - 0.1) \times [\text{Supply}_{E36} + \text{Demand}_{E36}] \times 0.45\} / \text{kW}$$

Where:

Demand_{E60} = Calculated kW demand charge for each E60 customer.

Supply_{E36} = Customer's annual kWh supply charge calculated at the E36 rate for a 12-month period. If no data is available, the supply charges will be calculated using estimated annual kWh usage.

Demand_{E36} = Customer's annual kW demand charges calculated at the E36 rate for the 12 months usage in the prior calendar year. If no data is available, the demand charges will be calculated using estimated annual kWh usage.

kW = The sum of Customer's total kilowatts measured for the 12 months in the prior calendar year. If no data is available, the total kilowatts will be estimated based on the customer's anticipated load profile.

The kW demand charge is billed as a stated rate, and the formula above is utilized to establish such value. The Department may review and adjust the Demand Charge as calculated above as it deems reasonably necessary to ensure the Charge is reflective of the customer's current usage, and the load profile of the customer. The Department may adjust the Demand Charge within 10% of the calculated total given a customer's load profile, usage patterns, or other material anomalies to further stabilize rates for the Customer and cost of service based revenue requirement of the Department.

POWER FACTOR REQUIREMENT:

All customers must maintain at least 90% power factor. If the customer's power factor is less than 90% lagging, the customer may be required to correct the power factor to at least 90% lagging as a condition of service. If the customer does not correct the power factor to at least 90% lagging, then the customer will reimburse the Department for all costs which it incurs to make such correction.

DEFINITION OF ON-PEAK AND OFF-PEAK ENERGY:

The On-Peak Energy is defined as all kilowatt-hours used by the customer during the On-Peak Hours beginning 7:00 a.m. and ending 11:00 p.m. each day, excluding Saturdays and Sundays. The Off-Peak Energy is defined as all kilowatt-hours used by the customer during all hours other than the on-peak hours described above.

EXTRA FACILITIES CHARGE:

An Extra Facilities Charge shall be billed each month when the customer has requested the Department to furnish facilities which are of greater capability than facilities necessary to meet the Department's reliability standards using good utility practice. The Extra Facilities Charge shall be equal to the Excess Facilities investment (including any net replacements from time to time) with an additional monthly carrying cost factor of 1.5% for the life of the Extra Facility.

If mutually agreeable between the Electric Division and the customer, the customer may pay to the Department a non-refundable contribution-in-aid of construction equal to all or a portion of the Excess Facilities investment. In such instance, the Extra Facilities Charge shall be determined based on the portion of the Extra Facilities not paid for through a contribution-in-aid by the requesting customer. In any case, however, all facilities shall remain the property of the Department.

In the event that a customer terminates service under this Rate Schedule prior to the Department's full recovery of costs associated with Extra Facilities, such unrecovered amount shall become immediately due and payable and shall be itemized in such customer's final bill. The Department may waive this provision in the event a new customer, of similar creditworthiness, assumes the obligations of the terminating customer.

The Department shall have the option of refusing requests for Excess Facilities if, on its own determination, the requested facilities are not feasible, or may adversely affect the Department's service to other customers.

FARM DISCOUNT:

Customers who meet the eligibility requirements for being engaged in the business of agriculture or farming as defined in M.G.L. Chapter 128, Section 1A at their service location are eligible for an additional discount from their distribution service rates. The discount will be calculated as 10% of the Customer's total bill for service provided by the Company before application of this discount. Customers who meet the requirements of this section must provide the Company with appropriate documentation of their eligibility under this provision.

TERMS AND CONDITIONS:

Bills are due and payable no later than 28 days after date of billing. Service is governed by the Rules and Regulations of the Westfield Gas and Electric Light Department, City of Westfield, Massachusetts.

Effective: August 1, 2023

City of Westfield
Gas and Electric Light Department

ELECTRIC ADJUSTMENT CHARGES SCHEDULE

APPLICABILITY:

An Electric Supply Charge shall be applied to each electric rate schedule in which reference is made to the Department's Electric Supply Charge.

A Transmission Service adjustment shall be applied to each electric rate schedule in which reference is made to the Department's Transmission Charge.

A Distribution Service adjustment shall be applied to each electric rate schedule in which reference is made to the Department's Distribution Charge.

ADJUSTMENT OF BILL:

The Electric Supply Charge ("ESC") will be adjusted for each electric rate schedule and contract of the Department and may be increased or decreased by an amount per kilowatt-hour to the nearest one thousandth of a cent (\$0.00001). The ESC will be adjusted to ensure adequate recovery of the following:

- The projected dollar amount to be applied or paid to all suppliers of purchased power and related services other than transmission or distribution costs referenced in the Department's relevant Tariff
- The dollar amount established to provide for accelerated recovery of generation assets

The Transmission Charge set forth in each applicable electric rate schedule and contract of the Department shall be increased or decreased by the Transmission Service Adjustment ("TSA") adjusted for each rate schedule on a per kilowatt-hour basis calculated to the nearest one thousandth of a cent (\$0.00001). The Transmission Charge will be adjusted using the TSA to ensure adequacy of transmission-related expenses.

