COMPLIANCE CHECKLIST

IP19 Renal Dialysis Services (Acute and Chronic)

The following checklist is intended to be used in the plan review applications for health care facilities submitted to the Massachusetts Department of Public Health. This checklist summarizes and references the applicable requirements from the Licensure Regulations and the 2018 Edition of the FGI Guidelines for Design and Construction of Hospitals. Applicants must verify compliance of the plans submitted to the Department with all referenced requirements from the Licensure Regulations and FGI Guidelines when completing this Checklist. A separate Checklist must be completed for each nursing unit, hospital or clinic department, or clinical suite.

Other jurisdictions, regulations and codes may have additional requirements which are not included in this checklist, such as:
- State Building Code (780 CMR)
- Accreditation requirements of The Joint Commission
- CDC Guidelines for Preventing the Transmission of Mycobacterium Tuberculosis in Health Care Facilities
- USP 797 & Regulations of the Massachusetts Board of Registration in Pharmacy
- Occupational Safety & Health Standards (OSHA)
- Accessibility Guidelines of the Americans with Disabilities Act (ADA)
- Architectural Access Board Regulations (521 CMR)
- Local Authorities having jurisdiction.

Instructions:
1. All requirement lines must be completed according to the following instructions and included in the plan submissions for Self-Certification Process or Abbreviated Review Process.
2. This checklist must be completed by the project architect or engineer based on the design actually reflected in the plans at the time of completion of the checklist.
3. Each requirement line (___) of this Checklist must be completed exclusively with one of the following marks, unless otherwise directed in the checklist. If a functional space is not affected by a renovation project, the mark “E” may be indicated on the requirement line (___) before the name of the functional space (associated requirements on indented lines below that name, or associated MEP requirements do not have to be completed in this case). If more than one functional space serves a given required function (e.g. patient room or exam room), that clarification should be provided in the Project Narrative, and the requirement lines are understood to only address the functional spaces that are involved in the project.

X = Requirement is met, for new space, for renovated space, or for existing direct support space for an expanded service.

E = Requirement relative to an existing suite or area that has been licensed for its designated function, is not affected by the construction project and does not pertain to a required direct support space for the specific service affected by the project. “E” must not be used for an existing required support space associated with a new patient care room or area.

W = Waiver requested for specific section of the Regulations or FGI Guidelines, where hardship in meeting requirement can be demonstrated (a Physical Plant Waiver Form must be completed for each waiver request). An explicit floor plan or plan detail must be attached to each waiver request.

4. All room functions marked with “X” must be shown on the plans with the same name labels as in this checklist.
5. Mechanical, electrical & plumbing requirements are only partially mentioned in this checklist. The relevant section of the FGI Guidelines must be used for project compliance with all MEP requirements and for waiver references.
6. Oxygen, vacuum, medical air, waste anesthesia gas disposal and instrument air outlets (if required) are identified respectively by the abbreviations “OX”, “VAC”, “MA”, “WAGD” & “IA”.
7. Requirements referenced with “FI” result from formal interpretations from the FGI Interpretations Task Group.
8. The location requirements including asterisks (*) refer to the definitions of the Glossary in the beginning section of the FGI Guidelines and reproduced in this checklist.

Facility Name: ____________________________

DoN Project Number: (if applicable) ____________________________

Project Description: ____________________________

MDPH/DHCFLC 12/18 IP19
2.2-3.10

**RENAI DIALYSIS SERVICES (ACUTE & CHRONIC)**

2.2-3.10.1.1 Application:
- Renal dialysis facilities in hospital that treat
  patients with acute & chronic end stage
  renal disease (ESRD), including dialysis
  provided in acute or intensive care unit

2.2-3.10.2

**HEMODIALYSIS TREATMENT AREA**

☐ check if not included in project (only if dialysis
  is provided in acute or intensive care unit)

- Treatment area separate from
  administrative waiting areas
- No built-in cabinetry in individual
  hemodialysis patient care stations

2.2-3.10.2.2

**Space Requirements for Individual**

**Hemodialysis Patient Care Stations:**

(1)(a) patient care stations with dialysis chairs
  ☐ check if not included in project
  min. clear floor area of 80 sf

(2)(a) min. clearance 4'-0" between
  sides of dialysis chairs

(2)(b) min. clearance 3'-0" between
  sides of dialysis chairs and
  adjacent* walls or partitions

(2)(c) min. clearance 2'-0" between foot of
  dialysis chairs and cubicle curtains

(1)(b) patient care stations with beds
  ☐ check if not included in project
  min. clear floor area of 90 sf

