COMPLIANCE CHECKLIST

IP21 Cancer Treatment - Infusion Therapy

The following checklist is intended to be used in the plan review applications for health care facilities submitted to the Massachusetts Department of Public Health. This checklist summarizes and references the applicable requirements from the Licensure Regulations and the 2018 Edition of the FGI Guidelines for Design and Construction of Hospitals. Applicants must verify compliance of the plans submitted to the Department with all referenced requirements from the Licensure Regulations and FGI Guidelines when completing this Checklist. A separate Checklist must be completed for each nursing unit, hospital or clinic department, or clinical suite.

Other jurisdictions, regulations and codes may have additional requirements which are not included in this checklist, such as:

- State Building Code (780 CMR)
- Accreditation requirements of The Joint Commission
- CDC Guidelines for Preventing the Transmission of Mycobacterium Tuberculosis in Health Care Facilities
- USP 797 & Regulations of the Massachusetts Board of Registration in Pharmacy
- Occupational Safety & Health Standards (OSHA)
- Accessibility Guidelines of the Americans with Disabilities Act (ADA)
- Architectural Access Board Regulations (521 CMR)
- Local Authorities having jurisdiction.

Instructions:

1. All requirement lines must be completed according to the following instructions and included in the plan submissions for Self-Certification Process or Abbreviated Review Process.
2. This checklist must be completed by the project architect or engineer based on the design actually reflected in the plans at the time of completion of the checklist.
3. Each requirement line (____) of this Checklist must be completed exclusively with one of the following marks, unless otherwise directed in the checklist. If a functional space is not affected by a renovation project, the mark “E” may be indicated on the requirement line (____) before the name of the functional space (associated requirements on indented lines below that name, or associated MEP requirements do not have to be completed in this case). If more than one functional space serves a given required function (e.g. patient room or exam room), that clarification should be provided in the Project Narrative, and the requirement lines are understood to only address the functional spaces that are involved in the project.

X = Requirement is met, for new space, for renovated space, or for existing direct support space for an expanded service.

E = Requirement relative to an existing suite or area that has been licensed for its designated function, is not affected by the construction project and does not pertain to a required direct support space for the specific service affected by the project. “E” must not be used for an existing required support space associated with a new patient care room or area.

W = Waiver requested for specific section of the Regulations or FGI Guidelines, where hardship in meeting requirement can be demonstrated (a Physical Plant Waiver Form must be completed for each waiver request). An explicit floor plan or plan detail must be attached to each waiver request.

4. All room functions marked with “X” must be shown on the plans with the same name labels as in this checklist.
5. Mechanical, electrical & plumbing requirements are only partially mentioned in this checklist. The relevant section of the FGI Guidelines must be used for project compliance with all MEP requirements and for waiver references.
6. Oxygen, vacuum, medical air, waste anesthesia gas disposal and instrument air outlets (if required) are identified respectively by the abbreviations "OX", "VAC", "MA", "WAGD" & "IA".
7. Requirements referenced with “FI” result from formal interpretations from the FGI Interpretations Task Group.
8. The location requirements including asterisks (*) refer to the definitions of the Glossary in the beginning section of the FGI Guidelines and reproduced in this checklist.

2.2-3.12

CANCER TREATMENT/ INFUSION THERAPY

2.2-3.12.2

INFUSION AREA

2.2-3.12.2.1(3)

Infusion area separate from administrative & waiting areas

2.2-3.12.2.2

Space Requirements:

☐ patient care bays
☐ check if not included in project

(1)(a) min. clear floor area 70 sf per bay

(2)(a) min. clearance 5'-0" between sides of patient lounge chairs

min. clearance 3'-0" between sides of patient lounge chairs & adjacent* walls or partitions

min. clearance 2' -0" between foot of patient lounge chairs & cubicle curtain

Ventilation:

☐ Min. 6 air changes per hour Table 7.1

Nurse Call System:

☐ Patient station Table 2.1-2

☐ Staff assistance station

☐ Emergency call station

☐ patient care cubicles
☐ check if not included in project

(1)(b) min. clear floor area 80 sf per cubicle

(2)(b) min. clearance 3'-0" between sides of patient lounge chairs & adjacent* walls or partitions

min. clearance 2' -0" between foot of patient lounge chairs & cubicle curtain

Ventilation:

☐ Min. 6 air changes per hour Table 7.1

Nurse Call System:

☐ Patient station Table 2.1-2

☐ Staff assistance station

☐ Emergency call station

☐ single-patient rooms
☐ check if not included in project

(1)(c) min. clear floor area 100 sf per room

(2)(c) min. clearance 3'-0" between sides & foot of beds or lounge chairs & adjacent* walls or partitions

Ventilation:

☐ Min. 6 air changes per hour Table 7.1

Nurse Call System:

☐ Patient station Table 2.1-2

☐ Staff assistance station

☐ Emergency call station

2.2-3.12.2.4

Each patient care station has provisions for visual privacy

2.2-3.12.2.5(1)

Handwashing Stations:

2.1-2.8.7.1

☐ located in each room where hands-on patient care is provided

2.1-2.8.7.3

☐ handwashing station serves multiple patient care stations
☐ check if not included in project

(1) ☐ at least 1 handwashing station for every 4 patient care stations or fewer & for each major fraction thereof

(2) ☐ handwashing stations evenly distributed
Architectural Requirements

2.2-3.12.2.5(2) ___ Handwashing station located in, next to or directly accessible* to nurse station

2.2-3.12.2.6 ___ Patient toilet room
   ___ at least one patient toilet room provided in infusion area
   ___ handwashing station

2.2-3.12.4.2 **AIRBORNE INFECTION ISOLATION (AII) ROOM**
   □ check if not included in project

2.1-2.4.2.2 ___ Complies with requirements applicable to infusion rooms
   (1) ___ Capacity one bed
   (2) ___ Personal protective equipment (PPE) storage at entrance to room
   (3) ___ Handwashing station

   (4) ___ Patient toilet room
      ___ serves only one AII room

2.1-2.4.2.3 ___ Anteroom
   □ check if not included in project
   (1) ___ provides space for persons to don personal protective equipment (PPE) before entering patient room
   (2) ___ all doors to anteroom have self-closing devices
      or
      ___ audible alarm activated when AII room is in use as isolation room

   (3)(a) ___ handwashing station
   (3)(b) ___ storage for unused PPE
   (3)(c) ___ disposal/holding container for used PPE

2.1-2.4.2.4 Architectural Details & Furnishings:
   (1)(a) ___ perimeter walls ceiling & floor including penetrations constructed to prevent air exfiltration

Building Systems Requirements

Ventilation:
   ___ Min. 10 air changes per hour  Table 7.1
   ___ Exhaust
   ___ Negative pressure
   ___ No recirculating room units

Table 7.1

### SPECIAL DESIGN ELEMENTS

- No fish tanks installed in cancer treatment/infusion therapy centers

### SUPPORT AREAS FOR INFUSION CENTER

#### 2.2-3.12.8

- Nurse station
  - Located in infusion area
  - Designed to provide visual observation of all patient care stations
  - Located out of direct line of traffic
  - Space for counters
  - Handwashing station next to or directly accessible
  - Hand sanitation dispenser next to or directly accessible

#### 2.1-2.8.8.2

- Medication preparation room
  - Under visual control of nursing staff
  - Handwashing station
  - Lockable refrigerator
  - Locked storage for controlled drugs
  - Sharps containers
  - Check if not included in project
  - Self-contained medication-dispensing unit
  - Check if not included in project
  - Room designed with space to prepare medications

#### 2.2-3.12.9

- Nourishment area or room
  - Handwashing station
  - Work counter
  - Refrigerator
  - Microwave
  - Storage cabinets
  - Space for temporary storage of food service implements
  - Provisions for separate temporary storage of unused & soiled meal trays

### Ventilation:

- Min. 4 air changes per hour
- Table 7.1

### Lighting:

- Task lighting
- 2.1-2.8.8.1(2)(d)

