COMPLIANCE CHECKLIST

OP6 Outpatient Classes 2 & 3 Imaging Facilities

The following checklist is intended to be used in the plan review applications for health care facilities submitted to the Massachusetts Department of Public Health. This checklist summarizes and references the applicable requirements from the Licensure Regulations and the 2018 Edition of the FGI Guidelines for Design and Construction of Outpatient Facilities. Applicants must verify compliance of the plans submitted to the Department with all referenced requirements from the Licensure Regulations and FGI Guidelines when completing this Checklist. A separate Checklist must be completed for each nursing unit, hospital or clinic department, or clinical suite.

Other jurisdictions, regulations and codes may have additional requirements which are not included in this checklist, such as:
- State Building Code (780 CMR)
- Accreditation requirements of The Joint Commission
- CDC Guidelines for Preventing the Transmission of Mycobacterium Tuberculosis in Health Care Facilities
- USP 797 & Regulations of the Massachusetts Board of Registration in Pharmacy
- Occupational Safety & Health Standards (OSHA)
- Accessibility Guidelines of the Americans with Disabilities Act (ADA)
- Architectural Access Board Regulations (521 CMR)
- Local Authorities having jurisdiction.

Instructions:
1. All requirement lines must be completed according to the following instructions and included in the plan submissions for Self-Certification Process or Abbreviated Review Process.
2. This checklist must be completed by the project architect or engineer based on the design actually reflected in the plans at the time of completion of the checklist.
3. Each requirement line (___) of this Checklist must be completed exclusively with one of the following marks, unless otherwise directed in the checklist. If a functional space is not affected by a renovation project, the mark “E” may be indicated on the requirement line (___) before the name of the functional space (associated requirements on indented lines below that name, or associated MEP requirements do not have to be completed in this case). If more than one functional space serves a given required function (e.g. patient room or exam room), that clarification should be provided in the Project Narrative, and the requirement lines are understood to only address the functional spaces that are involved in the project.
4. All room functions marked with “X” must be shown on the plans with the same name labels as in this checklist.
5. Mechanical, electrical & plumbing requirements are only partially mentioned in this checklist. The relevant section of the FGI Guidelines must be used for project compliance with all MEP requirements and for waiver references.
6. Oxygen, vacuum, medical air, waste anesthesia gas disposal and instrument air outlets (if required) are identified respectively by the abbreviations "OX", "VAC", "MA", "WAGD" & "IA".
7. Requirements referenced with "FI" result from formal interpretations from the FGI Interpretations Task Group.
8. The location requirements including asterisks (*) refer to the definitions of the Glossary in the beginning section of the FGI Guidelines and reproduced in this checklist.

Facility Name:

Patient Care Unit Bed Complements:

Patient Care Unit Bed Complements:

Satellite Name: (if applicable)

Satellite Address: (if applicable)

Project Description:

MDPH/DHCFLC 12/18 OP6
2.3 SPECIFIC REQUIREMENTS FOR OUTPATIENT CLASSES 2 & 3 IMAGING FACILITIES

2.3-1.1 APPLICATION
2.3-1.1.1 Outpatient Classes 2 & 3 imaging facility that is separate from acute care hospital

2.3-2 ACCOMMODATIONS FOR CARE OF PATIENTS OF SIZE
2.1-2.1.1.2
☐ check if not included in project (only if a Patient Handling & Movement Assessment that determines that the outpatient service does not have a need for expanded-capacity lifts & architectural details that support movement of patients of size in patient areas is attached to the Project Narrative)

2.1-2.1.2 Location:
☐ spaces designated for care of or use by patients of size are provided in locations to accommodate population expected to be served by facility

2.1-2.5 Handwashing stations
2.1-2.5.2 ☐ downward static force required for handwashing stations designated for patients of size accommodates maximum patient weight of patient population

2.1-2.6 Patient toilet room
2.1-2.6.1 ☐ expanded-capacity toilet
☐ mounted min. 36 inches from finished wall to centerline of toilet on both sides (for caregiver assistance with lifts)

or

2.1-2.6.2 ☐ regular toilet
☐ mounted min. 44 inches from centerline of toilet on both sides to finished walls to allow for positioning of expanded-capacity commode over toilet

2.1-2.6.3 ☐ rectangular clear floor area min. 46” wide extends 72” from front of toilet

2.1-2.8 ☐ Equipment & supply storage
2.1-2.9 ☐ Waiting areas
2.1-2.9.1 ☐ seating for persons of size be provided in waiting areas in outpatient facilities

2.1-2.9.2 ☐ waiting areas be sized to accommodate expanded-capacity furniture required for patients & visitors of size

2.1-2.10.1 ☐ All plumbing fixtures, handrails, grab bars, patient lift, equipment, built-in furniture & other furnishings designed to accommodate maximum patient weight

Ventilation:
☐ Min. 10 air changes per hour Table 8.1
☐ Exhaust
☐ Negative pressure
☐ No recirculating room units

Table 8.1
Architectural Requirements

2.1-2.10.2 Door Openings:
2.1-2.10.2.1 all door openings used for path of travel to public areas & areas where care will be provided for patients of size have min. clear width of 45.5”
2.1-2.10.2.2 door openings to toilet rooms designated for patients of size have min. clear width of 45.5”

2.3-3.2 GENERAL REQUIREMENTS FOR IMAGING ROOMS

2.1-3.5.1.2 Class 2 Imaging Room:
Table 2.1-5 (for diagnostic & therapeutic procedures such as coronary, neurological, peripheral angiography & EP procedures)
☐ check if not included in project
room is a semi-restricted area
accessed from unrestricted area or semi-restricted area

