COMPLIANCE CHECKLIST

IP20_Endoscopy Services

The following checklist is intended to be used in the plan review applications for health care facilities submitted to the Massachusetts Department of Public Health. This checklist summarizes and references the applicable requirements from the Licensure Regulations and the 2018 Edition of the FGI Guidelines for Design and Construction of Hospitals. Applicants must verify compliance of the plans submitted to the Department with all referenced requirements from the Licensure Regulations and FGI Guidelines when completing this Checklist. A separate Checklist must be completed for each nursing unit, hospital or clinic department, or clinical suite.

Other jurisdictions, regulations and codes may have additional requirements which are not included in this checklist, such as:
- State Building Code (780 CMR)
- Accreditation requirements of The Joint Commission
- CDC Guidelines for Preventing the Transmission of Mycobacterium Tuberculosis in Health Care Facilities
- USP 797 & Regulations of the Massachusetts Board of Registration in Pharmacy
- Occupational Safety & Health Standards (OSHA)
- Accessibility Guidelines of the Americans with Disabilities Act (ADA)
- Architectural Access Board Regulations (521 CMR)
- Local Authorities having jurisdiction.

Instructions:
1. All requirement lines must be completed according to the following instructions and included in the plan submissions for Self-Certification Process or Abbreviated Review Process.
2. This checklist must be completed by the project architect or engineer based on the design actually reflected in the plans at the time of completion of the checklist.
3. Each requirement line (___) of this Checklist must be completed exclusively with one of the following marks, unless otherwise directed in the checklist. If a functional space is not affected by a renovation project, the mark “E” may be indicated on the requirement line (___) before the name of the functional space (associated requirements on indented lines below that name, or associated MEP requirements do not have to be completed in this case). If more than one functional space serves a given required function (e.g. patient room or exam room), that clarification should be provided in the Project Narrative, and the requirement lines are understood to only address the functional spaces that are involved in the project.

X = Requirement is met, for new space, for renovated space, or for existing direct support space for an expanded service.

E = Requirement relative to an existing suite or area that has been licensed for its designated function, is not affected by the construction project and does not pertain to a required direct support space for the specific service affected by the project. “E” must not be used for an existing required support space associated with a new patient care room or area.

☐ = Check box under section titles or individual requirements lines for optional services or functions that are not included in the project area.

W = Waiver requested for specific section of the Regulations or FGI Guidelines, where hardship in meeting requirement can be demonstrated (a Physical Plant Waiver Form must be completed for each waiver request). An explicit floor plan or plan detail must be attached to each waiver request.

4. All room functions marked with “X” must be shown on the plans with the same name labels as in this checklist.
5. Mechanical, electrical & plumbing requirements are only partially mentioned in this checklist. The relevant section of the FGI Guidelines must be used for project compliance with all MEP requirements and for waiver references.
6. Oxygen, vacuum, medical air, waste anesthesia gas disposal and instrument air outlets (if required) are identified respectively by the abbreviations "OX", "VAC", "MA", “WAGD” & “IA”.
7. Requirements referenced with “FI” result from formal interpretations from the FGI Interpretations Task Group.
8. The location requirements including asterisks (*) refer to the definitions of the Glossary in the beginning section of the FGI Guidelines and reproduced in this checklist.

Facility Name:

Architectural Requirements

2.2-3.11

ENDOSCOPY SERVICES

2.2-3.11.1.1 ___ Provisions are made for patient examination, interview, preparation & testing & for obtaining vital signs of patients for endoscopic procedures

2.2-3.11.2(1) Facility Layout & Circulation:
(a) ___ procedure rooms
(b) ___ endoscope processing room
(c) ___ pre- & post-procedure patient care area
(2) ___ circulation & restricted access
(a) ___ endoscopy procedure suite designed to facilitate movement of patients & personnel into, through & out of defined areas in suite

ENDOSCOPY PROCEDURE ROOM

2.2-3.3.2.1(1) Application:
(a) ___ room designated for patient care that requires high-level disinfection or sterile instruments & some environmental controls but not be performed with environmental controls of operating room
___ hospital has completed clinical assessment of procedures to be performed to determine appropriate room type & location for procedures & documented this in functional program included in Project Narrative

