INDEPENDENT ACCOUNTANTS' COMPILATION REPORT

The Board of Commissioners
Princeton Municipal Light Department
Princeton, Massachusetts 01541

We have compiled the balance sheet of Princeton Municipal Light Department as of December 31, 2013 and 2012, and the related statements of income and unappropriated retained earnings for the year ended December 31, 2013 included in the accompanying prescribed form. We have not audited or reviewed the accompanying financial statements included in the accompanying prescribed form and, accordingly, do not express an opinion or provide any assurance about whether the financial statements are in accordance with the form prescribed by the Massachusetts Department of Public Utilities.

Management is responsible for the preparation and fair presentation of the financial statements included in the form prescribed by the Massachusetts Department of Public Utilities and for designing, implementing, and maintaining internal control relevant to the preparation and fair presentation of the financial statements.

Our responsibility is to conduct the compilation in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The objective of a compilation is to assist management in presenting financial information in the form of financial statements without undertaking to obtain or provide any assurance that there are no material modifications that should be made to the financial statements.

The financial statements included in the accompanying prescribed form are presented in accordance with the requirements of the Massachusetts Department of Public Utilities, and are not intended to be a presentation in accordance with accounting principles generally accepted in the United States of America.

This report is intended solely for the information and use of the Massachusetts Department of Public Utilities and is not intended to be and should not be used by anyone other than these specified parties.

Goulet, Salvidio & Associates P.C.

FURNISH SCHEDULE OF ESTIMATES REQUIRED BY GENERAL LAWS, CHAPTER 164, SECTION 57 FOR GAS AND ELECTRIC LIGHT PLANTS FOR THE FISCAL YEAR, ENDING DECEMBER 31, NEXT.

		Amount
INCOME FROM PRIVATE CONSUMERS:		
1	From sales of gas	0
2	From sales of electricity	3,337,006
3	TOTAL	3,337,006
4		
5	EXPENSES	
6	For operation, maintenance and repairs	3,202,290
7	For interest on bonds, notes or scrip	
8	For depreciation fund (3 % 4,483,812 as per page 9)	134,514
9	For sinking fund requirements	
10	For note payments	
11	For bond payments	
12	For loss in preceding year	
13	TOTAL	3,336,804
14		
15	COST:	
16	Of gas to be used for municipal buildings	
17	Of gas to be used for street lights	
18	Of electricity to be used for municipal buildings	104,236
19	Of electricity to be used for street lights	9,594
20	Total of above items to be included in the tax levy	113,830
21		
22	New construction to be included in the tax levy	
23	Total amounts to be included in the tax levy	113,830

CUSTOMERS

Names of cities or towns in which the plant supplies GAS, with the number of customers' meters in each.		Names of cities or towns in which the plant supplies ELECTRICITY, with the number of customers' meters in each.	
City or Town	Number of Customers' Meters, Dec. 31	City or Town	Number of Customers' Meters, Dec. 31
		Princeton	1,536
TOTAL	0	TOTAL	1,536

Bonds (Issued on Account of Gas or Electric Lighting.)							
When Authorized*	Date of Issue	Amount of Original Issue **	Period of Payments		Interest		Amount Outstanding at End of Year
			Amounts	When Payable	Rate	When Payable	
Jan 31, 1984	Nov 11, 1984	550,000					
Dec 21, 2002	Dec 21, 2002	225,000					
	TOTAL	775,000				TOTAL	0

The bonds and notes outstanding at end of year should agree with the Balance Sheet.
 When bond and notes are repaid report the first three columns only
 * Date of meeting and whether regular or special
 ** List original issues of bonds and notes including those that have been repaid

Town Notes

(Issued on Account of Gas or Electric Lighting.)

When Authorized*	Date of Issue	Amount of Original Issue **	Period of Payments		Interest		Amount Outstanding at End of Year
			Amounts	When Payable	Rate	When Payable	
17-Dec-09	17-Dec-09	500,000					0
09-Jul-10	09-Jul-10	225,000					0
TOTAL		725,000				TOTAL	0

The bonds and notes outstanding at end of year should agree with the Balance Sheet.