(2)(a) min. clearance 4'-0" between
  sides of beds

(2)(b) min. clearance 3'-0" between
  sides of beds and adjacent* walls
  or partitions

(2)(c) min. clearance 2'-0" between foot of
  beds and cubicle curtains

2.2-3.10.4

Space available to accommodate provisions
for patient privacy

2.2-3.10.5(1)

**Handwashing stations**

2.2-3.10.5(2)

located at entry to hemodialysis
  treatment area (may contribute to total
  number of handw. stations required)

2.1-2.8.7.1

located in each room where hands-on
  patient care is provided

### Architectural Requirements

2.1-2.8.8.2(1)

| (a) | ___ medication preparation room |
|     |   ___ under visual control of nursing staff |
|     |   ___ work counter |
|     |   ___ handwashing station |
|     |   ___ lockable refrigerator |
|     |   ___ locked storage for controlled drugs |
|     |   ___ sharps containers |
|     |   ☐ check if not included in project |
| (b) | ___ self-contained medication-dispensing unit |
|     |   ☐ check if not included in project |
|     |   ___ room designed with space to prepare medications |

or

2.1-2.8.8.2(2)

| (a) | ___ automated medication-dispensing unit |
|     |   ___ located at nurse station, in clean workroom or in alcove |
| (c) | ___ handwashing station located next to stationary medication-dispensing units or stations |

### Building Systems Requirements

**Ventilation:**

|   | ___ Min. 4 air changes per hour |

**Lighting:**

|   | ___ Task lighting |

|   | 2.1-2.8.8.1(2)(d) |

---

2.2-3.10.8.11

| ___ Clean workroom |

2.1-2.8.11.2

| (1) | ___ work counter |
| (2) | ___ handwashing station |
| (3) | ___ storage facilities for clean & sterile supplies |

2.2-3.10.8.12

| ___ Soiled workroom |

| (1)(a) | ___ handwashing station |
| (1)(b) | ___ flushing-rim clinical service sink with bedpan-rinsing device or equivalent flushing-rim fixture |
| (1)(c) | ___ work counter |
| (1)(d) | ___ space for separate covered containers for waste & soiled linen |
| (2) | ___ fluid management system is used |
| (a) |   ☐ check if not included in project |
|     |   ___ electrical & plumbing connections that meet manufacturer requirements |
| (b) | ___ space for docking station |

2.2-3.10.8.13(1)

| ___ Clean linen storage |

2.1-2.8.13.1

|   | ___ stored in clean workroom |
|   | or |
|   |   ___ separate closet |
|   | or |
|   |   ___ covered cart distribution system on each floor
### Architectural Requirements

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>(2) ____ storage of clean linen carts in</td>

**SUPPORT AREAS FOR STAFF**

**2.2-3.10.9.1** (may be shared with adjacent diagnostic & treatment areas)

**2.2-3.10.9.2**

(1) Lockers

(2) Toilet room

(3) handwashing station

**Ventilation:**

| Min. 10 air changes per hour | Table 7.1 |
| Exhaust |
| Negative pressure |
| No recirculating room units |

(4) Eyewash station

**Emergency shower**

**SUPPORT AREAS FOR PATIENTS**

**2.2-3.10.10.1** Waiting room

All support areas listed below are immediately accessible to dialysis unit

### Building Systems Requirements

#### Ventilation:
- Min. 10 air changes per hour
- Exhaust
- Negative pressure
- No recirculating room units

#### Nurse Call System:
- Patient toilet room equipped with nurse call device

**LOCATION TERMINOLOGY:**
- **Directly accessible**: Connected to the identified area or room through a doorway, pass-through, or other opening without going through an intervening room or public space
- **Adjacent**: Located next to but not necessarily connected to the identified area or room
- **Immediately accessible**: Available either in or adjacent to the identified area or room
- **Readily accessible**: Available on the same floor or in the same clinic as the identified area or room
### Architectural Details & MEP Requirements

#### 2.1-7.2.2 ARCHITECTURAL DETAILS

**Corridor Width:**
- **2.1-7.2.2.1** Aisles, corridors & ramps required for exit access in a hospital not less than 8'-0" in clear & unobstructed width
  - **or** Detailed code review incorporated in Project Narrative
- Aisles, corridors & ramps in adjunct areas not intended for the housing, treatment, or use of inpatients not less than 44" in clear & unobstructed width
  - **or** Detailed code review incorporated in Project Narrative

**Ceiling Height:**
- **2.1-7.2.2.2**
  - **(1)** Min ceiling height 7'-6" in corridors & in normally unoccupied spaces
  - **(3)** Min. height 7'-6" above floor of suspended tracks, rails & pipes located in traffic path for patients in beds & on stretchers
  - Min. ceiling height 7'-10" in other areas

