Drinking Water Program Updates

2020-01-02

This week's program director email has these topics of interest:

- Legionella Information
- PFAS
- Non-Revenue Water is Bad Business
- Appurtenances on Storage Tanks
- Training Calendar
- Spam

Legionella Information

To raise your awareness of *Legionella* and changes in the **U.S. Department of Health and Human Services, Centers for Medicare & Medicaid Services (CMS)** and the **U.S. Department of Veterans Health Administration (VHA)** health care facilities requirements that may impact CMS and VHA facilities in your distribution system and your water system. The following information is **attached**:

- Legionella information letter
- Legionella FAQ and resources
- List of health care facilities in Massachusetts

This information is available on our webpage at: <https://www.mass.gov/lists/drinking-water-contaminants-information-for-water-suppliers>.

PFAS Update and Training Video

See **attached** letter for a PFAS update, including the following:

- 1) Availability of free sampling analysis for PFAS if you have not already collected baseline samples.
- 2) MassDEP's proposed Drinking Water PFAS Maximum Contaminant Level (MCL). When finalized around the summer of 2020, the PFAS Drinking Water Regulations will require all PWS to collect baseline PFAS sampling and take other actions if samples exceed the MCL.
- 3) Pending update of the Massachusetts Office of Research and Standards Revised Guideline (ORSG) for PFAS from 70 ppt to 20 ppt. This revised ORSG harmonizes with the proposed PFAS MCL.

MassDEP Drinking Water Program has a new video for PWS on how to sample their sources for PFAS. It is available at: <https://youtu.be/zrwhwSI-R9M>.

Appurtenances on Storage Tanks

The policy on attaching appurtenances to water storage tanks has been updated. Policy # 2019-01 now includes references to antennas, solar sheets, and other appurtenances. Before installing anything to your storage tanks please refer to this updated policy and consult with MassDEP.

Policy on Antennas, Solar Sheets, and/or other Appurtenances Proposed to Be Attached to Public Drinking Water Storage Tanks or on Water Supply Land Policy #2019-01 is **attached**, and will soon be available online at: <https://www.mass.gov/service-details/drinking-water-policies-and-guidance>. This updated policy supersedes policy 98-01.

Non-Revenue Water is Bad Business

Click on the link below to read an interesting article from Master Meter, Inc. (MassDEP has no affiliation with Master Meter, Inc. nor does it endorse them.) The article discusses how non-revenue water, lost water, is a big problem for water utilities. Water that's lost in the distribution network jacks up production costs and puts pressure on already-stressed resources. Leaks in aging pipes and misreads

from older, inaccurate meters cause a significant portion of the financial drain. The article stresses a need for a strategy plan, use of smart meters, and data management.

Prioritize Source Water Protection in 2020

Whether you are responsible for operating a small or large public water system, it is important to practice a multi-barrier approach to protecting your drinking water from contamination. A Source Water Protection Program is the first part of the multi-barrier approach, along with optimizing your water treatment processes and maintaining water quality and security in the distribution system.

How long ago did you put together your Source Water Protection Program? Have conditions in your watershed or aquifer changed over time? What potential threats exist today or are expected in the future? What messages about drinking water protection are most important to you to tell the public, municipal officials, students, etc.?

Re-energize your program by updating or adding protection measures. The **attached** source water protection training slides can help you review your Program and select which parts need to be updated and re-energized in 2020.

Drinking Water Program Staff are available to answer questions and assist with updating your program, as well as documenting it in a new wellhead or surface water protection plan, by contacting program.director-dwp@mass.gov (add Source Water Protection to the subject line) or 617-292-5770.

Training Calendar

When you need training please look at the training calendar located at: mass.gov/eea/agencies/massdep/water/drinking/drinking-water-training-class-schedules.html for upcoming trainings.

If you need a refresher on recently given trainings, you can review several training videos located at: youtube.com/playlist?list=PLJn2AKOcYr7lutGJB-UfDKtQPF_o_249m

Please be reminded that official emails from MassDEP will never come from a Hotmail or any other personal account. If you receive an email of this nature, the email is spam. Do not click on the links, and delete it immediately. To safeguard yourself only click open emails that have XXXXX.XXXX@mass.gov.

MassDEP is sending this important drinking water information to all PWS responsible persons who are listed on the state database. If you are no longer the correct responsible person for the PWS please reply with the correct contact information. MassDEP needs one responsible contact person from each PWS.

Operators, consultants, and others who are interested in Drinking Water Program Updates are encouraged to request to be subscribed to this email list. You may also request to be unsubscribed by replying to this email.

