GRANT OF RENEWAL LICENSE

Section 2.1---GRANT OF RENEWAL LICENSE

Pursuant to the authority of Chapter 166A of the General Laws of the Commonwealth of Massachusetts, and subject to the terms and conditions set forth herein, the Mayor of the City of Westfield, Massachusetts, as the Issuing Authority of the City, hereby grants a non-exclusive Cable Television Renewal License to the Licensee authorizing the Licensee to operate and maintain a Cable Television System within the corporate limits of the City of Westfield.

This Renewal License is subject to the terms and conditions contained in Chapter 166A of the laws of Massachusetts; the regulations of the FCC; the Cable Act; and all City, State and federal statutes and by-laws of general application, as all may be amended.

Subject to the terms and conditions herein, the Issuing Authority hereby grants to the Licensee the right to lawfully operate and maintain a Cable Television System in, under, over, along, across or upon the Streets, lanes, avenues, alleys, sidewalks, bridges, highways and other public places having compatible easements and under the jurisdiction of the City of Westfield within the municipal boundaries and subsequent additions thereto, including property over, under or on which the City has a compatible easement or right-of-way in accordance with the laws of the United States of America, the Commonwealth of Massachusetts and the City of Westfield. In exercising rights pursuant to this Renewal License, the Licensee shall not endanger the lives of Persons, or interfere with any installations of the City, any public utility serving the City or any other Persons permitted to use Public Ways and places. Nothing herein shall preclude Licensee from offering any other service over the Cable System as may be lawfully allowed.

Grant of this Renewal License does not establish priority for use over other present or future permit holders or the City's own use of Public Ways or Streets. Disputes between the Licensee and other parties regarding use of Public Ways or Streets shall be resolved in accordance with any generally applicable regulations of the City and any lawful special laws or City ordinances and/or

regulations enacted hereafter.

Section 2.2---TERM OF RENEWAL LICENSE

The term of this Renewal License shall commence on March 20, 2025, and shall expire at midnight on March 19, 2035, unless sooner terminated as provided herein.

Section 2.3---NON-EXCLUSIVITY OF RENEWAL LICENSE

(a) This Renewal License shall not affect the right of the Issuing Authority to grant to any other Person a license or right to occupy or use the Public Ways or Streets, or portions thereof, for the construction, upgrade, installation, operation or maintenance of a Cable Television System within the City of Westfield; or the right of the Issuing Authority to permit the use of the Public Ways and places of the City for any purpose(s) whatsoever. The Licensee hereby acknowledges the Issuing Authority's right to make such grants and permit such uses.

(b) The grant of any additional cable television license(s) shall not be on terms more favorable or less burdensome, on the whole, than those contained in this Renewal License.

(i) In the event that the Licensee believes that any additional cable television license(s) have been granted on terms and conditions more favorable or less burdensome, on the whole, than those contained in this Renewal License, the Licensee may request, in writing, that the Issuing Authority convene a public hearing on that issue. Along with said written request, the Licensee shall provide the Issuing Authority with written reasons for its belief. At the public hearing, the Issuing Authority shall afford the Licensee an opportunity to demonstrate that any such additional cable television license(s) are on terms more favorable or less burdensome, on the whole, than those contained in this Renewal License. The Licensee shall provide the Issuing Authority with such financial or other relevant information as is requested.

(ii) Should the Licensee demonstrate that any such additional cable television license(s) have been granted on terms and conditions more favorable or less burdensome, on the whole, than those contained in this Renewal License, the Issuing Authority shall consider and negotiate, in good faith, equitable amendments to this Renewal License.

(c) In the event that the Licensee believes that there is an entity operating in the City that (i) is providing Video Services to residents of the City; (ii) is using, crossing and occupying the City's Public Ways; (iii) has not been issued a Cable Television License; and (iv) such an entity is lawfully required to apply for and obtain a Cable Television License in order to provide Cable Service using, crossing and occupying the Public Ways, then the Licensee may bring such matter to the attention of the Issuing Authority. The Licensee shall provide the Issuing Authority with such legal, financial, technical and/or other relevant information in writing supporting its position in a timely manner.

(i) In the event that a Cable Television License to provide Cable Service can lawfully be required of such entity, a Cable Television License to provide Cable Service is subsequently granted to such entity, and the Licensee believes that such additional Cable Television License has been granted on terms and conditions more favorable or less burdensome, on the whole, than those contained in this Renewal License, the Licensee may request, in writing, that the Issuing Authority convene a public hearing on that issue. Along with said written request, the Licensee shall provide the Issuing Authority with detailed written reasons for its position, including legal, financial, technical and/or other relevant information. At the public hearing, the Issuing Authority shall afford the Licensee an opportunity to demonstrate that any such additional Cable Television License is on terms more favorable or less burdensome, on the whole, than those contained in this Renewal License.

(ii) Should the Licensee demonstrate that such additional Cable Television License to provide Cable Services, using, crossing and occupying the Public Ways has been granted on terms and conditions more favorable or less burdensome, on the whole, than those contained in this Renewal License, the Issuing Authority shall consider and negotiate, in good faith, equitable amendments to this Renewal License.

(d) The issuance of additional license(s) shall be subject to applicable federal law(s), M.G.L. Chapter 166A and applicable regulations promulgated thereunder.

