

Historical Shoreline Change Rate Stony Beach to Nantasket Beach (1938 to 2001, in feet/year)

(+ = accretion, - = erosion)

Length of colored bars illustrates relative magnitude of shoreline change.
Dashed black lines show littoral cell boundaries.

This map is from the South Shore Coastal Hazards Characterization Atlas, published by the Massachusetts Office of Coastal Zone Management (CZM). CZM makes no representations or warranties with respect to the definitiveness of the data presented. Prepared by Applied Coastal Research and Engineering, Inc., December 2005.