This MassDEP Program Director technical assistance email is funded by the Safe Drinking Water Act Assessment (Section 70) Program. The Assessment is paid by all consumers of public water in Massachusetts and is collected by public water systems. For more information about the Assessment Program, go to mass.gov/eea/agencies/massdep/news/advisory-committees/safe-drinking-water-act-assessment-advisory-committee.html.

IMPORTANT INFORMATION ON *LEGIONELLA*

Dear Public Drinking Water Supplier,

The Massachusetts Department of Environmental Protection (MassDEP) Drinking Water Program is writing to raise your awareness of *Legionella* and changes in the **U.S. Department of Health and Human Services, Centers for Medicare & Medicaid Services (CMS)** and the **U.S. Department of Veterans Health Administration (VHA)** health care facilities requirements that may impact CMS and VHA facilities on your distribution system and your water system. The CMS and VHA changes are intended to prevent *Legionella* outbreaks at healthcare and nursing home facilities. This letter also highlights important information about *Legionella* from the U.S. Environmental Protection Agency (EPA) and U.S. Centers for Disease Control and Prevention (CDC), American Water Works Association, as well as other relevant resources.

Legionella is a bacteria found naturally in freshwater environments at generally low levels but can become a health problem when amplified in building water systems, especially large, complex water systems such as hotels, hospitals, and office buildings. When *Legionella* grows in the biofilm of premise plumbing and is aerosolized through devices such as showers, cooling towers, hot tubs, or fountains, people can breathe in small, contaminated water droplets. Inhalation of *Legionella* may result in a severe form of pneumonia known as Legionnaires' disease, or in milder Pontiac fever. Even though *Legionella* is primarily attributed to premise plumbing issues, public water systems should be aware of the issue. For more information on *Legionella*, see the attached "**Frequently Asked Questions, Information and Resources**".

It is also important that you know if there are any facilities on your distribution system that are responsible for complying with the CMS and VHA Directives and whether these facilities have made changes that may impact your water system program or plans, such as cross connection control or emergency response programs. For a list of these facilities, see the attachment "**health-care-facilities-list.pdf**".

What should you do with the facilities list?

- **Check the list** to identify facilities that receive water from your water system.
- **Find out about the CMS and VHA *Legionella* compliance practices of these facilities** in the course of your routine work (e.g. during cross connection control inspection).

This information is available in alternate format. Contact Michelle Waters-Ekanem, Director of Diversity/Civil Rights at 617-292-5751.
TTY# MassRelay Service 1-800-439-2370
MassDEP Website: www.mass.gov/dep

Printed on Recycled Paper

- For any of the facilities that are on your system you should determine if there are changes within these facilities that could impact your system programs (e.g. cross connection control or emergency response program) or that would require the facility to become a consecutive public water supplier and thus be regulated by MassDEP (e.g. treatment addition).
- **Refer to MassDEP any facilities that meet the definition of a public water system** per 310 CMR 22.00. (e.g. The facility installs permanent or temporary treatment). Send referral by email to MassDEP Drinking water Program at program.director-dwp@mass.gov. Subject: Potential PWS.
- **Determine if you need to update any of your programs/plans (e.g. cross connection or emergency response) as a result of any new information about these facilities. Update programs/plans as needed.**

Thank you for your interest in this public health issue. To assist you in understanding and addressing this emerging issue, we encourage you to review the information in the attachment **“Frequently Asked Questions, Information and Resources”**. If you have any questions about this information, please contact the MassDEP Drinking Water Program at 617-292-5770 or program.director-dwp@mass.gov.

Sincerely,

Yvette DePeiza
Program Director
MassDEP/BWR/Drinking Water Program

MassDEP Drinking Water Program
LEGIONELLA
FREQUENTLY ASKED QUESTIONS, INFORMATION and RESOURCES
for PUBLIC WATER SUPPLIERS

What is *Legionella*?

Legionella is a bacteria found naturally in freshwater environments at generally low levels, but can become a health problem when amplified in building water systems, especially large, complex water systems such as hotels, hospitals, and office buildings. When *Legionella* grows in the biofilm of premise plumbing and is aerosolized through devices such as showers, cooling towers, hot tubs, or fountains, people can breathe in small, contaminated water droplets. Inhalation of *Legionella* may result in a severe form of pneumonia known as Legionnaires' disease, or in milder Pontiac fever.

What is Legionnaires' disease?