When bond and notes are repaid report the first three columns only

* Date of meeting and whether regular or special

** List original issues of bonds and notes including those that have been repaid

TOTAL COST OF PLANT - ELECTRIC

1. Report below the cost of utility plant in service according to prescribed accounts
 2. Do not include as adjustments, corrections of additions and retirements for the current or the preceding year. Such items should be included in column (c) or (d) as appropriate.
 3. Credit adjustments of plant accounts should be enclosed in parentheses to indicate the negative effect of such amounts.
 4. Reclassifications or transfers within utility plant accounts should be shown in column (f).

29	Total General Plant	1,452,016	19,038	0	0	0	1,471,054
30	Total Electric Plant in Service	4,509,760	48,195	(17,273)	0	0	4,540,682
31							Total Cost of Electric Plant..... 4,540,682
33							Less Cost of Land, Land Rights, Rights of Way..... 56,870
34							Total Cost upon which Depreciation is based 4,483,812

The above figures should show the original cost of the existing property. In case any part of the property is sold or retired, the cost of such property should be deducted from the cost of the plant. The net cost of the property, less the land value, should be taken as a basis for figuring depreciation.

PRODUCTION FUEL AND OIL STOCKS (Included in Account 151)

(Except Nuclear Materials)

1. Report below the information called for concerning production fuel and oil stocks.
2. Show quantities in tons of 2,000 lbs., gal., or Mcf., whichever unit of quantity is applicable.
3. Each kind of coal or oil should be shown separately.
4. Show gas and electric fuels separately by specific use.

1. Report below the amount of operating revenue for the year for each prescribed account and the amount of increase or decrease over the preceding year.

2. If increases and decreases are not derived from previously reported figures, explain any inconsistencies.

3. Number of customers should be reported on the basis of meters, plus number of late rate accounts except where separate

ELECTRIC OPERATING REVENUES (Account 400)

meter readings are added for billing purposes, one customer shall be counted for each group of meters so added. The average number of customers means the average of the 12 figures at the close of each month. If the customer count in the residential service classification includes customers counted more than once because of special services, such as water heating, etc., indicate in a footnote the number of such duplicate customers included in the classification.

4. Unmetered sales should be included below. The details of such sales should be given in a footnote.

5. Classification on Commercial and Industrial Sales, Account 442, Large (or Industrial) may be according to the basis of classification regularly used by the respondent if such basis of classification is not greater than 1000 KW. See Account 442 of the Uniform System of Accounts. Explain basis of Classification

* Includes revenues from application of fuel clauses \$

Total KWH to which applied

0

SALES OF ELECTRICITY TO ULTIMATE CONSUMERS

Report by account number the K.W.H. sold, the amount derived and the number of customers under each filed schedule or contract. Municipal sales, contract sales and unbilled sales may be reported separately in total.

SALES FOR RESALE (Account 447) - Continued

5. If a fixed number of kilowatts of maximum demand is specified in the power contract as a basis of billings to the customer this number should be shown in column (f). The number of kilowatts of maximum demand to be shown in column (g) and (h) should be actual based on monthly readings and should be furnished whether or not used in the determination of demand charges. Show in column (i) type of demand reading (instantaneous, 15, 30, or 60 minutes integrated).
 6. The number of kilowatt-hours sold should be the quantities shown by the bills rendered to the purchasers.
 7. Explain any amounts entered in column (n) such as fuel or other adjustments.
 8. If a contract covers several points of delivery and small amounts of electric energy are delivered at each point, such sales may be grouped.

PURCHASED POWER (Account 555)
(EXCEPT INTERCHANGE POWER)

4. If receipt of power is at a substation indicate ownership in column (e), thus: respondent owned or leased, RS; seller owned or leased, SS.

5. If a fixed number of kilowatts of maximum demand is specified in the power contract as a basis of billing, this number should be shown in column (f). The number of kilowatts of maximum demand to be shown in columns (g) and (h) should be actual based on monthly readings and

should be furnished whether or not used in the determination of demand charges. Show in column (i) type of demand reading (instantaneous, 15, 30, or 60 minutes integrated).