Section 2.4---POLICE AND REGULATORY POWERS

By executing the Renewal License, the Licensee acknowledges that its rights are subject to the powers of the City to adopt and enforce general ordinances and by-laws necessary to the safety and welfare of the public. The Licensee shall comply with all applicable State laws and or City ordinances and by-laws of general applicability, and not specific to this Renewal License, the Cable System or the Licensee, rules, and regulations governing construction within a Public Way and shall apply all of such standards to construction within a private way in the City. If the City's exercise of the police power results in a material alteration of the terms and conditions of this License, then the parties shall negotiate amendments in good faith to this Agreement to the mutual satisfaction of both parties to ameliorate the negative effects on Licensee of the material alteration.

Section 2.5---REMOVAL

Upon termination of the Renewal License by passage of time or otherwise, and unless (1) the Licensee has its license renewed for another term or (2) the Licensee has transferred the Cable Television System to a transferee approved by the Issuing Authority, pursuant to applicable law, the Licensee shall, if requested by the Issuing Authority, remove all of its supporting structures, poles, Trunk and Distribution System, and all other appurtenances from the Public Ways and places and shall restore all areas. If such removal is not complete within six (6) months after such termination and Issuing Authority request, the Issuing Authority may deem any property not removed as having been abandoned. Notwithstanding the foregoing, the parties reserve any and all rights they may have under the Cable Act with respect to disposition of the Cable System in connection with termination of this Renewal License as a result of the License not being renewed or otherwise lawfully terminated. Notwithstanding the above, the Licensee shall not be required to remove its Cable System, or to relocate the Cable System as a result of revocation, denial of renewal, or any other lawful action to forbid or disallow Comcast from providing Cable Services, if the Cable System is actively being used to facilitate any other services as allowed by applicable law.

Section 2.6---TRANSFER OF THE RENEWAL LICENSE

(a) Neither this Renewal License, nor control thereof, shall be transferred, assigned or disposed

of in any manner, voluntarily or involuntarily, directly or indirectly, or by transfer of control of any Person, company and/or other entity holding such Renewal License to any other Person, company and/or other entity, without the prior written consent of the Issuing Authority, which consent shall not be arbitrarily or unreasonably withheld or delayed. Such consent shall be given only after a public hearing upon a written application therefore on forms as may be prescribed by the Department and/or the FCC. An application for consent to a transfer or assignment, if required, shall be signed by the Licensee and by the proposed transferee or assignee or by their representatives, evidence of whose authority shall be submitted with the application.

(b) Pursuant to applicable federal and State law(s), in considering a request to transfer control of the Renewal License, the Issuing Authority may consider such factors as the transferee's financial capability, management experience, technical expertise, legal ability to operate the Cable System under the existing license and any other criteria allowable under such applicable law(s) and/or regulation(s).

(c) For purposes of this Section 2.6, the word "control" shall comply with the definition of such in 207 CMR 4.01, as may be amended from time to time. Pursuant to 207 CMR 4.01(2), a transfer or assignment of this Renewal License or control thereof between commonly controlled entities, between affiliated companies, or between parent and subsidiary corporations, shall not constitute a transfer or assignment of this Renewal License or control thereof under M.G.L. c. 166A, Section 7. For purposes of this Section 2.6(c) only, under 207 CMR 4.00, an "affiliated company" is any Person or entity that directly or indirectly, or through one or more intermediaries, controls, is controlled by, or is under common control with another Person or entity.

(d) The consent or approval of the Issuing Authority to any assignment or transfer of the Renewal License granted to the Licensee shall not constitute a waiver or release of the rights of the City in and to the streets and Public Ways or any other rights of the City under the Renewal License, and any such transfer shall, by its terms, be expressly subordinate to the terms and conditions of this Renewal License.

(e) The Licensee shall promptly notify the Issuing Authority of any action requiring the consent of the Issuing Authority pursuant to this Section 2.6.

(f) Subject to applicable law, the Licensee shall submit to the Issuing Authority an original and five (5) copies, unless otherwise required, of the application and FCC Form 394 requesting such transfer or assignment consent.

(g) The consent of the Issuing Authority shall be given only after a public hearing to consider the written application for transfer. Unless otherwise allowed by applicable law(s), the Issuing Authority shall make a decision on said written application within one hundred twenty (120) days of receipt of said application. To the extent provided for under the Cable Act, after one hundred twenty (120) days, the application shall be deemed approved.

(h) Any proposed controlling or owning Person or transferee approved by the Issuing Authority shall be subject to all of the terms and conditions contained in the Renewal License.

Section 2.7---EFFECT OF UNAUTHORIZED TRANSFER ACTION

(a) Any transfer of the Cable System without complying with Section 2.6 above shall be null and void and shall be deemed a material breach of this Renewal License.

(b) If the Issuing Authority denies its consent to any such action and a transfer has nevertheless been effected, the Issuing Authority may revoke and terminate the Renewal License, unless such transfer is otherwise allowable by applicable law.

ARTICLE 4
CABLE SYSTEM LOCATION, MAINTENANCE
AND OPERATIONAL STANDARDS

Section 4.1---SERVICE AVAILABLE TO ALL RESIDENTS

(a) Licensee shall make Cable Service available to every residential dwelling unit within the City where the minimum density per mile is at least fifteen (15) dwelling units per aerial mile or thirty (30) dwelling units per underground mile, or fractional portion thereof; provided, however, that any plant extension is measured from the applicable Trunk and Distribution System from which a usable Cable Service signal may be obtained and provided Licensee is able to obtain any necessary easements, permits and/or permission from owners of property and multiple dwelling units.