**Doors & Door Hardware:**
- **2.1-7.2.2.3**
  - **(1)**
    - **(a)** doors between corridors, rooms, or spaces subject to occupancy swing type or sliding doors
    - **(b)** check if not included in project manual or automatic sliding doors comply with NFPA 101 detailed code review included in Project Narrative no floor tracks
  - **(2)**
    - **(a)** min. 45.5" clear door width for diagnostic/treatment areas
    - **(b)** swinging doors for personnel use in addition to sliding doors check if not included in project min. clear width 34.5"
  - **(3)**
    - **(a)** doors do not swing into corridors except doors to non-occupiable spaces & doors with emergency breakaway hardware

**Glazing Materials:**
- **2.1-7.2.2.7** Glazing within 1 foot 6 inches of floor check if not included in project must be safety glass, wire glass or plastic break-resistant material

**Handwashing Stations:**
- **2.1-7.2.2.8**
  - **(1)(c)** Handwashing stations in patient care areas located so they are visible & unobstructed
  - **(3)**
    - **(a)** Handwashing station countertops made of porcelain, stainless steel, solid-surface materials or impervious plastic laminate assembly
    - **(b)** Countertops substrate check if not included in project marine-grade plywood (or equivalent material) with impervious seal
  - **(4)** Handwashing station casework check if not included in project designed to prevent storage beneath sink
  - **(5)** Provisions for drying hands check if not included in project (only at hand scrub facilities) hand-drying device does not require hands to contact dispenser
  - **(6)** Liquid or foam soap dispensers
2.1-7.2.2.9 GRAB BARS:
(1) Grab bars anchored to sustain concentrated load 250 pounds
(3) Ends of grab bars constructed to prevent snagging clothes of patients, staff & visitors

2.1-7.2.2.10 HANDRAILS:
(1) Handrails installed on both sides of patient use corridors
(3) Rail ends return to wall or floor
(4) Handrail gripping surfaces & fasteners are with 1/8-inch min. radius
(5) Handrails have eased edges & corners
(6) Handrail finishes are cleanable

2.1-7.2.2.12 NOISE CONTROL:
(1) Recreation rooms, exercise rooms, equipment rooms & similar spaces where impact noises may be generated are not located directly over operating suites
(or)
Special provisions are made to minimize impact noise
(2) Noise reduction criteria in Table 1.2-6 applicable to partitions, floors & ceiling construction are met in patient areas

2.1-7.2.3 SURFACES
2.1-7.2.3.1 FLOORING & WALL BASES:
(1) Flooring surfaces cleanable & wear-resistant for location
(3) Smooth transitions provided between different flooring materials
(4) Flooring surfaces including those on stairways are stable, firm & slip-resistant
(5) Floors & wall bases of soiled workrooms, toilet rooms & other areas subject to frequent wet cleaning are constructed of materials that are not physically affected by germicidal or other types of cleaning solutions

2.1-7.2.3.2 WALLS & WALL PROTECTION:
(1)(a) Wall finishes are washable
(1)(b) Wall finishes near plumbing fixtures are smooth, scrubbable & water-resistant
(2) Wall surfaces in areas routinely subjected to wet spray or splatter are monolithic or have sealed seams that are tight & smooth
(5) Wall protection devices & corner guards durable & scrubbable

2.1-7.2.3.3 CEILINGS:
(1) Ceilings provided in all areas except mechanical, electrical & communications equipment rooms
(a) Ceilings cleanable with routine housekeeping equipment
(b) Acoustic & lay-in ceilings where used do not create ledges or crevices

2.1-7.2.4 FURNISHINGS:
2.1-7.2.4.1 built-in furnishings upholstered with impervious materials in patient treatment areas with risks of exposure & contamination from bodily fluids & other fluids

2.1-7.2.4.3 Privacy curtains in patient care areas are washable
☐ check if not included in project

2.1-8.2 HEATING VENTILATION & AIR-CONDITIONING (HVAC) SYSTEMS
Part 3/6.1 UTILITIES:
Part 3/6.1.2 Heating & Cooling Sources:
Part 3/6.1.2.1 heat sources & essential accessories provided in number & arrangement sufficient to accommodate facility needs (reserve capacity) even when any one of heat sources or essential accessories is not operating due to breakdown or routine maintenance

Part 3/6.2 AIR-HANDLING UNIT (AHU) DESIGN:
Part 3/6.2.1 AHU casing is designed to prevent water intrusion, resist corrosion & permit access for inspection & maintenance