6. The number of kilowatt hours purchased should be the quantities shown by the power bills.

7. Explain any amount entered in column (n) such as fuel or other adjustments.

INTERCHANGE POWER (Included in Account 555)

1. Report below the kilowatt-hours received and delivered during the year and the net charge or credit under interchange power agreements.
 2. Provide subheadings and classify interchanges as to (1) Associated Utilities, (2) Nonassociated Utilities, (3) Associated Nonutilities, (4) Other Nonutilities, (5) Municipalities, (6) R.E.A. Cooperatives, and (7) Other Public Authorities. For each interchange across a state line place an "x" in column (b).
 3. Particulars of settlements for interchange power

shall be furnished in Part B, Details of Settlement for Interchange Power. If settlement for any transaction also includes credit or debit amounts other than for increment generation expenses, show such other component amounts separately, in addition to debit or credit for increment generation expenses, and give a brief explanation of the factors and principles under which such other component amounts were determined. If such settlement represents the net of debits and credits under an interconnection, power pooling,

coordination, or other such arrangement, submit a copy of the annual summary of transactions and billings among the parties to the agreement. If the amount of settlement reported in this schedule for any transaction does not represent all of the charges and credits covered by the agreement, furnish in a footnote a description of the other debits and credits and state the amounts and accounts in which such other amounts are included for the year.

MONTHLY PEAKS AND OUTPUT

1. Report hereunder the information called for pertaining to simultaneous peaks established monthly (in kilowatts) and monthly output (in kilowatt-hours) for the combined sources of electric energy of respondent.

2. Monthly peak col. (b) should be respondent's maximum kw load as measured by the sum of its coincidental net generation and purchase plus or minus net interchange, minus temporary deliveries (not interchange) of emergency power to another system. Monthly peak including such emergency deliveries should be shown in a footnote with a brief explanation

as to the nature of the emergency.

3. State type of monthly peak reading (instantaneous 15, 30, or 60 minutes integrated.)

4. Monthly output should be the sum of respondent's net generation and purchases plus or minus net interchange and plus or minus net transmission or wheeling. Total for the year should agree with line 15 above.

5. If the respondent has two or more power systems not physically connected, the information called for below should be furnished for each system.

SUBSTATIONS

1. Report below the information called for concerning substations of the respondent as of the end of the year.
 2. Substations which serve but one industrial or street railway customer should not be listed hereunder.
 3. Substations with capacities of less than 5000 kva, except those serving customers with energy for resale, may be grouped according to functional character, but the number of such substations must be shown.

4. Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended.
 5. Show in columns (i), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity.
 6. Designate substations or major items of equipment leased from others, jointly owned with others, or operated otherwise than by reason of sole ownership by the respondent. For any substation or equipment operated under lease, give

name of lessor, date and period of lease and annual rent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of sharing expenses of other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner or other party is an associated company.

RATE SCHEDULE INFORMATION

1. Attach copies of all Filed Rates for General Consumers
2. Show below the changes in rate schedules during year and the estimated increase or decrease in annual revenues predicted on the previous year's operations.

Effective Date	M.D.P.U. Number	Rate Schedule	Estimated Effect on Annual Revenues	
			Increases	Decreases
		See attached rates.		

Effective: July 1, 2013
Princeton Municipal Light Department

**RESIDENTIAL RATE (RR)
WACHUSETTS RESIDENTIAL (WR)**

AVAILABILITY: Service under this rate is available for all domestic purposes in an individual private dwelling or an individual apartment. Incidental commercial uses on the same premises (not exceeding 150 kWh per month, as determined by the Department) may be permitted under this rate at the Department's discretion depending upon the metering requirements and the nature of the commercial load characteristics. In the case of multiple dwellings, the Department may under unusual circumstance and solely at the discretion of the Department, permit service under this rate through a master meter; however, the monthly customer charge shall be applied for each residential service meter, and the minimum monthly charge shall be equal to the customer charge multiplied by the number of separate living quarters so served.

