COMPLIANCE CHECKLIST

IP2: Oncology Nursing Unit

The following checklist is intended to be used in the plan review applications for health care facilities submitted to the Massachusetts Department of Public Health. This checklist summarizes and references the applicable requirements from the Licensure Regulations and the 2014 Edition of the FGI Guidelines for Design and Construction of Hospitals and Outpatient Facilities. Applicants must verify compliance of the plans submitted to the Department with all referenced requirements from the Licensure Regulations and FGI Guidelines when completing this Checklist. A separate Checklist must be completed for each nursing unit, hospital or clinic department, or clinical suite.

Other jurisdictions, regulations and codes may have additional requirements which are not included in this checklist, such as:

- State Building Code (780 CMR)
- Joint Commission on the Accreditation of Health Care Organizations
- CDC Guidelines for Preventing the Transmission of Mycobacterium Tuberculosis in Health Care Facilities
- USP 797
- Accessibility Guidelines of the Americans with Disabilities Act (ADA)
- Architectural Access Board Regulations (521 CMR)
- Local Authorities having jurisdiction.

Instructions:

1. All requirement lines must be completed according to the following instructions and included in the plan submissions for Self-Certification Process or Part II of the Abbreviated Review Process.
2. This checklist must be completed by the project architect or engineer based on the design actually reflected in the plans at the time of completion of the checklist.
3. Each requirement line (___) of this Checklist must be completed exclusively with one of the following symbols, unless otherwise directed in the checklist. If a functional space is not affected by a renovation project, the symbol “E” may be indicated on the requirement line (___) before the name of the functional space (associated requirements on indented lines below that name, or associated MEP requirements do not have to be completed in this case). If more than one functional space serves a given required function (e.g. patient room or exam room), that clarification should be provided in the Project Narrative, and the requirement lines are understood to only address the functional spaces that are involved in the project.

   X = Requirement is met, for new space, for renovated space, or for existing direct support space for an expanded service.

    = Check box under section titles or individual requirements lines for optional services or functions that are not included in the project area.

   E = Requirement relative to an existing suite or area that has been licensed for its designated function, is not affected by the construction project and does not pertain to a required direct support space for the specific service affected by the project.

   W = Waiver requested for specific section of the Regulations or FGI Guidelines, where hardship in meeting requirement can be demonstrated (a Physical Plant Waiver Form must be completed for each waiver request).

4. All room functions marked with “X” must be shown on the plans with the same name labels as in this checklist.
5. Mechanical, electrical & plumbing requirements are only partially mentioned in this checklist. The relevant section of the FGI Guidelines must be used for project compliance with all MEP requirements and for waiver references.
6. Oxygen, vacuum, medical air, and waste anesthesia gas disposal outlets (if required) are identified respectively by the abbreviations “OX”, “VAC”, “MA”, & “WAGD”.
7. Requirements referenced with “FI” result from formal interpretations from the FGI Interpretations Task Group.
8. The location requirements including asterisks (*) refer to the definitions of the Glossary in the beginning section of the FGI Guidelines.

Architectural Requirements

ONCOLOGY NURSING UNIT

2.2-2.2.3

PATIENT ROOM

2.2-2.2.2.1 Capacity:

(1) New Patient Room:
   - 1 bed per room

(2) Existing Patient Room:
   - maximum room capacity no more than present capacity, with maximum of 4 patients in each room

2.2-2.2.2 Space Requirements:

(1) patient rooms sized to accommodate needs of clinical services
   - single-bed rooms
   - check if not included in project

(2)(a) min. clear floor area 120 sf
(2)(b) min. clearance 3'-0" between sides of bed & any wall or any other fixed obstruction
(2)(b) min. clearance 3'-0" between foot of bed & any wall or any other fixed obstruction
(2)(b) min. 4'-0" clearance at foot of each bed for passage of beds & equipment

(2)(b) multiple bed rooms
   - check if not included in project

Bed Size for Determining Clearances:

- 40" wide by 96" long
- specifications of beds to be installed are attached to checklist

2.2-2.2.4 Protective Environment (PE) Room

(2) ICRA attached to Project Narrative to determine number & location of PE rooms

2.1-2.4.2.2 Ventilation:

(1) single-bed room
(2) provision made for personal protective equipment storage at entrance to room
(3) handwashing station in each patient room

Building Systems Requirements

Ventilation:

- Min. 4 air changes/hour

Power:

- Min. 12 receptacles
  - Min. 2 receptacles at each side of the head of the bed
  - Min. 2 receptacles on all other walls (may be omitted on exterior wall)

Nurse Call System:

- Patient station
- Emergency staff assistance station

Medical Gases:

- 1 OX, 1 VAC for each bed

*Common requirements for all patient rooms

Glossary

Bed Size for Determining Clearances:

- 40" wide by 96" long
- specifications of beds to be installed are attached to checklist

Ventilation:

- Min. 12 air changes per hour
- Positive pressure
- No recirculating room units
Architectural Requirements

2.1-7.2.3.1(6)  monolithic floors with integral coved 6" high wall base

Building Systems Requirements

Space ventilation & pressure relationship maintained in event of loss of normal electrical power 4/6.1.1
Supply air diffuser above patient 4/7.2.2
Diffuser design limits air velocity for patient comfort
Return/exhaust registers located near patient room door
Permanent device monitoring differential air pressure between PE room & corridor

Ventilation:
Min. 10 air changes per hour
Exhaust

Anteroom:

2.1-2.4.2.3
☐ check if not included in project
☐ for persons to don personal protective equipment before entering patient room
☐ all doors to anteroom have self-closing devices

Ventilation:
Min. 10 air changes per hour
Exhaust
Positive pressure to corridor
No recirculating room units
PE room under positive pressure to anteroom
anteroom under positive pressure to corridor

2.1-2.4.2.4(1)
(b) self-closing devices on all room exit doors
(c) doors has edge seals

2.2-2.2.4.4
Special Design Elements:
☐ monolithic ceiling
☐ all room surfaces cleanable
☐ lighting fixtures equipped with lenses & sealed

2.2-2.2.4.6
Bone marrow/stem cell transplant rooms
☐ check if not included in project
☐ close access to out-of-unit diagnostic imaging & radiation therapy equipment
☐ all patient rooms meet PE room requirements
☐ at least one patient room meets combination AII/PE room
Special Design Elements:
(a) sealed windows
☐ viewing panels in doors or walls for nursing staff observation
(b) curtains or other means to cover windows & viewing panels for patient privacy
## Architectural Requirements

### Support Areas for Oncology Unit

2.2-2.2.5.3

- **Location:**
  - (1) support areas listed are located in or readily accessible* to each nursing unit
  - (3) each support area provided on each nursing floor

2.1-2.6.1

- **Administrative Center or Nurse Station**
  - (1) space for counters
  - (2) at least one handwashing station located in, next to, or directly accessible*

2.1-2.6.2

- **Documentation Area**
  - work surface to support documentation process for number of staff who will use it at same time

2.2-2.2.6.3

- **Nurse or Supervisor Office**
  - in or readily accessible* to nursing unit

2.1-2.6.4

- **Multipurpose Room**
  - at least one multipurpose room for each facility for staff, patients & patients' families for patient conferences, reports, education, training sessions & consultation
  - accessible to each nursing unit (may serve several nursing units)

2.1-2.6.6

- **Medication Safety Zones**
  - (2) medication preparation room
  - or self-contained medication dispensing unit
    - (a) located out of circulation paths to minimize distraction & interruption
    - (c) work counters
    - (d) task lighting
    - (e) meet acoustic design criteria per 1.2-5.1
  - (1) medication preparation room
    - (a) under visual control of nursing staff
    - (b) work counter
    - (c) handwashing station
    - (d) lockable refrigerator
    - (e) locked storage for controlled drugs

## Building Systems Requirements

### Nurse Call System

- **Master Station**
- **Duty Station**

### Ventilation

- Min. 4 air changes per hour

### Sharps Containers

- check if not included in project
- sharps containers placed at height that allows users to see top of container

### Space to Prepare Medicines

- in addition to any self-contained medicine-dispensing unit
### Architectural Requirements

