NOTICE OF MEETING

The Department of Unemployment Assistance (DUA) is considering regulations for the Employer Medical Assistance Contribution Supplement that became law as part of *An Act Further Regulating Employer Contributions to Health Care* in August of 2017. The law temporarily changes the existing employer medical assistance contribution, creates a temporary supplemental contribution and modifies the unemployment insurance rate schedule. The updated contributions are effective for wages paid beginning January 1, 2018 and are time limited, expiring at the end of calendar year 2019. The modifications include:

- A decrease in the scheduled unemployment insurance experience rate
- A temporary increase in the existing Employer Medical Assistance Contribution (EMAC)
- A temporary supplemental contribution for employers with employees covered under MassHealth (the Massachusetts Medicaid program) or subsidized coverage through the ConnectorCare program

In recent years, Massachusetts has seen a shift in health care coverage from employer-sponsored insurance to publicly-subsidized coverage, increasing the cost to taxpayers. Since 2011, commercial coverage declined by more than 450,000 individuals due to a variety of reasons including: rising commercial health insurance costs; changes in employer sponsored insurance, implementing requirements associated with the Affordable Care Act (ACA); and regulatory landscape changes. During this same period of time, MassHealth enrollment increased by over 500,000 individuals, despite a stable population, low unemployment, and a high rate of health care coverage. The shift from commercial coverage to public coverage has contributed to significant growth in MassHealth spending.

The Administration has proposed a comprehensive package of reforms to attain a sustainable MassHealth program that are currently under review by the legislature. The time-limited increase in the Employer Medical Assistance Contribution and additional supplement will help to offset the costs for employees on subsidized coverage while longer-term reforms are established and implemented.