COST OF SERVICE:

Monthly Service charge: \$8.95 per meter (with no kWh)

Energy Charge: \$0.1920 per kWh

Monthly Minimum Charge: The Monthly Service Charge.

DISCOUNT: A 5% discount will be applied to the Residential Service Energy Charge, provided all outstanding bills are paid before the 20th of each month at the discretion of the Department. An outstanding bill equal to the monthly discount that would have applied on the single prior month's bill may be disregarded when determining applicability for the discount. No discount will be allowed on the Customer Charge, the Purchase Power Cost Adjustment, or any other charge that may be applied from time to time.

TERMS AND CONDITIONS: The Department's Terms and Conditions in effect from time to time, where not inconsistent with the specific provisions hereof, are a part of this rate.

POWER COST ADJUSTMENT: A Purchase Power Cost Adjustment (PPCA), either a charge or a credit, shall be applied to all kilowatt-hours sold under this rate as provided in the PPAC.

EXCULPATORY CLAUSE: An exculpatory clause shall apply to all rates and services provided by the Department.

Effective: July 1, 2013
Princeton Municipal Light Department

**COMMERCIAL SERVICE RATE (CS)
MUNICIPAL RATE (MR)**

AVAILABILITY: Service under this rate is available for non-residential service and shall include individual commercial, small industrial and municipal establishments requiring a single-phase, secondary connection. This rate is not available to customers where the Department has determined that the maximum monthly use of that customer exceeds 2750 kilowatt-hours at any time during the preceding 12 months.

COST OF SERVICE:

Monthly Service:	\$8.95 per meter (with no kWh)
Energy Charge:	\$0.196 per kWh
Monthly Minimum Charge:	The Monthly Service Charge.

TERMS AND CONDITIONS: The Department's Terms and Conditions in effect from time to time, where not inconsistent with the specific provisions hereof, are a part of this rate.

POWER COST ADJUSTMENT: A Purchase Power Cost Adjustment (PPCA), either a charge or a credit, shall be applied to all kilowatt-hours sold under this rate as provided in the PPAC.

EXCULPATORY CLAUSE: The exculpatory clause shall apply to all rates and services provided by the Department.

Effective: July 1, 2013
Princeton Municipal Light Department

PUBLIC AND PRIVATE OUTDOOR LIGHTING (OL)

AVAILABILITY: Service under this rate is available to any customer for outdoor lighting service for public and private property, providing that no light is more than 150 feet from the Department's existing overhead distribution system.

COST OF SERVICE:

Wattage/Type	Annual Rate
50W High Pressure Sodium	\$36.32
70W High Pressure Sodium	\$98.10
100W High Pressure Sodium (a)	\$147.76
150W High Pressure Sodium	\$188.84
175W Mercury Vapor (a)	\$213.40
250W High Pressure Sodium	\$283.74
Blinking Traffic Lights	\$290.51
400W High Pressure Sodium	\$534.13

When required, customers will be charged time and material for the installation of new poles.

(a) Not available for new services.

EQUIPMENT: In all cases the Department will furnish, own, and maintain all poles, wire, lamps, luminaries, brackets, and photoelectric controls. In cases where poles are located on private property, customers will, at the Department's request, provide traffic protection.

HOURS OF OPERATION: All lights shall be operated from approximately one-half hour after sunset to one half-hour before sun-rise, a total of approximately 4,000 hours each year. Burned out lamps will be replaced upon notification by the customer to the Department. No reduction in billing will be allowed for lamp outage.

BILLING: Private outdoor lights shall be billed semi-annually on the first day of January and July each year. Public Streetlights shall be billed monthly beginning the first day of July each year.

TERMS AND CONDITIONS: The Department's Terms and Conditions in effect from time to time, where not inconsistent with the specific provisions hereof, are a part of this rate.

EXCULPATORY CLAUSE: The exculpatory clause shall apply to all rates and services provided by the Department.