</table>
| 2.1-2.6.10.1 | Soiled workroom  
(1) Handwashing station  
(2) Flushing-rim clinical service sink with bedpan washer  
(3) Work counter  
(4) Space for separate covered containers  
| 2.1-2.6.10.2 | Soiled holding room  
(1) Handwashing station or hand sanitation station  
(a) Space for separate covered containers  
(b) Toilet with bedpan washer located in each inpatient toilet room  
| 2.1-2.6.11.1 | Clean linen storage  
(1) Clean linen stored in clean workroom or clean linen closet  
(2) Covered cart distribution system  
(3) Check if not included in project  
| 2.1-2.6.11.2 | Equipment & supply storage room or alcove  
(1) Min. 10 sf per patient bed  
| 2.1-2.6.11.3 | Storage space for stretchers & wheelchairs  
| 2.1-2.6.11.4 | Emergency equipment storage  
(1) Each nursing unit has at least one emergency equipment storage location  
(2) Storage locations in corridors do not infringe on min. required corridor width  
| 2.1-2.6.12 | Environmental services room  
(1) Serves one or more than one nursing unit on a floor  
(2) Readily accessible* to unit it serves  
| 2.1-2.6.12.2 | Service sink or floor-mounted mop sink  
(1) Provisions for storage of supplies & housekeeping equipment  
(2) Handwashing station or hand sanitation station  
| 2.1-2.6.8 | Ice-making equipment  
(1) Located in an enclosed space  
(2) Self-dispensing ice-making equipment in public area

**Architectural Requirements**

2.2-2.2.6.13  
____ Examination room  
☐ check if not included in project  
(1) (only if all patient rooms in nursing unit are single bedrooms)  
(2) centrally located to serve one or more nursing units on same floor

2.1-3.2.2  
____ Single-bed examination room

2.1-3.2.2.1  
Space Requirements:  
(1) min. clear floor area of 120 sf with min. clear dimension of 10'-0"  
(2)  
(a) room size permits min. clearance of 3'-0" at each side & at foot of exam table  
(b) room arrangement permits placement of exam table, recliner, or chair at an angle, closer to one wall than another, or against wall to accommodate type of patient being served

2.1-3.2.2.2  
Room Features:  
(1) examination light  
(2) storage for supplies  
(3) accommodations for written or electronic documentation  
(4) space for visitor’s chair  
(5) handwashing station

2.2-2.7  
**SUPPORT AREAS FOR STAFF**

2.2-2.2.5.3  
Location:  
(1) support areas listed are located in or readily accessible* to each nursing unit  
(3) each support area provided on each nursing floor

2.1-2.7.1  
____ Staff lounge  
____ min. 100 sf

2.1-2.7.2  
____ Staff toilet room

2.1-2.7.2.1  
____ readily accessible* to each nursing unit

2.1-2.7.2.2  
____ toilet & handwashing station

2.1-2.7.3  
____ Staff storage facilities

2.1-2.7.3.1  
____ securable closets or cabinet compartments for personal articles of staff  
____ located in or near nurse station

2.1-2.7.3.2  
____ coat storage  
☐ check if not included in project:  
____ storage of coats in closets or cabinets on each floor or in central staff locker area

**Building Systems Requirements**

Ventilation:  
____ Min. 6 air changes per hour  
Table 7.1

Nurse Call System:  
Table 2.1-2  
____ Duty station

Ventilation:  
____ Min. 10 air changes per hour  
Table 7.1  
____ Exhaust
2.2-2.2.8 SUPPORT AREAS FOR PATIENTS, FAMILIES & VISITORS

Location:
(1) support areas listed are located in or readily accessible* to each nursing unit
(3) each support area provided on each nursing floor

2.2-2.2.8.1 Family & visitor lounge
(2) lounge immediately accessible* to nursing unit served (may serve more than one nursing unit)
(4) lounge designed to minimize impact of noise & activity on patient rooms & staff functions
(6) public communication services

2.2-2.3.8.2 Space for visitor privacy
(1) area for communications
(2) patient-family information stations
(3) access to beverages & nourishment

2.2-2.2.8.3 Place for meditation & prayer
( ) dedicated quiet space to support meditation, bereavement, or prayer.

2.2-2.3.6.1 Diagnostic & Treatment Areas:
(1) Chemotherapy Infusion Center (2.2-3.12)
(2) Facilities For Imaging Services (2.2-3.4)
(3) Radiation Therapy Facilities (2.2-3.7)

2.2-2.3.6.2 Storage space for radiation body casts

2.2-2.3.9 SPECIAL DESIGN ELEMENTS

2.2-2.3.9.1 Architectural Details:
(1) no decorative water features
(2) no fish tanks
(3) no decorative plant boxes

2.2-2.3.9.2 Surfaces & Furnishings:
(1) frequently touched surfaces in patient environment of care designed to facilitate cleaning & disinfection
(2) cabinetry, casework & countertops flush surfaces that are smooth, non-porous, cleanable, wipeable & durable & do not scratch easily