Flooring:
☐ cleanable & wear-resistant for the location; stable, firm & slip-resistant
☐ monolithic floor with integral coved wall base carried up the wall min. 6”

Wall Finishes:
☐ washable, free of fissures, open joints or crevices

Ceiling:
☐ smooth & without crevices, scrubbable, non-absorptive, non-perforated; capable of withstand cleaning chemicals
☐ lay-in ceiling
☐ check if not included in project
☐ gasketed or each ceiling tile weighs at least 1 lbs/sq. ft.
☐ no perforated, tegular, serrated, or highly textured tiles

Ventilation:
☐ Min. 15 air changes per hour
☐ Positive pressure
☐ No recirculating room units

Power:
☐ Min. 12 receptacles in total
☐ Min. 8 receptacles convenient to table placement with at least one on each wall

Nurse Call System:
☐ Staff assistance station
☐ Emergency call station

Medical Gases:
☐ 1 OX, 2 VAC
☐ 1 MA (may be portable)

Handwashing Station or Hand Scrub Facilities:
☐ handwashing station
☐ directly accessible* to Class 2 imaging room

or

☐ hand scrub facilities
☐ hand scrub position directly outside entrance to Class 2 imaging room

2.1-2.8.6.3 placement of scrub station does not restrict min. required corridor width
### Architectural Requirements

**2.1-3.5.1.2**  
Class 3 Imaging Room  
(for invasive procedures, i.e. any Class 2 procedure during which patient will require physiological monitoring & is anticipated to require active life support)  
☐ check if **not** included in project  
___ room is a restricted area  
___ accessed from semi-structured area

**2.1-3.5.2.3(3)**  
Hand Scrub Facilities:  
☐ check if **not** included in project  
___ hand scrub facilities provided directly outside entrance to Class 3 imaging rooms  
___ placement of scrub station does not restrict min. required corridor width

**2.1-3.5.1.3**  
Radiation Protection:  
☐ check if **not** included in project (only if imaging equipment does not emit ionizing radiations)  
___ certified radiation physicist representing owner has specified type, location & amount of radiation protection to be installed in accordance with layout & equipment selections  
___ specifications of radiation shielding have been submitted to DPH Radiation Control Program

(1)  
___ shielded control alcove or room  
☐ check if **not** included in project (only if radiation-emitting imaging equipment is portable)
### Architectural Requirements

#### 2.1-3.5.3
**COMPUTED TOMOGRAPHY (CT) FACILITIES**
☐ check if not included in project

#### 2.1-3.5.3.1
- CT scanner room meets above requirements for Class 2 imaging rooms
  - or
- CT scanner room meets above requirements for Class 3 imaging rooms

#### 2.1-3.5.3.2
2.1-3.5.1.3(1)
- Shielded control alcove or room
  - Space Requirements:
    - sized & configured according to manufacturer’s recommendations
  - (c) shielded view window designed to provide full view of examination/procedure table & patient at all times including full view of patient during imaging activities (use of additional closed-circuit video monitoring permitted)
  - (d)
  - (e) control room enclosed with walls & door
    - ☐ check if not included in project
      - (only for Class 1 imaging room & where imaging room is not required to be under positive or negative pressure)

#### 2.1-3.5.2.2
- Space Requirements:
  - imaging rooms are sized & configured to comply with manufacturer’s recommendations
    - installation plans from manufacturer have been submitted to DPH Plan Review
  - (2)(a) min. clearance 4’-0” on all circulating sides of patient table/bed/couch gantry or assembly

#### 2.1-3.5.2.4(d)
- Structural Support:
  - floor & if applicable ceiling structures in imaging rooms designed to support weight of imaging equipment as well as other fixed & movable ancillary equipment

#### 2.1-3.5.3.3
2.1-3.5.2.5
- System component room
  - ☐ check if not included in project
  - Location:
    - (a) accessed only from unrestricted or semi-restricted space outside imaging room
  - (2)
  - Space Requirements:
    - room sized to accommodate following as indicated by imaging equipment manufacturer including clear floor area:
      - __ transformers
### Architectural Requirements

(b) **power distribution**  
(c) **power conditioning/UPS equipment**  
(d) **computers**  
(e) **associated electronics & electrical gear**

**Architectural Requirements**

2.1-3.5.5 **MAGNETIC RESONANCE IMAGING (MRI) FACILITIES**

☐ check if not included in project

(1) **Planning Configuration of MRI Suite:**

- ___ conforms to 4-zone screening & access control protocols identified by American College of Radiology
- ___ Zone I: all areas that are freely accessible to the general public
- ___ Zone II: interface between the publicly accessible uncontrolled Zone I & strictly controlled Zone III (space for screening questions, patient histories, medical insurance questions)
- ___ Zone III: no free access by unscreened persons or non-MRI personnel due to interactions between persons or equipment & MRI scanner
- ___ Zone IV: MRI scanner room where access must be supervised by MRI personnel

(2) ___ MRI suite as well as spaces around, above & below designed to prevent unscreened individuals from entering 5-gauss volume around MRI equipment

(3) **Specific Support Areas for MRI Suite:**

(a) ___ space for patient interviews & clinical screening
(b) ___ space for physical screening
(c) ___ ferromagnetic (only) detection & warning systems
(d) ___ access controls
(e) ___ space to accommodate site-specific clinical & operational requirements such as image-guided procedures, emergent imaging or general anesthesia support

☐ check if not included in project

(f) ___ space for containment of non-MRI-safe objects outside restricted MRI safety zones

(g) ___ space for storage (patient lockers) of patient belongings & non-MRI-safe items

(4) ___ Any area in which magnetic field strength is equal to or greater than 5 gauss is physically restricted by use of key locks or pass-key locking systems

