Southeast Region Data Package

Massachusetts Regional Planning Initiative 2017

strategy matters

LMI Overview

- Employers in our region have difficulty filling available openings.
- This **team** – representing education, workforce development, and economic development – is asked to identify skill gaps in priority sectors and occupations in your region and prioritize solutions to these skill gap problems.
- We need to understand how occupations and industries stack up against each other given different sets of **criteria**. For example:
 - Which jobs are plentiful, and make up a large share of an industry or employer base?
 - Which jobs pay well, and have a low barrier to entry?
 - Where do employers have a hard time finding skilled workers?
 - Which jobs are critical to an emerging industry in our region?
 - Which jobs are part of a career pathway, allowing workers to graduate from a lower-skill, lower-pay job to a higher-skill, higher-pay job?
- This initial data package and forthcoming data tool demonstrate different sets of criteria to frame your team's conversations around priority sectors and occupations. Remember, this data is a starting point -- we expect that you will start here, and complement and verify this with on the ground information and stakeholder feedback.

LMI Overview and Data Overview

- **Contextual data** will give us background on birds-eye view employment in our region.
- **Industry data** will show us what **employers** in the region look like.
- **Occupation data** shows us what **jobs** people in our region do. People often perform the same jobs at different types of employers and in different industries.
- This data will be organized across several different criteria and begin to guide your consensus and decision-making process.
- The data package will focus on demand data today. The slides will move through a thinking process on how to layer in criteria to see priorities within your region.

Labor Market Overview: Unemployment Rate

*Feb 2017 Labor Force:
720,121*

Labor Market Overview: Labor Force

The unemployment rate alone is not the only indicator of employment levels in your region.

Employed v. Unemployed Residents

Median Wage

Southeast MA rivals its neighbor, the Cape and Islands, for wage, but borders Greater Boston, home to the region's highest median wage.

Occupational Employment Statistics Wages, 2015

Educational Requirements for Employment

The majority of Southeast MA-based employment requires a high school diploma or less. However, educational attainment alone does not imply a skill match.

2017 Projected Employment by Educational Requirement

Total Projected Employment: 492,619

Preview

- Goal: a preliminary understanding of where we are
- Two lenses on employer demand:
 - Industry
 - Occupation
- Some criteria that we might choose to prioritize:
 - Employment share
 - Demand Index

 - Career Pathways

Where Do We Want to Go?

Regional Goals

- 1)What criteria should we use to set priorities?
- 2)What does the employer demand data that we have available today tell us about industries and occupations in my region?
- 3)Given the information we have available, what industries or occupations could we preliminarily prioritize as a team?
- 4)What other information do we need in order to finalize these decisions?

Please discuss in small groups as directed and prepare to report your answers.