(b) The Cable Television System shall be further extended to all areas in the City that do not meet the requirements of Section 4.1(a) above upon the request of the prospective Subscribers in such areas and based upon the following cost calculation: The cost of wiring such areas shall be calculated by taking the capital cost of extending such Service divided by the number of Subscribers in such area minus the costs of extending Service to the Subscriber in an area that meets the fifteen (15) homes per aerial mile or thirty (30) per underground mile of cable plant and/or fractional proportion thereof density requirement as specified in subsection (a) above. The resulting cost shall equal the per Subscriber contribution relating to line extension of Cable Service in that particular area of the City, or

$$\frac{C}{LE} - \frac{CA}{P} = SC$$

- * C equals the cost of construction of new plant from the termination of existing cable plant;
- * CA equals the average cost of construction per mile in the primary service area;
- * P equals the fifteen (15) homes per linear mile of aerial plant and thirty (30) homes per linear mile in the case of underground plant, as measured from the applicable Trunk and

Distribution System from which a usable Cable Service signal may be obtained;

* SC equals the per Subscriber contribution in aid of construction in the line extension area;
and

* LE equals the number of dwelling units requesting service in the line extension area.

Section 4.2---LINE EXTENSION PROCEDURES

(a) Any potential Subscriber located in an area of the City without Cable Service may request such Service from the Licensee. In areas meeting the requirements of Section 4.1(a) above, the Licensee shall extend Service to the area promptly, but in no case later than sixty (60) days after all necessary permits are obtained and make-ready requirements are completed. The Licensee shall expeditiously seek all necessary permits. In those areas with less than fifteen (15) Subscribers per aerial mile or thirty (30) per underground mile of cable plant as described in subsection 4.1(a) above, the Licensee, shall, within thirty (30) days following a request for Service, conduct a survey to determine the number of homes in the immediate area and shall inform the requesting potential Subscriber or the City of the possible contribution in aid of construction (see Section 4.1(b) above) that will be charged. The Licensee shall apply for pole attachment agreements within thirty (30) days of receiving the contribution in aid of construction from all prospective Subscribers. Cable Television Service(s) shall be made available and fully activated to all requesting Subscribers who made a contribution in aid of construction within ninety (90) days of receipt of pole attachment agreements, subject to Force Majeure and the completion of utility pole make-ready.

(b) The Licensee shall make its Cable System available to residents of the City, unless legally prevented from doing so, subject only to the installation charges herein.

(c) Installation charges shall be non-discriminatory. A standard aerial installation charge shall be established by the Licensee which shall apply to any residence located not more than two hundred feet (200') from the existing aerial Trunk and Distribution System and additions thereto. The Licensee may charge residents located more than two hundred feet (200') from the existing aerial Trunk and Distribution System, and additions thereto, time and materials charges subject to Licensee first providing the resident with a verbal estimate, or written estimate if requested, of the costs of a non-standard installation and subject to such resident consenting to same. The Licensee shall have up to, but not more than, ninety (90) days in order to survey, design and install non-standard installations that are more than two hundred feet (200') from the existing aerial Trunk

and Distribution System and additions thereto, subject to Force Majeure and the completion of utility pole make ready work. Any dwelling unit within two hundred feet (200') underground from the Trunk and Distribution System shall be entitled to a standard underground installation, unless the sub-surface of an underground installation is a hard surface or requires boring through rock or a similar hard surface (i.e. concrete, asphalt, etc.). The Licensee may charge residents located more than two hundred underground feet (200') from the existing Trunk and Distribution System, and additions thereto, time and materials charges subject to Licensee first providing the resident with a verbal estimate, or written estimate if requested, of the costs of a non-standard underground installation and subject to such resident consenting to same.

Section 4.3---LOCATION OF THE CABLE TELEVISION SYSTEM

The Licensee shall own, install, operate and maintain the Cable Television System within the City of Westfield. Licensee-owned poles, towers and other obstructions shall be erected so as not to interfere with vehicular or pedestrian traffic over Public Ways. The erection and location of all Licensee-owned poles, towers, if any, and other obstructions shall be in accordance with all applicable State laws and City ordinances/by-laws and regulations.

Section 4.4---ABOVE GROUND & UNDERGROUND FACILITIES

(a) The Licensee shall comply with applicable law(s) regarding any requirement(s) to remove Licensee-owned poles, overhead wires and associated overhead structures within all or any part or parts of the City. At such time as these wires and structures are placed underground by the telephone and electric utility company, the Licensee shall likewise place its facilities underground at no cost to the City, unless the City makes municipal public funds available to similarly situated occupiers of the rights-of-way to aid in the cost of said underground project(s) subject to applicable law and legally required appropriation requirements. Any costs incurred by Licensee for relocating the Cable System shall be reimbursed to Licensee in the event municipal or other public funds are raised for the project and made available to other similarly situated users of the Public Way subject to applicable law and legally required.

(b) Licensee-owned underground cable lines shall be placed beneath the pavement subgrade in compliance with applicable City ordinances/by-laws, rules, regulations and/or standards. It is

the policy of the City that existing poles for electric and communication purposes should be utilized wherever possible and that underground installation is preferable to the placement of additional poles.

(c) If the City makes available municipal funds to reimburse similarly situated utilities for the placement of underground utilities, the City shall reimburse Licensee for any costs incurred by Licensee for relocating the Cable System. If such costs are not available for reimbursement, the Licensee reserves its right to pass those costs through to Subscribers if and to the extent allowed by applicable law.

(d) Nothing in this Section 4.4 shall be construed to require the Licensee to construct, operate, or maintain underground any ground-mounted appurtenances in the Public Way as of the Effective Date such as Subscriber taps, line extenders, system passive devices, amplifiers, power supplies, pedestals, or other related equipment.

