PURPOSE
The Massachusetts Emergency Management Agency (MEMA) developed this resource guide to assist local communities in their planning efforts to integrate considerations for individuals with disabilities and others with access and functional needs into local emergency plans, programs, services and activities.

Annual review and revision of this resource guide is the culmination of cooperative efforts by MEMA’s Access and Functional Needs Advisory Committee members. The committee is comprised of the following agencies and organizations:

- Boston Public Health Commission, Office of Public Health Preparedness
- MA Emergency Management Agency
- MA Office of Disability
- Department of Children and Families
- MA Department of Public Health
- Boston Office of Emergency Management
- Center for Living and Working Inc.
- Stavros Center for Independent Living
- Department of Development Services
- MA Commission for the Deaf and Hard of Hearing
- MA Commission for the Blind
- MA Office of Refugees and Immigrants
- MA Department of Mental Health
- MA Department of Public Health: Office of Health Equity
- UMass Medical School: E.K. Shriver Center
- Federal Emergency Management Agency (Region 1)
- Executive Office of Elder Affairs
SECTION 1.0: KEY TERMS

Access and Functional Need Accommodations:
The Department of Homeland Security (DHS) defines access and functional need accommodations as circumstances that are met for providing physical, programmatic, and effective communication access to the whole community by accommodating individual requirements through universal accessibility and/or specific actions or modifications.

Extended Definition: Includes assistance, accommodation or modification for mobility, communication, transportation, safety, health maintenance, etc.; need for assistance, accommodation or modification due to any situation (temporary or permanent) that limits an individual’s ability to take action in an emergency.

Annotation: When physical, programmatic, and effective communication access is not universally available, individuals may require additional assistance in order to take protective measures to escape to and/or from, access either refuge and/or safety in an emergency or disaster, and/or may need other assistance, accommodations or modifications in an emergency or disaster through pre-planning by emergency management, first response agencies and other stakeholders or in sheltering or other situations from notification and evacuation, to sheltering, to return to pre-disaster level of independence.¹

Individuals with Disabilities and Others with Access and Functional Needs: Individuals with access and functional needs may include, but are not limited to, people with disabilities, children, older adults, and populations having limited English proficiency, limited access to transportation, and/or limited access to financial resources to prepare for, respond to, and recover from the emergency.

Disability:
The Americans with Disabilities Act (ADA) defines a person with a disability as a person who has a physical or mental impairment that substantially limits one or more major life activity. This includes people who have a record of such an impairment, even if they do not currently have a disability. It also includes individuals who do not have a disability but are regarded as having a disability. The ADA also makes it unlawful to discriminate against a person based on that person’s association with a person with a disability.

Whole Community (concept):
As a concept, Whole Community is a means by which residents, emergency management practitioners, organizational and community leaders, and government officials can collectively understand and assess the needs of their respective communities and determine the best ways to organize and strengthen their assets, capacities, and interests. By doing so, a more effective path to societal security and resilience is built. In a sense, Whole Community is a philosophical approach on how to think about conducting emergency management.

**Functional Needs Support Services (FNSS):**
Defined as services that enable individuals to maintain their independence in a general population shelter. FNSS includes:

- Reasonable modification to policies, practices, and procedures
- Durable medical equipment (DME)
- Consumable medical supplies (CMS)
- Personal assistance services (PAS)
- Other goods and services as needed

Children and adults requiring FNSS may have physical, sensory, mental health, and cognitive and/or intellectual disabilities affecting their ability to function independently without assistance. Others that may benefit from FNSS include women in late stages of pregnancy, elders, and people needing bariatric equipment.

**Service Animal**
Under the Americans with Disabilities Act (1990), a service animal is defined as a dog, or in some instances, a miniature horse, that has been individually trained to do work or perform tasks for an individual with a disability. The task(s) performed by the dog must be directly related to the person’s disability.

*See Section 2.4 for Service Animal Statewide Guidance in Massachusetts.*

**Consumable Medical Supplies (CMS):**
Medical supplies (medications, diapers, bandages, etc.) that are ingested, injected, or applied and/or are one time use only.

