

Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Water Management Act Program

Form WMA-E1

Computation of Withdrawal Volume for Cranberry Cultivation

Please do not mail. Submit through ePlace. See instructions.

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

Check applicable item:

- Combined grand total form
- Individual withdrawal point or bog
- Registered withdrawal point or bog

Registration # _____

Withdrawal point name and address _____

- For each bog in your application, fill out the chart below to show projected withdrawal volumes in millions of gallons.
NOTE: 100,000 gallons = 0.10 MG
- Add** the individual bog irrigation volumes and enter onto a separate Form E1 (a Combined Grand Total form) to show the total projected withdrawal volumes.
- If no change in acreage in production is anticipated, ditto marks ("") may be used.

Year	Acres x	10 AF/Year x	.325851 =	Million Gallons/Year /	365 Days/year =	Million Gallons/Day
