

wanted you to know as a Massachusetts and Cape Cod resident, I am thoroughly opposed to the wind farm project being proposed by Cape Wind Associates. I think Nantucket Sound is a historically significant, beautiful resource, it would be a shame to see it developed for private gain. It should be protected from this kind of development. The farm itself will be a nightmare for those who have enjoyed the Cape's beauty for centuries and it would not be feasible if not for a serious incentive from the government. This I find ironic. The photo of the transformer in today's Cape Cod Times is absolutely shocking. Please do all you can to stop this flawed project.

Thanks,

Paul and Kate Wylie