The Distribution Charge set forth in each applicable electric rate schedule and contract of the Department shall be increased or decreased by the Distribution Service Adjustment ("DSA") adjusted for each rate schedule on a per kilowatt-hour basis calculated to the nearest one thousandth of a cent (\$0.00001). The Distribution Charge will be adjusted using the DSA to ensure adequate recovery of base expenses and the estimated dollar amount necessary to meet the Department's fiduciary obligations and net income requirements as authorized for the Electric Division.

Adjustments will be made if the current rates lead to an annual over/under-recovery exceeding 15 percent of actual expenses and financial obligations as defined above. The annual period is the period of January 1 to December 31 of the present calendar year. As revenue and expenses change with actual values and updated projections, a variance assessment is conducted to determine projected excess or deficit in revenue compared to year end projected expenses. At least twice annually a variance

assessment is conducted to assure the variance does not exceed a 15 percent deviation between actual and expected revenues. An adjustment is made if the variance exceeds this threshold during the variance assessment. In extreme market conditions, a business decision may be made to allow for a variance exceeding 15 percent. To the extent that any deviation is necessitated by market conditions, such deviation will be noted and communicated promptly by the General Manager to the Municipal Light Board.

In addition to the adjustments to the ESC, Transmission Charge, and Distribution Charge, an over recovery may result in a deferral being made from the current year into the following year.

Effective: August 1, 2023

WESTFIELD GAS AND ELECTRIC LIGHT DEPARTMENT

ELECTRIC CONTRACT SERVICE RATE - E

APPLICABILITY:

This rate schedule is available to large or aggregated commercial, industrial and institutional customers that would enter into an agreement for electric service which, in the Department's sole discretion, would benefit both the customer and the Department. The minimum annual volume for a negotiated contract under this rate shall be at least 3,000,000 kWh. Electric service provided under this rate is for the customer's exclusive use and not for resale.

TERM:

For an agreement period not exceeding two years.

RATE:

The negotiated rate shall be made up of any of the following component charges:

Customer Charge -	A monthly administrative charge applicable to each meter.
Transmission Charge -	An additional charge per kWh to recover costs associated with delivery of electricity to the Westfield receipt station.
Distribution Charge -	An additional charge per kWh to recover costs associated with delivery of electricity to the customer's meter.
Demand Charge -	An additional charge per kW to recover costs necessary to allow the Department to meet the customer's peak electricity needs.
Electric Supply Charge -	An additional charge per kWh to recover charges associated with electric supply

The rates for electric service and terms and conditions under this rate schedule will be negotiated between the customer and the General Manager. In negotiating such rates and terms and conditions, the Manager shall consider, among other things, the following concerns and factors:

- a. Any benefits in utility electric supply planning that may arise as a result of the customer's contractual commitment;
- b. Whether the customer agrees to purchase from the Department either a certain minimum or maximum volume of electricity or a certain minimum or maximum percentage of its electricity needs over the term of the contract;
- c. The cost of competing energy alternatives available to the customer, including the cost of any renewable sources;
- d. The projected cost of electricity to the Department to supply the customer's needs over the term of the contract
- e. The projected revenues and margin that will be derived from the electricity sales to the customer over the term of the contract;
- f. Consideration of any economic development factors;
- g. The customer's demand level and load factor; and
- h. Other projected benefits or disadvantages to the electric utility occurring as a result of the contract.

Utility bills rendered under this schedule shall be subject to any applicable utility tax.

RATE ADJUSTMENTS:

This rate may be adjusted as provided in the Company's Demand Side Management and Renewable Energy Programs.

MINIMUM CHARGE:

The minimum charge per month is reflective of the actual costs incurred to support metering, meter reading and billing.

POWER FACTOR REQUIREMENT:

All customers must maintain at least a 90% power factor as a condition of service. In the event the customer does not maintain a power factor of at least 90%, the customer will be required to reimburse the Department for all costs it incurs to make such a correction.

TERMS AND CONDITIONS:

Bills are due and payable 28 days after date of billing. Service is governed by the "Rules and Regulations of the Westfield Gas & Electric Light Department, City of Westfield, Massachusetts".

Effective: May 1, 2012

15. PURCHASED POWER COST.....	10

1. General

These terms and conditions are applicable to and made a part of all service classifications. Any terms and conditions which are inconsistent with any specific provisions of any service classification shall not apply.

2. Territory to which Terms and Conditions Apply

The Terms and Conditions are applicable to all customers, or potential customers, requiring electric service within the franchise area of the Westfield Gas & Electric Light Department, hereinafter referred to as the "Department".

