Program Design

The CIES program is made up of six component services that assist consumers in achieving competitive employment. Consumers enter or exit component services based on need. The key measures of success for the program are the number of consumers placed in jobs for 30 days or more, called Job Placements, and the number of consumers employed beyond 90 days, called Successful Employment Outcomes (SEOs).

The State contracts with Qualified Community Rehabilitation Providers (CRPs) to deliver the CIES services. Providers are paid on a performance basis during the initiation and completion phases of services. Using a data management and billing system called EIM (Enterprise Invoice Management), the MRC CIES team tracks enrollment, expenditure, and outcomes. Data from the EIM system allows detailed analysis of provider performance and program results.

High Level Results

MRC CIES providers have consistently expended about 60% of resources on the Job Development and Placement component. A total of 1,164 consumers placed in a job as a percentage of all consumers served has steadily increased in recent years. In SFY 2017, 84% of all CIES placements, or 928 individuals, reached successful employment outcomes. These consumers achieved combined annual earnings of approximately \$10 million

CIES Job Placements by the North American Industry Classification System (NAICS)

CIES consumers are placed in a wide variety of occupations across Massachusetts. Retail Trade, followed by Accommodation & Food Services, and Health Care topped the list of industries/occupations where CIES consumers were placed.
