Important Telephone Numbers

For Help During an Emergency

Remember, in a public emergency do not use your telephone except to request help if you need it. For information, listen to your local Emergency Alert System radio station. It is important to leave telephone lines open and emergency workers available for people who need immediate help.

Amesbury ...................................................... (978)-388-8155

Seabrook Station

Non-Emergency Information Hotline........... 1-800-774-4771
You can call this number any time of the day or night for recorded information about what is happening at the plant.
Follow us on Twitter at www.twitter.com/SeabrookNPP. We will use this channel to share information on a regular basis, as well as establishing a social media presence in the unlikely event of an emergency.
Family Emergency Planning Guide

Fill in these blanks now and go over this information with your family. Decide who would pick up school-age children at the host facility and where to meet if you were apart in an emergency. Be sure children know what to do if they are alone and the sirens sound. Talk to your neighbors so you can help each other if necessary.

It is a good idea to keep some things handy in case of an emergency: portable radio, flashlight, extra batteries. Keep your car in good running order and don’t let the gas tank get too low.

This will all save time and avoid confusion in an emergency.

My best evacuation route is (pages 33-34):

My reception center is located at (pages 33-34):

My school-age children will be taken to (page 31):

Prescription medicines I will need:

Important papers I will need (page 30):

I could get an emergency bus at (pages 35-40):

My local Emergency Management Office non-emergency number during regular business hours is (page 1):

My local Emergency Management Office emergency number is (page 1):

Places that will accept pets (friends/family, motels/hotels, boarding facilities outside the Emergency Planning Zone):

Other things to remember:

Plan in Advance to Evacuate Your Pets

- Mass care shelters do not accept animals other than service animals. Plan in advance what you will do with your pets should you have to evacuate. Make a list of places that would accept your pets outside the affected area, such as friends, relatives, pet friendly hotels/motels, boarding kennels, veterinary facilities.

- Prepare an emergency kit for your pets to include:
  - Food: Keep at least three days of food in an airtight, waterproof container.
  - Water: Store at least three days of water specifically for your pets.
  - Medicines and medical records: Keep an extra week’s supply of medicines your pet takes in a waterproof container.
  - First aid kit: Talk to your veterinarian about what is most appropriate for your pet’s emergency medical needs. Most kits should include cotton bandage rolls, bandage tape and scissors; antibiotic ointment; flea/tick prevention; latex gloves, saline solution.
  - Collar with ID tag, harness or leash: Make sure the identification tag includes information on where you will be staying.

Note: It is important to keep your pet’s microchip contact information up-to-date.

- Important documents: Include copies of your pet’s registration information, adoption papers, vaccination documents and medical records.

- Sanitation: Include pet litter and litter box if appropriate, newspapers, paper towels, plastic trash bags.

- A picture of you and your pet together: If you become separated from your pet during an emergency, a picture of you and your pet together will help you document ownership and allow others to assist you in identifying your pet.

- Familiar items: Put favorite toys, treats or bedding in your kit. Familiar items can help reduce stress for your pet.

- Crate or other pet carrier.

For more information on disaster preparedness for pets, visit the MEMA Home Page at www.mass.gov/mema

Remember: WHEN YOU GO, THEY GO. If you are told to evacuate, take your pets with you. DO NOT LEAVE YOUR PETS BEHIND.

What should you do when the sirens sound? Information on page 41.
The Captain’s Well — Captain Valentine Bagley was stranded on the coast of Arabia in July of 1792. When Captain Bagley returned to Amesbury, he fulfilled a promise he made while in the desert to dig a well for all to use, so that no man would suffer from thirst as he did. The story was commemorated by the Poet John Greenleaf Whittier, Amesbury; date unknown. Courtesy of the Newburyport Public Library Archival Center.

2019 Emergency Public Information

Being Prepared Begins in our Community

An emergency response plan has been developed for your safety in partnership with the Emergency Management Directors in Amesbury, Merrimac, Newbury, Newburyport, Salisbury, and West Newbury. They work continually with fire, police, other public safety organizations, and dedicated volunteers throughout the year to ensure that your community is prepared to respond to an emergency at Seabrook Station, or in any emergency. Please give them your support by reading the information in this calendar, learning what is planned for your community, and developing an emergency plan for your family.