3. Characteristics of Service

3.1. General: The standard service of the Department is alternating current with a nominal frequency of 60 hertz (cycles per second). All types of service listed below are not available at all locations and the Department may specify a certain type of service based on location, size or type of load. The Department must always be consulted to determine the type of service to be supplied to a particular installation. Please refer to the Service Requirements booklet for details.

3.2. Service: Subject to the restrictions in 3.1, the types of service available are as follows:

3.2.1 Secondary Distribution Service

Single phase, 3 wire, 120/240 volts
Single phase, 3 wire, 120/208 volts
Three phase, 4 wire, 208Y/120 volts
Three phase, 4 wire, 480Y/277 volts

3.2.2 Primary Distribution Service

Three phase, 4 wire, 23,000 volts

4. Obtaining Service

4.1. Application: An application for electrical service may be made in person at the Department's office located on 100 Elm Street, online at <https://www.wgeld.org/pages/residential/service/gas-and-electric-service/>, or via phone at 413-572-0100. Customer will be required to have proof of state or federal identification.

4.2. Selection of Service Classification: The Department will assist in the selection of the rate schedule which is most appropriate for the type of service provided.

4.3. Applications for electric service within the territory served by the Department will be received at the Customer Service office located at 100 Elm Street, first floor, through any duly authorized representative of the Department or through our on-line authorized application process. Prospective non-residential customers must make a written application through our written application or our on-line forms for service. Both residential and non-residential applications are available on-line, and customers can

complete the electronic applications using the authorized forms located on the company website. In addition, customers may contact an authorized representative to process their application. New residential service is required to pay an electric meter deposit of \$125 for electric and \$300 for a combined gas & electric service. Residential meter deposits may be waived at the Department's discretion if the customer provides the property deed with the new service application to match the new account name. Nonresidential customers are required to pay the greater of \$500 for service or the equivalent of three months anticipated revenue. Nonresidential deposit requirements will be established based on consumption history for the service location. The Department may review the deposit on file at any future date based on actual load. The customer will then be required to meet the new deposit value. Service shall not commence until the Department has received said application except that for an interim period pending the receipt of a duly executed application, the Department may accept an oral application for rate service from customers taking service under residential rate schedules. If an oral application is received by the Department from a person not currently a customer of record of the Department for service at a location where service is disconnected for non-payment, the Department may request an application be made in writing at the office of the Department as a precondition for service, unless otherwise ordered by the DPU. The Department reserves the right to refuse service, at any location, to an applicant who is indebted to the Department for any service previously furnished to such applicant.

- 4.4 **Lowest Applicable Rate:** The rate schedule applicable to the customer's service will be the Department's least expensive rate in effect for like conditions of service to the class as determined by information provided by the customer at the time of application for service. Current rate information shall be maintained on the Department's web site. If the Department is subsequently notified by a customer of a change in the customer's character of service, the rate available to that customer for the service being supplied may be modified by the Department and the Customer shall be served under the appropriate rate schedule. The Department shall not be required to refund the difference in charges under different rate schedules for any past period during which the customer did not request service under an alternate rate schedule that may have been available to the customer. Unless specifically stated to the contrary, all rates are based on the supply of service to the customer throughout the twelve months of the year, and the Department will not normally change rates more frequently than once in any twelve-month period. The Department may occasionally review customer consumption to ensure appropriate rate classification according to the individual tariff characteristics.
- 4.5 **Service Information from Department:** Upon receipt of an application from a prospective customer setting forth the location of the premises to be served, the extent of service to be required and other pertinent information, the Department will advise the customer of the type and character of the service it can furnish, the point at which service will be delivered and the location to be provided for the Department's metering equipment.

5. Equipment on the Customer's Premises

- 5.1 **General:** The customer is required to furnish, install and maintain all wiring and equipment on the customer's premises beyond the point of attachment of the service lateral, except for the metering equipment described in this section. The customer shall provide sufficient and readily accessible space for the Department's metering equipment, service laterals, transformers and other equipment or apparatus required for electrical

service. The location of the service entrance, metering and other equipment will be designated by the Department.

The Department shall have the right of access at all reasonable times for the purpose of installing, reading, inspecting, repairing or testing the Department's equipment and for the purpose of discontinuing service or removing its apparatus or equipment.

