

WIOA WORKFORCE SYSTEMS INTEGRATION WORKGROUP

A. Purpose of the Workgroup:

The workgroup will provide input into an interface with information systems used by the WIOA Partner agencies to:

- institute a single sign-on and common intake/registration for individuals seeking services under WIOA programs,
- allow tracking of shared customers across WIOA partner agencies,
- create an on-line dashboard for individuals with information on resources and services relevant to their needs, and
- create a dashboard for staff with information on the status, services and options for individuals they serve.

B. Membership:

Members will participate in sessions to identify business requirements and components for the new interface. They may also participate in drafting Requests for Proposals (RFP) for procurement of software and technical resources.