**Ventilation:**

- Min. 6 air changes per hour
- Table 8.1
Architectural Requirements

(c) power conditioning/UPS equipment
(d) computers
(e) associated electronics & electrical gear
(e) associated electronics & electrical gear

Building Systems Requirements

2.1-3.5.5.8 Equipment Installation Requirements:
(1) power conditioning and/or uninterruptible power supply provided as indicated by MRI manufacturer’s power requirements & specific facility conditions
(2) radiofrequency (RF) shielding provided for clinical MRI installations to attenuate stray radio frequencies that could interfere with MRI imaging process
(3) magnetic shielding
☐ check if not included in project (only if magnetic field hazards or interferences are adequately controlled through facility planning)
☐ assessed by certified physicist

2.1-3.5.5.9 Special Design Elements for MRI Scanner Room:
(1)(a) ferromagnetic materials that may become detached or otherwise interfere with operation of MRI scanner are not used in MRI scanner rooms
(1)(b) MRI scanner room be located and/or shielded to avoid electromagnetic interference from elevators or other electromagnetic equipment
(2)(a) floor structure designed to support weight of MRI scanner equipment minimize disturbance to MRI magnetic field & mitigate disruptive environmental vibrations
(2)(b) MRI rooms be marked with lighted sign with red light to indicate that magnet is always on
(2)(c) acoustic control provided to mitigate noise emitted by MRI scanner per Table 1.2-6

2.1-3.5.7 NUCLEAR IMAGING SERVICES
☐ check if not included in project

2.1-3.5.7.1
2.1-3.5.3.1 Nuclear imaging room meets above requirements for Class 2 imaging rooms or
Nuclear imaging room meets above requirements for Class 3 imaging rooms
Architectural Requirements

2.1-3.5.7.1(3) ___ Exercise area or room
   □ check if not included in project
   (a) ___ space for exercise equipment in imaging room
       or ___ space for exercise equipment in separate room directly accessible* to imaging room
   (b) ___ staff work space in imaging room
       or ___ staff work space in separate room directly accessible* to imaging room

2.1-3.5.7.1(4) ___ Handwashing stations
   ___ provided throughout nuclear imaging suite at locations of patient contact
   ___ provided throughout nuclear imaging suite where radiopharmaceutical materials are handled, prepared or disposed

2.1-3.5.7.1(5) ___ Nuclear imaging dose administration area
   (c)(d) (may be combined with pre-procedure patient care area or PET patient uptake/cool-down room)
   (a) ___ located near preparation area
   (b) ___ provisions for visual privacy from other areas

2.1-3.5.7.1(6) ___ Surfaces throughout nuclear imaging suite constructed of cleanable non-porous materials that can be decontaminated

2.1-3.5.7.2 ___ Scintigraphy (gamma camera) rooms
   □ check if not included in project

Building Systems Requirements

2.1-3.5.2.2 Space Requirements:
   (1) ___ imaging rooms are sized & configured to comply with manufacturer recommendations
       ___ installation plans from manufacturer have been submitted to DPH Plan Review
   (2)(a) ___ min. clearance 4’-0” on all circulating sides of patient table/bed/couch gantry or assembly

2.1-3.5.2.4(d) Structural Support:
   ___ floor & if applicable ceiling structures in imaging rooms designed to support weight of imaging equipment as well as other fixed & movable ancillary equipment

2.1-3.5.7.2(2) ___ handwashing station

Architectural Requirements

(c) toilet room with handwashing station & dedicated “hot” toilet to accommodate radioactive waste
directly accessible* or adjacent* to uptake/cool-down room

Building Systems Requirements

Ventilation:
- Min. 10 air changes per hour  
  Table 8.1
- Exhaust
- Negative pressure
- No recirculating room units

2.1-3.5.7.4 Single-photon emission computed tomography room (SPECT)

2.1-3.5.3.1 SPECT scanner room meets above requirements for Class 2 imaging rooms

or

2.1-3.5.3.1 SPECT scanner room meets above requirements for Class 3 imaging rooms

2.1-3.5.2.2 Space Requirements:
(1) imaging rooms are sized & configured to comply with manufacturer recommendations
installation plans from manufacturer have been submitted to DPH Plan Review

(2)(a) min. clearance 4'-0" on all circulating sides of patient table/bed/couch gantry or assembly

2.1-3.5.2.4(d) Structural Support:
floor & if applicable ceiling structures in imaging rooms designed to support weight of imaging equipment as well as other fixed & movable ancillary equipment

2.1-3.5.7.4(2) handwashing station

2.1-3.5.2.5 System component room
☐ check if not included in project

(2) Space Requirements:
room size accommodates equipment listed below as indicated by imaging equipment manufacturer:

(a) transformers
(b) power distribution equipment
(c) power conditioning/UPS equipment
(d) computers
(e) associated electronics & electrical gear

## Architectural Requirements

### 2.1-3.4.4
- Phase I post-anesthetic care unit (PACU) provides minimum of one Phase I patient care station per Class 3 imaging room

### 2.1-3.4.5
- Phase II recovery room(s) or area
  - min. one Phase II patient care station per Class 2 or Class 3 imaging room

### 2.1-3.4.2.2

#### (2)(a)
- Space Requirements:
  - ☐ check if not included in project
  - min. clearance 5'-0" between sides of patient beds/gurneys/lounge chairs
  - min. clearance 3'-0" between sides of patient beds/gurneys/lounge chairs & adjacent* walls or partitions
  - min. clearance 2'-0" between foot of patient beds/gurneys/lounge chairs & cubicle curtain

