

END OF BEAM PLAN

SCALE: $\frac{3}{4}" = 1'-0"$

NOTES:

1. See the prestressed section of Part I of the Bridge Manual for the design of the transverse stirrups.
2. Bottom transverse stirrups shall be placed at a multiple of the top transverse stirrups spacing with a maximum spacing of 14".
3. The extent of the beam shown in the End of Beam Plan should be long enough to indicate typical transverse stirrup spacing throughout the beam.
4. The actual number and location of the prestressing strands shall be designed and shall conform to Dwg. No.'s 4.2.5 and 4.2.6.
5. See the prestressed section of Part I of the Bridge Manual for the design of the end transverse stirrups and vertical stirrups. The horizontal leg lengths of the vertical stirrups shall equal the depth of the beam and shall be dimensioned on the plan view.
6. Horizontal stirrups shall be embedded a minimum distance equal to the depth of the beam or 12" into the web of the voided section, whichever is longer. Length of embedment shall be noted on the plan view.
7. Horizontal shear reinforcement shall be designed in accordance with Article 5.8.4 of the AASHTO-LRFD and shall be spaced at a multiple of the transverse stirrups.
8. Properly note or show the location and spacing of any dowels which extend into sidewalks, curb, or barriers on the cross section and plan views of the beams.