If you have questions about emergency management in your community, please call your Emergency Management Office at the telephone number listed on page 1.

Become a Partner in Public Safety—Be Prepared!

City of Amesbury
Ken Berkenbush, Emergency Management Director

City of Newburyport
Christopher LeClaire, Emergency Management Director

Town of Merrimac
Ralph Spencer, Emergency Management Director

Town of Salisbury
Robert Cook, Emergency Management Director

Town of Newbury

Take Action Now to Receive Emergency Notifications!

• Download the Massachusetts Alerts Smart phone app for iOS and Android devices at www.mass.gov/mema/mobileapp.
• Sign up now for Seabrook Station’s Code Red emergency notification system at https://public.coderedweb.com/CNE/bf065f487535.
When you are alerted by the warning signal, you should tune to your local Emergency Alert System (EAS) station for emergency instructions. EAS is the direct link between you and the people responsible for your safety. Instructions may be given to you at any hour, day or night, and will include recommendations as to what you should do for your protection. Follow instructions carefully. Do not worry if you miss the beginning of an emergency broadcast. Information will be provided regularly.

In case of an emergency always stay tuned to an Emergency Alert System station for your area.
Emergency Classifications

If an emergency is declared at Seabrook Station, it would be categorized into one of four emergency levels.

• **Unusual Event:** This means a minor problem has occurred at the plant. It may involve hazardous weather or a minor equipment problem. Public officials would be notified, but there would be no need to sound the warning signals. People in the area would not need to take any special actions.

• **Alert:** This could affect plant safety but it is not expected to require any special actions by residents. Public officials would be notified. They would watch the situation and be ready to act if it got worse. As a precaution, public officials may mobilize transportation resources. They may transfer school children to host facilities outside the area and clear state parks and waterways.

Radio or news broadcasts would inform the public of these actions.

• **Site Area Emergency:** This means a more serious problem has occurred. Any release of radioactive material would be below federal limits. State and local officials would keep persons in the area fully informed about any necessary actions through Emergency Alert System radio stations. As a precaution, state officials would move school children to host facilities outside the area if this had not already been done. Sirens and Code Red would notify persons in the area. Other precautions would be called for by state officials, as needed.

• **General Emergency:** This is the most serious type of emergency. It could involve serious damage at the plant and the release of radioactive materials. State officials might direct persons in some areas to shelter-in-place or to evacuate to a safer location. Warning sirens and Code Red would notify persons in the area. Special instructions would be issued over the Emergency Alert System radio stations.

[www.twitter.com/SeabrookNPP](http://www.twitter.com/SeabrookNPP)
Massachusetts Public Information phone number is 211

What to Do When Told to Shelter-in-Place

You may be instructed to shelter-in-place, which means you should immediately go inside the nearest available building. If you are already inside, stay there. Sheltering in place may provide the best protection. If a shelter-in-place message is given for your community over the Emergency Alert System radio station, you should do the following:

• Go indoors and close all doors and windows.

• Turn off all window fans, air conditioners, clothes dryers, kitchen and bath exhaust fans, and other sources of outside air, if directed to do so.

• Continue monitor your EAS station for official messages and updated directions.

• Keep pets indoors.

• If you have livestock, shelter them too. Give them stored feed and water from a covered source.

• Stay inside until officials say otherwise. If you must go outside, cover your nose and mouth with a folded, damp cloth. Persons with respiratory disorders should not go out at all, until told to do so by government officials.

• If you are traveling in a motor vehicle in the affected area, close the windows and air vents and turn off the heater. Keep the radio tuned to an EAS station.

• Persons without a place to stay should leave the area immediately.

• If sheltering-in-place is recommended during school hours, children will be sheltered in the school building and cared for by school personnel.

• DO NOT use your telephone unless you need special assistance.

• Below ground basements provide the best shelter. Avoid areas near windows. If above ground, interior rooms or lower floors provide the best protection.