#### (2)(b)
-patient care cubicles
  - ☐ check if not included in project
  - min. clearance 3'-0" between sides of patient beds/gurneys/lounge chairs & adjacent* walls or partitions
  - min. clearance 2'-0" between foot of patient beds/gurneys/lounge chairs & cubicle curtain

#### (2)(c)
- single-patient rooms
  - ☐ check if not included in project
  - min. clearance 3'-0" between sides & foot of beds/gurneys/lounge chairs & adjacent* walls or partitions

## Building Systems Requirements

### Ventilation:
- Min. 6 air changes per hour
- No recirculating room units

### Power:
- Min. 8 receptacles in total
  - convenient to head of gurney or bed

### Nurse Call System:
- Patient station
- Staff assistance station
- Emergency call station

### Medical Gases:
- 1 OX, 3 VAC per station

### Note:
- *bays or cubicles face each other
- *check if not included in project
- *aisle with min. clearance 8'-0"
  - independent of foot clearance between patient stations or other fixed objects

---

MDPH/DHCFLC 12/18 OP6
Architectural Requirements

2.1-3.4.2.4 Patient Privacy:
2.1-2.1.2 ____ provisions are made to address patient visual & speech privacy

2.1-3.4.2.5 ____ Handwashing stations
2.1-2.8.7.1 ____ located in each room where hands-on patient care is provided
2.1-2.8.7.3 ____ handwashing station serves multiple patient care stations
   □ check if not included in project
(1) ____ at least 1 handwashing station for every 4 patient care stations or fewer & for each major fraction thereof
(2) ____ handwashing stations evenly distributed

2.1-3.4.4.2 ____ At least one route of patient transport provides direct access from semi-restricted area of surgical suite to Phase I recovery area without crossing public corridors

2.1-3.4.4.3 ____ Design of Phase I recovery area provides observation of all patient care stations from nurse station

2.1-3.5.8 SUPPORT AREAS FOR IMAGING SERVICES (may be shared with other clinical services)
2.1-3.5.8.2 ____ Reception area with control desk
2.1-3.5.8.3 ____ Documentation area
2.1-2.8.3.1 ____ work surface to support documentation process
2.1-3.5.8.4 ____ Consultation area
   ____ for consultation with patients or referring clinician (including remote consultation)

2.1-3.5.8.8(1) ____ Medication safety zone & storage
   □ check if not included in project
   ____ immediately accessible* from pre- & post-procedure patient care areas

2.1-3.5.8.8(2) ____ provision for locked storage of medications

Building Systems Requirements

Power:
   ____ Min. 8 receptacles in total Table 2.1-1
   ____ convenient to head of gurney or bed

Nurse Call System:
   ____ Patient station Table 2.1-3
   ____ Staff assistance station
   ____ Emergency call station

Architectural Requirements

2.1-3.5.8.12 Soiled workroom or soiled holding room

2.1-2.8.12.2 ___ soiled workroom

(1)(a) ___ handwashing station (1)(b) ___ flushing-rim clinical service sink with bedpan-rinsing device or equivalent flushing-rim fixture

(1)(c) ___ work counter (1)(d) ___ space for separate covered containers for waste & soiled linen

(2) ___ fluid management system is used

☐ check if not included in project

(a) ___ electrical & plumbing connections that meet manufacturer requirements

(b) ___ space for docking station

2.1-2.8.12.3 ___ soiled holding room

(1) ___ handwashing station or hand sanitation station

(2) ___ space for separate covered containers for waste & soiled linen

2.1-3.5.8.12(2) ___ Contaminated (hot) soiled holding

☐ check if not included in project (only if written statement from medical physicist is included)

(a) ___ provided in soiled workroom or soiled holding room

___ separate from other waste holding areas

2.1-3.5.8.13(4) ___ Clean linen storage

___ storage area for clean linen

___ handwashing station provided in clean linen storage area

2.1-3.5.8.14 ___ Environmental services room

(2) (may be shared with other clinical services)

(1) ___ immediate access to imaging suite

2.1-2.8.14.2 (1) ___ service sink or floor-mounted mop sink

(2) ___ provisions for storage of supplies & housekeeping equipment

(3) ___ handwashing station

or

___ hand sanitation station

Building Systems Requirements

Ventilation:

___ Min. 10 air changes per hour Table 8.1

___ Exhaust

___ Negative pressure

___ No recirculating room units
### Architectural Requirements

#### 2.1.3.5.8.16
- **Contrast media preparation area**
  - (may serve multiple imaging rooms)
  - ☐ check if not included in project
    - (1) sink & counter
    - ☐ check if not included in project (only if prepared media are used)
    - (c) storage to accommodate preparation of contrast media

#### 2.1.3.5.8.17
- **Image management system**
  - ☐ space provided for digital image management system to be used for image acquisition & transmission

#### 2.1.3.5.8.18
- **Image interpretation/reading rooms**
  - ☐ remote location of image interpretation/reading areas
  - ☐ radiologist is immediately available when interventional imaging procedures are performed
  - or
  - ☐ on-site location of image interpretation/reading areas
    - (a) adjustable ambient lighting with minimal glare projected onto computer monitors
    - ☐ higher level of illumination for room maintenance (activated separately from ambient reading lighting)
    - ☐ workstation task lighting for writing or reading hard copy
    - (b) ☐ acoustic control
      - ☐ materials, finishes & sound masking minimize disruption from conversational speaking dictation & surrounding noise

#### 2.1.3.5.8.21
- **Radiopharmaceutical production pharmacy**
  - ☐ check if not included in project
  - ☐ radiopharmacy provided with appropriate shielding
  - (1) **Space Requirements:**
    - (a) ☐ space provided for dose calibration quality assurance & record-keeping activities
    - (b) ☐ space provided for storage of radionuclides for preparation dose calibrators & records
  - (2) ☐ floors & walls be constructed of easily decontaminated materials

