

BIOFUEL SUPPLIERS LIST APPLICATION

Instructions

The Biofuel Supplier List is a list of entities that have been pre-approved to supply biofuel products to Generation Units, through a fuel distributor, participating in the Alternative Energy Portfolio Standard (APS). Examples of entities on the Biofuel Supplier List include: (1) biofuel suppliers, a person or entity who produces Eligible Liquid Biofuel from eligible feedstocks, or (2) biofuel wholesalers, a person or entity who purchases Eligible Liquid Biofuel from a biofuel supplier and sells it to a biofuel distributor. A biofuel distributor is a person or entity who sells Eligible Liquid Biofuel onto an end user. In order for a biofuel distributor to be eligible to receive Alternative Energy Certificates (AECs) under the APS, they must purchase their biofuel from a supplier or biofuel wholesaler on the Department's Biofuel Suppliers List.

Any biofuel supplier or wholesaler that wishes to be included on the Department's Biofuel Suppliers List must submit the following application to the Department. The Department shall review all applications and determine if the applicant meets all eligibility requirements prior to being placed on the list. **To remain eligible, all entities listed on the Biofuel Suppliers List must reapply every year to ensure all eligibility requirements remain valid.**

The completed and signed application must be sent electronically to thermal.DOER@state.ma.us. Include in the Subject line: APS Liquid Biofuel Suppliers List Application - [Organization Name].

Please note the Department reserves the right to audit all information provided in this form and request additional information as necessary.

Organization Name: _____

Address: _____

Contact Name: _____ Contact Title: _____

Email: _____ Phone: _____

How would you like to be listed on the Biofuel Suppliers List? (*May select either or both*)

Biofuel Supplier

Biofuel Wholesaler

Certification

I certify that I have, or have been granted, authority to submit this application on behalf of, the Biofuel Supplier or Biofuel Wholesaler listed above. Furthermore, I hereby certify, under pains and penalties of perjury that I have personally examined and am familiar with the information submitted herein, and based upon my inquiry of those individuals immediately responsible for obtaining information; I believe the information is true, accurate, and complete. I am aware that there are significant penalties, both civil and criminal, for submitting false information, including possible fines. My certification below certifies all information submitted in this application, including all required attachments.

For more information please contact thermal.DOER@state.ma.us

Biofuel Wholesalers Only:

Please list all biofuel suppliers you anticipate purchasing Eligible Liquid Biofuel from:

Eligible Liquid Biofuel Supplier	Listed on the Department's Biofuel Suppliers List (Y/N)	Anticipated Percentage of Eligible Liquid Biofuel Purchased per Supplier
Total	-	100%
Estimated volume of Eligible Liquid Biofuel (gallons/year)		

Please note this information is expected to be an estimate and is only intended to provide the Department with a general plan of Eligible Liquid Biofuel purchases for information purposes

Biofuel Suppliers Only:

225 CMR 16.00 regulations requires that liquid biofuel suppliers must be registered in the Environmental Protection Agency's Renewable Fuel Standard (RFS2), 40 C.F.R. §§ 80.1400 - 80.1474, and must verify that they produce biodiesel from organic waste feedstocks. To meet these requirements, a liquid biofuel supplier must provide the following documentation with its application:

- 1) EPA Renewable Fuel Standard Attestation
- 2) Third Party Engineering Report, as submitted to the EPA RFS
- 3) Biofuel Feedstock Supply Plan, which may be either an EPA Separated Food Waste Plan (SFWP) or the template below

BIOFUEL FEEDSTOCK SUPPLY PLAN

Types of Biofuel Feedstock	Percentage	Description of Feedstock
<i>Example- Animal Waste</i>	20%	<i>Feedstock is derived from meat processing facility</i>
Total	100%	-
Estimated volume of Eligible Liquid Biofuel (gallons/year)		

Please note this information is expected to be an estimate and is only intended to provide the Department with a general plan of Eligible Liquid Biofuel purchases for information purposes

In addition to the above information on the Biofuel Feedstock Supply Plan, please provide evidence to support the description of the feedstock. This could include a contract agreement with the feedstock provider for the duration of the calendar year. It is permissible to provide an aggregation for the types of biofuels feedstocks, so long as the aggregation includes all of the same type of biofuel feedstock. For example, if used cooking oil is collected, it is not necessary to list every restaurant and the type of biofuel feedstock could be aggregated as “Used Cooking Oil”. Note that the Department reserves the right to audit all documentation to verify fuel sources.
