You have TB infection (a type of TB).

This means you have TB germs in your body, but you don’t feel sick. You can’t give TB infection to your family or other people.

It is important to take medicine for TB infection now.

By taking your TB medicine, you can prevent TB disease and keep your family healthy!
Why take TB medicine now?

TB infection can turn into TB disease.

TB disease can hurt any part of the body, but it usually hurts the lungs. When people have TB disease, they usually feel sick.

If you become sick with TB disease, you might:

- ज्वरो आउने: Have fever
- वजन कम हुने: Lose weight
- थकाई लाग्ने: Feel tired
- स्फोटको लाग्ने: Cough
- राति पसिना आउने: Sweat at night

If you become sick with TB disease, you can also give TB to your family or other people.