Remember, tune in to one of the Emergency Alert System Stations at:

92.5 FM, 93.7 FM,
98.5 FM, 106.1 FM,
1450 AM or 1030 AM
for latest information.
What to Do When Told to Evacuate

If an evacuation is necessary, public safety officials will tell you over the Emergency Alert System radio station what to do. DO NOT evacuate unless directed to do so by public safety officials.

- Gather all persons in the house together.
- Take your pets with you.
- DO NOT try to pick up children at their schools. They will be taken to designated host schools outside the area where you may pick them up later (see page 34 for map to host schools).
- Household members outside the area may be advised not to return during an evacuation. They will be directed to the reception center where they can join you.
- DO NOT call your local fire or police departments for information. Emergency workers will need their telephone lines for emergency use. You may call Mass 211 for more information. If you need special help, call your local Emergency Management Office at the emergency number listed on page 1.
- The Commissioner of Public Health may recommend that evacuating individuals, who have elected to do so, ingest potassium iodide.
- Stay tuned to your Emergency Alert System radio station.

How to Travel

- While traveling in the car, keep all windows and vents closed until you have left the Emergency Planning Zone.
- Keep the car radio tuned to an Emergency Alert System station.
- Drive out of the area along one of the routes shown on page 33.

Some Things to Take With You

Just take essential items that you would need. You could be away from home for a few hours to a few days. These are suggestions that apply to any type of emergency evacuation.

- This calendar.
- Clothing for several days.
- Personal hygiene items (soap, toothbrush, toothpaste, shampoo, etc.).
- Prescription medicines, medical equipment and supplies, important medical records, assistive aids and batteries.
- Special dietary foods.
- Baby supplies.
- Blankets, pillows, and towels (if you will stay at a public mass care shelter).
- Identification (drivers license) and important papers.
- Checkbook, credit card, and cash.
- Passports.

About Your Pets

Do not leave your pets behind. Only service animals will be allowed inside the mass care shelters. Develop a buddy system with neighbors, friends and relatives to make sure someone is available to care for or evacuate your pets if you are unable to. See the Family Emergency Planning Guide (Page 2) for more information about evacuating pets. Do not leave your pets behind. Arrange for their evacuation in advance.

Reception Center

A Reception Center is available to assist evacuees. The reception center for your city or town is outside the 10-mile Emergency Planning Zone (See page 33 for reception center location).

At the center, you will be registered and checked for contamination. Emergency workers will decontaminate and care for anyone needing this type of assistance. You will be able to receive information about the location of other members of your family who have already registered at the reception center. If you need a place to stay you will be directed to a mass care shelter that will provide meals and lodging.

The reception center and mass care shelters are accessible to people with disabilities. If you have additional needs, officials will assist you. If you can, you may want to stay with friends or relatives until the emergency is over.
**Plans for Children in Day Care Centers**

Center-Based Day Cares, as well as Family-Based Day Care Centers, that are within the Emergency Planning Zone should have Emergency Plans. Center-Based Day Cares are larger organizations with multiple Day Care Providers. Family-Based Day Cares provide day care services in their own home.

Early in an emergency, any Day Care providers that requested notification will receive town notifications that they should close. Parents/Guardians will be notified by the Day Care Center, and asked to pick up their children. In the event the situation should not improve, children not picked up by parents/guardians will be transferred to a host facility outside the emergency planning zone. Parents/guardians should bring an ID with them to pick up their child at these Designated Host Facilities. Designated Host Facilities are listed in the next column.

If a Family-Based or Center-Based Day Care would like to be notified by the town or need transportation assistance, they should contact their Town’s Emergency Management Departments (see inside of front cover for the contact information for advance planning).

**Parents/guardians should be sure to listen to their local Emergency Alert System radio station to confirm this information at the time of an emergency.**

---

**Plans for Children in Schools**

Early in an emergency, school children may be moved to designated host facilities outside the emergency planning zone. (See list of host facilities). Do not try to pick up your children at their school or phone the school. The phone lines would be needed for emergency use. Instead, meet them at their host schools. Children who live inside the area, but go to school outside the area, will be held at the school until their parents/guardians pick them up. Bring an ID with you. Do not attempt to pick up your children at any other location.

