COMPLIANCE CHECKLIST

OP1 General & Specialty Medical Services Facilities

The following checklist is intended to be used in the plan review applications for health care facilities submitted to the Massachusetts Department of Public Health. This checklist summarizes and references the applicable requirements from the Licensure Regulations and the 2018 Edition of the FGI Guidelines for Design and Construction of Outpatient Facilities. Applicants must verify compliance of the plans submitted to the Department with all referenced requirements from the Licensure Regulations and FGI Guidelines when completing this Checklist. A separate Checklist must be completed for each nursing unit, hospital or clinic department, or clinical suite.

Other jurisdictions, regulations and codes may have additional requirements which are not included in this checklist, such as:
- State Building Code (780 CMR)
- Accreditation requirements of The Joint Commission
- CDC Guidelines for Preventing the Transmission of Mycobacterium Tuberculosis in Health Care Facilities
- USP 797 & Regulations of the Massachusetts Board of Registration in Pharmacy
- Occupational Safety & Health Standards (OSHA)
- Accessibility Guidelines of the Americans with Disabilities Act (ADA)
- Architectural Access Board Regulations (521 CMR)
- Local Authorities having jurisdiction.

Instructions:
1. All requirement lines must be completed according to the following instructions and included in the plan submissions for Self-Certification Process or Abbreviated Review Process.
2. This checklist must be completed by the project architect or engineer based on the design actually reflected in the plans at the time of completion of the checklist.
3. Each requirement line (___) of this Checklist must be completed exclusively with one of the following marks, unless otherwise directed in the checklist. If a functional space is not affected by a renovation project, the mark “E” may be indicated on the requirement line (___) before the name of the functional space (associated requirements on indented lines below that name, or associated MEP requirements do not have to be completed in this case). If more than one functional space serves a given required function (e.g. patient room or exam room), that clarification should be provided in the Project Narrative, and the requirement lines are understood to only address the functional spaces that are involved in the project.

X = Requirement is met, for new space, for renovated space, or for existing direct support space for an expanded service.

E = Requirement relative to an existing suite or area that has been licensed for its designated function, is not affected by the construction project and does not pertain to a required direct support space for the specific service affected by the project. “E” must not be used for an existing required support space associated with a new patient care room or area.

W = Waiver requested for specific section of the Regulations or FGI Guidelines, where hardship in meeting requirement can be demonstrated (a Physical Plant Waiver Form must be completed for each waiver request). An explicit floor plan or plan detail must be attached to each waiver request.

4. All room functions marked with “X” must be shown on the plans with the same name labels as in this checklist.
5. Mechanical, electrical & plumbing requirements are only partially mentioned in this checklist. The relevant section of the FGI Guidelines must be used for project compliance with all MEP requirements and for waiver references.
6. Oxygen, vacuum, medical air, waste anesthesia gas disposal and instrument air outlets (if required) are identified respectively by the abbreviations “OX”, “VAC”, “MA”, “WAGD” & “IA”.
7. Requirements referenced with “FI” result from formal interpretations from the FGI Interpretations Task Group.
8. The location requirements including asterisks (*) refer to the definitions of the Glossary in the beginning section of the FGI Guidelines and reproduced in this checklist.

Project Description:

MDPH/DHCFLC
**Architectural Requirements**

**Building Systems Requirements**

### 2.2

**GENERAL & SPECIALTY MEDICAL SERVICES FACILITIES**

#### 2.2-2

**ACCOMMODATIONS FOR CARE OF PATIENTS OF SIZE**

2.1-2.1.2

☐ check if not included in project (only if a Patient Handling & Movement Assessment that determines that the outpatient service does not have a need for expanded-capacity lifts & architectural details that support movement of patients of size in patient areas is attached to the Project Narrative)

2.1-2.1.2

Location:

- spaces designated for care of or use by patients of size are provided in locations to accommodate population expected to be served by facility

2.1-2.5

☐ Handwashing stations

2.1-2.5.2

☐ downward static force required for handwashing stations designated for patients of size accommodates maximum patient weight of patient population