- 5.2 Meters: The Department will furnish, install, and maintain such meter or meters as are necessary to measure, for Department billing purposes, the electricity used by a customer at the customer's expense.
 - 5.2.1 Meters for Secondary Service: For new installations to be metered at voltages not exceeding 600 volts, meter mounting equipment and, where required, current transformers, potential transformers, and miscellaneous equipment will be furnished and connected by the Department at the customer's expense. The customer may be responsible for mounting the equipment furnished by the Department.
 - 5.2.2 Meters for Primary Service: For new installations to be metered at voltages above 600 volts, meter mounting equipment, current transformers, potential transformers, test switches and miscellaneous equipment will be furnished and installed by the Department at the customer's expense. For underground service, the customer shall provide an enclosure, per Department specifications, for the Department's instrument transformers. For overhead service, the customer shall provide a structure, per Department specifications, suitable for mounting the Department's instrument transformers.
 - 5.2.3 Indicating Devices: The Department will not permit the connection of customer-owned ammeters, voltmeters, pilot lamps or other devices to its instrument transformers. The Department will provide, if requested by the customer and at the customer's cost, a three wire, form A or C (KYZ Pulse Output), contact output for connection to the customer's load monitoring equipment.
 - 5.2.4 Multi-Meter Installations: All service to a single customer at a single site or location shall be rendered through a single meter, unless the Department specifically permits or requires otherwise. Where the Department is to supply individual tenants within a single building, the customer or building owner shall install and maintain feeders from a common location to each tenant, and the Department will install and maintain meters on these feeders.
 - 5.2.5 Sub-metering and Check Metering: Resale of electricity furnished by the Department, based on the registration of customer-owned metering devices, is defined as a sub-metering and is not permitted. A customer may monitor his own usage through the use of approved meters, computers or other metering device. Such metering is defined as check metering.
 - 5.2.6 Meters shall be outside unless otherwise approved by the Department.
- 5.3 Protection of Meters and Other Equipment: The customer shall not injure, interfere, destroy or tamper with the meters or other property of the Department, nor shall the customer permit any person to do so. The customer shall use all reasonable precautions to protect the property of the Department located on the customer's premises. The customer

shall be responsible for all damage to or loss of such property unless caused by circumstances beyond the customer's control.

The Department will seal or lock all meters and all enclosures containing meters or metering equipment. No person except a duly authorized employee of the Department shall be permitted in any way to change or modify the Department's equipment. No seals or locks shall be permitted to be removed without authorization of the Department. There will be a \$50 fee for cutting seals.

When a meter is found to be tampered with, service to that meter will be disconnected. To have service restored, the customer must make an application at the Department's office and pay a service fee of \$50.00. Repeated instances of tampering will be reported to the Westfield Police Department for prosecution.

- 5.4 Customer Wiring: Wiring installed on the customer's premises must conform with all applicable requirements of the Department and the National Electrical Code. Wiring shall be inspected and approved by a Westfield Wiring Inspector acceptable to the Department, prior to the connection of a new service.
- 5.5 Utilization Apparatus: Motors, welders, furnaces and other utilization apparatus shall be wired, connected and operated so as not to produce any effect on the service to other customers.

Where the use of electric service is to be intermittent, occasional, or subject to violent fluctuations, the customer shall review such proposed use with the Department and obtain the Department's approval. Electric service must meet IEEE 141 Flicker Standard (PST 1.0 PLT 0.8).

The customer shall notify the Department prior to connecting any motor larger than indicated below:

5 Horsepower for single phase, 120, 120/240, 120/208 volt service
15 Horsepower for three phase, 240, 120/208, 277/480 volt service
75 Horsepower for three phase, at 23,000 volt service

- 5.6 Power Factor: A customer taking service is expected to maintain a power factor of not less than 90% lagging. The Department may require any customer not satisfying this power factor requirement to furnish, install and maintain, at no cost to the Department, such corrective equipment as the Department may deem necessary under the circumstances. Alternatively, the Department may elect to install such corrective equipment at the customer's expense.
- 5.7 Load Balance: Customers receiving three phase service shall maintain as nearly as reasonably possible, equal currents in each of the three phase conductors at the point where electric service is metered. In no event shall the current in all three phase conductors be more than a 5% spread.

6. Meter Reading and Billing

- 6.1 General: Unless otherwise specified in the service classifications, rates and charges are stated on a monthly basis. The Department will ordinarily schedule meters to be read and

bills to be rendered monthly, however, the Department reserves the right to read meters and render bills on a bi-monthly basis.

Billings for temporary services, however, shall have a minimum billing period of one month.

- 6.2 Estimated Bills: Where the Department is unable to read the meter, or where actual usage cannot be determined due to meter failure, the customer's usage will be estimated by the Department based on available data and the customer billed accordingly. Every attempt will be made to collect a monthly physical or remote read for billing. The Department shall have the right to collect for any underbilled amounts, unless due to the fault or negligence of the Department, pursuant to Massachusetts Department of Public Utilities regulations 220 C.M.R. § 25.00 et seq. Estimated usage due to a customer refusing to grant Department-required access to the meter for more than three months shall also include a monthly fee of \$25 until access to the meter is granted.
- 6.3 Payment of Bills: Bills are payable when presented. If payment is not received by the Department prior to the due date specified on the bill, a late payment charge of 1.5% per monthly billing period will be applied on the unpaid balance from the due date to the date payment is received. (Late charge applies only to commercial and industrial customers.)