Legionnaires' disease (LD) is a serious type of pneumonia (lung infection) caused by *Legionella* bacteria. People can get sick when they breathe in mist or accidentally swallow water into the lungs containing *Legionella*.

More information on Legionella can be found on the Center for Disease Control's website at:

<http://www.cdc.gov/legionella/index.html>.

What environmental conditions favor the spread of *Legionella*?

Legionella thrive in the temperature range of 77° F to 130° F, a range that includes hot water systems, shower heads and even cold-water systems in warm climates. The recommended energy saving step of lowering hot water heater temperatures below 120° F will have the unintended consequence of favoring *Legionella* growth. *Legionella* also thrive in stagnant water conditions and heating and cooling systems that produce aerosols.

***Legionella* Outbreaks**

Legionella is the leading cause of [waterborne disease outbreaks](#) in the United States. Outbreaks can be severe, especially in susceptible populations, causing hospitalization and death. Outbreaks are commonly associated with buildings or structures that have complex water systems, like hotels and resorts, long-term care facilities, hospitals, and cruise ships. The most likely sources of infection include water used for showering, hot tubs, decorative fountains, and

cooling towers (structures that contain water and a fan as part of centralized air-cooling systems for a building or industrial processes). Multiple outbreaks have been associated with health care facilities, and because of the sensitive populations that reside there, health care agencies have some of the most robust policies on *Legionella* control.

MassDEP Regulations and *Legionella*

For surface water sources only, *Legionella* is regulated under the Surface Water Treatment Rule (SWTR), 310 CMR 22.20, with a maximum contaminant level goal (a non-enforceable guideline) of zero *Legionella* organisms for drinking water and a treatment technique for *Legionella* control (e.g., filtration and maintenance of a detectable disinfectant residual). No monitoring for *Legionella* is required.

310 CMR 22.03(3) of the Massachusetts Drinking Water regulations states that facilities served by a public water system that meet criteria that might otherwise make them a consecutive water system do not need to be regulated by MassDEP if they meet five criteria, the first of which is that they do not treat the water. Facilities that install permanent or temporary treatment must comply with the Massachusetts Drinking Water Regulations.

For details of this process and areas of responsibility, please contact your local MassDEP Office serving your public water system. For more information on minimum permitting for installation of permanent or temporary treatment on a consecutive public water system, see <https://www.mass.gov/info-details/public-drinking-water-system-operations#system-development->.

Massachusetts Department of Public Health (MDPH) requirements and *Legionella*

Legionellosis (another name for Legionnaire's disease) is a notifiable disease in Massachusetts. Local boards of health (LBOH), healthcare providers, laboratories and other public health personnel must report the occurrence of notifiable diseases as required by Massachusetts General Laws, Chapter 111, Sections 3, 6, 7, 109, 110, 111 and 112 and Chapter 111D, Section 6 to the Massachusetts Department of Public Health (MDPH). MDPH reviews all reported cases and works with the LBOH to determine if it is necessary to contact the local public water supplier and MassDEP. Even though *Legionella* is primarily a premise plumbing issue, if MDPH and the LBOH determine that the local public water system needs to be evaluated, MassDEP and the public water system will be notified and MassDEP will work with all parties to resolve the issue.

All *Legionella* health complaints or questions should be referred to the LBOH and MDPH.

- For a list of local Boards of Health see: <https://www.mahb.org/boards-of-health/>.

For more information on infectious disease surveillance, reporting and control in MA, see: <https://www.mass.gov/infectious-disease-surveillance-reporting-and-control>.

How has the U.S. Department of Health and Human Services, Centers for Medicare & Medicaid Services (CMS) sought to control *Legionella*?

The CMS issued a revised Survey and Certification letter on July 6, 2018 that outlines the expectations for healthcare facilities to have Water Management Policies and Procedures (LTC) to reduce the risk of growth and spread of *Legionella* and other opportunistic pathogens. The policy was also intended to provide general awareness on *Legionella* and other pathogens for all healthcare organizations. Facilities must have water management plans and documentation that, at a minimum, ensure each facility:

- Conducts a facility risk assessment to identify where *Legionella* and other opportunistic waterborne pathogens (e.g. *Pseudomonas*, *Acinetobacter*, *Burkholderia*, *Stenotrophomonas*, *nontuberculous mycobacteria*, and *fungi*) could grow and spread in the facility water system.

MassDEP Drinking Water Program
LEGIONELLA
FREQUENTLY ASKED QUESTIONS, INFORMATION and RESOURCES
for PUBLIC WATER SUPPLIERS

- Develops and implements a water management program that considers the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) industry standard and the CDC toolkit.
- Specifies testing protocols and acceptable ranges for control measures and documents the results of testing and corrective actions taken when control limits are not maintained.
- Maintains compliance with other applicable Federal, State and local requirements.

