32	Total cost upon which depreciation is based.....						
33	The net cost of the property, less the land values, should be taken as a basis for figuring depreciation.						
34	9,209,776.03 X 3%= 276,293.28						

The above figures should show the original cost of the existing property. In case any part of the property is sold or retired, the cost of such property should be deducted from the cost of the plant. The net cost of the property, less the land values, should be taken as a basis for figuring depreciation.

	Unaccounted Losses:.....	5.67%
	<b>TOTAL.....</b>	<b>49,514,742</b>

**MONTHLY PEAKS AND OUTPUT**

- Reports hereunder the information called for pertaining to simultaneous peaks established monthly (in kilowatts) and monthly output (in kilowatt-hours) for the combined sources of electric energy of respondent. 2. Monthly peak col. (b) should be respondent's maximum kW load as measured by the sum of its coincidental net generation and purchases plus or minus net interchange, minus temporary deliveries (not interchange) of emergency power to another system. Monthly peak including such emergency deliveries should be shown in a footnote with a brief explanation as to the nature of the emergency.
- State type of monthly peak reading (instantaneous 15, 30, or 60 minutes integrated.)
- Monthly output should be the sum of respondent's net generation and purchases plus or minus net interchange and plus or minus net transmission or wheeling. Total for the year should agree with line 15 above.
- If the respondent has two or more power systems not physically connected, the information called for below should be furnished for each system.

Rowley, MA System

Line No.	Month (a)	Monthly Peak					Monthly Output (kWh) (See Instr. 4) (g)