**Parents/guardians should be sure to listen to their local Emergency Alert System radio station to confirm this information at the time of an emergency.**

If an emergency existed before the start of the school day, school would be canceled as it is when there is a danger of a winter storm.

---

**List of Host Facilities**

**Remember, tune in to one of the Emergency Alert System Stations at:**

92.5 FM, 93.7 FM, 98.5 FM, 106.1 FM, 1450 AM or 1030 AM for latest information.
Evacuation Route Descriptions

NOTE: The use of these suggested main roads will expedite the movement of evacuating traffic away from Seabrook Station.

Amesbury

North: Route 107A North (South Hampton Road) to Route 108 South to Haverhill to Route 110 East to I-495 South to Exit 42B, Route 114 East to I-95 North to Exit 51, Endicott Road eastbound to the Masconomet Regional School.

East of Market St./South of Elm St.: Route 110 West to I-495 South to Exit 42B, Route 114 East to I-95 North to Exit 51, Endicott Road eastbound to the Masconomet Regional School.

West of Main St.: Hillside Ave. South, across Route 110 to I-495 South to Exit 42B, Route 114 East to I-95 North to Exit 51, Endicott Road eastbound to the Masconomet Regional School.

West of Hillside Ave.: Route 110 West to Merrimac. Left on Broad St. to I-495 South to Exit 42B, Route 114 East to I-95 North to Exit 51, Endicott Road eastbound to the Masconomet Regional School.

Merrimac

East of Church St.: Route 110 to Broad St to I-495 South to Exit 42B, Route 114 East to I-95 North to Exit 51, Endicott Road eastbound to the Masconomet Regional School.

West of Church St.: Route 110 West to I-495 South to Exit 42B, Route 114 East to I-95 North to Exit 51, Endicott Road eastbound to the Masconomet Regional School.

Newbury

Plum Island: Plum Island Turnpike West, turn left on Ocean Avenue. South to Rolfe’s Lane, South to Route 1A, South to Route 133 West. Route 133 West to I-95 South to Exit 51, Endicott Road. Left to Masconomet Regional School.

Or Plum Island Turnpike West, turn left on Ocean Avenue, South to Rolfe’s Lane to Hanover Street to U.S. Route 1 South to Route 133 West to I-95 South to Exit 51, Endicott Road. Left to Masconomet Regional School.

Inland including Byfield: U.S. Route 1 South to Route 133 West to I-95 South to Exit 51, Endicott Road. Left to Masconomet Regional School.

Or I-95 South to Exit 51, Endicott Road. Left to Masconomet Regional School.

Or Rte.1A south to Route 133 West to I-95 South to Exit 51, Endicott Road. Left to Masconomet Regional School.

Newburyport

East of State St.: U.S. Route 1 South to Route 133 to I-95 South to Exit 51, Endicott Road. Left to Masconomet Regional School.

Between Broad & State Sts.: Low Street to Graf Road, South to Scotland Road to I-95 South to Exit 51, Endicott Road. Left to Masconomet Regional School.

West of Broad St.: High Street West (Route.113) to I-95 South to Exit 51, Endicott Road. Left to Masconomet Regional School.

Salisbury

Salisbury Beach: Route 1A South to Route 133, West to Route 1 South to Route 97 West to Washington Street, then to Endicott Road westbound to the Masconomet Regional School.

South of Beach Rd.: U.S. Route 1 South to Route 133 West to I-95 South to Exit 51, Endicott Road eastbound to the Masconomet Regional School.

North of Beach Rd.: Route 1 South to Route 97 West to Washington Street, then to Endicott Road westbound to the Masconomet Regional School.

West Newbury

North: Route 113 West (Main Street) to Groveland to Route 97 North/113 West to I-495 South to Exit 42B, Route 114 East to I-95 North to Exit 51, Endicott Road eastbound to the Masconomet Regional School.