7. Discontinuance of Service

- 7.1 By the Department: The Department, upon reasonable notice, may discontinue service for the following reasons:
1. For the purpose of making permanent or temporary repairs, changes, improvements in any part of its system;
 2. For compliance in good faith with any government order or directive;
 3. Any of the following acts or omissions on the part of the customer:
 - (a) non-payment of a valid bill for service previously furnished as permitted by 220 C.M.R. 25.00 et seq.;
 - (b) tampering with any facility of the Department;
 - (c) customer moves from the premises, unless customer requests that service be continued;
 - (d) service is provided to others (sub-metering);
 - (e) failure to provide payment as provided for in these terms and conditions;
 - (f) connecting and operating equipment in a manner so as to produce disturbing effects on the service of the Department or other customers;
 - (g) for health and safety reasons, or the customer's actions pose a hazard to life or property;
 - (h) customer refuses reasonable access to the Department's employees.
- 7.2 Municipal Lien Certificate (MLC) Estimation Policy: For purposes of issuing a Municipal Lien Certificate (MLC), an estimated amount due as of the closing date will be included in the MLC figure. This estimate accounts for any outstanding balances and projected usage since the last billing cycle.

If the total amount collected exceeds the actual charges owed, the overpayment will be refunded to the original owner. If the estimated amount is insufficient to cover the final charges, the outstanding balance will remain due and payable by the property owner.

- 7.3 By the Customer: A customer wishing to discontinue service must give two business days' advance notice to the Department.

8. Reconnection of Service

- 8.1 By the Department: The Department requires advance notice of two business days for any reconnection or transfer of electric service. Reconnections, unrelated to non-payment terminations, will be scheduled during normal working hours, Monday through Friday, at no additional cost to the customer. A charge of \$25.00 will apply for any reconnection scheduled before 3:00 p.m. during working hours. For reconnections scheduled after 3:00 p.m., the fee will be \$50.00.

A request for reconnection due to termination of service for non-payment is \$50.00 at any time of reconnection. The customer is charged a minimum of \$50.00 or an actual labor rate multiplied by 1-3/4 times with a minimum call-out rate of 2-1/2 hours. There will also be a charge for a truck and the equipment used for the reconnection. The charge will be applied according to the rate scheduled for equipment in effect at that time.

9. Line Extension

- 9.1 General: The Department will furnish, install and maintain all electric lines and facilities located on public streets, highways and rights-of-ways acquired by the Department.
- 9.2 If a customer's property abuts on a public street, highway, or Department right-of-way, the Department will extend such lines to the customer's property at the Department's cost.

10. Services

- 10.1 Residential Overhead: The Department will furnish, install, and maintain all poles, conductors, transformers, and associated equipment required for overhead service. If the service lateral exceeds 300 feet in length, the customer shall pay the Department the actual cost of that part of the lateral excess of 300 feet.
- 10.2 Residential Underground from Overhead Distribution: The customer will furnish and install all required conduits and conductors required for the underground service. This shall be installed in accordance with the Department's requirements. The Department will make all permanent connections at the pole. The customer will own and maintain the wire and conduit.
- 10.3 Residential Underground from Underground Distribution: The customer shall furnish, install, and maintain the underground conduits from the house to the common junction point to be determined by the Department. The Department will furnish, install, and maintain all underground conductors up to the common junction point. The Department will make permanent connections at the junction point as well as at the customer provided meter socket.
- 10.4 Commercial Service: The Department will furnish, install, and maintain all underground conductors, transformers, and associated equipment required for underground service at the customer's expense. The customer shall furnish, install, and maintain, in accordance

with the Department's requirements, the underground conduit system, hand holes and transformer foundation as required.

- 10.5 Commercial Overhead: Commercial services, new or upgraded, are to be placed underground.

11. Temporary and Special Services

- 11.1 Where service is to be used for a limited period (such as building construction) the customer will pay a minimum charge of \$250.00 for installation of all temporary overhead services not greater than 200-amp, 120/240 volt. All additional charges will be billed at actual cost. Temporary services will be billed monthly based on actual usage at the applicable service rate.

Whenever, at the customer's request, the Department relocates facilities to suit the convenience of the customer, the customer shall pay all costs of such relocation.

12. Service Limitations

- 12.1 Service Continuity: The Department will use all reasonable diligence to provide a regular and uninterrupted supply of service, but should supply be discontinued for any reason set forth in these terms and conditions, or should the supply of service be interrupted, curtailed, or fail by reason of any interference, the Department shall not be liable for any loss or damage, direct or consequential, resulting from any such discontinuation. Also, the same limitations apply for any interruption abnormal voltage, discontinuance or reversal of its service due to causes beyond its immediate control whether accident, labor difficulties, conditions of dual supply, the actions of any public authority, reduction in voltage, rotating the use of feeders, selected black-outs, or failure to receive any electricity for which in any manner it has contracted, or due to the operation in accordance with good utility practices of any emergency load reduction program by the Westfield Gas and Electric Light Department.