Section 4.5---TREE TRIMMING

In the installation of amplifiers, poles, other appliances or equipment and in stringing of cables and/or wires as authorized herein, the Licensee shall avoid all unnecessary damage and/or injury to any and all shade and ornamental trees in and along the streets, alleys, Public Ways and places in the City. The Licensee shall be subject to M.G.L. Chapter 87 and shall comply with all rules established by the Issuing Authority and/or its designee(s) during the term of the Renewal License. Whenever the Licensee takes up or disturbs any pavement, sidewalk or other improvement of any Public Way or public place, the same shall be replaced and the surface restored in as good condition as before entry as soon as practicable. If the Licensee fails to make such restoration within a reasonable time, the Issuing Authority may fix a reasonable time for such restoration and repairs and shall notify the Licensee in writing of the restoration and repairs required and the time fixed for performance thereof. Upon failure of the Licensee to comply within the specified time period, the Issuing Authority may cause proper restoration and repairs to be made, and the reasonable expense of such work shall be paid by the Licensee upon demand by the Issuing

Authority.

Section 4.7---TEMPORARY RELOCATION

The Licensee shall temporarily raise or lower its wires or other equipment upon the reasonable request of any Person holding a building moving permit issued by the City. The expense of such raising or lowering shall be paid by the Licensee, unless otherwise required or permitted by applicable law. The Licensee shall be given reasonable notice necessary to maintain continuity of Service.

If the City makes available municipal funds to reimburse similarly situated utilities for the placement of underground utilities or related to street construction, change or establishment of street grade, or the construction of any public improvement or structure, the City shall reimburse Licensee for any costs incurred by Licensee for relocating the Cable System. If such costs are not available for reimbursement, the Licensee reserves its right to pass those costs through to Subscribers if and to the extent allowed by applicable law.

Section 4.9---SAFETY STANDARDS

The Licensee shall construct, install, operate, maintain and remove the Cable Television System in conformance with the applicable provisions of the Occupational Safety and Health Administration regulations, the Massachusetts Electrical Code, the National Electrical Code, the National Electrical Safety Code, the rules and regulations of the Department and the FCC, all State and local laws of general applicability, any other generally applicable regulations, and all land use restrictions as the same exist or may be amended hereafter. Enforcement of such codes shall be by the appropriate regulatory authority.

Section 4.10---PEDESTALS

Pedestals housing passive devices may be installed and utilized by the Licensee in and on the City's Public Way(s) for the provision of Cable Service(s), subject to the Licensee applying for and receiving a permit for such installation and/or utilization. In any cases in which Pedestals housing passive devices are to be utilized, in City Public Ways or within the City public lay-out, such equipment must be installed in accordance with applicable DPW regulations; provided, however, that the Licensee may place active devices (amplifiers, line extenders, power supplies, etc.) in a low-profile electronic control box at City approved locations to be determined when the Licensee applies for a permit. All pedestals and low-profile boxes shall be shown on the Cable System maps submitted to the City in accordance with Section 4.13 *infra*. In the event that the Licensee is no longer utilizing any such Pedestals for Cable Service(s), the Licensee shall remove any such Pedestals from the Public Ways in a timely manner, unless the Licensee is otherwise permitted to use such Pedestals pursuant to applicable law.

The Licensee shall be subject to all laws, ordinances, by-laws and/or regulations regarding private property in the course of constructing, upgrading, installing, operating and maintaining the Cable Television System in the City. The Licensee shall promptly repair or replace all private property, real and personal, damaged or destroyed as a result of the construction, installation, operation or maintenance of the Cable System at its sole cost and expense.

Section 4.12---RIGHT TO INSPECTION OF SYSTEM

The Issuing Authority or its designee(s) shall have the right, at its cost, to inspect all construction and installation work performed subject to the provisions of this Renewal License in order to ensure compliance with the terms and conditions of this Renewal License and all other applicable law. Any such inspection shall not interfere with the Licensee's operations, except in emergency situations. Except for emergency situations, the Issuing Authority shall provide the Licensee with timely and reasonable notice of any such inspection(s). The Licensee shall have the right to have a representative present at any such inspection. Both parties shall make a good faith effort to work with each other to schedule any such inspections at a mutually convenient time.

Section 4.13---CABLE SYSTEM MAPS

The Licensee shall provide the Issuing Authority or its designee, upon written request by the Issuing Authority, with strand maps of the Cable System. If changes are made in the Cable System located in the Public Way, the Licensee shall file updated strand maps not more than once annually; provided, however, Licensee shall not be required to file changed strand map(s) if such a map is filed with a City department during any Public Way road opening permit, grant of location, etc. application process.

Section 4.14---SERVICE INTERRUPTION

The interest on such additional fee shall be charged from the due date at the Prime Rate during the period that such additional amount is owed. **EXHIBIT 1
FCC TECHNICAL SPECIFICATIONS**

**TITLE 47—TELECOMMUNICATION
CHAPTER I--FEDERAL COMMUNICATIONS COMMISSION
PART 76--MULTICHANNEL VIDEO AND CABLE TELEVISION SERVICE**

§ 76.605 Technical standards.