2.2-3.3.2.1(2) Location:
(a) ___ procedure room meet requirements of semi-restricted area
(b) ___ procedure room accessed from semi-restricted corridor or from unrestricted corridor

2.2-3.11.2 Space Requirements:
(1) ___ min. clear floor area 180 sf
(2)(a) ___ min. 5'-0" at each side of gurney/table
(2)(b) ___ min. 3'-6" at head & foot of gurney/table

2.2-3.3.2.3 ___ Documentation area
(1) ___ accommodations for written and/or electronic documentation provided in procedure room

2.1-2.8.3.1 ___ work surface to support documentation process

2.2-3.3.2.3(2) ___ use of documentation area allows for direct observation of patient

2.2-3.3.2.4 ___ Provisions made for patient privacy

Building Systems Requirements

Ventilation:
___ Min. 15 air changes per hour Table 7.1
___ Positive pressure
___ No recirculating room units

Power:
___ Min. 12 receptacles in total Table 2.1-1
___ Min. 8 receptacles convenient to table placement with at least one on each wall

Nurse Call System:
___ Staff assistance station Table 2.1-2
___ Emergency call station

Medical Gases:
___ 1 OX, 2 VAC, 1 MA Table 2.1-3

| 2.1-3.4.4.2 | At least one route of patient transport provides direct access from procedure corridor to Phase I recovery area without crossing public corridors |

### Building Systems Requirements

**Power:**

- ____ Min. 8 receptacles in total Table 2.1-1
- ____ convenient to head of gurney or bed

**Nurse Call System:**

- ____ Staff assistance station Table 2.1-2
- ____ Emergency call station

**Medical Gases:**

- ____ 1 OX, 3 VAC, 1 MA per station Table 2.1-3

### ENDOSCOPE PROCESSING ROOM

- ____ Ready accessible* to procedure rooms 2.2-3.11.4.1(2)
- ____ Meets requirements of semi-restricted area (3)
- ____ Endoscopy processing room includes decontamination area & clean work area (4)

**Layout:**

| (5) | ____ designed to provide one-way traffic pattern of contaminated instruments to cleaned instruments to sterilizer or mechanical processor |

| (b) | ____ entrance to decontamination area from procedure room |
| (b) | or |
| (b) | ____ entrance to decontamination area from procedure corridor |

| (c) | ____ exit from clean work area into procedure room |
| (c) | or |
| (c) | ____ exit from clean work area into procedure corridor |
**Architectural Requirements**

(d)  **min. clearance 3'-0" provided between decontamination area & clean work area**

2.2-3.11.4.2  **Decontamination area**

- (2)(a) **work counter**
- (2)(b) **handwashing station**
- (2)(c) **utility sink**
- (2)(d) **two-bin sink with backsplash at least 12 inches high**
- (2)(e) **single-bin sink with backsplash at least 12 inches high**
- (2)(f) **alternative methods for leak testing & pre-cleaning are provided**

(d)  **eyewash station**

(f)  **storage space for decontamination supplies & personal protective equipment (PPE)**

2.2-3.11.4.3  **Clean work area**

- (2)(a) **countertop with space for equipment**
- (2)(b) **storage for supplies**
- (4) **storage for clean endoscopes**
- (a)  **provided outside but adjacent* to procedure room**
- (b)  **provided in clean work area**
- **storage cabinets with doors**
- **cabinets located at least 3'-0" from any sink**
- **cabinets located so staff do not have to cross through decontamination area to access clean scopes**

2.2-3.11.8  **SUPPORT AREAS FOR ENDOSCOPY PROCEDURE SUITE & OTHER PATIENT CARE AREAS**

2.2-3.11.8.2  **Nurse station or control station**

2.1-2.8.2.1(1)  **space for counters**

2.1-2.8.2.1(2)  **handwashing station next to or directly accessible**

or  **hand sanitation dispenser next to or directly accessible**

2.2-3.11.8.3  **Documentation area**

2.1-2.8.3  **work surface to support documentation process**

Nurse Call System:

- **Duty station (light/sound signal)**

**Building Systems Requirements**

Ventilation:

- **Min. 6 air changes per hour**
- **Exhaust**
- **Negative pressure**
- **No recirculating room units**

- **Min. 4 air changes per hour**
- **Positive pressure**
- **No recirculating room units**

## Architectural Requirements

### SUPPORT AREAS FOR STAFF

2.2-3.11.9.1 **Lounge & toilet facilities**
- May be shared with other departments
- ☐ check if not included in project (only if hospital has fewer than 3 procedure rooms)
  - ☐ staff lounge
  - ☐ staff toilet room

### Building Systems Requirements

#### Ventilation:
- ☐ Min. 10 air changes per hour  
- ☐ Exhaust
- ☐ Negative pressure
- ☐ No recirculating room units

### SUPPORT AREAS FOR STAFF

2.2-3.11.9.4 **Staff changing area & toilet facilities**

1. ☐ one or more private changing rooms or areas for male & female staff
2. (a) lockers
3. (b) showers
4. (c) toilets

#### Ventilation:
- ☐ Min. 10 air changes per hour  
- ☐ Exhaust
- ☐ Negative pressure
- ☐ No recirculating room units

5. (d) handwashing stations
6. (e) space for donning & doffing surgical attire
7. (f) provisions for separate storage of clean & soiled surgical attire

### SUPPORT AREAS FOR PATIENTS

2.2-3.11.10.3 **Patient changing areas**

1. (a) provisions for storing patients' belongings
2. (c) separate changing or gowning areas
    - or
3. (2) private rooms, bays or cubicles are provided for changing

### LOCATION TERMINOLOGY:

- **Directly accessible:** Connected to the identified area or room through a doorway, pass-through, or other opening without going through an intervening room or public space
- **Adjacent:** Located next to but not necessarily connected to the identified area or room
- **Immediately accessible:** Available either in or adjacent to the identified area or room
- **Readily accessible:** Available on the same floor or in the same clinic as the identified area or room
ARCHITECTURAL DETAILS

CORRIDOR WIDTH:

2.1-7.2.2.1 Aisles, corridors & ramps required for exit access in a hospital not less than 8'-0" in clear & unobstructed width

NFPA 101, 18.2.3.4

or

Detailed code review incorporated in Project Narrative

or

Aisles, corridors & ramps in adjunct areas not intended for the housing, treatment, or use of inpatients not less than 44" in clear & unobstructed width

or

Detailed code review incorporated in Project Narrative

2.1-7.2.2.2 CEILING HEIGHT:

(1) Min ceiling height 7'-6" in corridors & in normally unoccupied spaces

(3) Min. height 7'-6" above floor of suspended tracks, rails & pipes located in traffic path for patients in beds & on stretchers

Min. ceiling height 7'-10" in other areas

2.1-7.2.2.3 DOORS & DOOR HARDWARE:

(1) Door Type:

(a) doors between corridors, rooms, or spaces subject to occupancy swing type or sliding doors

(b) sliding doors

□ check if not included in project

□ manual or automatic sliding doors comply with NFPA 101

□ detailed code review included in Project Narrative

□ no floor tracks

(2) Door Opening:

(a) min. 45.5" clear door width for diagnostic/treatment areas

min. 83.5" clear door height for diagnostic/treatment areas

(b) swinging doors for personnel use in addition to sliding doors

□ check if not included in project

□ min. clear width 34.5"

(3) Door Swing:

(a) doors do not swing into corridors except doors to non-occupiable spaces & doors with emergency breakaway hardware

□ Lever hardware or push/pull latch hardware

□ Doors for Patient Toilet Facilities:

(a) two separate doors

or

□ door that swings outward

or

□ door equipped with emergency rescue hardware (permits quick access from outside the room to prevent blockage of the door)

or

□ sliding door other than pocket door

(b) toilet room opens onto public area or corridor

□ check if not included in project

□ visual privacy is maintained

2.1-7.2.2.7 GLAZING MATERIALS:

□ Glazing within 1 foot 6 inches of floor

□ check if not included in project

□ must be safety glass, wire glass or plastic break-resistant material

2.1-7.2.2.8 HANDWASHING STATIONS:

(1)(c) Handwashing stations in patient care areas located so they are visible & unobstructed

(3)

(a) Handwashing station countertops made of porcelain, stainless steel, solid-surface materials or impervious plastic laminate assembly

(b) Countertops substrate

□ check if not included in project

□ marine-grade plywood (or equivalent material) with impervious seal

(4) Handwashing station casework

□ check if not included in project

□ designed to prevent storage beneath sink

(5) Provisions for drying hands

□ check if not included in project

□ only at hand scrub facilities

(a) hand-drying device does not require hands to contact dispenser

(b) hand-drying device is enclosed to protect against dust or soil & to ensure single-unit dispensing

(6) Liquid or foam soap dispensers
2.1-7.2.2.9 GRAB BARS:
(1) Grab bars anchored to sustain concentrated load 250 pounds
(3) Ends of grab bars constructed to prevent snagging clothes of patients, staff, & visitors

2.1-7.2.2.10 HANDRAILS:
(1) Handrails installed on both sides of patient use corridors
(3) Rail ends return to wall or floor
(4) Handrail gripping surfaces & fasteners are with 1/8-inch min. radius
(5) Handrails have eased edges & corners
(6) Handrail finishes are cleanable

2.1-7.2.2.12 NOISE CONTROL:
(1) Recreation rooms, exercise rooms, equipment rooms & similar spaces where impact noises may be generated are not located directly over operating suites
or Special provisions are made to minimize impact noise
(2) Noise reduction criteria in Table 1.2-6 applicable to partitions, floors & ceiling construction are met in patient areas

2.1-7.2.3 SURFACES
2.1-7.2.3.1 FLOORING & WALL BASES:
(1) Flooring surfaces cleanable & wear-resistant for location
(3) Smooth transitions provided between different flooring materials
(4) Flooring surfaces including those on stairways are stable, firm & slip-resistant
(5) Floors & wall bases of soiled workrooms, toilet rooms & other areas subject to frequent wet cleaning are constructed of materials that are not physically affected by germicidal or other types of cleaning solutions
(7)(a) Floors are monolithic & integral coved wall bases are at least 6” high & tightly sealed to wall in endoscopy procedures rooms & endoscope processing room

2.1-7.2.3.2 WALLS & WALL PROTECTION:
(1)(a) Wall finishes are washable
(1)(b) Wall finishes near plumbing fixtures are smooth, scrubbable & water-resistant

(2) Wall surfaces in areas routinely subjected to wet spray or splatter are monolithic or have sealed seams that are tight & smooth
(5) Wall protection devices & corner guards durable & scrubbable

2.1-7.2.3.3 CEILINGS:
(1) Ceilings provided in all areas except mechanical, electrical & communications equipment rooms
(a) Ceilings cleanable with routine housekeeping equipment
(b) Acoustic & lay-in ceilings where used do not create ledges or crevices
(2) Semi-Restricted Areas (i.e. Endoscopy Procedure Rooms):
(a) ceiling finishes are scrubbable, non absorbent, non perforated, & capable of withstanding cleaning with chemicals
(b) lay-in ceilings gasketed or each ceiling tile weighs at least one pound per square foot
(c) no perforated, tegular, serrated or highly textured tiles
or ceilings of monolithic construction

2.1-7.2.4 FURNISHINGS:
2.1-7.2.4.1 built-in furnishings upholstered with impervious materials in patient treatment areas with risks of exposure & contamination from bodily fluids & other fluids

2.1-7.2.4.3 Privacy curtains in patient care areas are washable

2.1-8.2 HEATING VENTILATION & AIR-CONDITIONING (HVAC) SYSTEMS
Part 3/6.1 UTILITIES:
Part 3/6.1.1 Ventilation Upon Loss of Electrical Power:

---

MDPH/DHCFLC 12/18 IP20
Part 3/6.1.2 Heating & Cooling Sources:
Part 3/6.1.2.1 Heat sources sufficient to accommodate facility needs (reserve capacity) even when any one of heat sources or essential accessories is not operating due to breakdown or routine maintenance.