2.2-2.3.9.3 Window Treatments & Privacy
(a) Curtains:
   ( ) window treatments & privacy curtains in accordance with Section 2.1-7.2.4
   ( ) no fabric drapes & curtains
Architectural Requirements

2.2-2.3.9.3 Lighting:
(1) no light coves, non-flush surfaces & areas that collect dust
(2) lighting adjustable for high visibility during procedures & still provide for sleep & comfort of patient
(3) natural lighting for patient rooms through windows

2.2-2.4 PEDIATRIC & ADOLESCENT ONCOLOGY NURSING UNIT
☐ check if not included in project

2.2-2.4.1 Rooms & spaces in pediatric & adolescent oncology nursing unit comply with Section 2.2-2.3

2.2-2.4.2.1 Patient rooms include provisions for family support (hygiene, sleeping & personal belongings).

2.2-2.4.2.2 Patient rooms separated from units serving adult populations

2.2-2.4.5 Combination airborne infection isolation/protective environment (AII/PE) room

2.2-2.4.4 At least one combination AII/PE room for each pediatric unit

2.1-2.4.2.2 Single-bed room
(1) provision made for personal protective equipment storage at entrance to room
(2) handwashing station in each patient room
(3) separate room with toilet, handwashing station & bathtub or shower
(4) monolithic floors with integral coved 6" high wall base

2.1-2.4.2.3 Anteroom
(1) for persons to don personal protective equipment before entering patient room
(2) all doors to anteroom have self-closing devices

Building Systems Requirements

Ventilation:
- Min. 12 air changes per hour Table 7.1
- Exhaust
- Positive pressure
- No recirculating room units

Ventilation:
- Min. 10 air changes per hour Table 7.1
- Exhaust
- Negative pressure

Supply air diffusers located above patient bed
Exhaust registers located near patient room door

Ventilation:
- Min. 10 air changes per hour Table 7.1
- Exhaust
- Positive pressure to both AII/PE room & corridor
or
- Negative pressure to both AII/PE room & corridor

<tbody>
<tr>
<td>(1)</td>
<td>(a) Doors between corridors, rooms, or spaces subject to occupancy swing type or sliding doors &lt;br&gt; (b) Sliding doors &lt;br&gt; (check if not included in project) &lt;br&gt; (c) manual or automatic sliding doors comply with NFPA 101 &lt;br&gt; (d) code review sheet attached &lt;br&gt; (e) no floor tracks</td>
</tr>
<tr>
<td>(2)</td>
<td>(a) Min. 45.5&quot; clear door width for patient rooms &amp; diagnostic/treatment areas &lt;br&gt; (b) Min. 83.5&quot; clear door height for patient rooms &amp; diagnostic/treatment areas</td>
</tr>
</tbody>
</table>
| (3) | (a) Swinging doors for personnel use in addition to sliding doors <br> (check if not included in project) <br> (b) min. clear width 34.5" <br> (3) Doors do not swing into corridors (except doors to non-occupiable spaces & doors with emergency breakaway hardware)
Lever hardware
Doors for patient bathing/toilet facilities
- 2 doors separated by horizontal distance equal to one-half length of max. diagonal room dimension
- or door that swings outward
- or door equipped with emergency rescue hardware
- or sliding door

Toilet room door opening in public area or corridor maintains visual privacy
Bathing room door opening in corridor maintains visual privacy

2.1-7.2.2.5 WINDOWS IN PATIENT ROOMS:
(1) Natural light by means of window to outside
(3) Min. net glazed area no less than 8% of floor area of room served
(a) Operable windows
☐ operation limited with either stop limit/restrictor hardware or open guard/screen

2.1-7.2.2.6 insect screens

2.1-7.2.2.7 GLAZING MATERIALS:
(2) Safety glass-tempered or plastic glazing materials used for shower doors & bath enclosures
☐ check if not included in project
(4) Glazing within 18" of floor
☐ check if not included in project
- safety glass, wire glass or plastic break-resistant material

2.1-7.2.2.8 HANDWASHING STATIONS:
(1) Handw. stations in patient care areas located to be visible & unobstructed
(3) anchoring suitable for vertical or horizontal force of 250 lbs.
(4) Handwashing Station Countertops:
☐ check if not included in project
- porcelain, stainless steel or solid surface materials
- plastic laminate countertops
☐ check if not included in project
- substrate marine-grade plywood (or equivalent) with impervious seal