Effective: July 1, 2013
Princeton Municipal Light Department

PURCHASE POWER COST ADJUSTMENT (PPCA)

APPLICABLE: The Purchase Power Cost Adjustment (PPCA) is applicable to all rates identified with Power Cost Adjustment clause.

PPCA CHARGE: There shall be added or credited to each monthly bill an amount equal to the total kWh billing during the month multiplied by the PPCA factor determined each month as follows:

(A) Total Purchased Power Cost including NEPOOL Interchange charged to Account 555(a) for the month divided by:

(B) Estimated kWh's to be sold during the month will be compared to:

(C) Base period cost of purchased power per kWh sold, amounting to \$0.00 per kWh sold.

The difference between the base cost and the monthly cost per kWh estimated to be sold will be applied in the monthly billing period. The purchased power cost adjustment (PPCA) will be calculated as follows:

$PPCA = ((A)/(B)) \text{ minus } (C)$

(a) An adjustment to Account 555 charges shall be made each month to reflect the difference between estimated kWh's sold each month and actual kWh's sold each month in order to recover or credit any under-collection or over-collection of purchase power charges.

Effective: July 1, 2013
Princeton Municipal Light Department

EXCULPATORY CLAUSE

APPLICABILITY: The Exculpatory Clause is applicable to all rates identified.

EXCULPATORY CLAUSE: The Town of Princeton, Municipal Lighting Plant, shall not be liable for, or in any way in respect of, any interruption, abnormal voltage, discontinuance or reversal of its service, due to causes beyond its immediate control, whether accident, labor difficulties, conditions of fuel supply, the attitude of any public authority, reduction in voltage, rotating of the use of feeders, selected black-outs, or failure to receive any electricity for which in any manner it has contracted, or due to the operation in accordance with good utility practice of an emergency load reduction program by the Municipal Lighting Plant or one with whom it has contracted for the supply of electricity or inability for any reason to maintain uninterrupted and continuous service; provided, however, that if the Municipal Lighting Plant is unable for any of the causes enumerated above to supply electricity for a continuous period of two (2) days or more, that upon request of the customer, the demand charge, if any, shall be suspended for the duration of such inability.

Effective: July 1, 2013
Princeton Municipal Light Department

Terms and Conditions

1. General:

This Terms and Conditions Statement ("Agreement") has been established to convey the conditions that you ("Customer") agree to when requesting service from Princeton Municipal Light Department ("PMLD"). The benefits and obligations of this Agreement will commence on the day that you, as the Customer, are connected to PMLD's service and will inure to and be binding upon the successors and assigns, survivors and executors or administrators of the original parties. PMLD reserves the right to revise, amend, supercede, supplement or change these Terms and Conditions from time to time in accordance with applicable laws, regulations and policy. The Terms and Conditions shall remain consistent with the Department of Telecommunications & Energy ("DTE") standards.

The supply of electric service is contingent upon PMLD's ability to secure and retain the necessary location for its poles, wires, conduit, cable and other apparatus. The character of service to be made available at each location will be determined by PMLD. In general, the standard voltage supplied will be 120/240 volts, single phase. Contact PMLD for information on availability of other voltages and service characteristics.

Such wiring and other electrical equipment and apparatus as may be necessary in order to utilize the service shall be provided, installed, maintained, and used by the Customer in accordance with the requirements, if any, of the National Electrical Safety Code, and of all public authorities having jurisdiction of the same, and the requirements of PMLD. In general, PMLD will not provide any service until the Customer's wiring has been inspected and approved.

In general, all customers shall be served from one service location and one meter. Apartment buildings shall be served through one service, one building service meter, and an individual meter for each occupancy. In the case of more than one building in an apartment complex, each building service meter shall be considered an individual and separate account and will be billed separately.

2. Application:

Service shall not be supplied unless and until the Customer completes an "Application for Service". The Application must be accurate, true, complete, and signed by the Customer of Record. All Customers' electrical needs present and future, if known, should be stated at the time of the application. A customer shall be and remain the customer of record and shall be liable for service taken until such time as the customer of record requests termination of service and a final meter reading is recorded.