### Building Systems Requirements

#### Ventilation:
- **Hoods for pharmaceutical preparation**
  - 2.1.3.5.8.21
Architectural Requirements

2.1-3.5.8.22  ____ Hot lab for nuclear imaging services
   □ check if not included in project
   ____ securable area or room for storage &
   dosage of radiopharmaceuticals

(2)  ____ hot lab shielded according to
   manufacturer’s technical specifications
   ____ manufacturer technical specifications
   have been submitted to DPH

(3)(a)  ____ source storage area
(3)(b)  ____ dose storage area
(3)(c)  ____ storage area for syringe shields
(3)(d)  ____ emergency eyewash & shower

2.1-3.5.9  SUPPORT AREAS FOR IMAGING SERVICES
           STAFF

2.1-3.5.9.1  ____ Staff lounge
(1)  ____ readily accessible* to imaging suite
(2)  ____ Provisions for securing staff belongings

2.1-3.5.9.2  ____ Staff toilet room
(2)  ____ fewer than 3 imaging rms in imaging suite
   ____ staff toilet room readily accessible* to imaging suite
   or
   ____ 3 or more imaging rms in imaging suite
   ____ staff toilet room immediately accessible* to imaging suite

2.1-3.5.9.4  ____ Staff changing area
           (may be shared with surgery services)

2.2-3.3.9.4(1)  ____ staff changing area with one or more
           private changing rooms or areas
           provided for male & female staff

2.2-3.3.9.4(2)
(a)  ____ lockers
(b)  ____ showers
(c)  ____ toilets
   Ventilation:
   ____ Min. 10 air changes per hour
   Table 8.1
   ____ Exhaust
   ____ Negative pressure
   ____ No recirculating room units

(d)  ____ handwashing stations
(e)  ____ space for donning & doffing surgical
     attire
(f)  ____ provision for separate storage of clean
     & soiled surgical attire

Building Systems Requirements

Ventilation:
   ____ Min. 6 air changes per hour
   Table 8.1
   ____ Exhaust
   ____ Negative pressure
   ____ No recirculating room units
2.1-3.5.10
2.1-3.5.10.1
___ Patient waiting room or area
(1) ___ screened & separated from unrelated
traffic
___ under staff control
(2) ___ seating capacity accommodates
maximum expected patient volume

(4) Sub-Waiting Areas:
☐ check if not included in project
___ provision of waiting areas for individual
imaging modalities or sharing of waiting
areas among similar modalities
___ located adjacent* to imaging rooms

2.1-3.5.10.2 ___ Patient toilet rooms
(1) ___ immediately accessible* to waiting areas
___ immediately accessible* to changing
rooms
___ handwashing stations
(3) ___ Toilet rooms for nuclear imaging patients
(a) ___ immediately accessible* to waiting areas
___ immediately accessible* to nuclear
imaging rooms
(b) ___ Dedicated “hot” toilet rooms for dosed
nuclear imaging patients

2.1-3.5.10.3 ___ Patient changing rooms
☐ check if not included in project
(1) ___ located adjacent* to imaging rooms
(2) ___ each room includes seat or bench &
mirror
(3) ___ provisions for hanging patient clothing &
securing valuables located either in
patient changing room or in shared
secured storage

STERILE PROCESSING
☐ check if not included in project
___ Compliance Checklist OP4 has been
submitted to DPH Plan Review
### Architectural Requirements

#### STERILE PROCESSING

2.3-4.3

--- Facilities for on-site sterile processing

☐ check if not included in project

☐ Compliance Checklist OP4 has been submitted

2.7-4.3.2

--- Support areas for facilities using off-site sterile processing

☐ check if not included in project (only if sterile processing is performed on-site)

2.7-4.3.3

--- Support areas for facilities using off-site sterile processing

☐ check if not included in project (only if sterile processing is performed on-site)

2.1-4.3.3.1

--- room for breakdown (receiving/unpacking) of clean/sterile supplies

2.1-4.3.3.2

--- room for on-site storage of clean & sterile supplies

2.1-4.3.2.4(1)

--- storage for sterile & clean instruments & supplies

(a) separate equipment & supply storage room

or

designated equipment & supply storage area in clean workroom

(b) space for case cart storage

☐ check if not included in project (only if case carts are not used)

(c) provisions to maintain humidity & temperature levels

2.1-4.3.3.3

--- room with flush-type device for gross decontamination & holding of soiled instruments

2.1-3.8.12.1

--- does not have direct connection with clean workrooms or clean supply rooms

2.1-3.8.12.2(1)

(a) handwashing station

(b) flushing-rim clinical service sink or equivalent flushing-rim fixture

(c) work counter

(d) space for separate covered containers for waste & soiled linen

(2) fluid management system

☐ check if not included in project

(a) electrical & plumbing connections that meet manufacturer requirements

(b) space for docking station

-----

### Ventilation:

- Min. 10 air changes per hour
- Exhaust
- Negative pressure
- No recirculating room units

*LOCATION TERMINOLOGY:

Directly accessible: Connected to the identified area or room through a doorway, pass-through, or other opening without going through an intervening room or public space

Adjacent: Located next to but not necessarily connected to the identified area or room

Immediately accessible: Available either in or adjacent to the identified area or room

Readily accessible: Available on the same floor or in the same clinic as the identified area or room
2.1-7.2.2.2 ARCHITECTURAL DETAILS

2.1-7.2.2.1 CORRIDOR WIDTH:

Min. 44”

or

Detailed code review incorporated in Project Narrative

421 CMR 6.00

(2) Corridors include turning spaces for wheelchairs

(2) Corridors used for stretcher & gurney transport have min. corridor or aisle width of 6'-0"

