INSTITUTE FOR COMMUNITY INCLUSION promoting the inclusion of people with disabilities

# Disability by the Numbers

- In Massachusetts, **12%** of population has a disability
  - **39%** of people with disabilities participate in the workforce

VS.

- **80%** of those without disabilities
- 6% of individuals using Career Centers in MA identify as having a disability

Successful employment for people with disabilities:

# the same as everyone else

- Clear goals
- Clear plan
- Use of personal networks
- Persistence
- A good job match
- A supportive work environment

# Disability-Specific Considerations

- Disclosure
- Accommodations
- Benefit issues
- Others

New

This site is an online resource destination to support the 24 grantees implementing the Disability Employment Initiative (DEI) Grant. Throughout the country, there are approximately 85 Disability Resource Coordinators serving on the front lines in coordination with State Project Leads to help strengthen the capacity of American Job Centers to increase employment opportunities for people with disabilities. We sincerely welcome all visitors to this site in an effort to highlight the work we do and promote the lessons learned to further increase the prosperity of people with disabilities.

### TOOLS FOR ISUERD. 29 - 2017 CAREER CENTER SUCCESS: Services and Practices Made Possible by the DEI Grant

#### by Lydia Landim, Daria Domin, and Caro Narby

The DEI projects identified a series of services and practices that were found to be effective in meeting the needs of job seekers with disabilities using One-Stop Career Centers. This brief summarizes nine of these practices, and then offers reco ndations for duplication

#### 1. Federal funding made it possible to create and support a disability resource coordinator, or DRC position at each One - Ston.

A core requirement of the federal funding for the DEI project was the creation of a disability resource coordinator (DR position in each One-Stop Career Center. The DRC is a specialized role focused on the disability population. an relinator (DRC) specialized role tocused on the disability population, and ha been critical to helping centers reach out to and support job seekers with disabilities to achieve employment success.

Through interviews, it was made clear that the work of DRCs is crucial to the overall objectives of the One-Stop Career Centers, and to the success of job seekers with disabilities.

The DRC provides intensive one-on-one services and sea access to the One-Stop, using a relationship-based model. This approach is much more labor-intensive than typical One-Stop taff roles. DRCs indicated that cases are never really "closed." and that they remain available to clients as needed

It was found that without staff spacifically dedicated to service It was tound that without start specifically declicated to servi clients with disabilities, One-Stops might experience challen in meeting the needs of the population of job seekers with significant disabilities.

The DEI grant was instrumental in providing enhanced financial support of various services offered by One-Stop Career Centers. These funds were essential not only for creating, but also maintaining the positions of DRCs at the various centers.

The funds provided by DEI were vital to ensuring that people with disabilities have full access to One-Stop resources and are supported by the center staff. Without the financial resources provided under the grant, One-Stops may struggle to sustain the positions of DRCs. Some centers have developed significant

DEI Proiect Background

The Massachusetts Disability Employment Initiative (DEI) wa a three-year federal grant from the US Department of Labor wavrden in DU to the Commonwealth of Massachusetts, Executive Office of Labor and Workforce Development. The project was known as DEI 3, as it was the third round of fund awarded to states under this federal initiative.

The overall purpose of the DEI 3 project was to improve the

ibility and responsiveness of the Massachusetts wor

a assist them with their employment needs, with a focus on adividuals with a high level of need.

individual with a kiple level at end. Grant finite were used to support a diability unsome continuou (IRCI) in each region who antibied individual with diability with members and antibied needs. He IRC and strategies forward an collaborative effects, bath within he Deo and an effect of the active and spectrics. The strengt of the effects was to build capacity in each of these regions to meet a needs of contrast with challful to the second of the endpole and and advance in their cancer, with this regarded the advance of the second of the the spectra of the applicity strated and advance in their cancer, with this regarded funding, the DRC positions have been maintained at some level

In addition, the intent of the project was to identify practices that can be replaced in other regions and One-Stop Career Centers. This series of birds support these efforts, document best practices that occurred under DE1 s, so that they can be replicated both within and outside Massaduretts.

"Every person is different and this caseload is very labor-intensive..."

icket to Work is a program from the Social Security Administration. It is designed to help job seekers become successfully employed, while reducing their reliance on Social Security disability cash benefits (Social Security Disability Insurance - SSDI, or Supplemental Security Income - SSI). Under the DEI project, each of the project sites was required to become a vendor under Ticket to Work, if they were not one already. Over the course of the project, three of the sites (Futureworks, Springfield; Career Point, Holyoke; Career Center of Lowell) generated significant revenue under the Ticket program, and continue to do so post-project. The purpose of this brief is to examine the reasons for the success of these One-Stop Career Centers under the Ticket, and how

#### Ticket to Work Background

If an individual assigns their Ticket to an approved vendor nown as an Employment Network or EN, and the EN assists the individual in becoming successfully employed with monthly income at or above specific levels, the Employment Network eceives payment. The EN receives payments on an ongoing basis, for up to several years, as long as the Ticket hold maintains employment at specified earning levels. For 2017. the individual must earn at least \$840 in gross earnings month for the Employment Network to begin receiving payments. The level of earnings required increases over time. Total potential payments are approximately \$25,000 paid out over several years. (A full breakdown of payments, is available online from the Ticket to Work Payments at Glance.) The formula for Ticket payments is designed to create

res for ENs to assist individuals with their employmen needs while reducing the individual's reliance on Social Security cash benefits over the long-term. For individuals on SSI, their Social Security payments are gradually reduced in relation to earned income (after the first \$85 in gross month income, cash benefits are reduced by \$1 for every \$2 in