**Durable Medical Equipment (DME):**
Medical equipment (e.g., walkers, canes, wheelchairs) used by persons with a disability to maintain their usual level of independence.

**Personal Assistance Services (PAS):**
Formal and informal services provided by paid personnel, personal attendants, friends, family members, and volunteers that enable children and adults to maintain their usual level of independence in a general population shelter. These services (when necessary) may include, but are not limited to, assisting with:

- Basic personal care
- Grooming
- Eating
- Bathing
- Toileting
- Dressing and undressing
- Walking
- Transferring
- Maintaining health and safety
Activities of daily living include but are not limited to:

- Taking medications
- Communicating
- Accessing programs and services
SECTION 2.0: LEGAL FOUNDATION

2.1 Federal Legislation, Regulations and Policy

Pet Evacuation Transportation Standards Act of 2006
Pet Evacuation and Transportation Standards Act of 2006 - Amends the Robert T. Stafford Disaster Relief and Emergency Assistance Act to require the Director of the Federal Emergency Management Agency (FEMA) to ensure that state and local emergency preparedness operational plans address the needs of individuals with household pets and service animals prior to, during, and following a major disaster or emergency.

Authorizes the Director to: (1) study and develop plans that take into account the needs of individuals with pets and service animals prior to, during, and following a major disaster or emergency; and (2) make financial contributions, on the basis of programs or projects approved by the Director, to the states and local authorities for animal emergency preparedness purposes, including the procurement, construction, leasing, or renovating of emergency shelter facilities and materials that will accommodate people with pets and service animals.

Authorizes federal agencies to provide, as assistance essential to meeting threats to life and property resulting from a major disaster, rescue, care, shelter, and essential needs to individuals with household pets and service animals and to such pets and animals.

On July 22, 2004, President Bush signed Executive Order 13347 to strengthen emergency preparedness with respect to individuals with disabilities. This Executive Order directs the federal government to address the safety and security needs of people with disabilities in emergency situations including natural and man-made disasters. To this end, the Executive Order created a Federal Interagency Coordinating Council of Emergency Preparedness and Individuals with Disabilities chaired by the DHS and comprised of several federal agencies.

Americans with Disabilities Act (ADA) of 1990 (Title II):
Prohibits discrimination on the basis of disability in employment, state and local government, public accommodations, commercial facilities, transportation, and telecommunications.

Title II covers all programs, services, and activities of state and local governments regardless of the government entity’s size or receipt of Federal funding. Title II requires that state and local governments give people with disabilities an equal opportunity to benefit from all of their programs, services, and activities (e.g. emergency programs, public education, transportation, recreation, health care, social services, courts, voting, and town meetings).

Source: https://www.ada.gov/t2hlt95.htm
**Architectural Barriers Act of 1968**
Requires that facilities designed, built, altered, or leased with certain Federal dollars, to comply with accessibility standards. It also applies to non-government facilities that have received Federal funding, such as certain schools, public housing and mass transit systems.

**Civil Rights Act of 1964:**
The Civil Rights Act of 1964 is a landmark piece of civil rights legislation in the United States that outlawed discrimination based on race, color, religion, sex, or national origin.

**Fair Housing Act of 1968, as amended:**
Prohibits housing discrimination on the basis of race, color, religion, sex, disability, familial status, or national origin. The Act covers all types of housing intended as a short or long-term residence, including the following types of housing that are often used to house persons who are displaced by disasters: shelters that house persons for more than a few days, transitional housing facilities, nursing homes, and manufactured housing.

**Post-Katrina Emergency Management Reform Act of 2006:**
Includes provisions that amend the Stafford Act to better integrate consideration of all populations and needs into general emergency management planning, response, recovery, and mitigation.