Note: The CMS does not require water testing for *Legionella* or other opportunistic water borne pathogens. Testing protocols are at the discretion of the provider.

Healthcare facilities are expected to comply with CMS requirements and conditions of participation to protect the health and safety of its patients. Those facilities unable to demonstrate measures to minimize the risk of LD are at the risk of citation for non-compliance.

A link to the revised 7/6/18 CMS Survey and Certification letter is available at the following link:

<https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/SurveyCertificationGenInfo/Downloads/QSO17-30-HospitalCAH-NH-REVISED-.pdf>.

How has the U.S. Department of Veterans Health Administration (VHA) sought to control *Legionella* in their facilities?

On August 31, 2014, the VHA issued a Directive to its facilities for the prevention of healthcare-associated *Legionella* Disease and Scald Injury from Potable Distribution Systems in VHA. The *Legionella* prevention activities in the Directive involve assessing risks, monitoring water quality and implementing commensurate engineering controls to limit the growth of *Legionella*. Use of engineering controls to limit *Legionella* growth include ongoing monitoring of implemented controls, validating that the control measures are effective at inhibiting *Legionella* growth, and modifying implementation or type(s), as necessary. The Directive focused on engineering controls to the overall microbiological quality of facility water, not just the inhibition of *Legionella* growth. The Directive further noted that *Legionella* growth in building potable water distribution systems is primarily suppressed by the implementation of engineering controls such as maintenance of appropriate water temperatures or biocide (e.g. residual oxidant) levels. Application of more than one control may be necessary for the successful inhibition of *Legionella* growth.

For more information see the VHA Directive at www.va.gov/vhapublications/ViewPublication.asp?pub_ID=3033.

Other Resources

- ASDWA

The Association of State Drinking Water Administrators (ASDWA) developed a paper on what Building/Facility Water Systems Operators should know about the management of *Legionella*. The white paper highlights the issues surrounding buildings that install treatment and are then considered public water systems under the Safe Drinking Water Act (SDWA) and subject to SDWA requirements. “Reducing exposure and controlling Legionella..... In buildings where Legionella has grown in the premise plumbing, the water provided by the public water system is a likely initial source. There are currently efforts to conduct a study monitoring for Legionella in the water in the distribution systems of public water systems that will provide a better understanding of the occurrence of Legionella in a distribution system. Regardless of whether the public water system is the original source of the Legionella found in premise plumbing, water systems can support control of Legionella and other opportunistic pathogens by providing water with optimal disinfectant residuals to all customers.”

For details see:

Building Water System Operators White Paper; May 2019

Update on Draft PFAS Regulations and New Funding Availability

Dear Public Water Supplier:

This letter is intended to inform you of the following three Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS) updates. These updates should strongly encourage your PWS to voluntarily collect PFAS baseline samples, as soon as you can, if you have not already collected and analyzed samples with a laboratory approved by MassDEP/DWP with detection levels below 4 ppt:

- 1) Availability of free sampling analysis for PFAS if you have not already collected baseline samples.
- 2) MassDEP's proposed Drinking Water PFAS Maximum Contaminant Level (MCL). When finalized around the Summer of 2020, the PFAS Drinking Water Regulations will require all PWS to collect baseline PFAS sampling and take other actions if samples exceed the MCL.
- 3) Pending update of the Massachusetts Office of Research and Standards Revised Guideline (ORSG) for PFAS from 70 ppt to 20 ppt. This revised ORSG harmonizes with the proposed PFAS MCL.

Availability of Funding for PFAS Testing

Last week, a Supplemental Budget was passed providing funding for: PFAS testing, design of treatment systems at PWS for the removal of PFAS, and 0% interest loans for PWS to install treatment. MassDEP will be contracting with labs to provide the free PFAS testing to PWS.

To indicate your interest in free sampling, if you have not already completed PFAS baseline sampling, you must complete a brief survey at <https://www.surveymonkey.com/r/S7QHNF2> or send a request with the information described in the survey (E.g. PWS name, PWS ID#, # of sources already tested, number of sources to be tested, and system population) to program.director-dwp@mass.gov. Subject: "PFAS free lab analyses."

We expect that the available funding is enough to test all the PWS in the state and will notify you when the program is available. We will also be creating a grant program to pay for design of PFAS treatment systems at PWS who exceed the MCL. MassDEP is currently considering how to apportion the grants. In

This information is available in alternate format. Contact Michelle Waters-Ekanem, Director of Diversity/Civil Rights at 617-292-5751.

