

System Requirements

For Career Ready 101 and KeyTrain

Our curriculum can be accessed from any computer, tablet, or mobile device with a browser that supports HTML5. No apps to install. No plugins necessary (except if you are using Windows XP).

Examples of what you can use

- Windows PC (Vista or newer) with a recent version of Internet Explorer, Chrome, Firefox, or Opera
- Windows XP with Internet Explorer 8 and an up-to-date Flash plug-in (minimum 8.2)
- Mac OS X (10.2 or newer) with a recent version of Safari, Chrome, Firefox, or Opera
- iPad, iPod, or iPhone (iOS 4 or newer) with Safari, Chrome, Firefox, or Opera
- Android tablets and smartphones (version 2.1 or newer)
- Blackberry PlayBook and smartphones (version 10 or newer)
- Microsoft Surface tablets and Windows phones
- Kindle Fire

Browser Settings

- JavaScript enabled
- Cookies enabled

Internet Connection

- 3g/4g/LTE or a wi-fi connection is needed if using a mobile device.
- For best results, a high-speed Internet connection (DSL, cable, etc.) is recommended.
- For multi-user sites, the responsiveness of the program depends on the amount of available bandwidth, taking into consideration other traffic that already exists on the connection. As a rule of thumb, a T-1, cable modem, or DSL connection can support up to 30 simultaneous users with the sound turned on and up to 150 with the sound turned off.

Speakers/Headphones

- Required for Writing, Listening, Workplace Observation, and Teamwork
- Recommended for Applied Mathematics, Reading for Information, Locating Information, and Applied Technology

Additional Software

To handle imports and exports, you need a spreadsheet viewer such as Microsoft Excel or Open Office (administrators and instructors only).

Security

If running a firewall or other security software, exceptions may need to be added to allow all communication to and from *.keytrain.com and *.careerready101.com.