3. Requirements of Providing Service:

The Customer shall wire to the point designated by PMLD, typically the customer owned meter socket, at which point PMLD will connect its service. PMLD shall construct and install overhead or underground electric service extension, distribution facilities, or other equipment determined to be appropriate for a customer under the following conditions:

- The owners of record shall grant PMLD, without cost, perpetual rights and easements, including rights of ingress and egress, free and clear of encumbrances of record, the form and content of which shall be acceptable to and approved by PMLD. Such rights and easements must be granted to and accepted by PMLD prior to the start of construction.
- The Customer shall furnish PMLD with an approved subdivision plan or plans, together with all available grades and land clearing information, and locations of well, property lines, and structures.

- When the Customer requests an overhead or underground electric service extension on their property, PMLD shall install, own, and maintain all primary and secondary electric service equipment up to the point of attachment (meter socket) on the Customer's structure in accordance with PMLD specifications.
- Customers will be billed “time and material” for all costs related to the installation of all overhead and underground, primary and secondary electric services from the customer property line to the point of attachment (meter socket). This includes the initial construction cost and subsequent capital upgrades and improvements to the overhead and underground primary and secondary electric services.
- Customers will be billed “time and material” for all costs related to corrective and preventative maintenance of the overhead and underground primary and secondary electric service on the Customers property.
- When the Customer requests an underground or overhead primary electric service extension to reach the customers property, the Customer shall be responsible for the all capital expenses, at time & material rates, related to extending the overhead or underground primary electric service from its current location to the Customers property line.
- PMLD shall not be required to install a service or meter for a garage, barn or other out-buildings, so located that it may be supplied with electricity through a service and meter in the main building.
- PMLD may, in the exercise of reasonable judgment, refuse to supply service to load's of unusual characteristics that might adversely affect the quality of service supplied to other customers, the public safety, or the safety of PMLD personnel. In lieu of such refusal, PMLD may require a customer to install at its expense any necessary regulating and protective equipment in accordance with requirements and specifications of PMLD.
- The Customer's wiring, piping, apparatus, and equipment shall, at all times, conform to the requirements of any legally constituted authorities and to those of PMLD, and the Customer shall keep such wiring, piping, apparatus, and equipment in proper repair and at the customers own expense.
- The Customer shall furnish and maintain, at no cost to PMLD, the necessary space, housing, fencing, and foundations for all equipment that is installed on its premises in order to supply the Customer with electricity, whether such equipment is furnished by the Customer or by PMLD. Such space, housing, fencing, and foundations shall be in conformity with PMLD’s specifications and subject to its approval.
- PMLD will provide Customers a project cost estimate for each customer request for service extension on and to their property. The final cost of the project will be determined based on actual time and materials. The Customer must pay 50% of the project cost estimate, prior to PMLD beginning construction of the service extension to or on their property.
- PMLD may utilize at its own cost, its primary and secondary overhead and underground electric service equipment for any use related to its operations. This includes the installation of utility poles, conductors, switching, fusing, transformers, voltage regulators, SCADA equipment, metering devices, telecommunications equipment, antennas and other equipment related to PMLD’s operations.
- Customers must maintain at their own cost, physical clearance and access for overhead and underground electric service extensions on their property. Periodic tree trimming, tree and shrub removal, and ground clearing must be performed by qualified contractors trained to safely work near energized power lines. Customers will be charged for repairs caused by failing to maintain adequate (National Electric Safety Code) physical clearance and access for overhead and underground electric service extensions on their property.

4. Deposit:

A deposit may be required on any commercial or residential account. Deposits shall be determined by Customer's credit standing as is reported by a national credit bureau. Deposits may be waived if the Customer provides PMLD with proof that the Customer is the owner of the property for which service is requested. PMLD reserves the right to request a deposit at any time, and from time to time, on any account that does not remain in good standing.

Interest is payable annually on all deposits which are retained longer than six (6) months at a rate that is at or above such rate specified by applicable laws and regulations. Such rate may be credited to a Customer's account.

