

# Building Chemical Safety Into Local Emergency Response Plans

## Intended audiences:

Municipal users of hazardous materials, EMDs, fire departments, REPC members, community stakeholders.

**November 2, 2017**  
**1:00pm – 4:30pm**

Montague Public Safety Complex  
180 Turnpike Road  
Turners Falls, MA 01376

## Training Summary

As demonstrated by Hurricane Harvey, extreme weather events can lead to accidental releases of toxic chemicals. This free training will aim to reduce these risks in Franklin County. Public facility managers will learn of best practices and resources to help improve site safety, including free and confidential technical assistance. First responders will receive tools for creating an emergency plan with facilities, including a planning template. The workshop portion will leave participants with a set of next steps to bring to municipal facilities in their own communities.

## Speakers:

- Chief Bob Strahan, Greenfield FD, EMD, REPC President
- Tiffany Skogstrom, MA Office of Technical Assistance
- Todd Dresser (ESIS)
- Mary Dever-Putnam (EPA Region I)
- David Slowick (MassDEP, Emergency Response)