2.1-7.2.2.9 GRAB BARS:
(2) Grab bars anchored to sustain concentrated load of 250 lbs.
(3) Bariatric design
2.1-7.2.2.10 HANDBRAILS:
(1) Handrails installed on both sides of patient use corridors
(3) Rail ends return to wall or floor
(4) Smooth non-textured surface free of rough edges
(5) Eased edges & corners
(6) Finishes cleanable

2.1-7.2.2.12 NOISE CONTROL:
(1) Recreation rooms, exercise rooms, equipment rooms & similar spaces where impact noises may be generated are not located directly over patient bed areas
(2) Partitions, floors & ceiling construction in patient areas conform to Table 1.2-6
2.1-7.2.3 SURFACES
2.1-7.2.3.1 FLOORING & WALL BASES:
(1) Selected flooring surfaces cleanable & wear-resistant for location
(2) Smooth transitions between different flooring materials
(3) Flooring surfaces, including those on stairways, stable, firm & slip-resistant
(b) Carpet
☐ check if not included in project
- provides stable & firm surface
(4) Floors & wall bases of soiled workrooms, toilet rooms & other wet cleaned areas are not physically affected by cleaning solutions

2.1-7.2.3.2 WALLS & WALL PROTECTION:
(1) Washable wall finishes
(a) Wall finishes near plumbing fixtures smooth, scrubbable & water-resistant
(b) Monolithic wall surfaces in areas routinely subjected to wet spray or splatter
2.1-7.2.3.3 CEILINGS:

(1) Ceilings in areas occupied by patients, in clean rooms & soiled rooms:
   (a) cleanable with routine housekeeping equipment
   (b) acoustic & lay-in ceilings
       ☐ check if not included in project
       ☐ do not create ledges or crevices

2.1-8.2 HEATING, VENTILATION, & AIR-CONDITIONING (HVAC) SYSTEMS

4/6.3.1 Outdoor Air Intakes:
   4/6.3.1.1 Located min. 25 feet from cooling towers & all exhaust & vent discharges
       ☐ Bottom of air intake is at least 6'-0" above grade

4/6.3.1.2 Roof Mounted Air Intakes:
       ☐ check if not included in project
       ☐ bottom min. 3'-0" above roof level

4/6.3.2 Exhaust Discharges for Infectious Exhaust Air:
       ☐ check if not included in project
       ☐ Ductwork under negative pressure (except in mechanical room)
       ☐ Discharge in vertical direction at least 10'-0" above roof level
       ☐ Located not less than 10'-0" horizontally from air intakes & operable windows/doors

4/6.4 Filtration:
   ☐ Filter banks conform to Table 6.4

4/6.4.1 Filter Bank #1 placed upstream of heating & cooling coils

4/6.4.2 Filter Bank No. 2 installed downstream of cooling coils & supply fan

4/6.5 Heating & Cooling Systems:
   ☐ no radiators or convectors in special care areas

4/6.7 Air Distribution Systems:
   ☐ Ducted return or exhaust systems in spaces listed in Table 7.1 with required pressure relationships
   ☐ Ducted return or exhaust systems in inpatient care areas

4/6.7.3 Smoke & Fire barriers:
   ☐ HVAC zones coordinated with compartmentation to minimize ductwork penetrations of fire & smoke barriers

2.1-8.2.1.1 Acoustic Considerations:
   ☐ Equipment location or acoustic provisions limit noise associated with outdoor mechanical equipment to 65 dBA at building façade

2.1-8.2.1.2 Ventilation & Space-Conditioning:
   (1) ☐ All rooms & areas used for patient care have provisions for ventilation
   (2) ☐ Natural ventilation only provided in non-sensitive areas & patient rooms via operable windows
       ☐ check if not included in project
       ☐ Mechanical ventilation provided for all rooms & areas in facility in accordance with Table 7.1 of Part 4

2.1-8.3 ELECTRICAL SYSTEMS

2.1-8.3.2 ELECTRICAL DISTRIBUTION & TRANSMISSION

2.1-8.3.2.1 Switchboards Locations:
   (1) ☐ Located in areas separate from piping & plumbing equipment
   (a) ☐ Not located in rooms they support
   (b) ☐ Accessible to authorized persons only
   (c) ☐ Located in dry, ventilated space free of corrosive gases or flammable material

2.1-8.3.2.2 Panelboards:
   ☐ Panelboards serving life safety branch emergency circuits only serve same floor, floor above & floor below

MDPH/DHCFLC 05/15 IP2
Panelboards serving critical branch emergency circuits only serve same floor.

