NOTES:

1. HEADED REINFORCEMENT BAR SPLICERS SHALL BE SET PERPENDICULAR TO THE FACE OF THE BEAM.

2. NOT ALL INTERMEDIATE DIAPHRAGM REINFORCEMENT IS SHOWN FOR CLARITY.

**INTERNAL DIAPHRAGM**

SCALE: $\frac{1}{4}'' = 1'-'0''$

**NOTE:**
Minimum length of void is equal to 2'. If this minimum dimension cannot be met, omit void and combine the internal diaphragms into one solid block. Include weight of this block in design calculations.