South: South Street East to I-95 South to Exit 51, Endicott Road eastbound to the Masconomet Regional School.
Evacuation Route Descriptions

Emergency buses would be available if evacuation should be necessary for your city or town. If you need a ride, a bus would take you to your reception center. Additional bus information could be given on the Emergency Alert System.
Evacuation Route Descriptions

Emergency buses would be available if evacuation should be necessary for your city or town. If you need a ride, a bus would take you to your reception center. Additional bus information could be given on the Emergency Alert System.

Merrimac

Emergency Bus Information

To get a ride in an emergency, walk to one of the routes shown as a solid line.

Buses will pick up riders anywhere along these routes. If a bus is full, another will come along.

Buses will take riders to the reception center at the Masconomet Regional School in Boxford.

Buses will take riders to the reception center at the Masconomet Regional School in Boxford.
Plans for Individuals Requiring Additional Assistance

Patients in Hospitals and Nursing Homes
Hospital and nursing home patients who could not be released to their families would be taken to facilities beyond the 10-mile zone where they would receive the care they need. In the event of an evacuation, information about where patients have been moved would be provided as it becomes available.

People with Access and Functional Needs
Let your local Emergency Management Director know in advance if you need any assistance during a public emergency. If you or someone in your household would need notification or assistance with emergency sheltering-in-place, evacuating, or staying in a mass care shelter, please let your Emergency Management Director know immediately. Assistance is available, but is best planned before an emergency happens. Please fill out the Access and Functional Needs card at the back of this booklet. A new card should be sent in every year. ALL INFORMATION WILL BE KEPT STRICTLY CONFIDENTIAL.

If you know someone who is Blind or might have difficulty reading this calendar, please read it to them.

If you are Deaf or hard of hearing and would need to be notified on a TTY (teletypewriter) of a public emergency, please notify your local Emergency Management office. You may use the Access and Functional needs card at the back of this booklet.

If you have children who might be home alone, make sure they understand the information in this calendar and know what to do in an emergency. It is especially important that they know how to tune to their Emergency Alert System station.

People at the Beaches
In an emergency, the Salisbury and Plum Island beaches and the Parker River National Wildlife Refuge could be closed. People at the beaches or wildlife refuge should leave those areas and go back to their lodgings or homes. This action could be taken as a precaution even if no emergency actions were needed by the general public. Sirens would alert people at the beaches and the refuge to the emergency. The U.S. Department of the Interior personnel would also alert people at the refuge.

Boaters
Boaters on the ocean would be alerted by U.S. Coast Guard personnel. Sirens would alert boaters on the Merrimack River. Channels 16 and 22 on marine radio would give boaters information, in addition to the Emergency Alert System stations.

Siren Sounding
Emergency Plan Testing
To make sure that the emergency plan works well, it is tested regularly. This testing is called an exercise. Emergency workers and public officials simulate a serious problem and go through the emergency actions in the plan. You can read about these tests in the newspaper before they take place.

Siren Testing
Each of the 121 sirens is tested silently every two weeks to verify its ability to operate. Siren system activation equipment is tested on a similarly frequent basis. Periodically the entire siren system will be sounded throughout the 10 mile EPZ to demonstrate the sound people would hear from the sirens.

Siren Sounding
Occasionally a siren or sirens may sound accidentally. If you hear a siren, tune immediately to your Emergency Alert System station for information: 92.5 FM, 93.7 FM, 98.5 FM, 106.1 FM, 1030 AM and 1450 AM. If the sirens were sounded unintentionally, you would be notified via a regular news broadcast. EAS messages would only be used in the event of an actual emergency.

If you do not hear a message, you can call your local public officials (listed to the right). These are non-emergency numbers with representatives who will be able to tell you if there is an emergency associated with Seabrook Station.

Please do not use 911 to report an accidental siren activation.
About Radiation

Q. What is radiation?
A. Radiation is a form of energy that is all around us. Radar, radio waves, microwaves, ultraviolet (sun) rays, and X-rays are all forms of radiation. Some radiation is energy released from radioactive matter. Radioactive matter is present in the fuel in nuclear power plants.

People must take care to avoid too much exposure to most kinds of radiation.