"The utility agrees to use reasonable diligence in providing a regular and uninterrupted supply of power, but does not guarantee a constant supply of power, or the maintenance of unvaried frequency or voltage, and will not be liable in damages to the customer by reason of any failure in respect thereof." Whenever the integrity of the electric service may be threatened by power quality, quality of power at the point of use or disturbances, the customer shall take and use power in such a manner to not cause disturbance or voltage fluctuations on the utility supply system or systems of any third party.

The customer shall use remedial measures at his own expense by way of installing suitable apparatus or otherwise may be necessary to reduce any disturbance, fluctuations or interference to a level deemed tolerable by the utility.

- 12.2 Emergencies: The Department may curtail or interrupt service or reduce voltage to any customer or customers in the event of an emergency threatening the integrity of its system, or the system of its suppliers, if, in its judgment, such action will prevent or alleviate the emergency condition.

- 12.3 Contingent Service: The supply of electric service is contingent upon the Department's ability to secure and retain the necessary locations for its poles, wires, conduits, cables, and other apparatus.
- 12.4 Force Majeure: The Department shall not be considered to be in default hereunder and shall be excused from furnishing electricity hereunder if and to the extent that it shall be prevented from doing so by storm, flood, lightning, earthquake, fire, explosion, equipment failure, dam failure, civil disturbance, labor dispute, act of God or the public enemy, action of a court or public authority, or any cause beyond the control of the Department, including, without limitation, shutdown or limited operation due to breakdown, or scheduled or unscheduled repairs or maintenance, operational problems with the power grid, or inability to obtain adequate electric supplies.

13. Supplemental and Emergency Power

- 13.1 Emergency Generation: Where the customer installs one or more emergency generators for the sole purpose of providing emergency power during failure of the Department's service, a double throw switch shall be provided by the customer to prevent a connection between the emergency generator and the Department's service.
- 13.2 Small Power Production and Co-Generation Facilities: The Department may purchase electricity from such customers through the applicable rate schedule or agreed upon power purchase agreement under the Distributed Generation Reimbursement Rider and Interconnection Standards and Procedures for Distributed Generation available on the WG+E website.

14. Applicable Laws

All terms and conditions and policies of the Department are subject to the applicable General Laws of the Commonwealth of Massachusetts, Chapter 164 in particular, and the applicable regulations and orders of the Massachusetts Department of Public Utilities.

15. Purchased Power Cost

The Customer shall be liable for all rates, charges, and surcharges allowed for in the Schedule of Rates related to services provided to each Customer individually.

WESTFIELD GAS AND ELECTRIC LIGHT DEPARTMENT

SCHEDULE OF OFF STREET OR CONTRACT LIGHTING

APPLICABILITY:

This rate is applicable to off street lighting or general area lighting only.

SERVICE INSTALLATION CHARGE:

There will be a one-time service charge, as specified in the following table, to cover the cost of labor and equipment required for the installation of the lighting fixture. Wooden poles will be installed at the cost of \$175 each.

LIGHTING FIXTURE RATES:

Lamp Type	Nominal Wattage / Wattage Equivalent	Installation	Monthly Rate
Mercury Vapor*	175	N/A	\$16.88
Mercury Vapor*	400	N/A	\$24.52
Mercury Vapor*	1000	N/A	\$45.00
High Pressure Sodium	150	\$110.00	\$16.44
High Pressure Sodium	250	\$110.00	\$20.08
High Pressure Sodium	400	\$110.00	\$36.37
LED	100	\$133.17	\$8.85
LED	150	\$146.31	\$11.78
LED	250	\$225.25	\$13.99
LED	400	\$248.47	\$22.10

*Additional Mercury Vapor lights will not be installed.

TERMS AND CONDITIONS:

Bills are due and payable no later than 28 days after date of billing. Broken luminaries or lamps due to vandalism will be replaced by the Department at the customer's expense. Service is governed by the "Terms & Conditions of the Westfield Gas and Electric Light Department, City of Westfield, Massachusetts."

WESTFIELD GAS AND ELECTRIC LIGHT DEPARTMENT

CUSTOMER-OWNED ELECTRIC GENERATION REIMBURSEMENT RIDER

APPLICABILITY:

The rider is applicable to any customer receiving service under rate schedules Residential Electric Service Rate E11-12, Small General Service Electric Rate E21-22-23, General Service Electric Rate E31-32-33-34, Large Power Electric Rate E35-36 and Contract Service Time of Use Rate E60 and has an on-site electric generation and/or solar photovoltaic system with production up to 100 kW interconnected with Westfield Gas & Electric Light Department's (WG&E) distribution system behind the master meter with an Interconnection Application received by WG&E any time after December 31, 2016.