Source: [https://emilms.fema.gov/IS230c/FEM0101200.htm](https://emilms.fema.gov/IS230c/FEM0101200.htm)

**Rehabilitation Act of 1973 (Section 504- Programs, Services and Activities), as amended:**
Prohibits discrimination on the basis of disability in any program or activity that receives federal financial assistance, including federally subsidized housing programs. Section 504 requires that both Federal agencies and those receiving Federal assistance ensure that their programs are useable and accessible to persons with disabilities, including making changes to policies, practices, and procedures, and structures as a reasonable accommodation for individuals with disabilities unless doing so would require a fundamental alteration of the program or constitute an undue financial and administrative burden. In addition, Section 504 requires effective communication with people who have communication disabilities including hearing, vision, or cognitive disabilities.

Source: [http://www.ada.gov/cguide.htm#anchor65610](http://www.ada.gov/cguide.htm#anchor65610)
**Robert T. Stafford Disaster Relief and Emergency Assistance Act of 1988, as amended:**
The law that authorizes Federal assistance when the President declares a State to be a disaster area. The Act ensures that the Civil Rights of all persons receiving services or benefits from agency programs and activities are protected. No person shall, on the grounds of race, color, national origin, sex, religion, nationality, age, disability, limited English proficiency, or economic status, be denied the benefits of, be deprived of participation in, or be discriminated against any program or activity conducted by or receiving financial assistance from FEMA.

These prohibitions extend to all entities receiving Federal financial assistance from FEMA, including state and local governments.

Source: [www.fema.gov/pdf/about/stafford_act.pdf](http://www.fema.gov/pdf/about/stafford_act.pdf)

**Telecommunications Act of 1996:**
Requires that people with disabilities will have access to products and services such as telephones, cell phones, pagers, call-waiting, and operational services that were previously not accessible for many people with disabilities.

### 2.2 Commonwealth of Massachusetts Legislation and Regulations

**Disability Rights Laws in Massachusetts**

**Bill S.1172: An Act Ensuring the Safety of People with Pets in Disasters**
The definitions (Section 1) of the previously existing law were amended to include pets, in addition to service animals. From this bill, any emergency plan of operations shall include strategies to support the needs of people with household pets, and the needs of household pets under their care, including service animals.

*Local Emergency Management Directors are encouraged to investigate applicable State laws.*

### 2.3 Legal Foundation for FNSS Guidance
The Stafford Act and Post-Katrina Emergency Management Reform Act (PKEMRA), along with Federal civil rights laws, mandate integration and equal opportunity for people with disabilities in general population emergency shelters. To comply with Federal law, those involved in emergency management and shelter planning should understand the concepts of accessibility and nondiscrimination and how they apply in emergencies.
The following are key nondiscrimination concepts applicable under Federal laws, and examples of how these concepts apply to all phases of emergency management\(^2\).

1. **Self-Determination**: People with disabilities are the most knowledgeable about their own needs.

2. **No “One-Size-Fits-All”**: People with disabilities do not all require the same assistance and do not all have the same needs.
   - Many different types of disabilities affect people in different ways. Preparations should be made for people with a variety of functional needs, including people who use mobility aids, require medication or portable medical equipment, use service animals, need information in alternate formats, or rely on a caregiver.

3. **Equal Opportunity**: People with disabilities must have the same opportunities to benefit from emergency programs, services, and activities as people without disabilities.
   - Emergency recovery services and programs should be designed to provide equivalent choices for people with disabilities as they do for people without disabilities. This includes choices relating to short-term housing or other short- and long-term disaster support services.

4. **Inclusion**: People with disabilities have the right to participate in and receive the benefits of emergency programs, services, and activities provided by governments, private businesses, and nonprofit organizations.
   - Inclusion of people with various types of disabilities in planning, training, and evaluation of programs and services will ensure that all people are given appropriate consideration during emergencies.

5. **Integration**: Emergency programs, services, and activities typically must be provided in an integrated setting.
   - The provision of services such as sheltering, information intake for disaster services, and short-term housing in integrated settings keeps people connected to their support system and caregivers and avoids the need for disparate services facilities.

6. **Physical Access**: Emergency programs, services, and activities must be provided at locations that all people can access, including people with disabilities.
   - People with disabilities should be able to enter and use emergency facilities and access the programs, services, and activities that are provided. Facilities typically required to be accessible include: parking, drop-off areas, entrances and exits, security screening areas, toilet rooms, bathing facilities, sleeping areas, dining facilities, areas where medical care or human services are provided, and paths of travel to and from and between these areas.