TOOLS FOR ISSUE MO. 27 - 2017 by Caro Narby, Daria Domin, and Lydia Landim

core requirement of the federal funding for the DEI project A core requirement of the federal funding for the use project was the creation of a disability resource coordination (DRC) position in each One-Stop Career Center. Each DRC is responsible for providing services and guidance to the job seekers with disabilities who pursue assistance through the One-Stop. Case management is the most central and crucial aspect of the DRC's role. Understanding how DRCs manage their caseload is an

mportant step toward identifying best practices. The following are some conclusions shared by DRCs about the way case management function in their roles.

#### Case management is intensive and time-consuming

The DEI grant supported one full-time DRC within each service region. As such, DRCs handle very large and challenging caseloads. One DRC stated, "Every person is different and this caseload is very labor intensive. For [job seekers with disabilities] the follow-through is very tricky." Managing each case begins with assessing the job seeker's

individual needs. One DRC described creating an initial plan of action, which began with the question "How job-ready are you?" To support each job seeker, the DRC needs to have a clear and honest understanding of the customer's skills, goals, and needs. Disability disclosure is a crucial part of the process, but it can also be a sensitive topic, so a high level of trust is necessary between the DRC and the job seeker

The needs of job seekers with disabilities are distinct, and may be intensive. In addition to helping job seekers with the employment placement process, DRCs may have to help their customers secure other basic needs, such as housing and transportation.

The DRC may take on the responsibility of coordinating services with other organizations and agencies, such as the state Department of Developmental Services (DDS), Massachusetts Rehabilitation Commission (MRC), Massachusetts Commission Rehabilitation Commission (MRC), Massachusetts Commission for the Blind (MCB), Department of Mental Health (DMH), and private service providers. DRCs connect job seekers to training

DEI Project Background

Massachusetts Disability Employment Initiative (DEI) was expear federal grant from the US Department of Labor anded in 2012 to the Gammonweilth of Massachusetts, curitye Office of Labor and Workforce Development. The jet was shown as OB 2, as it was the third road of funding anded to states under this federal initiative. The overall purpose of the DEI 3 project was to improve the

The overall purpose of the EU3 project was to improve the accessibility and reprovincess of the Macaschusett worlford development system to meet the needs of job seekses with dubalities. Through project funding, model demonstration activities were conducted with the One-Strog Career Crutter (*Harmican Ich Certury System*). In Care worlfore regions: Harmgdon, franklin Harmphiles Lowell, and the Hernb Store. agencies and partners coming together at one location to provide easy access to services, including those mandated under the Workforce Innovation and Opportunity Act of 2014, as well as optional partners. One of the benefits of ration and partnership formation under DEI was to expand on this, with One-Stops tapping into resources that the centers did not offer.

Interviews with disability resource coordinators (DRCs), One-Stop staff, benefit specialists, job seekers, and agency partners were conducted and analyzed to explore how partnerships formed, and the impact that inter- and intra-agency llaborations have on job seekers' success in achieving an

employment outcome. Career centers and their staff reported using resources from career centers and their staff reported using resources from multiple sources to meet the needs of the job seeker. Many job seekers have multiple and varied service (or resource)

needs, which have to be met prior to or concurrently with a job search. Job seekers mentioned that working with multiple agencies led to their success. The DRC serves as the liaison to introduce and o

eekers to other agencies and professionals. These may include the Massachusetts Rehabilitation Commission. Massachusetts Commission for the Blind, Department of Developmental Services, Department of Mental Health, adult basic education partners, community colleges, and benefits specialists.

Institute for Community Inclusion PROMOTING THE INCLUSION OF PEOPLE WITH DISABILITIES

### **Career Center Success Brief Series and Videos**

The Career Center Success series focuses on enhancing the capacity of One-Stop Career Centers (American Job Centers) to meet the needs of individuals with disabilities. The series features five written briefs that document best practices resulting from the Disability Employment Initiative (DEI) in Massachusetts, funded by the US Department of Labor from 2012 to 2016. (Massachusetts has subsequently received two additional rounds of DEI funding.) Each written brief has one ore more accompanying videos. The Career Center Success series can be used by a wide range of audiences:

- workforce development system professionals to increase their knowledge in best practices in meeting the needs of job seekers with disabilities
- as a useful guide for disability service providers and systems on how to work in partnership with One-Stop Career Centers and other components of the general workforce development system.
- by individuals with disabilities on how to best utilize One-Stop Career Centers for career success.

Each written product in the series provides an overview of the topic, findings from site visits and interviews, and a series of recommendations for sustainability and replication. The accompanying videos provide additional information, background, and examples regarding the topic.

### CAREER CENTER SUCCESS: The Critical Role of Benefits Counseling

This brief provides information regarding the importance of a high level of access to quality counseling on public benefits to assist and encourage individuals to pursue employment.