2.1-7.2.2.2 CEILING HEIGHT:

(2) Min. height 7'-0" in radiography, procedure, operating rooms from floor to lowest protruding element of equipment or fixture in stowed position

(4) Min. height 7'-6" above floor of suspended tracks, rails & pipes located in traffic path

(4) Min. ceiling height 7'-10" in other areas

2.1-7.2.2.3 DOORS & DOOR HARDWARE:

Door Type:

(a) doors between corridors, rooms, or spaces subject to occupancy swing type or sliding doors

(b) sliding doors

☐ check if not included in project manual or automatic sliding doors comply with NFPA 101

☐ detailed code review incorporated in Project Narrative

☐ no floor tracks

(2) Door Opening:

(a) min. 34” clear door width

min. 83.5” clear door height

(b) Rooms with Gurney Access:

☐ 41.5” min. clear door width

☐ 79.5” min. clear door height

(3) Door Swing:

(a) doors do not swing into corridors except doors to non-occupiable spaces (e.g. environmental services rooms & electrical closets) & doors with emergency breakaway hardware

(b) Lever hardware or push/pull latch hardware

2.1-7.2.2.8 HANDWASHING STATIONS:

(3)(a) Handwashing station countertops made of porcelain, stainless steel, solid-surface materials or impervious plastic laminate assembly

(3)(b) Countertops substrate

☐ check if not included in project marine-grade plywood (or equivalent material) with impervious seal

(4) Handwashing station casework

☐ check if not included in project designed to prevent storage beneath sink

(5) Provisions for drying hands

☐ check if not included in project (only at hand scrub facilities)

(a) hand-drying device does not require hands to contact dispenser

(b) hand-drying device is enclosed to protect against dust or soil

(6) Liquid or foam soap dispensers

2.1-7.2.2.9 GRAB BARS:

(1) Grab bars anchored to sustain concentrated load 250 pounds

(3) Ends of grab bars constructed to prevent snagging clothes of patients staff & visitors

2.1-7.2.2.10 HANDRAILS:

☐ check if not included in project

(2) Rail ends return to wall or floor

(3) Handrail gripping surfaces & fasteners are smooth with 1/8-inch min. radius

(4) Handrails have eased edges & corners

(5) Handrail finishes are cleanable
2.1-7.2.2.11 RADIATION PROTECTION:
☐ check if no radiation emitting equipment is included in project
☐ Protection for X-ray installations are shown in the plans
☐ Documentation for radiation protection has been submitted separately to the DPH Radiation Control Program

2.1-7.2.2.14 Decorative water features
☐ check if not included in project
(1) no indoor unsealed (open) water features in confines of outpatient suite
(2) no covered fish tanks in other than public areas of outpatient suite

2.1-7.2.3 SURFACES
2.1-7.2.3.1 FLOORING & WALL BASES:
(1) Flooring surfaces cleanable & wear-resistant for location
(3) Smooth transitions provided between different flooring materials
(4) Flooring surfaces including those on stairways are stable, firm & slip-resistant
(5) Floors & wall bases of all areas subject to frequent wet cleaning are constructed of materials that are not physically affected by germicidal or other types of cleaning solutions
(6)(a) Floors are monolithic & integral coved wall bases are at least 6" high & tightly sealed to wall in Class 2 & Class 3 imaging rooms

2.1-7.2.3.2 WALLS & WALL PROTECTION:
(1)(a) Wall finishes are washable
(1)(b) Wall finishes near plumbing fixtures are smooth, scrubbable & water-resistant
(2) Wall surfaces in areas routinely subjected to wet spray or splatter (e.g. environmental services rooms) are monolithic or have sealed seams that are tight & smooth
(4) Wall protection devices & corner guards durable & scrubbable

2.1-7.2.3.3 CEILINGS:
(1) Ceilings provided in all areas except mechanical, electrical & communications equipment rooms
(a) Ceilings cleanable with routine housekeeping equipment
(b) Acoustic & lay-in ceilings where used do not create ledges or crevices

(2) Semi-Restricted Areas:
☐ check if not included in project
(a) ceiling finishes are scrubbable, non absorptive, non perforated, & capable of withstanding cleaning with chemicals
(b) lay-in ceilings
(c) gasketed or each ceiling tile weighs at least 1 Lbs/sq. ft.
(d) no perforated tegular serrated or highly textured tiles in semi-restricted areas
or
ceilings of monolithic construction

(3) Restricted Areas:
☐ check if not included in project
(a) ceilings of monolithic construction (except for central diffuser array)
(b) ceiling finishes scrubbable & capable of withstanding cleaning & disinfecting chemicals
(c) access openings are gasketed

2.1-7.2.4.3 Privacy curtains in patient care areas are washable

2.1-8.2 HEATING VENTILATION & AIR-CONDITIONING (HVAC) SYSTEMS
Part 3/6.1 UTILITIES:
Part 3/6.1.1 Ventilation Upon Loss of Electrical Power:
☐ check if not included in project
space ventilation & pressure relationship requirements of Table 8.1 are maintained for AII Rooms & Operating Rooms in event of loss of normal electrical power

Part 3/6.1.2 Heating & Cooling Sources:
☐ check if not included in project
heat sources & essential accessories sufficient to accommodate facility needs (reserve capacity) even when any one of heat sources or essential accessories is not operating due to breakdown or routine maintenance

capacity of remaining source or sources is sufficient to provide heating for operating rooms & recovery rooms
Part 3/6.1.2.2 Central cooling systems greater than 400 tons (1407 kW) peak cooling load
☐ check if not included in project
☐ cooling sources & essential accessories sufficient to support facility operation plan upon breakdown or routine maintenance of any one of cooling sources