7. **Equal Access**: People with disabilities must be able to access and benefit from emergency programs, services, and activities equal to the general population.

- Equal access applies to emergency preparedness, notification of emergencies, evacuation, transportation, communication, shelter, distribution of supplies, food, first aid, medical care, housing, and application for and distribution of benefits.

8. **Effective Communication**: People with disabilities must be given information that is comparable in content and detail to that given to the general public. It must also be accessible, understandable and timely.

- Auxiliary aids and services may be needed to ensure effective communication. These resources may include pen and paper; sign language interpreters through on-site or video; and interpretation aids for people who are deaf, deaf-blind, hard of hearing or have speech impairments. People who are blind, deaf-blind, have low vision, or have cognitive disabilities may need large print information or people to assist with reading and filling out forms.

9. **Program Modifications**: People with disabilities must have equal access to emergency programs and services, which may entail modifications to rules, policies, practices, and procedures.

- Service staff may need to change the way questions are asked, provide reader assistance to complete forms, or provide assistance in a more accessible location.

10. **No Charge**: People with disabilities may not be charged to cover the costs of measures necessary to ensure equal access and nondiscriminatory treatment.

- Examples of accommodations provided without charge to the individual may include ramps; cots modified to address disability-related needs; a visual alarm; grab bars; additional storage space for medical equipment; lowered counters or shelves; Braille and raised letter signage; a sign language interpreter; a message board; assistance in completing forms or documents in Braille, large print or audio recording.

### 2.4 Service Animal Statewide Guidance in Massachusetts: Planning for Service Animals in an Emergency Shelter Setting

The Americans with Disabilities Act (ADA, 1990) requires that state and local governments be accessible to people with disabilities. Under the ADA, state and local governments, businesses, and nonprofit organizations that serve the public generally must allow service animals to accompany people with disabilities in all areas of the facility where the public is normally allowed to go, including areas where food is served and most areas where medical care is provided.

A service animal is any dog, or in some instances, a miniature horse, that has been individually trained to do work or perform tasks for the benefit of an individual with a disability, including physical, sensory, psychiatric, intellectual, or other mental disability. The work or tasks performed by a service animal must be directly related to the handler’s disability including, but not limited to:
assisting individuals who are blind or have low vision, alerting individuals who are deaf or hard of hearing to the presence of people or sounds, pulling a wheelchair, or fetching dropped items, assisting an individual during a seizure, alerting individuals to the presence of allergens, retrieving items such as medications or a telephone, providing physical support and assistance with balance and stability, and helping people with neurological or psychiatric disabilities by preventing or interrupting impulsive or destructive behaviors.

Service animals are required to be leashed or harnessed except when performing work or tasks where such tethering would interfere with the service animal’s ability to perform. In cases where the individual is not able to hold a leash, the animal must be under control and respond to verbal commands. In addition:

- Service animals are exempt from breed bans as well as size and weight limitations.
- Service animals may or may not be certified.

How does the Americans with Disabilities Act apply to service animals in emergency shelters?

The ADA generally requires that shelters provide equal access to the many benefits that shelters provide, including safety, food, services, comfort, information, a place to sleep until it is safe to return home, and the support and assistance of family, friends, and neighbors. The ADA generally requires emergency managers and shelter operators to make reasonable modifications to policies to allow people with disabilities to be accompanied by their service animals and remain with them at all times, including if being transported to the emergency shelter, to another facility, transitioning home, etc.

Emergency shelters must make exceptions to “no pets” or “no animals” policies to allow people with disabilities to be accompanied by their service animals and remain with them at all times, including if being transported to the emergency shelter, to another facility, transitioning home, etc.

Any questions or concerns about service animals should be directed to the shelter manager.

How can a service animal be identified?