Part 3/6.1.2.2 Central cooling systems greater than 400 tons (1407 kW) peak cooling load. ☐ check if not included in project

Part 3/6.2 AIR-HANDLING UNIT (AHU) DESIGN:
Part 3/6.2.1 AHU casing is designed to prevent water intrusion, resist corrosion & permit access for inspection & maintenance.

Part 3/6.3 OUTDOOR AIR INTAKES & EXHAUST DISCHARGES:
Part 3/6.3.1 Outdoor Air Intakes:
Part 3/6.3.1.1 Located min. of 25'-0" from cooling towers & all exhaust & vent discharges. Outdoor air intakes located such that bottom of air intake is at least 6'-0" above grade. Air intakes located away from public access.

Part 3/6.3.1.3 Intakes on top of buildings. ☐ check if not included in project

Part 3/6.3.1.4 Intake in areaway. ☐ check if not included in project

Part 3/6.4 FILTRATION:
Two filter banks for inpatient care (see Table 6.4)
Filter Bank No. 1: MERV 7
Filter Bank No. 2: MERV 14
Each filter bank with efficiency of greater than MERV 12 has differential pressure measuring device to indicate when filter needs to be changed.

Part 3/6.4.1 Filter Bank No. 1 is placed upstream of heating & cooling coils.

Part 3/6.4.2 Filter Bank No. 2 is placed downstream of all wet-air cooling coils & supply fan.

Part 3/6.5 HEATING & COOLING SYSTEMS:
Part 3/6.5.3 Radiant heating systems:
☐ check if not included in project

Part 3/6.7 AIR DISTRIBUTION SYSTEMS:
Part 3/6.7.1 Maintain pressure relationships required in Tables 7.1 in all modes of HVAC system operation.

Part 3/6.8 ENERGY RECOVERY SYSTEMS:
☐ check if not included in project

Part 3/6.8.1 Located upstream of Filter Bank No. 2.
Part 3/6.8.2 All room exhaust systems or combination All/PE rooms are not used for energy recovery.

Part 3/6.8.3 Energy recovery systems with leakage potential.
☐ check if not included in project

Part 3/6.9 SPACE VENTILATION
Part 3/6.9.1 Spaces ventilated according to Table 7.1.
Part 3/6.9.1.1 Air movement is from clean to less-clean areas.
Part 3/7.1.a.3  Min. number of total air changes required for positive pressure rooms is provided by total supply airflow
Min. number of total air changes required for negative pressure rooms is provided by total exhaust airflow

Part 3/7.1.a.4  Entire minimum outdoor air changes per hour required by Table 7.1 for each space meet filtration requirements of Section 6.4

Part 3/7.1a.5  Air recirculation through room unit
☐ check if not included in project
☐ complies with Table 7.1
☐ room unit receive filtered & conditioned outdoor air
☐ serve only a single space
☐ provides min. MERV 6 filter located upstream of any cold surface so that all of air passing over cold surface is filtered

2.1-8.3  ELECTRICAL SYSTEMS

2.1-8.3.2  ELECTRICAL DISTRIBUTION & TRANSMISSION

2.1-8.3.2.2  Panelboards:
(1) panelboards serving life safety branch circuits serve floors on which they are located & floors immediately above & below
(2) panelboard critical branch circuits serve floors on which they are located
(3) panelboards not located in exit enclosures or exit passageways

2.1-8.3.3  POWER-GENERATING & -STORING EQUIPMENT

2.1-8.3.3.1  Essential electrical system or emergency electrical power
(1) essential electrical system complies with NFPA 99
(2) emergency electrical power complies with NFPA 99

2.1-8.3.5  ELECTRICAL EQUIPMENT

2.1-8.3.5.1  Handwashing sinks that depends on building electrical service for operation are connected to essential electrical system
☐ check if not included in project

2.1-8.3.6  ELECTRICAL RECEPTACLES

2.1-8.3.6.1  Receptacles In Corridors:
(1) duplex-grounded receptacles for general use installed 50'-0" apart or less in all corridors
(2) duplex-grounded receptacles for general use installed within 25'-0" of corridor ends