TTY# MassRelay Service 1-800-439-2370

MassDEP Website: www.mass.gov/dep

Printed on Recycled Paper

addition, zero-percent interest loans will be made available for publicly owned PWS to install treatment to reduce PFAS levels to below the MCL. **We will inform you when these programs are available.**

PFAS Drinking Water MCL

MassDEP has drafted new regulations to establish an MCL for PFAS. The draft regulations are scheduled to be out for public comment on December 27, 2019 and there will be a 60-day comment period ending February 27, 2020. Four public hearings will be held around the state. We encourage you to participate in the public hearings and comment on the proposal. The proposed regulations establish a Total PFAS MCL of 20 ppt for six PFAS contaminants: perfluorooctanesulfonic acid (PFOS), perfluorooctanoic acid (PFOA), perfluorohexane sulfonic acid (PFHxS), perfluorononanoic acid (PFNA), perfluoroheptanoic acid (PFHpA), and perfluorodecanoic acid (PFDA). A preview of these regulations and public hearing notice is available at <https://www.mass.gov/lists/development-of-a-pfas-drinking-water-standard-mcl>. For more information about the establishment of an MCL, please see: <https://www.mass.gov/lists/development-of-a-pfas-drinking-water-standard-mcl>.

Office of Research and Standards Guideline (ORSG)

Additionally, in the near future, MassDEP will revise its Office of Research and Standards Revised Guideline (ORSG) to 20 ppt for six PFAS compounds, perfluorooctanesulfonic acid (PFOS), perfluorooctanoic acid (PFOA), perfluorohexane sulfonic acid (PFHxS), perfluorononanoic acid (PFNA), perfluoroheptanoic acid (PFHpA), and perfluorodecanoic acid (PFDA), synchronizing the ORSG with both the proposed PFAS MCL and with the groundwater standard that was recently finalized for waste site cleanup. In order to protect the public health, MassDEP will use the revised ORSG when evaluating PFAS results starting December 27, 2019.

For more information about PFAS and the Department's efforts to address it, please see: <https://www.mass.gov/info-details/per-and-polyfluoroalkyl-substances-pfas>.

If you have any questions about this update, please contact the Drinking Water Program at program.director-dwp@mass.gov. Subject: PFAS

I look forward to your review of the proposed PFAS MCL and urge you to take full advantage of the free lab analyses the Department is offering as we work together to address this emerging contaminant.

Sincerely,

Yvette DePeiza

Bureau of Water Resources Division of Watershed Management Drinking Water Program

Policy on Antennas, Solar Sheets and/or Other Appurtenances Proposed to Be Attached to Public Drinking Water Storage Tanks or On Water Supply Land

Effective Date: 12-31-2019

Policy #2019-01

Supersedes Policy #: DWP98-01

Approved by: Kathleen Baskin, Assistant Commissioner, Bureau of Water Resources

Purpose

This policy is adopted to explain the position of the Massachusetts Department of Environmental Protection (MassDEP) Drinking Water Program regarding the installation of antennas, solar sheets and/or other appurtenances on, or adjacent to, water storage tanks. It is made necessary due to incidents which have resulted in damage to water storage tanks. Public drinking water storage tanks contain finished drinking water that will go directly to consumers. Therefore, MassDEP must safeguard the integrity of these tanks.

The Drinking Water Program has encountered a number of instances where the installation of structures and components, such as antennas, on tanks has compromised the public water supply's ability to deliver fit and safe water in accordance with M.G.L. c. 111, § 160.

Applicability

This policy applies to drinking water system personnel, any person installing or proposing to install antennas, solar sheets and/or other appurtenances to public drinking water storage tanks or on land owned or controlled by a public water system and MassDEP Drinking Water Program staff. This policy does not apply to land-based solar installations proposed on land owned or controlled by a public water system. See *Information to be Submitted to MassDEP for Proposed Solar and Wind Energy Projects on Lands Owned or Controlled By Public Water Systems for Drinking Water Purposes* and *Drinking Water Policy 11-01: Wind and Solar Energy Projects*

This information is available in alternate format. Contact Michelle Waters-Ekanem, Director of Diversity/Civil Rights at 617-292-5751.

TTY# MassRelay Service 1-800-439-2370

MassDEP Website: www.mass.gov/dep

Printed on Recycled Paper

Proposed in Zone I at <https://www.mass.gov/service-details/drinking-water-policies-and-guidance>.