MONTHLY RATE:

The Monthly Rate is in addition to all other charges contained in the Customer's applicable tariff schedule, with adjustments to the charges in the Customer's applicable tariff schedule as set forth in the table below:

Electric Generation Metering Charge per Month: \$6.00

Electric Generation Reimbursement Credit: Variable per kWh

The Electric Generation Reimbursement Credit for electric generating systems with a capacity greater than 100 kW AC will be negotiated between the customer and General Manager.

Billable kilowatt-hours (kWh) shall be based on metered energy delivered by WG&E's electric distribution system and the metered energy consumed from an on-site electric generating system: also known as the total metered energy consumption during the billing month. All non-kWh based charges under this rate schedule shall remain unaffected by the application of this rider.

For each billing month, the customer shall receive a non-transferable credit equal to the metered kilowatt-hour output of the customer's electric generation and/or photovoltaic system multiplied by the Electric Generation Reimbursement Credit rate. Credits are applicable to the customer's total charges for Residential/Commercial/Industrial Service in the customer's name on the same premise and account where the on-site electric generating system is interconnected. Any credit in excess of total monthly charges will be returned to the customer.

The Electric Generation Reimbursement Credit is reviewed and reset periodically based on WG&E's actual avoided cost determination for value of the generation and transmission savings, typically determined during cost of service analysis.

WESTFIELD GAS AND ELECTRIC LIGHT DEPARTMENT**GENERAL SERVICE ELECTRIC VEHICLE CHARGING****#EV01****APPLICABILITY:**

The rate is applicable to all non-residential uses of electricity related to electric vehicle Level 2 and Level 3 (DC fast) charging stations. All electricity delivered hereunder shall be measured through one meter or in conjunction with a current General Service Commercial/Industrial/Municipal load.

- Level 2 stations: 120 or 240V single phase power typically drawing 7-20 kW
- Level 3 stations: 208 or 480V three phase power typically drawing 50-140 kW

Redistribution of electricity for electric vehicle charging shall not be considered the resale of electricity provided that the charge for the plug-in service is not sold on an energy unit basis or metered basis. The Customer agrees that the Customer's charges for use of the electric vehicle charging equipment – the total electricity revenue recovered, will not exceed the total cost of electricity as billed by WG&E. The Customer is not prohibited from recovering the cost of the electric vehicle charging equipment and related infrastructure.

MONTHLY RATE:**Delivery Services:**

Customer Charge	\$ 40.00 per meter
Transmission Charge	\$ 0.02408 per kWh
Distribution Charge	
All Kilowatts of Billing Demand	\$ 3.80 per kW
All Kilowatt-hours	\$ 0.03638 per kWh

Supplier Services:

Electric Supply Charge	\$ 0.06615 per kWh
------------------------	--------------------

RATE ADJUSTMENTS:

This rate may be adjusted as provided in the Department's Demand Side Management and Renewable Energy Programs.

DELIVERY SERVICES ADJUSTMENTS:

There shall be adjustments to the Transmission Charge and Distribution Charge in the above rate as provided, respectively, in the Department's Transmission Service Adjustment Clause and Distribution Service Adjustment Clause, each as calculated for this rate schedule and in effect at the time of delivery.

ELECTRIC SUPPLY SETTLEMENT:

There shall be an adjustment to the Electric Supply Charge in the above rate as provided in the Department's Electric Supply Charge Settlement Clause as calculated for this rate schedule and in effect from time to time.

MINIMUM CHARGE:

The minimum charge per month is reflective of the actual costs incurred to support metering, meter reading, billing, customer service and a portion of maintenance and operations expenses, plus \$3.80 per kW of Billing Demand, where the Billing Demand is defined as the customer's highest thirty-minute kilowatt demand occurring during the current and preceding eleven months.

POWER FACTOR REQUIREMENT:

Customers are expected to maintain a power factor of not less than 90% lagging. The Department may require any customer not satisfying this power factor requirement to furnish, install and maintain, at no cost to the Department, such corrective equipment as the Department may deem necessary under the circumstances. Alternatively, the Department may elect to install such corrective equipment at the customer's expense.

FARM DISCOUNT:

Customers who meet the eligibility requirements for being engaged in the business of agriculture or farming as defined in M.G.L. Chapter 128, Section 1A at their service location are eligible for an additional discount from their distribution service rates. The discount will be calculated as 10% of the Customer's total bill for service provided by the Company before application of this discount. Customers who meet the requirements of this section must provide the Company with appropriate documentation of their eligibility under this provision.

TERMS AND CONDITIONS:

Bills are due and payable no later than 28 days after date of billing. Service is governed by the Rules and Regulations of the Westfield Gas and Electric Light Department, City of Westfield, Massachusetts. The Department may terminate service for any violation of this rate tariff.

