INTRODUCTION

Communication outreach strategies for your community, including key messaging, printable materials, and social media content.

WINTER WEATHER PREPAREDNESS

The Massachusetts Emergency Management Agency (MEMA) has developed this toolkit to help you share important messaging about Winter Weather Preparedness with your community. The toolkit includes key messages, which can be tailored to write local press releases or talking points, as well as sample social media posts and graphics that can be used or adapted for your community.

PREPAREDNESS FOR INDIVIDUALS WITH ACCESS AND FUNCTIONAL NEEDS

- **Language Access:** MEMA has both physical and digital copies of general disaster preparedness flyers translated in seven languages, which are available here: [Mass.gov/ready](https://www.mass.gov/ready)
- **Access & Functional Needs:** Be sure to include alternative text for your graphics on social media, and consider that not everyone in your community uses social media. Reaching individuals with access and functional needs is especially important since this population may need to take extra steps to ensure they are prepared for emergencies. Consider reaching out to or posting emergency preparedness messaging within the following: places of worship, senior/community centers, housing authorities, public transportation (i.e. bus shelters).
- **Helpful Links:**
 - MEMA
 - MEMA provides information on [**how to support individuals with access and functional needs**](#) on our website

WINTER WEATHER PREPAREDNESS FOR PEOPLE WITH ACCESS AND FUNCTIONAL NEEDS

- **Create an emergency kit tailored to your needs:** medications, medical supplies, mobility aids, batteries, etc. Don't forget a communication plan!
- **Stay informed!** Follow local authorities for updates and evacuation orders. Use accessible sources for information.
- **Notify your utility provider** if you rely on powered medical equipment.
- **Notify neighbors, friends, and family about your situation and emergency plan.** Stay connected for support and updates.

KEY MESSAGING

Before a Winter Storm

- **Ensure your vehicle is ready for safe winter driving.** Keep the gas tank at least half-full, have a Winter Emergency Car Kit in the trunk, and make sure all parts of vehicle are ready for winter: wipers, tires, etc.
- **Build an emergency kit** for disasters that contains items that will sustain you & your family's specific needs if you are not able to leave your home.
- **Ensure your home is ready for winter.** Remove dead or rotting trees and branches around your home that could fall and cause injury or damage. Ensure your smoke and carbon monoxide alarms are working and have fresh batteries.
- **Be a good neighbor.** Ask elderly neighbors or neighbors with disabilities if they would like your assistance with preparing.
- **Prepare for power outages** by charging cell phones and electronics and setting your refrigerator and freezer to their coldest settings. If you use electricity to get well water, fill your bathtub with water to use for flushing toilets.

During a Winter Storm

- **Drivers are encouraged to stay off the road if they can during the storm.** If you must travel, clear snow off your vehicle, maintain a safe distance, take it slow, give yourself extra time & #DontCrowdThePlow.
- **Stay inside if possible during the storm** when conditions may be dangerous. If you are outside, watch for signs of frostbite and hypothermia.
- **Be careful when shoveling,** especially heavy, wet snow & take frequent breaks. Over-exertion can be dangerous.

KEY MESSAGING

After a Winter Storm

- If you are able, **please help public safety officials by shoveling out the nearest fire hydrant** to your home or business.
- **Protect you and your family from Carbon Monoxide after the storm.** Shovel away snow from exhaust vents around your home, clear your vehicle's tailpipe before starting your car and ensure working CO detectors.
- **Stay away from downed utility wires.** Always assume a downed power line is live.
- **If your power is out, follow these power outage safety tips.**
 - Report power outages to your utility company.
- **Use generators and grills outside** because their fumes contain carbon monoxide. Make sure your carbon monoxide detectors are working as it is a silent, odorless, killer. See more Generator Safety Tips.
- **Check with your local authorities or call 2-1-1 to find locations of warming centers or shelters near you or for other storm-related questions.**
- **Be a good neighbor.** Check on family, friends, and neighbors, especially the elderly, those who live alone, those with medical conditions and those who may need additional assistance.

More resources and safety tips available on MEMA's website, www.mass.gov/mema

SOCIAL MEDIA POSTS

Below are examples of social media posts that can be used to equip your communities with winter weather preparedness knowledge. Included within this toolkit are infographics and printable materials that can be used on your own social media or as inspiration to create your own. Engage your audience further by adding emojis and linking information from local resources.