Part 3/6.2 AIR-HANDLING UNIT (AHU) DESIGN:
Part 3/6.2.1 AHU casing is designed to prevent water intrusion, resist corrosion & permit access for inspection & maintenance

Part 3/6.3 OUTDOOR AIR INTAKES & EXHAUST DISCHARGES:
Part 3/6.3.1 Outdoor Air Intakes:
Part 3/6.3.1.1 located min. of 25'-0" from cooling towers & all exhaust & vent discharges
☐ outdoor air intakes located such that bottom of air intake is at least 6'-0" above grade
☐ air intakes located away from public access
☐ all intakes are designed to prevent entrainment of wind-driven rain

Part 3/6.3.1.3 intakes on top of buildings
☐ check if not included in project
☐ located with bottom of air intake min. of 3'-0" above roof level

Part 3/6.3.1.4 intake in areaway
☐ check if not included in project
☐ bottom of areaway intake opening is at least 6'-0" above grade
☐ bottom of air intake opening from areaway into building is at least 3'-0" above bottom of areaway

Part 3/6.3.2 Contaminated Exhaust Discharges:
☐ check if not included in project
☐ ductwork within building is under negative pressure for exhaust of contaminated air (i.e. air from AI1 rooms or HD sterile compounding pharmacy)

Part 3/6.3.2.2 exhaust discharge outlets with contaminated air located such that they reduce potential for recirculation of exhausted air back into building
☐ exhaust discharge outlets with contaminated air is arranged to discharge to atmosphere in vertical direction at least 10 feet above adjoining roof level
☐ exhaust discharge outlets from laboratory work area chemical fume hoods discharge with stack velocity of at least 2500 fpm

Part 3/6.4 FILTRATION:
☐ Two filter banks for operating rooms, ambulatory diagnostic & therapeutic radiology (see Table 6.4)
☐ Filter Bank No. 1: MERV 7
☐ Filter Bank No. 2: MERV 14
☐ All other outpatient spaces one filter bank MERV 7
☐ One filter bank MERV 13 for laboratories
☐ Each filter bank with efficiency of greater than MERV 12 is provided with differential pressure measuring device to indicate when filter needs to be changed

Part 3/6.4.1 Filter Bank No. 1 placed upstream of heating & cooling coils
Part 3/6.4.2 Filter Bank No. 2 placed downstream of all wet-air cooling coils & supply fan

Part 3/6.5 HEATING & COOLING SYSTEMS:
Part 3/6.5.3 Radiant heating systems
☐ check if not included in project
☐ ceiling or wall panels with exposed cleanable surfaces or radiant floor heating are provided in AI1 room, OR or procedure room
Part 3/6.7 AIR DISTRIBUTION SYSTEMS:
Part 3/6.7.1 Maintain pressure relationships required in tables 7.1 in all modes of HVAC system operation
Spaces that have required pressure relationships are served by fully ducted return systems or fully ducted exhaust systems
Recovery rooms are served by fully ducted return or exhaust systems

Part 3/6.7.2 Air Distribution Devices:
Supply air outlets comply with Table 6.7.2

Part 3/6.7.3 Smoke Barriers:
HVAC zones coordinated with compartmentation to minimize ductwork penetrations of fire & smoke barriers.

Part 3/6.8 ENERGY RECOVERY SYSTEMS:
☐ check if not included in project
Part 3/6.8.1 Located upstream of Filter Bank No. 2
Part 3/6.8.2 AII room exhaust systems are not used for energy recovery

Part 3/6.8.3 Energy recovery systems with leakage potential
☐ check if not included in project
Arranged to minimize potential to transfer exhaust air directly back into supply airstream
Designed to have no more than 5% of total supply airstream consisting of exhaust air
Not used from these exhaust airstream sources: waste anesthesia gas disposal, endoscope cleaning, central medical & surgical supply, soiled or decontamination room

Part 3/7 SPACE VENTILATION:
Part 3/7.1.a Complies with Table 8.1
Part 3/7.1.a.1 Air movement is from clean to less-clean areas
Part 3/7.1.a.3 Min. number of total air changes required for positive pressure rooms is provided by total supply airflow
Min. number of total air changes required for negative pressure rooms is provided by total exhaust airflow
Part 3/7.1.a.4 Entire minimum outdoor air changes per hour required by Table 8.1 for each space meet filtration requirements of Section 6.4

Part 3/7.1a.5 Air recirculation through room unit
☐ check if not included in project
Complies with Table 8.1
Room unit receive filtered & conditioned outdoor air
Serve only a single space
Provides min. MERV 6 filter located upstream of any cold surface so that all of air passing over cold surface is filtered

Part 3/7.2 ADDITIONAL ROOM-SPECIFIC REQUIREMENTS:
Part 3/7.2.1 Airborne Infection Isolation (AII) Rooms
☐ check if not included in project
AII rooms have permanently installed device and/or mechanism to constantly monitor differential air pressure between room & corridor
Local visual means is provided to indicate whenever negative differential pressure is not maintained
Air from AII room is exhausted directly to outdoors
Exhaust air from AII rooms, associated anterooms & toilet rooms is discharged directly to outdoors without mixing with exhaust air from any other non-AII room or exhaust system
Exhaust air grille or register in patient room is located directly above patient bed on ceiling or on wall near head of bed

Anteroom
☐ check if not included in project
AII room is at negative pressure with respect to anteroom
Anteroom is at negative pressure with respect to corridor

