## About DCR

The Department of Conservation and Recreation (DCR) operates one of the most diverse park systems in the country—overseeing 450,000 acres of parks, forests, beaches and pedestrian trails, watersheds, dams, and parkways—for the people.

One hundred and twenty-five years ago, DCR's foundations began with the creation of a regional park system to preserve our natural resources for the public as the city of Boston continued to expand. The first of its kind in the country, the Metropolitan Park System was formed on June 3, 1893 with Beaver Brook Reservation as the first park acquired for all people of the Commonwealth to enjoy recreation and green space.

The state's acquisition of other treasured properties, including the first wilderness area, now Mount Greylock State Reservation, soon followed. The agency's critical water supply protection responsibilities also date from the beginning. DCR's diverse portfolio solidifies its stewardship and leadership in conservation and recreation for the Commonwealth.

Thank you for your support of DCR. With your partnership, we will continue this rich legacy—to preserve, protect and promote our common wealth of natural, cultural and recreational resources for the well-being of all.
