NOTES:

1. See Dwg. No. 4.4.10 for 18" and 21" deep Beams.
2. Backwall reinforcement extending into the top of abutment shall be designed to resist longitudinal seismic loads. At a minimum, provide #5 @ 12".
3. Use 7" and 10" high backwall for 12" and 15" deep Beams, respectively.
4. The thickness of the deck slab may need to be increased to accommodate roadway profile.

(See Dwg. No. 4.4.12 for Notes to be included on Construction Drawings)