Part 3/7.4.1 Class 3 Imaging Rooms
☐ check if not included in project
Each IR has individual temperature control
IR is provided with primary supply diffuser array designed as follows:
Airflow is unidirectional downwards & average velocity of diffusers is 25 to 35 CFM/ft²
Diffusers are concentrated to provide airflow pattern over patient & surgical team
coverage area of primary supply diffuser array extends min. 12" beyond footprint of surgical table on each side
no more than 30% of portion of primary supply diffuser array is used for non-diffuser uses
additional supply diffusers provided within room outside of primary supply diffuser array
☐ check if not included in project
each IR has at least two low sidewall return or exhaust grilles spaced at opposite corners or as far apart as possible with bottom of these grilles installed approximately 8” above floor

☐ check if not included in project
each IR has at least two low sidewall return or exhaust grilles spaced at opposite corners or as far apart as possible with bottom of these grilles installed approximately 8” above floor

☐ check if not included in project
each IR has at least two low sidewall return or exhaust grilles spaced at opposite corners or as far apart as possible with bottom of these grilles installed approximately 8” above floor

☐ check if not included in project
each IR has at least two low sidewall return or exhaust grilles spaced at opposite corners or as far apart as possible with bottom of these grilles installed approximately 8” above floor

Part 3/7.4.3 Imaging Procedure Rooms
☐ check if not included in project
Anesthetic gases are administered
☐ ventilation requirements for operating rooms are met
or
☐ No anesthetic gases are administered

2.1-8.3 ELECTRICAL SYSTEMS

2.1-8.3.2 ELECTRICAL DISTRIBUTION & TRANSMISSION

2.1-8.3.2.2 Panelboards:
(1) all panelboards accessible to health care tenants they serve
(2) panelboard serving critical branch circuits serve floors on which they are located
(3) panelboards serving life safety branch circuits serve floors on which they are located & floors immediately above & below
(4) panelboards not located in exit enclosures or exit passageways

2.1-8.3.2.3 Ground-Fault Circuit Interrupters in Critical Care Areas:
☐ check if not included in project
(2) each receptacle individually protected by single GFCI device

2.1-8.3.3 POWER-GENERATING & -STORING EQUIPMENT

2.1-8.3.3.1 Essential electrical system or emergency electrical power
(1) essential electrical system complies with NFPA 99
(2) emergency electrical power complies with NFPA 99

2.1-8.3.5 Handwashing sinks & scrub sinks that depends on building electrical service for operation are connected to essential electrical system

2.1-8.3.6 Receptacles in patient care areas are provided according to Table 2.1-1

PLUMBING SYSTEMS

2.1-8.4 Plumbing & Other Piping Systems:
2.1-8.4.2
(3)(c) no installation of dead-end piping (except for empty risers mains & branches for future use)
(3)(b) any existing dead-end piping is removed
☐ check if not included in project
(4)(a) water-heating system supplies water at following range of temperatures: 105–120°F

2.1-8.4.2.6 Drainage Systems:
(1)(b) drip pan for drainage piping above ceiling of sensitive area
☐ check if not included in project
(2) accessible
(3) overflow drain with outlet located in normally occupied area that is not open to restricted area

Floor Drains:
(2) no floor drains in Class 2 & 3 imaging rooms
2.1-8.4.3.1(1) Materials used for plumbing fixtures are non-absorptive & acid-resistant.

2.1-8.4.3.2 Handwashing Station Sinks:

(a) Sinks are designed with basins that will reduce risk of splashing to areas where direct patient care is provided, sterile procedures are performed & medications are prepared.

(b) Sink basins have nominal size of no less than 144 square inches.

(c) Sink basins have min. dimension of 9 inches in width or length.

(d) Sink basins are made of porcelain, stainless steel or solid-surface materials.

(e) Water discharge point min. 10” above bottom of basin.

(f) Anchored so that allowable stresses are not exceeded where vertical or horizontal force of 250 lbs. is applied.

(g) Sinks used by staff, patients, & public have fittings that can be operated without using hands (may be single-lever or wrist blade devices).

(h) Blade handles:
   - Check if not included in project
   - At least 4 inches in length
   - Provide clearance required for operation

(i) Sensor-regulated water fixtures:
   - Check if not included in project
   - Meet user need for temperature & length of time water flows
   - Designed to function at all times and during loss of normal power

2.1-8.4.3.4 Ice-Making Equipment:

- Copper tubing provided for supply connections to ice-making equipment.

2.1-8.4.3.5 Clinical Flushing-Rim Sinks:

(a) Trimmer with valves that can be operated without hand (may be single-lever or wrist blade devices).

(b) Handles are at least 6 in. long.

(c) Integral trap wherein upper portion of water trap provides visible seal.

2.1-8.4.3.6 Scrub Sinks:

(a) Freestanding scrub sinks are trimmed with foot, knee or electronic sensor controls.

(b) No single-lever wrist blades except for temperature pre-set valve.

2.1-8.4.4 Medical Gas & Vacuum Systems

- Station outlets provided as indicated in Table 2.1-2.

2.1-8.5.1 Call Systems

- Nurse call stations provided as required in Table 2.1-3.

2.1-8.7 Elevators

- Check if not included in project

2.1-8.7.3 Dimensions of Elevators Used for Transport of Outpatients on Gurneys:

- Min. interior car dimensions 5’-8” wide by 7’-9” deep.

2.1-8.7.4 Elevators are equipped with two-way automatic level-maintaining device with accuracy of ± 1/4 inch.

2.1-8.7.5 Elevator Controls:

(a) Elevator call buttons & controls not activated by heat or smoke.

(b) Light beams if used for operating door reopening devices without touch are used in combination with door-edge safety devices & are interconnected with system of smoke detectors.

(c) Elevator controls, alarm buttons & telephones are accessible to wheelchair occupants & usable by the blind.