2.1-2.6

☐ Patient toilet room

- expanded-capacity toilet
  - mounted min. 36 inches from finished wall to centerline of toilet on both sides (for caregiver assistance with lifts)
  - or
  - regular toilet
    - mounted min. 44 inches from centerline of toilet on both sides to finished walls to allow for positioning of expanded-capacity commode over toilet

2.1-2.6.3

☐ rectangular clear floor area min. 46” wide extends 72” from front of toilet

2.1-2.7

☐ Single-patient exam/observation room

Space Requirements:

- min. 5’-0” clearance at foot of expanded-capacity exam table
  - Ventilation:
    - Min. 10 air changes per hour
    - Exhaust
    - Negative pressure
    - No recirculating room units

- min. 3’-0” clearance on non-transfer side of expanded-capacity exam table

- min. 5’-0” on transfer side of expanded-capacity exam table with ceiling- or wall-mounted lift
  - Power:
    - Each examination table is served by at least one duplex receptacle

Table 8.1/Policy
Architectural Requirements

(b) min. 7'-0" on transfer side of expanded-capacity exam table in rooms without ceiling- or wall-mounted lift

2.1-2.8 ___ Equipment & supply storage

2.1-2.9 ___ Waiting areas
2.1-2.9.1 ___ seating for persons of size be provided in waiting areas in outpatient facilities
2.1-2.9.2 ___ waiting areas be sized to accommodate expanded-capacity furniture required for patients & visitors of size

2.1-2.10.1 ___ All plumbing fixtures, handrails, grab bars, patient lift, equipment, built-in furniture & other furnishings designed to accommodate maximum patient weight

2.1-2.10.2 Door Openings:
2.1-2.10.2.1 ___ all door openings used for path of travel to public areas & areas where care will be provided for patients of size have min. clear width of 45.5" to provide access for expanded-capacity wheelchairs access
2.1-2.10.2.2 ___ door openings to toilet rooms designated for patients of size have min. clear width of 45.5"

Building Systems Requirements

2.2-3.2.1 EXAMINATION ROOMS
2.1-3.2.1.1(1)(b) ___ Provisions to preserve patient privacy from observation from outside exam room

2.1-3.2.1.2 ___ Single-patient examination room
☐ check if not included in project

Space Requirements:
(2)(a) ___ min. clear floor area of 80 sf
___ room size allows min. clearance 2'-8" at each side & at foot of exam table or recliner
___ room arrangement shown in the plans for each exam room (Layout #1)

(1)(b) ___ room arranged with particular placement of exam table, recliner or chair to accommodate type of patient being served
☐ check if not included in project
___ room arrangement shown in the plans (Layout #2)
___ proposed room arrangement to accommodate type of patient being served is explained in Project Narrative

Ventilation: ___ Min. 4 air changes per hour Table 8.1/Policy

Power: ___ Each exam table is served by at least one duplex receptacle 2.2-8.3.6.2

### Architectural Requirements

#### LABORATORY SERVICES

- 2.2-4.1
  - Laboratory services provided on-site
    - Compliance Checklist OP2 has been submitted
  - or
    - Laboratory services provided off-site

#### SPECIMEN COLLECTION & STORAGE

- 2.2-4.1.8
  - Specimen Collection:
    - (1) dedicated specimen collection toilet room
      - toilet room is accessible without reentering waiting room or leaving clinical services area
    - or
      - patient toilet room used for specimen collection
      - toilet room is accessible without reentering waiting room or leaving clinical services area
  - (2) dedicated blood collection area
    - or
      - examination rooms used for blood collection

- 2.2-4.1.8.2
  - Specimen storage
    - (1) accommodations for storage of blood, urine & other specimens
    - (2) blood storage facilities meet requirements of CLIA standards for blood banks
    - §493.1103(c)(1)
      - blood specimen stored in monitored refrigerator
      - or
      - blood storage conditions, including temperature, are appropriate to prevent deterioration of blood specimens

### Building Systems Requirements

#### Ventilation:
- Min. 10 air changes per hour
- Exhaust
- Negative pressure
- No recirculating room units

#### Sterile Processing

- 2.2-4.3
  - check if not included in project (only if only disposable instruments & supplies are used)