M.G.L. c. 111, § 160, states that the department may “make rules and regulations and issue such orders as in its opinion may be necessary to prevent the pollution...and to ensure the delivery of a fit and pure water supply to all consumers.” In addition, M.G.L. c. 40, § 15B, states “[a] town, city, or district authorized to furnish water for domestic purposes, may, with the advice and approval of the state department of environmental protection...in its discretion, by lease, license, or other agreement, permit the construction and maintenance on any land under its control of towers, poles, wires, and other structures for the purpose of transmitting electronic power over lands and water held for water supply purposes; provided, that such lease, license or agreement will not, in the opinion of the said department, affect or interfere with the water supply; and provided, further, that said city, town, or district may, with the approval of said department, revoke said lease, license or agreement for cause to be determined by it.”

In addition, 310 CMR 22.04(1) states “[a]ny person proposing to construct a new public water system, operate a public water system or to substantially modify an existing public water system shall obtain the prior written approval of the Department,” and 310 CMR 22.04(4)(b) says that “no person shall operate a Public Water System unless such operation is in accordance with the terms and conditions of all Department permits and approvals.” Substantial modifications are defined in 310 CMR 22.00 as “any deviation from approved plans or specifications affecting capacity, hydraulic conditions, operating units, the functioning of water treatment processes or systems, or the quality of water delivered to consumers....” The department has determined that the installation of antennas, solar sheets and/or other appurtenances on, or adjacent to, water storage tanks is a substantial modification.

As of the effective date of this policy, MassDEP will presume that a proposal for new construction of antennas, solar sheets and/or appurtenances to be attached to drinking water storage tanks or antennas and/or appurtenances to be constructed on any land under the control of the public water system, complies with the requirements of M.G.L. c. 111, § 160, and 310 CMR 22.00, if it has been reviewed and approved by the public water system in accordance with MassDEP guidelines, and the public water system certifies to MassDEP that it has determined that the proposal will not affect or interfere with the water supply. MassDEP reserves the right to revoke its presumptive approval if it subsequently determines that the installation does affect and/or interfere with the water supply.

Guidelines for Presumptive Approval

Proposals for installations meeting these guidelines will be presumed not to affect or interfere with the water supply. The public water system should review each application for impact on the water supply and approve or disapprove in writing whether the proposed antenna, solar sheets or appurtenance may or may not be attached to a drinking water storage tank or antenna and/or appurtenances constructed on land under the control of the public water system.

1. Each application should be in writing and include, at a minimum, the following:
 - a. A map or drawing showing the location of the storage tank;
 - b. A description of where the antenna, solar sheets or appurtenance is to be attached;
 - c. A description of the method of attachment (e.g., bolting, welding, adhesion, etc.);
 - d. Documentation from the tank manufacturer or tank construction contractor indicating that the method of attachment will not affect or interfere with the provision of safe water and will not result in or cause structural damage, interior or exterior corrosion, opening in the tank, etc.; and
 - e. A maintenance and access schedule and procedure.
2. The public water system should review the submitted application and determine whether:
 - a. The project will have an impact on the safety of the water supply;
 - b. The project and its proponent will comply with the criteria established by the tank manufacturer and construction contractor;
 - c. The size and location of any cable support or mounting devices will interfere with future cleaning and painting operations, or present sanitary, safety, or personnel hazards; and
 - d. Any surface preparation and/or touch-up painting of impacted areas in or outside of the tank will comply with tank manufacturer or tank construction contractor, AWWA, and other pertinent industry standards.
3. The public water system should approve or disapprove the application in writing and within 30 days of any approval submit a copy of the approval to the appropriate MassDEP Regional Office or scan and submit an electronic copy by email to program.director-dwp@mass.gov, with a subject line of: Storage Tank Appurtenances Approval. The MassDEP copy should be accompanied by a completed certification form (included with this package), and a copy of the agreement between the project proponent and the public water system.
4. The public water system and the project proponent should execute an agreement between them governing the terms and conditions of the installation. The agreement should include the following:
 - a. An access provision that requires contractors to obtain approval from the public water system for all on-site visits.