Service animals come in all breeds and sizes. Many are easily identified because they wear special harnesses, capes, vests, scarves, or patches. Others can be identified by the functions they perform for people whose disabilities can be readily observed. When none of these identifiers are present, shelter staff may ask only two questions to determine if an animal is a service animal:

1. “Do you need this animal because of a disability?”
2. “What tasks or work has the animal been trained to perform?”

If the answers to these questions reveal the animal has been trained to work or perform tasks for a person with a disability, it qualifies as a service animal and must generally be allowed to accompany its owner anywhere other members of the public are allowed to go, including areas where food is served and most areas where medical care is provided.
Under the ADA, shelter staff may not require a license, certification, ID tag, medical certificate, or any other type of documentation for a service animal. In addition, questions about the nature or severity of a person’s disability or ability to function may not be asked. It is also inappropriate to question a person’s need for a service animal or to exclude a service animal on the grounds that shelter staff or volunteers can provide the assistance normally provided by the service animal.

**Can a service animal be removed from a shelter?**

In most instances, you may not remove a service animal or ask the owner to leave the service animal elsewhere. Service animal owners may be asked to remove their animal only if:

1. The service animal is out of control and the owner does not take effective action to control it or
2. The service animal is not housebroken.

In either of these situations, the emergency manager and shelter operator should try to work with the owner to provide the needed services in an alternative form or location.

**Service animal planning considerations for shelter operations**

Many people with disabilities rely on service animals. Although it is the responsibility of the owner to feed and care for their service animals, when evacuating during an emergency, some individuals may be unable to transport the items needed to sustain their service animal in an emergency shelter environment.

Local plans should direct that, prior to an emergency or disaster, the following issues are addressed regarding service animals in an emergency shelter:

- Integrate into your emergency shelter plan those people with expertise in supporting service animal needs. Include your animal control officer and consider having a plan for emergency veterinary services.
- Identify reliable sources for food, water and supplies (ex., water bowls, food bowls, leashes, collars, disposable containers) for service animals and make sure agreements are in place to ensure that these items are available.
- Consider how you will set up the emergency shelter to accommodate people and their service animals. When estimating shelter capacity, consider that a person with a service animal may require up to 100 square feet.
- People with allergies or a fear of animals should be directed to space away from the service animal(s).
- Ensure the owner understands their responsibility for feeding and care of their service animal.

SECTION 7.0: FREE MOBILE APPLICATIONS

7.1 Show Me for Emergencies
A mobile app, piggybacked on the foundation of the Show Me booklet, and incorporated and expanded upon all of the icons and concepts from the booklet. The app includes not just shelter environments, but also emergency dispensing sites (EDS) and door-to-door outreach required for shelter-in place or evacuation directives. Much like the paper-based tool, the Show Me app is an interactive tool that was created for effective two-way communication: just as users of the booklet can use a dry erase marker to modify or create their own messages, the app incorporates a ‘write’ ability, that when selected, brings up a keyboard for custom entries to be typed.

The audience for this app includes volunteer organizations and staffers, mental health workers, and various public safety personnel. Upon opening the app, users have the option either to get started immediately or walk through a brief tutorial. The app is organized by response scenario, and end users choose their scenario based on the real life incident.

Show Me for Emergencies is available to download from both the iTunes and Google Play stores.

7.2 Show Me for Emergencies: FAC (Family Assistance Center)
Show Me for Emergencies: FAC (Family Assistance Center) is the final tool in the Show Me suite. It, too, is a free app that was built upon the foundation of the tools before it and incorporates and expands upon some of the previous icons and concepts. Show Me: FAC is intended to be used within the scenario of a mass casualty or mass fatality incident, and it’s thought that disaster relief and medical professionals like American Red Cross volunteers and forensic nurses would use the app to supplement the tools they employ to communicate information to and collect data from families and loved ones of victims.

Show Me for Emergencies: FAC is available to download from both the iTunes and Google Play stores.
7.3 Americans with Disabilities Act (ADA) Reference- Lite Edition
The ADA Reference – Lite Edition mobile Android app is available to download for free from Google Play stores.