One class of radiation can cause changes in the atoms that make up the human body. This class includes ultraviolet rays, X-rays, and radiation from radioactive matter. As with other types of radiation, care must be taken to protect people. People should limit their sunbathing, the number of X-rays they receive, and their contact with highly radioactive matter.

Q. Where does radiation come from?
A. Most radiation comes from natural sources. This is called background radiation. Rocks, water, the sun, and objects in space give off radiation. The ground we walk on, the buildings we live in, and nearly everything we touch contains some radioactive matter. The food we eat and the air we breathe give off radiation. Even our bodies are mildly radioactive.

Some radiation also comes from man-made sources. Man-made radiation comes from things like medical, industrial, and dental X-rays. It also comes from items such as the mantles in camping lanterns, some kinds of smoke detectors, and wood stoves. And some radiation comes from nuclear and even coal fired power plants that generate electricity.

The amount of radiation that a person gets is measured in “millirem.” See the chart on right. This chart shows the average amount of some types of radiation received by the general public in one year. You can see from the chart that a nuclear power plant adds very little to how much radiation we receive.

Q. What kind of protection does a nuclear power plant offer?
A. A commercial nuclear power plant in the U.S. has a series of barriers to keep radiation inside the plant.

The nuclear fuel is in pellet form. The pellets are put into long metal tubes. The metal tubes are bundled together. These bundles are placed in water inside the reactor vessel, which is steel, eight inches thick, and is lined with stainless steel. The reactor vessel is inside the containment building.

Seabrook’s containment building is the strongest in the U.S. It is called a double containment. This is because it has two steel-and-concrete domes with a five-foot airspace in between. The first dome is of steel and concrete four and one-half feet thick. The outer dome is 15 inches thick. In addition, there is a steel containment liner three-eighths of an inch thick. The containment could withstand the crash of a fighter bomber jet. It could also withstand an earthquake right under the building or other natural disasters.

Q. Can a nuclear power plant explode like an atom bomb?
A. Absolutely not. A nuclear explosion is impossible in a commercial nuclear power plant. A power plant doesn’t contain the type of fuel in the amount which is needed to make atomic bombs.

Q. What if there were a major accident at Seabrook Station?
A. In the event that all safeguards failed, radiation could be released. Worldwide experience has shown this to be a very unlikely event. That is why the emergency plan described in this calendar would be put into action to protect you.

Q. Would there be any health effects from a major release of radiation?
A. It is well known that exposure to high levels of radiation may cause observable health effects. Possible health effects from lower levels of radiation are unknown, and consequently the present philosophy of radiation safety is to avoid unnecessary radiation exposure. Most evidence shows that radiation doses in low levels do not cause observable health effects. However, they can increase the chance of health problems later in life. To be especially careful, sheltering and evacuation would be ordered if the public might be exposed to low levels of radiation, using the Environmental Protection Agency’s protective action guidelines as recommendations. This would protect you and your family with an ample margin of safety. Be sure to follow the instructions in this calendar and on the Emergency Alert System.

*Actual dose can vary greatly depending on how well a house is ventilated.
Potassium Iodide (KI) and the Public

The Massachusetts Department of Public Health and the Massachusetts Emergency Management Agency want you to know about potassium iodide (KI). The Nuclear Regulatory Commission has made KI available to states for distribution within the 10-mile emergency planning zones of commercial nuclear power stations.

What is potassium iodide (KI)?

Potassium iodide is a drug that can protect the thyroid gland from radiation injury caused by radioactive iodine. The drug is approved for use by the U.S. Food and Drug Administration and is available over-the-counter.

How does it work?

KI saturates the thyroid gland with stable (non-radioactive) iodine, to limit the amount of radioactive iodine that could be absorbed by the thyroid. During a radiological emergency, radioactive iodine could be released to the environment. Iodine concentrates in the thyroid gland. Breathing air or eating food contaminated with radioactive iodine can injure the thyroid and increase the risk of thyroid cancer.

Potassium iodide is only effective against exposure to radioactive iodine and only protects the thyroid gland. KI does not protect against other types of radioactivity that might be released during a nuclear emergency. Evacuation and sheltering-in-place are the primary means of protection. The use of KI is in addition to these protective measures, however, no one should delay following the EAS instructions if you can not find or do not have KI.