(a) As of December 30, 1992, unless otherwise noted, the following requirements apply to the performance of a cable television system as measured at any subscriber terminal with a matched impedance at the termination point or at the output of the modulating or processing equipment (generally the headend) of the cable television system or otherwise as noted. The requirements are applicable to each NTSC or similar video downstream cable television channel in the system:

(1)(i) The cable television channels delivered to the subscriber's terminal shall be capable of being received and displayed by TV broadcast receivers used for off-the-air reception of TV broadcast signals, as authorized under part 73 of this chapter; and

(ii) Cable television systems shall transmit signals to subscriber premises equipment on frequencies in accordance with the channel allocation plan set forth in the Electronics Industries Association's "Cable Television Channel Identification Plan, EIA IS-132, May 1994" (EIA IS-132). This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 522(a) and 1 CFR Part 51. Cable systems are required to use this channel allocation plan for signals transmitted in the frequency range 54 MHz to 1002 MHz. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 522(a) and 1 CFR Part 51. Copies of EIA IS-132 may be obtained from: Global Engineering Documents, 2805 McGraw Ave., Irvine CA 92714. Copies of EIA IS-132 may be inspected during normal business hours at the following locations: Federal Communications Commission, 1919 M Street, NW, Dockets Branch (Room 239), Washington, DC, or the Office of the Federal Register, 800 North Capitol Street, NW, suite 700, Washington, DC. This requirement is applicable on May 31, 1995, for new and re-built cable systems, and on June 30, 1997, for all cable systems.

(2) The aural center frequency of the aural carrier must be $4.5 \text{ MHz} \pm 5 \text{ kHz}$ above the frequency of the visual carrier at the output of the modulating or processing equipment of a cable television system, and at the subscriber terminal.

(3) The visual signal level, across a terminating impedance which correctly matches the internal impedance of the cable system as viewed from the subscriber terminal, shall not be less than 1 millivolt across an internal impedance of 75 ohms (0 dBmV). Additionally, as measured at the end of a 30 meter (100 foot) cable drop that is connected to the subscriber tap, it shall not be less than 1.41 millivolts across an internal impedance of 75 ohms (+3 dBmV). (At other impedance values, the minimum visual signal level, as viewed from the subscriber terminal, shall be the square root of $0.0133 (Z)$ millivolts and, as measured at the end of a 30 meter (100 foot) cable drop that is connected to the subscriber tap, shall be 2 times the square root of $0.00662(Z)$ millivolts, where Z is the appropriate impedance value.)

(4) The visual signal level on each channel, as measured at the end of a 30 meter cable drop that is connected to the subscriber tap, shall not vary more than 8 decibels within any six-month interval, which must include four tests performed in six-hour increments during a 24 hour period in July or August and during a hour period in January or February, and shall be maintained within:

(i) 3 decibels (dB) of the visual signal level of any visual carrier within a 6 MHz nominal frequency separation;

(ii) 10 dB of the visual signal level on any other channel on a cable television system of up to 300 MHz of cable distribution system upper frequency limit, with a 1 dB increase for each additional 100 MHz of cable distribution system upper frequency limit (e.g., 11 dB for a system at 301-400 MHz; 12 dB for a system at 401-500 MHz, etc.); and

(iii) A maximum level such that signal degradation due to overload in the subscriber's receiver or terminal does not occur.

(5) The rms voltage of the aural signal shall be maintained between 10 and 17 decibels below the associated visual signal level. This requirement must be met both at the subscriber terminal and at the output of the modulating and processing equipment (generally the headend). For subscriber terminals that use equipment which modulate and remodulate the signal (e.g., baseband converters), the rms voltage of the aural signal shall be maintained between 6.5 and 17 decibels below the associated visual signal level at the subscriber terminal.

(6) The amplitude characteristic shall be within a range of ± 2 decibels from 0.75 MHz to 5.0 MHz above the lower boundary frequency of the cable television channel, referenced to the average of the highest and lowest amplitudes within these frequency boundaries.

- (i) Prior to December 30, 1999, the amplitude characteristic may be measured after a subscriber tap and before a converter that is provided and maintained by the cable operator.
- (ii) As of December 30, 1999, the amplitude characteristic shall be measured at the subscriber terminal.
- (7) The ratio of RF visual signal level to system noise shall be as follows:
- (i) From June 30, 1992, to June 30, 1993, shall not be less than 36 decibels.
- (ii) From June 30, 1993 to June 30, 1995, shall not be less than 40 decibels.
- (iii) As of June 30, 1995, shall not be less than 43 decibels.
- (iv) For class I cable television channels, the requirements of paragraphs (a)(7)(i), (a)(7)(ii) and (a)(7)(iii) of this section are applicable only to:
- (A) Each signal which is delivered by a cable television system to subscribers within the predicted Grade B contour for that signal;
- (B) Each signal which is first picked up within its predicted Grade B contour;
- (C) Each signal that is first received by the cable television system by direct video feed from a TV broadcast station, a low power TV station, or a TV translator station.
- (8) The ratio of visual signal level to the rms amplitude of any coherent disturbances such as intermodulation products, second and third order distortions or discrete-frequency interfering signals not operating on proper offset assignments shall be as follows:
- (i) The ratio of visual signal level to coherent disturbances shall not be less than 51 decibels for noncoherent channel cable television systems, when measured with modulated carriers and time averaged; and
- (ii) The ratio of visual signal level to coherent disturbances which are frequency-coincident with the visual carrier shall not be less than 47 decibels for coherent channel cable systems, when measured with modulated carriers and time averaged.
- (9) The terminal isolation provided to each subscriber terminal:
- (i) Shall not be less than 18 decibels. In lieu of periodic testing, the cable operator may use specifications provided by the manufacturer for the terminal isolation equipment to meet this standard; and
- (ii) Shall be sufficient to prevent reflections caused by open-circuited or short-circuited subscriber terminals from producing visible picture impairments at any other subscriber terminal.
- (10) The peak-to-peak variation in visual signal level caused by undesired low frequency disturbances (hum or repetitive transients) generated within the system, or by inadequate low frequency response, shall not exceed 3 percent of the visual signal level. Measurements made on a single channel using a single unmodulated carrier may be used to demonstrate compliance with this parameter at each test location.
- (11) As of June 30, 1995, the following requirements apply to the performance of the cable television system as measured at the output of the modulating or processing equipment (generally the headend) of the system:
- (i) The chrominance-luminance delay inequality (or chroma delay), which is the change in delay time of the chrominance component of the signal relative to the luminance component, shall be within 170 nanoseconds.
- (ii) The differential gain for the color subcarrier of the television signal, which is measured as the difference in amplitude between the largest and smallest segments of the chrominance signal (divided by the largest and expressed in percent), shall not exceed $\pm 20\%$.
- (iii) The differential phase for the color subcarrier of the television signal which is measured as the largest phase difference in degrees between each segment of the chrominance signal and reference segment (the segment at the blanking level of O IRE), shall not exceed ± 10 degrees.
- (12) As an exception to the general provision requiring measurements to be made at subscriber terminals, and without regard to the type of signals carried by the cable television system, signal leakage from a cable television system shall be measured in accordance with the procedures outlined in § 76.609(h) and shall be limited as follows:

Frequencies	Signal leakage limit (micro-volt/ meter)	Distance in meters (m)
Less than and including 54 MHz, and over 216 MHz	15	30
Over 54 up to and including 216 MHz	20	3

(b) Cable television systems distributing signals by using methods such as nonconventional coaxial cable techniques, noncoaxial copper cable techniques, specialized coaxial cable and fiber optical cable hybridization techniques or

specialized compression techniques or specialized receiving devices, and which, because of their basic design, cannot comply with one or more of the technical standards set forth in paragraph (a) of this section, may be permitted to operate: Provided, That an adequate showing is made pursuant to § 76.7 which establishes that the public interest is benefited. In such instances, the Commission may prescribe special technical requirements to ensure that subscribers to such systems are provided with an equivalent level of good quality service.

Note 1: Local franchising authorities of systems serving fewer than 1000 subscribers may adopt standards less stringent than those in § 76.605(a). Any such agreement shall be reduced to writing and be associated with the system's proof-of-performance records.

Note 2: For systems serving rural areas as defined in § 76.5, the system may negotiate with its local franchising authority for standards less stringent than those in §§ 76.605(a)(3), 76.605(a)(7), 76.605(a)(8), 76.605(a)(10) and 76.605(a)(11). Any such agreement shall be reduced to writing and be associated with the system's proof-of-performance records.

Note 3: The requirements of this section shall not apply to devices subject to the provisions of §§ 15.601 through 15.626.

Note 4: Should subscriber complaints arise from a system failing to meet § 76.605(a)(6) prior to December 30, 1999, the cable operator will be required to provide a converter that will allow the system to meet the standard immediately at the complaining subscriber's terminal. Further, should the problem be found to be system-wide, the Commission may order all converters on the system be changed to meet the standard.

Note 5: Should subscriber complaints arise from a system failing to meet § 76.605(a)(10), the cable operator will be required to remedy the complaint and perform test measurements on § 76.605(a)(10) containing the full number of channels as indicated in § 76.601(b)(2) at the complaining subscriber's terminal. Further, should the problem be found to be system-wide, the Commission may order that the full number of channels as indicated in § 76.601(b)(2) be tested at all required locations for future proof-of-performance tests.

Note 6: No State or franchising authority may prohibit, condition, or restrict a cable system's use of any type of subscriber equipment or any transmission technology.

BILLING AND TERMINATION OF SERVICE

10.01: Billing Practices Notice

- (1) Every cable television operator shall give written notice of its billing practices to potential subscribers before a subscription agreement is reached. Such notice shall include practices relating to the frequency and timing of bills, payment requirements necessary to avoid account delinquency, billing dispute resolution procedures and late payment penalties.
- (2) A copy of the cable television operator's billing practices notice, work order and sample subscriber bill shall be filed by March 15th of each year with the Commission, the issuing authority, and the company's local office, where they shall be available for public inspection. If an operator amends its billing practices notice, work order or subscriber bill after submitting the annual filing, it shall file copies of the amendments with the Commission, the issuing authority and the company's local office.
- (3) At least 30 days prior to implementing a change of one of its billing practices, the cable television operator shall notify in writing the Commission, the issuing authority and all affected subscribers of the change and include a description of the changed practice.
- (4) Statements about billing practices in work orders, marketing, materials and other documents shall be consistent with the billing practices notice.

10.02: Services, Rates and Charges Notice

- (1) The cable television operator shall give notice of its services, rates and charges to potential subscribers before a subscription agreement is reached.
- (2) At least 30 days prior to implementing an increase in one of its rates or charges or a substantial change in the number or type of programming services, the operator shall notify, in writing, the Commission, the issuing authority and all affected subscribers of the change and include a description of the increased rate or charge. The notice shall list the old and new rate or charge and, if applicable, the old and new programming services provided.
- (3) Every cable television operator shall fully disclose in writing all of its programming services and rates, upon request from a subscriber.
- (4) Every cable television operator shall fully disclose in writing all of its charges for installation, disconnection, downgrades and upgrades, reconnection, additional outlets, and rental, purchase and/or replacement due to damage or theft of equipment or devices used in relation to cable services, upon request from a subscriber.
- (5) Every cable television operator shall provide written notice of the charge, if any, for service visits and under what circumstances such charge will be imposed, upon request from a subscriber.
- (6) A copy of the cable operator's programming services, rates and charges shall be filed by March 15th of each year with the Commission, the issuing authority and the company's local office where it shall be made available for public inspection. If an operator amends its notice after the annual filing, it shall file a copy of the amendment with the Commission, the issuing authority and the company's local office.
- (7) A cable operator shall not charge a subscriber for any service or equipment that the subscriber has not affirmatively requested by name. This provision, however, shall not preclude the addition or deletion of a specific program from a service offering, the addition or deletion of specific channels from an existing tier of service, or the restructuring or division of existing tiers of service that do not result in a fundamental change in the nature of an existing service or tier of service.

