NOTES:

(See Dwg. No. 4.4.12 for Notes to be included on Construction Drawings, modify as necessary)

DETAILS AT ABUTMENT — SIDEWALK SECTION

SCALE: 1" = 1’-0"

Backwall reinforcement extending into the top of abutment shall be designed to resist longitudinal seismic loads. At a minimum, provide #5 @ 12".

NOTE:
The thickness of the deck slab may need to be increased to accommodate roadway profile.