- b. A requirement that the public water system perform a final inspection upon completion of construction to compare the completed construction against the plans and specifications.
- c. A requirement that the public water system conduct periodic inspections (at least monthly) of the water storage tank to ensure that the installation continues to present no impact to the drinking water system. Use the Drinking Water Program's PWS monthly inspection log form located at <https://www.mass.gov/doc/pws-monthly-storage-tank-inspection-log-0/download> to document all inspections.
- d. **For projects involving the adherence of solar sheets to public drinking water storage tanks**, the following conditions:
 - i. If the water storage tank is located within the Zone I, the project proponent must clearly demonstrate, through testing or through confirmation from the manufacturer, that there are no per- or poly-fluoroalkyl substances (PFAS) compounds in the solar sheets, adhesives, other components of the solar installation or maintenance practices. Written documentation that the system does not contain PFAS must be maintained in the public water system's files for MassDEP review when requested.
 - ii. Solar sheeting on drinking water storage tanks may increase the temperature of the tank and the water in the tank. Care should be taken in selecting the type of solar sheeting and appurtenances to be used, managing the water in the tank and preventing detrimental impacts to the structural integrity of the tank.

Additional Guidance

Sanitary, Safety, and Structural

- a) Openings cut into tanks compromise the safety of the water in the tank, as well as damage the structural integrity of the tank
- b) Cables and antenna brackets or devices that are improperly mounted to ladders, across access openings, or on platforms create safety and OSHA deficiencies. These can also obstruct or hamper access to vents and manholes.
- c) Brackets or mounting devices screwed directly into tubular columns can cause interior as well as exterior column corrosion and possible structural failure.
- d) Improperly designed brackets can crumple during high winds.

Future Maintenance

Improper (or unperformed) “touch up” painting after the antenna or brackets are installed can lead to premature coating failure on the interior and exterior of the tank.

Cables, antennae, and mounting devices placed too close to tanks can make it difficult, if not impossible, to clean or paint behind them.

Other

Improperly mounted devices, solar sheets or antennas can create a potential liability should high winds, ice loading, seismic activity, electrical storms, or other similar events cause the installation to fail, damage the tank or surrounding support structures, or endanger nearby people. The attachment of these elements on drinking water storage tanks may affect the structural integrity of the tanks due to the added weight, changes in wind pressure and thermal cycling.

Public water systems are advised to consult a professional engineer when installing or attaching antenna, solar sheets and/or other appurtenances on drinking water storage tanks.

Massachusetts Department of Environmental Protection

Drinking Water Program

Updated August 2019

Checking In On Your Source Water Protection Program

Status of Source Water Protection Program

- When did you develop your Source Water Protection Program?
- Have the conditions in your watershed or aquifer changed since you started the program?
- Is it time to re-energize your program by updating or adding protection measures?

Let's Review the Components of a Source Water Protection (SWP) Program

Components of a SWP Program

- Intake & Wellhead Protection
- Land Protection
- Land Management
- Public Access
- Wildlife Impacts
- Forestry
- Invasive Species
- In-Lake Problems
- Water Sampling
- Local Regulatory Controls
- Municipal Improvements
- Emergency Planning
- Outreach/Education
- Multi-Town Coordination
- Staffing
- Other Local Topics

Intake & Wellhead Protection

- Conduct regular, logged inspections to assure proper maintenance and security at wellheads, surface water intakes, and dams.
- Post water supply protection signs.
- Post emergency contact information.

Land Protection

Acquiring Land and Conservation Restrictions (CRs)

- Contact landowners re: their interest
- Negotiate terms
- Conduct a baseline survey of land conditions, uses, etc.
- Proceed with acquisition (MassDEP must pre-approve)
- Record all related documents and plans

Partnerships

- Partner with other groups to research and write applications, to contribute funds and to help manage the lands for water supply protection.

Grant Program for Massachusetts Public Water Suppliers

<https://www.mass.gov/service-details/drinking-water-supply-protection-grant-program>

Managing Lands That You Own

- Decide whether or not to allow public access.
- Do you have staff & funds to oversee public access?
- There is no public access allowed in the Zone I.

Public Access on PWS Lands

Do you have problems with people, dogs, horses, off-road vehicles, illegal dumping, trash, or erosion?

To control public access/recreation:

- Replace missing signs
- Reroute trails away from unstable soils, steep slopes, and other vulnerable areas.
- Block off vulnerable areas to people and vehicles
- Replant eroded areas
- Create well-defined parking areas
- Educate the public
- Develop a trail adoption program

Conservation Restrictions

Reach out to landowners with reminders about the conditions (restrictions on land use and activities) of their Conservation Restriction and to let you know if ownership changes.

Wildlife Impacts

- Conduct regular inspections for wildlife impacts from aquatic mammals and birds.
- Develop a long-term plan to address beaver and muskrat.
- “Harass” birds to prevent contact with reservoir and wellhead.
- Reduce attractive habitat for geese.
- Work with solid waste & sewage treatment facilities to control gulls.
- Conduct outreach to residents: Don’t feed the birds.
- Remind businesses to cover trash and food waste bins.