10.03: Form of Bill

- (1) The bill shall contain the following information in clear, concise and understandable language and format:
 - (a) The name, local address and telephone number of the cable television operator. The telephone number shall be displayed in a conspicuous location on the bill and shall be accompanied by a statement that the subscriber may call this number with any questions or complaints about the bill or to obtain a description of the subscriber's rights under 207 CMR 10.07 in the event of a billing dispute;
 - (b) the period of time over which each chargeable service is billed including prorated periods as a result of establishment and termination of service;

- (c) the dates on which individually chargeable services were rendered or any applicable credits were applied;
- (d) separate itemization of each rate or charge levied or credit applied, including, but not be limited to, basic, premium service and equipment charges, as well as any unit, pay-per-view or per item charges;
- (e) the amount of the bill for the current billing period, separate from any prior balance due;
- (f) The date on which payment is due from the subscriber.
- (2) Cable operators may identify as a separate line item of each regular subscriber bill the following:
 - (a) The amount of the total bill assessed as a franchise fee and the identity of the franchising authority to whom the fee is paid;
 - (b) The amount of the total bill assessed to satisfy any requirements imposed on the cable operator by the franchise agreement to support public, educational, or governmental channels or the use of such channels;
 - (c) The amount of any other fee, tax, assessment, or charge of any kind imposed by any governmental authority on the transaction between the operator and the subscriber. In order for a governmental fee or assessment to be separately identified under 207 CMR 10.03, it must be directly imposed by a governmental body on a transaction between a subscriber and an operator.
- (3) All itemized costs shall be direct and verifiable. Each cable operator shall maintain a document in its public file which shall be available upon request that provides the accounting justification for all itemized costs appearing on the bill.

10.04: Advance Billing and Issuance of Bill

- (1) In the absence of a license provision further limiting the period of advance billing, a cable operator may, under uniform nondiscriminatory terms and conditions, require payment not more than two months prior to the last day of a service period.
- (2) A cable subscriber may voluntarily offer and a cable operator may accept advance payments for periods greater than two months.
- (3) Upon request, a cable television operator shall provide subscribers with a written statement of account for each billing period and a final bill at the time of disconnection.

10.05: Billing Due Dates, Delinquency, Late Charges and Termination of Service

- (1) Subscriber payment is due on the due date marked on the bill, which shall be a date certain and in no case a statement that the bill is due upon receipt. The due date shall not be less than five business days following the mailing date of the bill.
- (2) A subscriber account shall not be considered delinquent unless payment has not been received by the company at least 30 days after the bill due date.
- (3) The following provisions shall apply to the imposition of late charges on subscribers:
 - (a) A cable television operator shall not impose a late charge on a subscriber unless a subscriber is delinquent, the operator has given the subscriber a written late charge notice in a clear and conspicuous manner, and the subscriber has been given at least eight business days from the date of delinquency to pay the balance due.
 - (b) A charge of not more than a lawful percent of the balance due may be imposed as a one-time late charge.
 - (c) No late charge may be assessed on the amount of a bill in dispute.
- (4) A cable television operator shall not terminate a subscriber's service unless the subscriber is delinquent, the cable operator has given the subscriber a separate written notice of termination in a clear and conspicuous manner, and the subscriber has been given at least eight business days from the mailing of the notice of termination to pay the balance due. A notice of termination shall not be mailed to subscribers until after the date of delinquency.
- (5) A cable television operator shall not assess a late charge on a bill or discontinue a subscriber's cable television service solely because of the nonpayment of the disputed portion of a bill during the period established by 207 CMR 10.07 for registration of a complaint with the operator or during the process of a dispute resolution mechanism recognized under 207 CMR 10.07.
- (6) Any charge for returned checks shall be reasonably related to the costs incurred by the cable company in processing such checks.

10.06: Charges for Disconnection or Downgrading of Service

- (1) A cable television operator may impose a charge reasonably related to the cost incurred for a downgrade of service, except that no such charge may be imposed when:
 - (a) A subscriber requests total disconnection from cable service; or
 - (b) A subscriber requests the downgrade within the 30 day period following the notice of a rate increase or a substantial change in the number or type of programming services relative to the service (s) in question.
- (2) If a subscriber requests disconnection from cable television service prior to the effective date of an increase in rates, the subscriber shall not be charged the increased rate if the cable television operator fails to disconnect service prior to the effective date. Any subscriber who has paid in advance for the next billing period and who

requests disconnection from service shall receive a prorated refund of any amounts paid in advance.