2.1-8.3.6.3  Essential Electrical System Receptacles:
(1) cover plates for electrical receptacles supplied from essential electrical system are distinctively colored or marked for identification
(2) same color is used throughout facility

2.1-8.4  PLUMBING SYSTEMS

2.1-8.4.2  Plumbing & Other Piping Systems:
(1) no plumbing piping exposed overhead or on walls where possible accumulation of dust or soil may create cleaning problem
(2) heated potable water distribution systems serving patient care areas are under constant recirculation
(3)(a) non-recirculated fixture branch piping max. length 25'-0"
(3)(b) any existing dead-end piping is removed
☐ check if not included in project
(3)(c) water-heating system supplies water at temperatures & amounts indicated in Table 2.1-4

2.1-8.4.2.6  Drainage Systems:
(1)(a) drainage piping installed above ceiling of or exposed in electronic data processing areas & electric closets
☐ check if not included in project
☐ special provisions to protect space below from leakage & condensation
(1)(b) drip pan for drainage piping above ceiling of sensitive area
☐ check if not included in project
☐ accessible
☐ overflow drain with outlet located in normally occupied area
2.1-8.4.3 PLUMBING FIXTURES
2.1-8.4.3.1(1) Materials used for plumbing fixtures are non-absorptive & acid-resistant.

2.1-8.4.3.2 Handwashing Station Sinks:
(1) Sinks in handwashing stations are designed with basins that will reduce risk of splashing to areas where direct patient care is provided, sterile procedures are performed & medications are prepared.
(2) Sink basins have nominal size of no less than 144 square inches.
(3) Sink basins have min. dimension 9 inches in width or length.
(4) Sink basins are made of porcelain, stainless steel or solid-surface materials.
(5) Water discharge point of faucets is at least 10" above bottom of basin.
(6) Anchored so that allowable stresses are not exceeded where vertical or horizontal force of 250 lbs. is applied.
(7) Sinks used by staff, patients & public have fittings that can be operated without using hands (may be single-lever or wrist blade devices).
(a) Blade handles:
☐ check if not included in project
☐ provide clearance
☐ required for operation.
(b) Sensor-regulated water fixtures:
☐ check if not included in project
☐ meet user need for temperature & length of time water flows
☐ designed to function at all times & during loss of normal power.

2.1-8.4.3.5 Clinical Flushing-Rim Sinks:
(1) Trimmed with valves that can be operated without hands (may be single-lever or wrist blade devices).
(a) Handles are at least 6 in. long.
(b) Integral trap wherein upper portion of water trap provides visible seal.

2.1-8.4.4 MEDICAL GAS & VACUUM SYSTEMS
(1) Station outlets provided as indicated in Table 2.1-3.

2.1-8.5.1 CALL SYSTEMS
2.1-8.5.1.1(1) Nurse call stations provided as required in Table 2.1-2.
2.1-8.5.1.1(2) Nurse call systems report to attended location with electronically supervised visual & audible annunciation as indicated in Table 2.1-2.
2.1-8.5.1.4 Call system complies with UL 1069 "Standard for Hospital Signaling & Nurse Call Equipment".
2.1-8.5.1.5 Wireless nurse call system:
☐ check if not included in project
☐ complies with UL 1069.

2.1-8.5.1.2(4) Nurse call system provided in each patient care area as required in Table 2.1-2.

2.1-8.5.1.3 Bath Stations:
☐ bath station that can be activated by patient lying on floor provided at each patient toilet.
(1) Alarm in these areas can be turned off only at bath station where it was initiated.
(3) Toilet bath stations located on the side of toilets within 12" of front of toilet bowl & 3'-0" to 4'-0" above floor.

2.1-8.5.1.5 Emergency call stations are equipped with continuous audible or visual confirmation to person who initiated the code call.

2.1-8.6.2 ELECTRONIC SURVEILLANCE SYSTEMS
☐ check if not included in project
2.1-8.6.2.2 Monitoring devices are located so they are not readily observable by general public or patients.
2.1-8.6.2.3 Electronic surveillance systems receive power from essential electrical system.