Forestry on PWS Lands

Maintain a healthy forest by developing a forest management plan for cutting on PWS land.

Monitor cutting on private lands such as those covered by a conservation restriction.

<http://masswoods.net/monthly-update/newly-revised-forestry-best-management-practices-manual>

Invasive Species

Plant and animal invasive (non-native) species are being identified at an increasing rate on land in New England.

Water suppliers should stay aware of what species are moving in and the best management practices to control them.

For more information about invasive species, go to <https://www.mass.gov/service-details/invasive-plants>.

Stormwater

Problems at Reservoirs, River Intakes & Groundwater Wells

- Stormwater, Stormwater, Stormwater
- Flooding
- Bacteria
- Cyanobacteria, other blooms
- Aquatic Invasive Species

Controls include: promote vegetative buffers; identify, map, and then reduce or eliminate untreated stormwater runoff into reservoir and tributaries; reduce nutrient runoff; conduct street sweeping.

Water Sampling

- Perform water sampling at locations in the reservoir and tributaries or in the aquifer to establish baseline water quality or where you have identified, or suspect, there are land uses/activities that may impact the water supply.
- Sampling programs are very watershed and aquifer specific.
- Often community groups and government agencies have water quality results that can be used to identify problems and look for trends in surface water and ground water quality.

Local Regulatory Controls

What Do I Not Want in My Aquifer or Watershed?

- High density residential
- Agricultural runoff
- Untreated stormwater runoff
- Large parking lots or other impermeable surfaces
- Uncontained road salt/sand storage
- Underground storage tanks
- Junk yards
- Other

<https://www.mass.gov/source-water-protection>

Municipal Improvements

Identify municipal activities:

- Stormwater runoff
- Road salt/sand use & storage
- Chemical use & storage
- Municipal composting
- Motor oil collection
- Household hazardous waste
- Underground tanks
- Gasoline pumps
- Vehicle repair
- Septic systems at municipal buildings
- Pesticide/fertilizer use & storage
- Forestry

Develop a plan with municipal staff & officials to improve municipal land uses & activities for water supply protection.

Always use a state licensed pesticide applicator. See <https://www.mass.gov/orgs/pesticide-program> for more information.

Emergency Planning

- Post Your Communication/Contact List at All Facilities
- Participate in drills with the local first responders.
- Coordinate emergency procedures with other towns in the aquifer/watershed.
- Identify locations of frequent vehicular accidents near the water supply and talk to the DPW to see if safety measures/road changes can be made.
- Post road signs in the aquifer/watershed to call 911 for emergencies.

Outreach and Education

Water Supply Outreach To?

- Residents
- School Kids
- Dog Owners
- Farmers
- Backyard Hobby Farmers
- Businesses
- Municipal Staff & Officials

What format?

- Water Dept. Open House
- Fact Sheets, Brochures
- Bill Stuffers
- Water Fair
- Press Releases
- Local Cable Show
- School Programs
- Library Displays
- Consumer Confidence Report

If you have GIS available, maps and street address matching are useful tools for outreach programs. Also, reverse 911 helps to get your messages out.

Outreach and Education

Possible Topics

- Pet Waste
- Car Care
- Household Hazardous Wastes
- Lawn Care/Gardening
- Failing Septic Systems
- The Value of Public Drinking Water
- Underground & Above Ground Storage Tanks
- Business Best Management Practices
- Municipal Best Management Practices
- Forestry Practices
- Land Protection
- Local Concerns

Outreach and Education

Potential Partners – Find Common Goals & Interests

- Teachers
- Garden clubs
- Staff in town departments
- Volunteer interns from local schools and colleges
- Scouting organizations
- Senior citizen groups
- Members of watershed associations
- Other volunteers from the community

Multi-Town Coordination

Does your aquifer or watershed extend into other communities?

- Exchange copies of aquifer & watershed maps.
- Form an aquifer and/or watershed protection team.
- Exchange information and comment on proposed projects in other communities.
- Ask other municipalities to adopt land use controls.
- Exchange information about emergency contacts.

Staffing

- Do you have enough staff to implement your Source Water Protection Program and conduct inspections, enforcement, and outreach and education?
- Do you train staff to protect the water supply?
- Have you designated a staff person to update your Program as needed?

Guidance for Developing Local Surface Water & Wellhead Protection Plans