- 2.2-4.3.2
  - Facilities for on-site sterile processing are provided
    - Compliance Checklist OP4 has been submitted
  - or

- 2.2-4.3.3
  - Sterile processing is performed off-site
    - Section 2.1-4.3.3 below is completed

- 2.1-4.3.3
  - Support areas for outpatient facilities using off-site sterile processing
    - check if not included in project (only if sterile processing services are provided on-site & Compliance Checklist OP4 has been submitted)
**Architectural Requirements**

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Description</th>

Architectural Requirements

2.2-5.3

**ENVIRONMENTAL SERVICES**

2.1-5.3.1
- Environmental services room

2.1-5.3.1(3)
- (may serve more than one clinical service area on same floor)

2.1-5.3.1(1)
- min. one ES room per floor

2.1-5.3.1.2(1)
- service sink or floor-mounted mop sink

2.1-5.3.1.2(2)
- provisions for storage of supplies & housekeeping equipment

2.1-5.3.1.2(3)
- handwashing station or hand sanitation dispenser

2.2-5.4

**ENGINEERING & MAINTENANCE SERVICES**

2.1-5.4.1
- Equipment rooms for HVAC, telecom. & electrical equipment

2.1-5.4.2.2
- secured with controlled access

2.1-5.4.3
- Building maintenance supplies & equipment storage room (may be shared)

2.2-6.2

**PUBLIC AREAS**

2.1-6.2.1
- Vehicular drop-off & pedestrian entrance

2.1-6.2.1.1
- min. of one building entrance reachable from grade level

2.1-6.2.1.2
- building entrances used to reach outpatient services be clearly marked

2.1-6.2.1.3
- building entrances used to reach outpatient services located so patients need not go through other activity areas (except for shared lobbies in multi-occupancy buildings)

2.1-6.2.2
- Reception

- reception & information counter, desk or kiosk provided either at main entry or at each clinical service

2.1-6.2.3
- Waiting area

2.1-6.2.3.2
- visible from staff area either by camera or direct staff sight line

2.1-6.2.4
- Public toilet room

2.1-6.2.4.2
- (may be located off public corridor in multi-tenant building)

2.1-6.2.4.1
- readily accessible* from waiting area without passing through patient care or staff work areas

Building Systems Requirements

Ventilation:
- Min. 10 air changes per hour
- Exhaust
- Negative pressure
- No recirculating room units

Table 8.1

MDPH/DHCFLC 12/18 OP1
### Architectural Requirements

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Details</th>
</tr>
</thead>
</table>
| 2.1-6.2.7.2 Wheelchair parking space             | ☐ check if not included in project (only if Project Narrative indicates that facility provides services that do not require patients to transfer to facility chair, recliner, exam table or stretcher)  
☐ designated area provided for parking at least one patient-owned wheelchair in non-public area  
☐ located out of any required egress width or other required clearance |

2.2-6.3 **ADMINISTRATIVE AREAS**

2.1-6.3.2 Interview space  
☐ check if not included in project  
(2) (may be combined with consultation room)  
(1) ☐ separate from public areas

2.1-6.3.3 Office space for business, administrative & professional staffs

2.1-6.3.5 Medical records space  
☐ provisions made for securing medical records of all media types used by facility  
2.1-6.3.5.1 ☐ location restricted to staff access to maintain confidentiality of record

2.1-6.3.5.2 Space Requirements:  
(1) ☐ space provided for medical records management  
(2) ☐ physical space for electronic storage of forms or documents

2.1-6.3.6 Storage for office equipment & supplies

2.2-6.4 **SUPPORT AREAS FOR STAFF**

2.1-6.4.1 Staff lounge  
☐ check if not included in project  
☐ handwashing station

2.1-6.4.2 Storage for staff personal effects  
☐ locking drawers cabinets or lockers  
☐ readily accessible* to individual work areas

*LOCATION TERMINOLOGY:  
**Directly accessible:** Connected to the identified area or room through a doorway, pass-through, or other opening without going through an intervening room or public space  
**Adjacent:** Located next to but not necessarily connected to the identified area or room  
**Immediately accessible:** Available either in or adjacent to the identified area or room  
**Readily accessible:** Available on the same floor or in the same clinic as the identified area or room
### Architectural Details & MEP Requirements