7.4 iTranslate
iTranslate is very easy to use. It consists of one menu where you choose form over 90 languages and then just plug in a word or phrase. iTranslate is available to download for free from both the iTunes and Google Play stores.
SECTION 8.0: TOOLKITS FOR PREPAREDNESS AND PLANNING

The following toolkits are available free of cost. While these toolkits are not endorsed by MEMA, the agency believes sharing such information will help local communities in their efforts to plan for individual with disabilities and others with access and functional needs.

<table>

</table>
**Tool:** Social Vulnerability Index (SVI)  
**Website:** [http://svi.cdc.gov/index.html](http://svi.cdc.gov/index.html)  
**Source:** Agency for Toxic Substances and Disease Registry  
**Type:** Mapping tool  

**Description:** ATSDR has created a tool to help emergency response planners and public health officials identify and map the communities that will most likely need support before, during, and after a hazardous event. The Social Vulnerability Index (SVI) uses U.S. Census data to determine the social vulnerability of every Census tract. Census tracts are subdivisions of counties for which the Census collects statistical data. The SVI ranks each tract on 14 social factors, including poverty, lack of vehicle access, and crowded housing, and groups them into four related themes. Each tract receives a separate ranking for each of the four themes, as well as an overall ranking.

**Tool:** HIPPA. Disclosures for Emergency Preparedness - A Decision Tool: Overview  
**Website:** [http://www.hhs.gov/hipaa/for-professionals/special-topics/emergency-preparedness/decision-tool-overview/index.html](http://www.hhs.gov/hipaa/for-professionals/special-topics/emergency-preparedness/decision-tool-overview/index.html)  
**Source:** U.S. Department of Health and Human Services  
**Type:** Web-based interactive decision tool  

**Description:** To guide you in determining how the Privacy Rule applies to the disclosure in question, this tool focuses on the source of the information being disclosed, to whom the information is being disclosed, and the purpose of the information being disclosed. To make your determination, go to the question that is most relevant to your emergency preparedness planning need and follow the information flow to find the appropriate answer.

Many terms used in the tool are defined by law or have a special meaning. The definitions or special meanings are discussed on the relevant pages or will be linked to other locations on this Web Site to assist you.

**Tool:** Access and Functional Needs Resource Guide  
**Source:** MA Department of Public Health, Office of Preparedness and Emergency Management  
**Type:** Resource guide  

**Description:** A compilation of resources to assist in public health preparedness planning for individuals with disabilities and others with access and functional needs.
SECTION 9.0: TRAININGS AND COURSES

9.1 Online Trainings
The following online trainings are available free of cost. While these online trainings are not endorsed by MEMA, the agency believes sharing such information will help create a better awareness, and understanding, of individuals with disabilities and others with access and functional needs, and the assistance they may require before, during or after an emergency.

| Title: Planning for the Needs of Children in Disasters |
| Website: [https://training.fema.gov/is/courseoverview.aspx?code=IS-366.a](https://training.fema.gov/is/courseoverview.aspx?code=IS-366.a) |
| Description: The purpose of this course is to provide guidance for Emergency Managers and implementers of children’s programs about meeting the unique needs that arise among children as a result of a disaster or emergency. |
| Source: FEMA |
| Course ID: IS 366 |

| Title: ADA Title II Tutorial |
| Website: [http://www.adatitle2.org](http://www.adatitle2.org) |
| Description: Provide education and resources on the requirements applicable to State and Local government under Title II of the Americans with Disabilities Act (ADA). |
| Source: National Network of ADA Centers |
| Course ID: N/A |

| Title: Ready, Willing, & Able - Disaster Preparedness and Response Course on Meeting the Needs of Persons with Disabilities |
| Website: [https://www.train.org](https://www.train.org) |
| Description: Specific training covers disability etiquette, terminology, and communications and assistance techniques during disasters for assisting people with disabilities. Course participants will become familiar with various disaster assistance needs of persons with sight, mobility, hearing and cognitive disabilities. Instruction is given in the video by professional educators with one educator being a person with a disability to enhance the experience of acquainting the audience with disabilities. |
| Source: Public Health Foundation: Train National |
| Course ID: 1020884 |
9.2 In-Person Trainings and Courses

In-person trainings and courses are continuously offered through various local, state and federal agencies and non-governmental organizations. Please contact the specific agency or organization for more information about the training/course (e.g. there may be a fee for taking the course). While these trainings are not endorsed by MEMA, the agency believes sharing such information will assist local communities in their efforts to incorporate considerations for individuals with disabilities and others with access and functional needs into their community’s emergency plans, activities, programs and services.

