1 day 

The primary purpose of the Home Made Explosives (HME) and Post blast training class is to provide participants with the knowledge and recognition of energetic materials utilized in the manufacturing of homemade explosives and explosive devices. The course by design helps to reduce the human-caused threats by instructing the first responders on the identification and of pre-cursor chemicals utilized to manufacture homemade explosives (HME). This course of instruction allows first responders to identify and interrupt the manufacture of HME needed to conduct potential terrorist attacks. First responders attending this HME recognition course are able to identify the threats and hazards that might occur in their geographical area by recognizing suspect behavior and common activities related to the manufacturing of HME by potential bombing suspects. This course enhances the ability to provide a safe, secure environment for law enforcement and related security and protection operations for people and communities located within the affected areas and also for response personnel engaged in life saving and life sustaining operations. This program enhances the first responder knowledge to search for secondary devices and the post blast training allows the regional explosive detection canines the training to locate secondary devices in the post blast area.

Target audience is Law enforcement, Fire Service, Corrections, and EMS personnel.

Officer James Ljunggren is a 30 year police veteran who has been involved with the commercial blasting industry since the 1980's. Ljunggren additionally works in the Science and Technology Field and is involved in explosives research. He has worked throughout the United States, Europe and the Middle East. Ljunggren is an Explosive Odor Detection canine handler and was deployed at the Boston Marathon Bombing in 2013.

This training is funded by Homeland Security Funds.

Accident Waiver and Release from Liability (AWRL)

By selecting the I AGREE check box below, I hereby acknowledge that certain training activities conducted by the Department of Fire Services, including but not limited to participation and/or observation of live burn exercises and all other activities relating to firefighting, fire protection, explosions, hazardous materials, environmental exposure, process safety and emergency response; present certain risks which are unavoidable.

I expressly acknowledge and understand that participation and/or observation of these activities at the Massachusetts Firefighting Training Academy are inherently dangerous. Although safety precautions are taken by the Department of Fire Services, the Massachusetts Firefighting Training Academy and its staff to protect myself, a certain degree of risk remains.

However, notwithstanding these risks and being fully informed, I, hereby assume these risks. Therefore, I agree to waive any claim of liability, now and forever, relating to or arising out of the above referenced activities which could be filed against the Department of Fire Services, Massachusetts Firefighting Academy, Commonwealth of Massachusetts or any of its departments, boards, commissions, trainers, agents, servants, employees or their consultants thereof, whether in their official or individual capacity. I hereby agree to indemnify and hold harmless all entities or persons mentioned in this paragraph from any and all liability or claims, whether in law or in equity, made by other individuals or entities as a result of my activities during this training.

I certify that I am physically fit and have not been advised otherwise by a qualified medical person.

I hereby certify that I have read this document and understand its content.