New panelboards not located in exit enclosures.

**EMERGENCY ELECTRICAL SERVICE**

- Emergency power per NFPA 99, NFPA 101 & NFPA 110

**LIGHTING**

- Light fixtures in wet areas have smooth, cleanable, shatter-resistant lenses & no exposed lamps

- Patient Rooms:
  - Reading light for each patient
  - Controls accessible to patient in bed
  - Light source covered by diffuser or lens
  - Flexible light arms
  - Night lighting
  - Switch in patient room
  - Lights path from room entrance to bed
  - Lights path from bed to toilet

- Nursing Unit Corridors:
  - General illumination
  - Reduced light levels at night

- Exam/Treatment Rooms:
  - Portable or fixed exam light

**ELECTRICAL EQUIPMENT**

- Required handwashing station or scrub sink tied to building electrical service

**ELECTRICAL RECEPTACLES**

- Receptacles in Corridors:
  - Duplex grounded receptacles installed approx. 50'-0" apart
  - Duplex grounded receptacles installed approx. within 25'-0" of corridor ends

- Receptacles in Patient Care Areas:
  - Receptacles provided according to Table 2.1-1

- Emergency System Receptacles:
  - Distinctively colored or marked for identification

**CALL SYSTEMS**

- Nurse call system locations provided as required in Table 2.1-2
- Nurse call systems report to attended location with electronically supervised visual & audible signals
- Call systems meet requirements of UL 1069 Standard for Hospital Signaling & Nurse Call Equipment
- Wireless system check if not included in project meet requirements of UL 1069

**Patient Call Stations**

- Each patient sleeping bed provided with patient call station equipped for two-way voice communication
  - Visible signal once call station has been activated
  - Reset switch for canceling call
  - Visible signal in corridor at patient room door
  - Additional visible signals installed at corridor intersections
  - Visible & audible signal at nurse call duty stations in clean workroom, soiled workroom, medication preparation room, documentation area or other charting facilities, nourishment area, nurse master station of nursing unit or patient care area
  - Call stations in diagnostic & treatment areas per Table 2.1-2

**Bath Stations**

- Provided at each patient toilet, bathtub or shower stall
  - Alarm turned off only at bath station where it was initiated
  - Located 5'-0" to 6'-0" above floor in shower stalls & tubs, within normal view of user
  - Within reach of staff without need to step into shower or tub
2.1-8.3.7.4 Staff emergency stations for summoning local staff assistance for non-life-threatening situations at each patient care location

2.1-8.3.7.5 Code call station equipped with continuous audible or visual signal at point of origin

2.1-8.4.2 PLUMBING & OTHER PIPING SYSTEMS

2.1-8.4.2.5 Heated Potable Water Distribution Systems:
- systems serving patient care areas are under constant recirculation
- non-recirculated fixture branch piping does not exceed 25'-0" in length
- no dead-end piping
- water-heating system has supply capacity at minimum temperatures & amounts indicated in Table 2.1-3

2.1-8.4.3 PLUMBING FIXTURES

2.1-8.4.3.1 Materials material used for plumbing fixtures non-absorptive & acid resistant

2.1-8.4.3.2 Handwashing Station Sinks:
- basins reduce risk of splashing to areas where direct patient care is provided, sterile procedures are performed & medications are prepared
- basin min. 144 square inches
- min. dimension 9 inches
- made of porcelain, stainless steel, or solid-surface materials

2.1-8.4.3.7 Bedpan Washers:
- bedpan washer provided in each inpatient toilet room

2.1-8.4.4 MEDICAL GAS & VACUUM SYSTEMS

2.1-8.4.4.2 Vacuum discharge at least 25'-0" from all outside air intakes, doors & operable windows
2.1-8.6.2 **ELECTRONIC SURVEILLANCE SYSTEMS**
- □ check if not included in project
  2.1-8.6.2.1 Devices in patient areas mounted in unobtrusive & tamper-resistant enclosures
  2.1-8.6.2.2 Monitoring devices not readily observable by general public or patients
  2.1-8.6.2.3 Receive power from emergency electrical system