10.07: Billing Disputes

- (1) Every cable television operator shall establish procedures for prompt investigation of any billing dispute registered by a subscriber. The procedure shall provide at least 30 days from the due date of the bill for the subscriber to register a complaint. The cable television operator shall notify the subscriber of the result of its investigation and give an explanation for its decision within 30 working days of receipt of the complaint.
- (2) The subscriber shall forfeit any rights under 207 CMR 10.07 if he or she fails to pay the undisputed balance within 30 days.
- (3) Any subscriber in disagreement with the results of the cable television operator's investigation shall promptly inquire about and take advantage of any complaint resolution mechanism, formal or informal, available under the license or through the issuing authority before the Commission may accept a petition filed under 207 CMR 10.07(4).
- (4) The subscriber or the cable television operator may petition the Commission to resolve disputed matters within 30 days of any final action. Final action under 207 CMR 10.07(3) shall be deemed to have occurred 30 days after the filing of a complaint.

In resolving the dispute, the Commission may receive either written or oral statements from the parties, and may conduct its own investigation. PART 76--CABLE TELEVISION SERVICE

Subpart H--General Operating Requirements

Sec. 76.309 Customer Service Obligations

(a) A cable franchise authority may enforce the customer service standards set forth in paragraph (c) of this section against cable operators. The franchise authority must provide affected cable operators ninety (90) days written notice of its intent to enforce the standards.

(b) Nothing in this rule should be construed to prevent or prohibit:

(1) A franchising authority and a cable operator from agreeing to customer service requirements that exceed the standards set forth in paragraph (c) of this section;

(2) A franchising authority from enforcing, through the end of the franchise term, pre-existing customer service requirements that exceed the standards set forth in paragraph (c) of this section and are contained in current franchise agreements;

(3) Any State or any franchising authority from enacting or enforcing any consumer protection law, to the extent not specifically preempted herein; or

(4) The establishment or enforcement of any State or municipal law or regulation concerning customer service that imposes customer service requirements that exceed, or address matters not addressed by the standards set forth in paragraph (c) of this section.

(c) Effective July 1, 1993, a cable operator shall be subject to the following customer service standards:

(1) Cable system office hours and telephone availability--

(i) The cable operator will maintain a local, toll-free or collect call telephone access line which will be available to its subscribers 24 hours a day, seven days a week.

(A) Trained company representatives will be available to respond to customer telephone inquiries during normal business hours.

(B) After normal business hours, the access line may be answered by a service or an automated response system, including an answering Machine. Inquiries received after normal business hours must be responded to by a trained company representative on the next business day.

(ii) Under normal operating conditions, telephone answer time by a customer representative, including wait time, shall not exceed thirty (30) seconds when the connection is made. If the call needs to be transferred, transfer time shall not exceed thirty (30) seconds. These standards shall be met no less than ninety percent of the time under normal operating conditions, measured on a quarterly basis.

(iii) The operator will not be required to acquire equipment or perform surveys to measure compliance with the telephone answering standards above unless an historical record of complaints indicates a clear failure to comply.

(iv) Under normal operating conditions, the customer will receive a busy signal less than three (3) percent of the time.

(v) Customer service center and bill payment locations will be open at least during normal business hours and will be conveniently located.

(2) Installations, outages and service calls. Under normal operating conditions, each of the following four standards will be met no less than ninety-five percent of the time measured on a quarterly basis:

(i) Standard installations will be performed within seven (7) business days after an order has been placed. "Standard" installations are those that are located up to 125 feet from the existing distribution system.

(ii) Excluding conditions beyond the control of the operator, the cable operator will begin working on "service interruptions" promptly and in no event later than 24 hours after the interruption becomes known. The cable operator must begin actions to correct other service problems the next business day after notification of the service problem.

(iii) The "appointment window" alternatives for installations, service calls, and other installation activities will be either a specific time or, at maximum, a four hour time block during normal business hours. (The operator may

schedule service calls and other installation activities outside of normal business hours for the express convenience of the customer.)

(iv) An operator may not cancel an appointment with a customer after the close of business on the business day prior to the scheduled appointment.

(v) If a cable operator representative is running late for an appointment with a customer and will not be able to keep the appointment as scheduled, the customer will be contacted. The appointment will be rescheduled, as necessary, at a time that is convenient for the customer.

(3) Communications between cable operators and cable subscribers--

(i) Notifications to subscribers--

(A) The cable operator shall provide written information on each of the following areas at the time of installation of service, at least annually to all subscribers, and at any time upon request:

(3) Installation and service maintenance policies;

(4) Instructions on how to use the cable service;

(6) Billing and complaint procedures, including the address and telephone number of the local franchise authority's cable office.

(B) Customers will be notified of any changes in rates, programming services or channel positions as soon as possible in writing. Notice must be given to subscribers a minimum of thirty (30) days in advance of such changes if the change is within the control of the cable operator. In addition, the cable operator shall notify subscribers thirty (30) days in advance of any significant changes in the other information required by paragraph (c)(3)(i)(A) of this section. Notwithstanding any other provision of Part 76, a cable operator shall not be required to provide prior notice of any rate change that is the result of a regulatory fee, franchise fee, or any other fee, tax, assessment, or charge of any kind imposed by any Federal agency, State, or franchising authority on the transaction between the operator and the subscriber.

(ii) Billing--

(A) Bills will be clear, concise and understandable. Bills must be fully itemized, with itemizations including, but not limited to, basic and premium service charges and equipment charges. Bills will also clearly delineate all activity during the billing period, including optional charges, rebates and credits.

(B) In case of a billing dispute, the cable operator must respond to a written complaint from a subscriber within 30 days.

(iii) Refunds--Refund checks will be issued promptly, but no later than either--

(A) The customer's next billing cycle following resolution of the request or thirty (30) days, whichever is earlier, or

(B) The return of the equipment supplied by the cable operator if service is terminated.

(iv) Credits--Credits for service will be issued no later than the customer's next billing cycle following the determination that a credit is warranted.

(4) Definitions--