All deposits shall be due and paid before service will be provided.

5. Metering:

For the purpose of determining the amount of electricity used, a meter or meters will be installed and maintained by PMLD on the Customer's premises. All meters shall remain the sole and exclusive property of PMLD. Customer agrees that the wiring upon the premises of the Customer to which service will be connected shall be installed and maintained by Customer in accordance with the requirements of the National Electrical Code and all requirements of the Town of Princeton.

PMLD or its authorized agent shall have access to the Customer's premises at all reasonable times to install, read, inspect, test, operate, maintain, repair, or remove its equipment, to discontinue service, to determine the rate or rates for the Customer's electric service, or for any other purpose reasonably related to the provision of electric service.

The Customer shall not injure, interfere with, destroy or tamper with any meter or other property of PMLD. The Customer shall be responsible for the care and protection of any of PMLD's property located or installed on the Customer's premises and shall not permit anyone but PMLD or its authorized representatives to have access to such property. PMLD's property, machinery or equipment shall not be handled or operated by anyone other than PMLD or its authorized representatives without the express written consent of PMLD. PMLD will lock or seal all enclosures containing meters or metering equipment, and no person, except an employee or duly authorized agent of PMLD shall be permitted to, in any way, change or modify PMLD's meters or other equipment, and no seals or locks shall be permitted to be removed without the written authorization of PMLD. Customer shall indemnify and hold PMLD harmless, should any violations of these provisions result in injury, death or damage to persons or property.

PMLD will test a meter, at the Customer's request, once in a twelve-month period at no cost. The cost for each additional meter test requested by a Customer within such twelve-month period will be \$15.00. If the meter test is found to be accurate, the fee paid by the customer will not be refunded. A meter shall be deemed inaccurate if it registers more than two percent above or below the standard measure approved by the DTE.

The Customer shall so maintain and operate its electric equipment, meter socket, and apparatus as not to endanger or interfere with the service of electricity. Electric meters are the property of PMLD. No one but authorized Department personnel shall cut and open the padlock seal on a meter, remove and install a meter, install jumper pieces or other bypassing devices, remove or install sleeves, change the meter registration, or tamper in any way with the electric meter. Meters damaged accidentally or otherwise will be replaced at the expense of the property owner where the meter is located.

When a meter is found to be tampered with, service to that meter will be disconnected. To have service restored, the Customer must first pay a reconnection fee, payable in cash to the Department. In addition, charges for electricity used, but not metered as a result of the tampering, will be calculated by PMLD. All costs attributable to investigating the tampering, calculation of amounts owed, and any other administrative costs related to the tampered meter will be charged to the Customer.

When a meter is found to be defective, PMLD will replace the meter at no cost to the Customer. PMLD may charge the Customer for electricity used, but not metered as a result of a defective meter. All costs attributable to the investigation of a defective meter, calculation of amounts owed, and any other administrative costs related to the defective meter will be charged to the Customer.

When Customer owned equipment related to metering, such as meter-socket, current transformers, disconnect switch, etc, is found to be defective, PMLD will request the Customer to replace the electrical equipment at the Customer's cost. PMLD will charge the Customer for electricity used, but not metered as a result of defective Customer owned electric equipment, related to the metering of electricity consumption. All costs attributable to investigation of the defective meter, calculation of amounts owed, and any other administrative costs related to the defective electrical equipment will be charged to the Customer.

All instances of meter tampering will be reported to the Police Department for investigation and prosecution. To restore service after it has been disconnected, application must be made in person at the Department's offices. In addition to the fee for tampering, a deposit will be required, equal to three months' average consumption on the premises in question. Service will be reconnected within 24 hours after payment of the aforementioned fees and deposit, if the matter has been resolved to the satisfaction of the Department.

Subject to the provisions of Massachusetts General Laws ("M.G.L."), Chapter 164 and applicable DTE regulations, whenever PMLD determines that an unauthorized and unmetered use of electricity is being made on the premises of a Customer, PMLD may, at the Customer's expense, make such changes in the location of its meters, appliances and equipment on said premises as will, in the opinion of PMLD, prevent such unauthorized and unmetered use from being made.