WESTFIELD GAS + ELECTRIC LIGHT DEPARTMENT**HOME PLUS PROGRAM RIDER**

Partnership for Residential Electrification Capital Improvements

APPLICABILITY:

The Rider is available and applicable to residential customers who participate in the Home Plus Program to install an electric heat pump and other qualifying efficiency home improvements. The intent of the Rider is to recover the revenue requirement of the capital investments made by Westfield Gas + Electric (WG+E) for an electric heat pump or other qualifying efficiency home improvement.

QUALIFICATIONS:

The Home Plus Program and this Rider are available to residential electric customers who meet the following criteria:

1. Customer receives electric service pursuant to WG+E rate schedule E11/E12 Residential Electric Service. Customer will be classified as rate E12 Residential Electric Heat.
2. Customer's residence, at the time of application for the Home Plus Program, must use oil, propane, wood/pellets, or electric baseboard heat as the primary heating source. Natural gas heat customers are not eligible for the Home Plus Program.
3. Customer must reside in a Westfield Environmental Justice Block group, designated as of June 1, 2024 by the [Massachusetts 2020 Environmental Justice Populations Map](#).
4. Customer's WG+E/Whip City Fiber (WCF) accounts must be in good standing. Good standing means Customer's WG+E/WCF accounts must be current with no more than one collection disconnect in the last 12 months. Customers with less than 12 months of history with WG+E must be current with no history of collection disconnects and must submit a letter demonstrating good standing from their previous utility provider.

Customers who qualify for the Home Plus Program must also meet the following property criteria:

1. Capital improvements will be provided for owner-occupied properties with three dwelling units or less. Owner-occupied condos or townhomes with individual unit heating systems will be considered individual dwelling units. Non-owner-occupied properties do not qualify. Tenants or non-owners of property are not eligible.
2. There shall be no Municipal, State, or Federal tax liens on the property. Customer must provide proof that any outstanding mortgage on the property is current on payment.
3. New construction properties are not eligible.
4. Property must not have active knob and tubing electrical systems.

HOME PLUS PROGRAM RIDER

CONDITIONS:

1. A WG+E Energy Audit must be completed prior to the project moving forward. If the Audit identifies the need for the heat pump, windows, doors, and insulation, Customer must install all identified improvements in the building envelope and the air source heat pump. If the audit finds that there is not a need for the installation of new windows, doors, and insulation, the property will qualify for the air source heat pump alone. All energy efficiency upgrades must be paired with a whole home heat pump.
2. The maximum capital investment for a project by WG+E is \$27,000 after WG+E incentives have been applied. Multi-unit properties are limited to a maximum capital investment of \$27,000. The Home Plus Program Rider is only applied to the owner account of multi-unit properties.
3. If Customer sells the property at which the capital improvements have been made, the remainder of the revenue requirement must be repaid in full to WG+E, unless the new property owner agrees to assume the Home Plus Program Rider. A written agreement must be executed between the owners to transfer the Rider and be provided to WG+E prior to closing of the sale of the property explicitly stating that the buyer assumes this Rider upon taking WG+E electric service.
4. Customer must fully repay the original project's revenue requirement before applying for a similar program through the WG+E.

BASE MONTHLY CHARGE:

1. The customer's monthly customer, transmission, distribution, and energy supply charges shall be determined in accordance with the standard E11/E12 Residential Electric Service rate.
2. The Rider is subject to the WG+E Electric Service Terms and Conditions including all provisions for service shutoff, payment default, collection costs, and late fees.

MONTHLY RECOVERY OF THE CAPITAL INVESTMENT REVENUE REQUIREMENT:

1. A monthly charge of \$150 will be added to the "Other Services and Charges" section of the bill until payment of the WG+E capital improvement is paid in full; this is the revenue requirement for the capital improvement.
2. The Residential Early Pay Discount and Farm Discount are not applicable to the \$150 revenue requirement.
3. The full value of the capital investment may be paid in full at any time. Any payments greater than the amount billed each month will result in a credit on the Customer account.
4. WG+E will not add any interest or carrying charges to the revenue requirement.
5. This Rider terminates once the capital improvement has been paid in full.

HOME PLUS PROGRAM RIDER

TERMS OF AGREEMENT:

The maximum recovery time to return the capital improvement is 180 months (15 years). Each Customer's Rider Term will be determined by the total revenue requirement divided by \$150 (e.g., \$27,000 capital investment divided by \$150 monthly = 180 monthly payments, \$15,000 capital investment divided by \$150 monthly = 100 monthly payments).

Service is governed by the Electric Service Terms and Conditions of the Westfield Gas & Electric Light Department. Failure to stay current and in good standing may result in a service disconnect.

Home Plus Program Terms and Conditions are available on the program website or by request.