When should I take KI?

KI should be taken shortly before or shortly after exposure to radioactive iodine to be most effective. Even if taken three to four hours after exposure, it would still reduce the amount of radioactive iodine absorbed by the thyroid and have a substantial effect. The protective effects of KI last approximately 24 hours. Emergency broadcasts over Emergency Alert System radio stations will tell people if the Massachusetts Department of Public Health advises them to take KI.

How much KI should I take or give to my children?

Presently the KI pills are 65-milligram scored tablets. In December 2001, the U.S. Food and Drug Administration published guidance on KI recommending the dosages shown below. These are the minimum effective doses; the Massachusetts Department of Public Health supports the use of one (1) 65-milligram tablet for children above three (3) years of age during an emergency. This is in agreement with U.S. Food and Drug Administration guidance.

If you are considering using KI in an emergency, you should discuss whether taking KI is right for you with your health care provider.

Security at Seabrook Station

Nuclear power plants are the most secure industrial facilities in the United States. After September 11, the nuclear energy industry substantially enhanced security at nuclear plants—already the most secure facilities in the U.S. industrial infrastructure. Security forces at nuclear plants were increased by one-third to approximately 8,000 officers at 103 plants located at 64 sites. Overall, the industry has spent $1.2 billion on security-related enhancements since September 2001.

NextEra Energy Seabrook Station features some of the strongest structures in the world, a comprehensive security program, and a highly experienced team of security professionals working hard to protect public health and safety. Seabrook Station remains in regular contact with local, state, and federal law enforcement officials, ensuring the exchange of vital information and the ability to prepare for potential threats. In addition, law enforcement agencies participate in training exercises with Seabrook Station officers.

Seabrook Station continues to be at the highest state of security awareness. Security measures taken at Seabrook since 9/11 include:

- extending and fortifying security perimeters
- increasing patrols within security zones
- installing new barriers to protect against threats from explosives in vehicles
- installing additional high-tech surveillance equipment
- strengthening coordination of security efforts with local, state and federal agencies to integrate approaches among the entities.

In addition to these measures, the State of New Hampshire established buffer zones around the plant to prevent boaters and others on the local marshes from approaching too closely. And, the Federal Aviation Administration has issued rules to instruct pilots not to hover, circle, or linger around sensitive installations, including nuclear power plants.

In terms of emergency preparedness, Seabrook Station’s Emergency Response Organization (ERO) is made up of nuclear professionals able to respond immediately at any time in the unlikely event of a plant emergency. The ERO regularly conducts drills and exercise with local, state, and federal agencies ensuring emergency preparedness. Both the State of New Hampshire and the Commonwealth of Massachusetts administer comprehensive emergency plans through their offices of emergency management. In fact, the surrounding communities of Seabrook Station benefit by having this established emergency plan in place as it can be utilized for any emergency conditions.

Protecting public health and safety is the top priority at Seabrook Station.

Tewksbury, MA 01876-0116

SCORE HERE; DOTTED LINE DOES NOT PRINT

If you would like…
additional copies of this calendar, please call or write to the Massachusetts Emergency Management Agency or contact your local Emergency Management Office.

Don’t forget to sign up for Code Red at:
https://public.coderedweb.com/CNE/b0106347535

For People with Disabilities or other Access and Functional Needs
Provisions have been made to provide emergency assistance for all persons with access and functional needs. It is important that you make any need for assistance known beforehand. For example, a person who uses a wheelchair or requires emergency notification messages to be provided on TTY (teletypewriter). Contact your local Emergency Management Director or use the confidential card on the back cover of this calendar. Emergency information is also available on CD at your local library for persons who are blind or visually impaired.

MAIL IN this CONFIDENTIAL card.
ACCESS AND FUNCTIONAL NEEDS CARD

Do you require assistance in an emergency?

Yes, I/this person will need assistance in an emergency:

Name _______________________________________________________
Address/City/Zip _____________________________________________
Phone (Home) _______________________________________________
Cell _________________________________________________________

Relative/person we can notify to assist you in an emergency:
