### **Observations and Recommendations**

1. The inmate population was 1,104 at the time of inspection.
2. At the time of the inspection, the boiler was not functioning properly which affected the supply of hot water to the kitchen. The warewash machine was unable to reach the correct temperature to properly sanitize the dishes. As a result, the kitchen staff stated they would begin using disposable trays and utensils until the boiler had been repaired and the warewash machine can reach the appropriate temperature. At the completion of the inspection the boiler had not been repaired.
3. The Department recommends that all showers be identified with a numbering system. This will assist the Department and correctional employees to better identify where issues exist.

This facility does not comply with the Department's Regulations cited above. In accordance with 105 CMR 451.404, please submit a plan of correction within 10 working days of receipt of this notice, indicating the specific corrective steps to be taken, a timetable for such steps, and the date by which correction will be achieved. The plan should be signed by the Superintendent or Administrator and submitted to my attention, at the address listed above.