**Title:** ADA for Municipalities (Title I and II)

**Source:** MA Office of Disability

**Contact:**
Rita DiNunzio, ADA Training Manager
Phone: 617-727-7440
Email: Rita.DiNunzio@massmail.state.ma.us.

Please note: MOD’s ability to meet training requests is based on many factors including staff availability, agency resources, etc. MOD endeavors to respond to requests for training on a first-come first-serve basis.

**Course ID:** N/A

**Description:**
This training for municipal officials and staff concerns the municipality’s obligations under Title I (Employment) and Title II (State and Local Government Services) of the ADA. This training can also be geared to specific municipal departments if the interest and attendance is significant.

The Title I portion of this training covers topics related to a municipality’s obligations to its employees, including the definition of disability, reasonable accommodation requests, who is a qualified individual with a disability, essential job functions, non-discrimination, nondiscriminatory job descriptions, confidentiality, etc.

The Title II portion of this training covers obligations a municipality has to members of the public it serves. Topics include programmatic access, reasonable accommodations, effective communication, service animals, nondiscriminatory eligibility criteria, administrative requirements under Title II (ADA Coordinator, public notice, self-evaluation, transition plan, grievance procedure, and structural changes), holding accessible meetings and events, etc.

<tr>
<th>Title: Introduction to Disaster Behavioral Health Response: Enhancing Resiliency in an Emergency</th>
<th>Description: Disaster responders and other professionals may be unaware of how significant the psychological impact of a disaster can be, even among those who appear to be unaffected. Both disaster survivors and witnesses alike may display a range of strong traumatic reactions. Disaster behavioral health is the provision of behavioral health, stress management, substance abuse services, and other interventions to disaster survivors as well as responders. Participants will learn to recognize typical traumatic reactions and how to play a supportive role to those experiencing them. Participants will also learn strategies to manage the psychological impact of emergencies on themselves and their team members.</th>

9.3 Online Informational and Training Videos

The following online training videos are related to Access and Functional Needs populations, and are available free of cost. While these online training videos are not endorsed by MEMA, the agency believes that sharing such information will help create a better awareness and understanding of such populations.

| Title: Emergency Response for People Who Have Access and Functional Needs: A Guide for First Responders | Description: 15 training videos to demonstrate to first responders and shelter staff how to assist, support and communicate with individuals in an emergency shelter setting. |
| Website: [http://terrorism.spcollege.edu/SPAWARAFN/video.html](http://terrorism.spcollege.edu/SPAWARAFN/video.html) | Source: The National Preparedness Institute at St. Petersburg College |

| Title: Just In Time Disaster Training: Functional Needs Support Services (FNSS) Shelter Operations | Description: 15 training videos to demonstrate to shelter staff how to assist, support, and communicate with individuals in an emergency shelter setting. |
| Website: [http://www.drc-group.com/project/jitt-fnss.html](http://www.drc-group.com/project/jitt-fnss.html) | Source: Disaster Resistant Communities Group LLC |

<p>| Title: Live Response: Planning for the Whole Community (June 2011) | Description: FEMA/DHS initiative, Planning for the Whole Community. A new division, referred to as the Office of Disability Integration and Coordination (ODIC), has been working diligently since 2010 to redesign how emergency management defines and serves people with access and functional needs in our communities in the event of disasters. The new paradigm works toward the notion that all segments of American society will be integrated and served through a single and inclusive emergency management approach. Important elements of the planning process; public communications needs for non-English-speaking people, visual- and hearing-impaired citizens, and others; evacuation challenges; sheltering needs; and some of the work being done to aid in disaster recovery is discussed. |