### Nurse Call System:

- Duty station (light/sound signal)
- Table 2.1-2

Compliance Checklist: Cancer Treatment - Infusion Therapy

**Architectural Requirements**

2.2-3.12.8.13(3)  _Gurney/wheelchair storage space_

2.2-3.12.8.14  _Environmental services room_

2.1-2.8.14.1  _readily accessible* to unit or floor it serves (permitted to serve more than one patient care unit on floor)_

2.1-2.8.14.2  

(1)  _service sink or floor-mounted mop sink_

(2)  _provisions for storage of supplies & housekeeping equipment_

(3)  

or

___ handwashing station

or

___ hand sanitation station

2.2-3.12.9  **SUPPORT AREAS FOR STAFF**

2.2-3.12.9.1  _Staff lounge facilities (may be shared with other services)_

(2)  _readily accessible* to cancer treatment/infusion therapy unit_

2.1-2.9.1  _min. 100 sf_

2.2-3.12.9.2  _Staff toilet room (permitted to be unisex)_

2.1-2.9.2.1  _readily accessible* to each patient care unit_

2.1-2.9.2.2  _toilet & handwashing station_

2.2-3.12.10  **SUPPORT AREAS FOR PATIENTS**

2.2-3.12.10.1  _Waiting room_

(1)  _toilet room_

___ handwashing station

(2)  _provisions for drinking water_

(3)  _provisions for telephone access_

(4)  _seating accommodations for waiting periods_

2.2-3.12.10.3  _Storage for patient belongings_

☐ check if not included in project

___ located in infusion area

**Building Systems Requirements**

Ventilation:  ___ Min. 10 air changes per hour  Table 7.1

___ Exhaust

___ Negative pressure

___ No recirculating room units

*LOCATION TERMINOLOGY:*

**Directly accessible:** Connected to the identified area or room through a doorway, pass-through, or other opening without going through an intervening room or public space

**Adjacent:** Located next to but not necessarily connected to the identified area or room

**Immediately accessible:** Available either in or adjacent to the identified area or room

**Readily accessible:** Available on the same floor or in the same clinic as the identified area or room
ARCHITECTURAL DETAILS

CORRIDOR WIDTH:

- Aisles, corridors & ramps required for exit access in a hospital not less than 8’-0” in clear & unobstructed width
  - Detailed code review incorporated in Project Narrative
- Aisles, corridors & ramps in adjunct areas not intended for the housing, treatment, or use of inpatients not less than 44” in clear & unobstructed width
  - Detailed code review incorporated in Project Narrative

CEILING HEIGHT:

1. Min ceiling height 7’-6” in corridors & in normally unoccupied spaces
2. Min. height 7’-6” above floor of suspended tracks, rails & pipes located in traffic path for patients in beds & on stretchers
3. Min. ceiling height 7’-10” in other areas

DOORS & DOOR HARDWARE:

1. Doors between corridors, rooms, or spaces subject to occupancy swing type or sliding doors
   - Sliding doors
     - Manual or automatic
     - Sliding doors comply with NFPA 101
     - Detailed code review included in Project Narrative
     - No floor tracks
2. Door Opening:
   - Min. 45.5” clear door width for diagnostic/treatment areas
   - Min. 83.5” clear door height for diagnostic/treatment areas
   - Swinging doors for personnel use in addition to sliding doors
     - Check if not included in project
     - Min. clear width 34.5”
3. Door Swing:
   - Doors do not swing into corridors except doors to non-occupiable spaces & doors with emergency breakaway hardware

GLAZING MATERIALS:

- Glazing within 1 foot 6 inches of floor
  - Check if not included in project
  - Must be safety glass, wire glass or plastic break-resistant material

HANDWASHING STATIONS:

1. Handwashing stations in patient care areas located so they are visible & unobstructed
2. Handwashing station countertops made of porcelain, stainless steel, solid-surface materials or impervious plastic laminate assembly
   - Check if not included in project
   - Marine-grade plywood (or equivalent material) with impervious seal
3. Handwashing station casework
   - Check if not included in project
   - Designed to prevent storage beneath sink
4. Handwashing station casework
   - Check if not included in project
   - Designed to prevent storage beneath sink
5. Provisions for drying hands
   - Check if not included in project
   - Only at hand scrub facilities
   - Hand-drying device does not require hands to contact dispenser
   - Hand-drying device is enclosed to protect against dust or soil & to ensure single-unit dispensing
6. Liquid or foam soap dispensers
2.1-7.2.2.9 GRAB BARS:
(1) Grab bars anchored to sustain concentrated load 250 pounds
(3) Ends of grab bars constructed to prevent snagging clothes of patients staff & visitors

2.1-7.2.2.10 HANDRAILS:
(1) Handrails installed on both sides of patient use corridors
(3) Rail ends return to wall or floor
(4) Handrail gripping surfaces & fasteners are with 1/8-inch min. radius
(5) Handrails have eased edges & corners
(6) Handrail finishes are cleanable

2.1-7.2.2.12 NOISE CONTROL:
(2) Noise reduction criteria in Table 1.2-6 applicable to partitions, floors & ceiling construction are met in patient areas

2.1-7.2.3 SURFACES
2.1-7.2.3.1 FLOORING & WALL BASES:
(1) Flooring surfaces cleanable & wear-resistant for location
(3) Smooth transitions provided between different flooring materials
(4) Flooring surfaces including those on stairways are stable, firm & slip-resistant
(5) Floors & wall bases of soiled workrooms, toilet rooms & other areas subject to frequent wet cleaning are constructed of materials that are not physically affected by germicidal or other types of cleaning solutions
(7)(a) Floors are monolithic & integral coved wall bases are at least 6" high & tightly sealed to wall in Airborne infection isolation (AII) room & any anteroom

2.1-7.2.3.2 WALLS & WALL PROTECTION:
(1)(a) Wall finishes are washable
(1)(b) Wall finishes near plumbing fixtures are smooth, scrubbable & water-resistant
(2) Wall surfaces in areas routinely subjected to wet spray or splatter are monolithic or have sealed seams that are tight & smooth
(5) Wall protection devices & corner guards durable & scrubbable

2.1-7.2.3.3 CEILINGS:
(1) Ceilings provided in all areas except mechanical, electrical & communications equipment rooms
(a) Ceilings cleanable with routine housekeeping equipment
(b) Acoustic & lay-in ceilings where used do not create ledges or crevices

2.1-7.2.4 FURNISHINGS:
2.1-7.2.4.1 built-in furnishings upholstered with impervious materials in patient treatment areas with risks of exposure & contamination from bodily fluids & other fluids
2.1-7.2.4.3 Privacy curtains in patient care areas are washable

2.1-8.2 HEATING VENTILATION & AIR-CONDITIONING (HVAC) SYSTEMS

Part 3/6.1 UTILITIES:
Part 3/6.1.1 Ventilation Upon Loss of Electrical Power:
☐ space ventilation & pressure relationship requirements of Table 7.1 are maintained for AII Rooms in event of loss of normal electrical power
☐ check if not included in project

Part 3/6.1.2 Heating & Cooling Sources:
Part 3/6.1.2.1 heat sources & essential accessories provided in number & arrangement sufficient to accommodate facility needs (reserve capacity) even when any one of heat sources or essential accessories is not operating due to breakdown or routine maintenance

Part 3/6.2 AIR-HANDELING UNIT (AHU) DESIGN:
Part 3/6.2.1 AHU casing is designed to prevent water intrusion, resist corrosion & permit access for inspection & maintenance

Part 3/6.3 OUTDOOR AIR INTAKES & EXHAUST DISCHARGES:
Part 3/6.3.1 Outdoor Air Intakes:
Part 3/6.3.1.1 located min. of 25'-0" from cooling towers & all exhaust & vent discharges
☐ outdoor air intakes located such that bottom of air intake is at least 6'-0" above grade
☐ air intakes located away from public access
Part 3/6.3.1.3  intakes on top of buildings
☐ check if not included in project
located with bottom of air intake min. of 3'-0" above roof level