Part 3/6.3 OUTDOOR AIR INTAKES & EXHAUST DISCHARGES:
Part 3/6.3.1 Outdoor Air Intakes:
Part 3/6.3.1.1 located min. of 25'-0" from cooling towers & all exhaust & vent discharges
☐ outdoor air intakes located such that bottom of air intake is at least 6'-0" above grade
☐ air intakes located away from public access
Part 3/6.3.1.3  intakes on top of buildings
☐ check if not included in project
☐ located with bottom of air intake min. of 3'-0" above roof level
Part 3/6.3.1.4  intake in areaway
☐ check if not included in project
☐ bottom of areaway air intake opening is at least 6'-0" above grade
☐ bottom of air intake opening from areaway into building is at least 3'-0" above bottom of areaway
Part 3/6.4  FILTRATION:
☐ Two filter banks for inpatient care (see Table 6.4)
☐ Filter Bank No. 1: MERV 7
☐ Filter Bank No. 2: MERV 14
☐ Each filter bank with efficiency of greater than MERV 12 is provided with differential pressure measuring device to indicate when filter needs to be changed
Part 3/6.4.1  Filter Bank No. 1 is placed upstream of heating & cooling coils
Part 3/6.4.2  Filter Bank No. 2 is placed downstream of all wet-air cooling coils & supply fan
Part 3/6.7  AIR DISTRIBUTION SYSTEMS:
Part 3/6.7.1  Maintain pressure relationships required in tables 7.1 in all modes of HVAC system operation
☐ Spaces that have required pressure relationships are served by fully ducted return systems or fully ducted exhaust systems
☐ Inpatient facilities & recovery rooms are served by fully ducted return or exhaust systems
Part 3/6.7.2  Air Distribution Devices:
☐ supply air outlets comply with Table 6.7.2
Part 3/6.7.3  Smoke Barriers:
☐ HVAC zones coordinated with compartmentation to minimize ductwork penetrations of fire & smoke barriers.
Part 3/6.8  ENERGY RECOVERY SYSTEMS:
☐ check if not included in project
Part 3/6.8.1  Located upstream of Filter Bank No. 2
Part 3/6.8.2  All room exhaust systems are not used for energy recovery
Part 3/6.8.3  Energy recovery systems with leakage potential
☐ check if not included in project
☐ arranged to minimize potential to transfer exhaust air directly back into supply airstream
☐ designed to have no more than 5% of total supply airstream consisting of exhaust air not used from these exhaust airstream sources: soiled workroom
Part 3/7  SPACE VENTILATION
Part 3/7.1.a  Spaces ventilated according to Table 7.1
Part 3/7.1.a.1  Air movement is from clean to less-clean areas
Part 3/7.1.a.3  Min. number of total air changes required for positive pressure rooms is provided by total supply airflow
☐ Min. number of total air changes required for negative pressure rooms is provided by total exhaust airflow
Part 3/7.1.a.4  Entire minimum outdoor air changes per hour required by Table 7.1 for each space meet filtration requirements of Section 6.4
Part 3/7.1a.5  Air recirculation through room unit
☐ check if not included in project
☐ complies with Table 7.1
☐ room unit receive filtered & conditioned outdoor air
☐ serve only a single space
☐ provides min. MERV 6 filter located upstream of any cold surface so that all of air passing over cold surface is filtered
2.1-8.3  ELECTRICAL SYSTEMS
2.1-8.3.2  ELECTRICAL DISTRIBUTION & TRANSMISSION
2.1-8.3.2.2  Panelboards:
(1)  panelboards serving life safety branch circuits serve floors on which they are located & floors immediately above & below
(2)  panelboard critical branch circuits serve floors on which they are located
(3)  panelboards not located in exit enclosures or exit passageways
### POWER-GENERATING & -STORING EQUIPMENT

2.1-8.3.3.1 Essential electrical system or emergency electrical power:

1. Essential electrical system complies with NFPA 99
2. Emergency electrical power complies with NFPA 99

### ELECTRICAL EQUIPMENT

2.1-8.3.5.1 Handwashing sinks that depend on building electrical service for operation are connected to essential electrical system:

- [ ] check if not included in project

2.1-8.3.5.2 Electronic health record system servers & centralized storage provided with uninterruptible power supply:

### ELECTRICAL RECEPTACLES

2.1-8.3.6 Receptacles in Corridors:

1. Duplex-grounded receptacles for general use installed 50-0” apart or less in all corridors
2. Duplex-grounded receptacles for general use installed within 25-0” of corridor ends

2.1-8.3.6.3 Essential Electrical System Receptacles:

1. Cover plates for electrical receptacles supplied from essential electrical system are distinctly colored or marked for identification
2. Same color is used throughout facility

### PLUMBING SYSTEMS

2.1-8.4 Plumbing & Other Piping Systems:

1. No plumbing piping exposed overhead or on walls where possible accumulation of dust or soil may create cleaning problem

2.1-8.4.2.1 Hemodialysis/Hemoperfusion Water Distribution:

1. Separate treated water distribution system
2. Outlet at each individual hemodialysis treatment bay
3. Outlet at hemodialysis equipment repair area
4. Outlet at dialysate preparation area
5. Dialysis equipment includes sufficient water treatment provisions for use of domestic cold water

2.1-8.4.2.5 Heated Potable Water Distribution Systems:

1. Heated potable water distribution systems serving patient care areas are under constant recirculation
2. Piping max. length 25-0”
3. No installation of dead-end piping (except for empty risers mains & branches for future use)
4. Any existing dead-end piping is removed:
   - [ ] check if not included in project
5. Water-heating system supplies water at temperatures & amounts indicated in Table 2.1-4

2.1-8.4.2.6 Drainage Systems:

1. Drainage piping installed above ceiling of or exposed in electronic data processing areas & electric closets:
   - [ ] check if not included in project
   - Special provisions to protect space below from leakage & condensation
2. Drip pan for drainage piping:
   - above ceiling of sensitive area
   - [ ] check if not included in project
   - Accessible
   - Overflow drain with outlet located in normally occupied area

### PLUMBING FIXTURES

2.1-8.4.3 Materials used for plumbing fixtures are non-absorptive & acid-resistant

2.1-8.4.3.2 Handwashing Station Sinks:

1. Sinks in handwashing stations are designed with basins that will reduce risk of splashing to areas where direct patient care is provided, sterile procedures are performed & medications are prepared
(2) sink basins have nominal size of
no less than 144 square inches
sink basins have min. dimension
9 inches in width or length

(3) sink basins are made of
porcelain, stainless steel or
solid-surface materials

(5) water discharge point of
faucets is at least 10” above
bottom of basin

(7) anchored so that allowable
stresses are not exceeded
where vertical or horizontal
force of 250 lbs. is applied

(8) sinks used by staff, patients, &
public have fittings that can be
operated without using hands
(may be single-lever or wrist
blade devices)

(a) blade handles
☐ check if not included in project
☑ at least 4 inches in length
☑ provide clearance
☑ required for operation

(b) sensor-regulated water fixtures
☐ check if not included in project
☑ meet user need for
temperature & length of
time water flows
☑ designed to function at all
times and during loss of
normal power

2.1-8.4.3.4 Ice-Making Equipment:
copper tubing provided for
supply connections to
ice-making equipment

2.1-8.4.3.5 Clinical Flushing-Rim Sinks:
(1) trimmed with valves that can
are operated without hands
(may be single-lever or wrist
blade devices)

(a) handles are at least 6 in. long

(b) integral trap wherein upper
portion of water trap provides
visible seal

2.1-8.4.4 MEDICAL GAS & VACUUM SYSTEMS
Station outlets provided as
indicated in Table 2.1-3

2.1-8.4.5 MEDICAL GAS & VACUUM SYSTEMS
Station outlets provided as
indicated in Table 2.1-3

2.1-8.5.1 CALL SYSTEMS
2.1-8.5.1.1 Nurse call stations provided as
required in Table 2.1-2

(1) Nurse call systems report to attended
location with electronically supervised
visual & audible annunciation as
indicated in Table 2.1-2

(2) Call system complies with UL 1069
“Standard for Hospital Signaling &
Nurse Call Equipment”

(5) Wireless nurse call system
☐ check if not included in project
☑ complies with UL 1069

2.1-8.5.1.2 Nurse call system provided in each
patient care area as required in
Table 2.1-2

2.1-8.5.1.3 Bath Stations:
bath station that can be
activated by patient lying on floor
provided at each patient toilet

(1) alarm in these areas can be
turned off only at bath station
where it was initiated

(3) toilet bath stations located on
the side of toilets within 12” of
front of toilet bowl & 3’-0” to
4’-0” above floor

2.1-8.5.1.5 Emergency call stations are
equipped with continuous audible or
visual confirmation to person who
initiated the code call

2.1-8.6.2 ELECTRONIC SURVEILLANCE
SYSTEMS
☐ check if not included in project

2.1-8.6.2.2 monitoring devices are located so
they are not readily observable by
general public or patients

2.1-8.6.2.3 electronic surveillance systems
receive power from essential
electrical system