#### 2.1-7.2.2 ARCHITECTURAL DETAILS

<table>
<thead>
<tr>
<th>MIN. 44”</th>
<th>Detailed code review incorporated in Project Narrative</th>
</tr>
</thead>
</table>

- **CORRIDOR WIDTH:**
  - **IBC 1018.2**
  - Min. 44”
  - Corridors include turning spaces for wheelchairs

- **CEILING HEIGHT:**
  - **421 CMR 6.00**
  - Min. ceiling height 7’-6” in corridors & in normally unoccupied spaces
  - Min. height 7’-6” above floor of suspended tracks, rails & pipes located in traffic path
  - Min. ceiling height 7'-10” in other areas

- **DOORS & DOOR HARDWARE:**
  - **Door Type:**
    - Doors between corridors, rooms, or spaces subject to occupancy
      - Swing type or sliding doors
      - Sliding doors
        - Check if not included in project manual or automatic sliding doors comply with NFPA 101 detailed code review incorporated in Project Narrative
        - No floor tracks
  - **Door Opening:**
    - Min. 34” clear door width
    - Min. 83.5” clear door height
  - **Door Swing:**
    - Doors do not swing into corridors except doors to non-occupiable spaces (e.g. environmental services rooms & electrical closets) & doors with emergency breakaway hardware
    - Lever hardware or push/pull latch hardware
  - **Doors for Patient Toilet Facilities:**
    - Door that swings outward
    - Door equipped with emergency rescue hardware (permits quick access from outside the room to prevent blockage of the door)
    - Sliding door other than pocket door

- **HANDWASHING STATIONS:**
  - Handwashing station countertops
    - Handwashing station countertops made of porcelain, stainless steel, solid-surface materials or impervious plastic laminate assembly
  - Countertops substrate
    - Check if not included in project
    - Detailed code review incorporated in Project Narrative
  - Handwashing station casework
    - Check if not included in project visual privacy is maintained
  - Handwashing station countertops
    - Countertops substrate
      - Marine-grade plywood (or equivalent material) with impervious seal
  - Handwashing station casework
    - No indoor unsealed (open) water features in confines of outpatient suite
  - Handwashing station casework
    - Check if not included in project
    - Visual privacy is maintained

- **GRAB BARS:**
  - Grab bars anchored to sustain concentrated load 250 pounds
  - Ends of grab bars constructed to prevent snagging clothes of patients staff & visitors

- **HANDRAILS:**
  - Rail ends return to wall or floor
  - Handrail gripping surfaces & fasteners are smooth (free of sharp or abrasive elements) with 1/8-inch min. radius
  - Handrails have eased edges & corners
  - Handrail finishes are cleanable

- **DECORATIVE WATER FEATURES:**
  - Check if not included in project
  - No indoor unsealed (open) water features in confines of outpatient suite
  - No covered fish tanks in other than public areas of outpatient suite
2.1-7.2.3 SURFACES
2.1-7.2.3.1 FLOORING & WALL BASES:
(1) Flooring surfaces cleanable & wear-resistant for location
(3) Smooth transitions provided between different flooring materials
(4) Flooring surfaces including those on stairways are stable, firm & slip-resistant
(5) Floors & wall bases of all areas subject to frequent wet cleaning are constructed of materials that are not physically affected by germicidal or other types of cleaning solutions
(6)(a) Monolithic floors & integral coved wall bases that are at least 6" high & tightly sealed to wall in airborne infection isolation (AII) room & any anteroom
☐ check if not included in project

2.1-7.2.3.2 WALLS & WALL PROTECTION:
(1)(a) Wall finishes are washable
(1)(b) Wall finishes near plumbing fixtures are smooth, scrubbable & water-resistant
(2) Wall surfaces in areas routinely subjected to wet spray or splatter (e.g. environmental services rooms) are monolithic or have sealed seams that are tight & smooth
(4) Wall protection devices & corner guards durable & scrubbable

2.1-7.2.3.3 CEILINGS:
(1) Ceilings provided in all areas except mechanical, electrical & communications equipment rooms
(a) Ceilings cleanable with routine housekeeping equipment