Part 3/6.3.1.4  intake in areaway
☐ check if not included in project
bottom of areaway air intake opening is at least 6'-0" above grade
☐ bottom of air intake opening from areaway into building is at least 3'-0" above bottom of areaway

Part 3/6.2  Exhaust Discharges for Infectious Exhaust Air:
☐ check if not included in project

Part 3/6.2.1  ductwork within building is under negative pressure for exhaust of contaminated air (i.e. air from AII rooms)
☐ exhaust discharge outlets with contaminated air located such that they reduce potential for recirculation of exhausted air back into building

Part 3/6.2.2  exhaust discharge outlets with contaminated air is arranged to discharge to atmosphere in vertical direction at least 10 feet above adjoining roof level
☐ exhaust discharge outlets from laboratory work area chemical fume hoods discharge with stack velocity of at least 2500 fpm
☐ exhaust discharge outlets from AII rooms bronchoscopy & sputum collection exhaust & laboratory work area chemical fume hoods is located not less than 25 feet horizontally from outdoor air intakes, openable windows/doors & areas that are normally accessible to public

Part 3/6.4  FILTRATION:
☐ Two filter banks for inpatient care (see Table 6.4)
☐ Filter Bank No. 1: MERV 7
☐ Filter Bank No. 2: MERV 14
☐ Each filter bank with efficiency of greater than MERV 12 is provided with differential pressure measuring device to indicate when filter needs to be changed
☐ Filter Bank No. 1 is placed upstream of heating & cooling coils

Part 3/6.4.2  Filter Bank No. 2 is placed downstream of all wet-air cooling coils & supply fan

Part 3/6.5  HEATING & COOLING SYSTEMS:
Part 3/6.5.3  radiant heating systems
☐ check if not included in project
☐ ceiling or wall panels with exposed cleanable surfaces or radiant floor heating are provided in AII room & procedure room

Part 3/6.7  AIR DISTRIBUTION SYSTEMS:
Part 3/6.7.1  Maintain pressure relationships required in tables 7.1 in all modes of HVAC system operation
☐ Spaces that have required pressure relationships are served by fully ducted return systems or fully ducted exhaust systems
☐ Inpatient facilities & recovery rooms are served by fully ducted return or exhaust systems

Part 3/6.7.2  Air Distribution Devices:
☐ supply air outlets comply with Table 6.7.2

Part 3/6.7.3  Smoke Barriers:
☐ HVAC zones coordinated with compartmentation to minimize ductwork penetrations of fire & smoke barriers.

Part 3/6.8  ENERGY RECOVERY SYSTEMS:
☐ check if not included in project
Part 3/6.8.1  Located upstream of Filter Bank No. 2
Part 3/6.8.2  AII room exhaust systems or combination AII rooms are not used for energy recovery
Part 3/6.8.3  Energy recovery systems with leakage potential
☐ check if not included in project
☐ arranged to minimize potential to transfer exhaust air directly back into supply airstream
☐ designed to have no more than 5% of total supply airstream consisting of exhaust air not used from these exhaust airstream sources: soiled workroom

Part 3/7  SPACE VENTILATION
Part 3/7.1.a  Spaces ventilated according to Table 7.1
Part 3/7.1.a.1  Air movement is from clean to less-clean areas
Part 3/7.1.a.3  Min. number of total air changes required for positive pressure rooms is provided by total supply airflow

Min. number of total air changes required for negative pressure rooms is provided by total exhaust airflow

Part 3/7.1.a.4  Entire minimum outdoor air changes per hour required by Table 7.1 for each space meet filtration requirements of Section 6.4

Part 3/7.1a.5  Air recirculation through room unit
☐ check if not included in project
☐ complies with Table 7.1
☐ room unit receive filtered & conditioned outdoor air
☐ serve only a single space
☐ provides min. MERV 6 filter located upstream of any cold surface so that all of air passing over cold surface is filtered

Part 3/7.2  ADDITIONAL ROOM-SPECIFIC REQUIREMENTS:

Part 3/7.2.1  Airborne Infection Isolation (AII) Rooms
☐ check if not included in project
☐ AII rooms have permanently installed device and/or mechanism to constantly monitor differential air pressure between room & corridor
☐ Local visual means is provided to indicate whenever negative differential pressure is not maintained
☐ Air from AII room is exhausted directly to outdoors
☐ Exhaust air from AII rooms, associated anterooms & toilet rooms is discharged directly to outdoors without mixing with exhaust air from any other non-AII room or exhaust system
☐ Exhaust air grille or register in patient room is located directly above patient bed on ceiling or on wall near head of bed

☐ Anteroom
☐ check if not included in project
☐ AII room is at negative pressure with respect to anteroom
☐ Anteroom is at negative pressure with respect to corridor

2.1-8.3  ELECTRICAL SYSTEMS

2.1-8.3.2  ELECTRICAL DISTRIBUTION & TRANSMISSION

2.1-8.3.2.2  Panelboards:
(1) panelboards serving life safety branch circuits serve floors on which they are located & floors immediately above & below
(2) panelboard critical branch circuits serve floors on which they are located
(3) panelboards not located in exit enclosures or exit passageways

2.1-8.3.2.3  Ground-Fault Circuit Interrupters in Critical Care Areas:
☐ check if not included in project
(2) each receptacle individually protected by single GFCI device

2.1-8.3.3  POWER-GENERATING & -STORING EQUIPMENT

2.1-8.3.3.1  Essential electrical system or emergency electrical power
(1) essential electrical system complies with NFPA 99
(2) emergency electrical power complies with NFPA 99

2.1-8.3.5  ELECTRICAL EQUIPMENT

2.1-8.3.5.1  Handwashing sinks & scrub sinks that depends on building electrical service for operation are connected to essential electrical system

2.1-8.3.5.2  Electronic health record system servers & centralized storage provided with uninterruptible power supply

2.1-8.3.6  ELECTRICAL RECEPTACLES

2.1-8.3.6.1  Receptacles In Corridors:
(1) duplex-grounded receptacles for general use installed 50'-0" apart or less in all corridors
(2) duplex-grounded receptacles for general use installed within 25'-0" of corridor ends

2.1-8.3.6.3  Essential Electrical System Receptacles:
(1) cover plates for electrical receptacles supplied from essential electrical system are distinctively colored or marked for identification
(2) same color is used throughout facility
2.1-8.4 PLUMBING SYSTEMS
2.1-8.4.2 Plumbing & Other Piping Systems:
2.1-8.4.2.1(3) no plumbing piping exposed overhead or on walls where possible accumulation of dust or soil may create cleaning problem

2.1-8.4.2.5 Heated Potable Water Distribution Systems:
(2) heated potable water distribution systems serving patient care areas are under constant recirculation
(3)(a) no installation of dead-end piping (except for empty risers mains & branches for future use)
(3)(c) any existing dead-end piping is removed
☐ check if not included in project
(3)(b) water-heating system supplies water at temperatures & amounts indicated in Table 2.1-4

2.1-8.4.2.6 Drainage Systems:
(1)(a) drainage piping installed above ceiling of or exposed in electronic data processing areas & electric closets
☐ check if not included in project
(1)(b) drip pan for drainage piping above ceiling of sensitive area
☐ check if not included in project
☐ accessible
☐ overflow drain with outlet located in normally occupied area

2.1-8.4.3 PLUMBING FIXTURES
2.1-8.4.3.1(1) Materials used for plumbing fixtures are non-absorptive & acid-resistant

2.1-8.4.3.2 Handwashing Station Sinks:
(1) sinks in handwashing stations are designed with basins that will reduce risk of splashing to areas where direct patient care is provided
(2) sink basins have nominal size of no less than 144 square inches
sink basins have min. dimension 9 inches in width or length
(3) sink basins are made of porcelain, stainless steel or solid-surface materials

2.1-8.4.3.5 Clinical Flushing-Rim Sinks:
(1) trimmed with valves that can are operated without hands
(a)
(b) handles are at least 6 in. long
(2) integral trap wherein upper portion of water trap provides visible seal

2.1-8.4.4 MEDICAL GAS & VACUUM SYSTEMS
☐ Station outlets provided as indicated in Table 2.1-3