6. Meter Reading / Bills:

A bill based on an actual or estimated reading of PMLD's metering equipment shall be rendered monthly, payable upon receipt. When a Customer is serviced through more than one meter, each meter will be considered separately.

If PMLD cannot obtain a meter reading, it shall render an estimated bill, provided PMLD has not rendered an estimated bill for the billing period prior to that for which the estimate is made, except in the case where circumstances reasonably beyond the control of PMLD prevent it from obtaining an actual meter reading. Subject to the provisions of M.G.L., Chapter 164 and applicable DTE regulations, if any Customer, directly or indirectly, prevents or hinders any such employee or agent of PMLD from entering such premises for the purposes of making such examination, PMLD may pursuant to M.G.L. c. 164, § 116 make a complaint to any court or magistrate authorized to issue criminal process.

7. Classification:

PMLD determines a Customer's appropriate rate based on information provided by Customer at the time of application for service. The rates are updated to provide each Customer the most advantageous rate available. It is the Customer's responsibility to assure itself that it is on a rate most advantageous to itself. Customer should promptly notify PMLD of any change in circumstances, which may qualify Customer for a more advantageous rate.

8. Characteristics of Electric Service:

All electric service supplied by the Princeton Municipal Light Department (PMLD) is alternating current (A.C.) with a frequency of 60 Hz. (cycles per second) at the nominal voltage and capacity levels indicated below. Single-phase service is readily available in all locations throughout PMLD's service territory, and three-phase service is available in certain locations. However, where single or three-phase service is not presently available, but is required to accommodate a customer's electric need, PMLD's electrical distribution system can usually be extended at the customer's expense (See Expansion of Distribution Lines and New Electric Service Policy for additional information)

9. Types of Service Available:

120/240 volts. 3 wire, single-phase normally up to a maximum requirement of 100 KVA, although higher amounts may be permitted at certain locations, subject to approval by PMLD.

208Y/120 volts. 4 wire, three -phase up to a maximum of 300 KVA for an overhead service, and no limit for an underground service.

480Y/277 volts, 4 wire, three-phase up to a maximum of 500 KVA for an overhead service, and no limit for an underground service.

480 volt, 3 wire, three-phase up to a maximum of 500 KVA for an overhead service, and no limit for an underground service.

10. Voltage Variation:

Equipment Ratings - Customer installed equipment should be rated for operation at the designated nominal voltage class offered by PMLD. Ratings that deviate from the nominal service classification, such as the use of 240 volt motors on a system nominally rated at 208 volts, may result in inadequate performance, or failure of the equipment.

Voltage Regulation - Service provided by PMLD is subject to reasonable variations in accordance with industry standards and regulatory requirements. In general, under normal conditions, steady state voltage variation at the meter location will be within 5% of the nominal voltage rating of the designated service classification. While PMLD cannot guarantee that all customers will experience voltage regulation within this range throughout its distribution system, it will endeavor to take remedial action to improve the regulation of its service voltage where sustained variations outside of this range prevail under normal circumstances. PMLD is not responsible for losses or expenses directly or indirectly caused by; under or over voltage variations, power quality disturbances, loss of power, restoration of power after an outage, and loss of phase, including but not limited to, business or production losses or any damage to customer equipment. It is the customer's responsibility to provide and maintain power-conditioning devices to protect sensitive electric loads.

Automatic Protection - Any equipment which might be adversely affected by infrequent or long term excursions of the service voltage outside of the normal voltage range should be equipped with suitable automatic isolation protection. Due to circumstances beyond the control of PMLD, including, but not limited to, equipment malfunction, or voltage variations originating on other interconnected distribution, transmission, or generation systems, PMLD cannot provide protection for all conceivable system conditions. PMLD recommends that customer owned equipment be equipped with protective devices in addition to those required by the National Electric Code to guard against damage caused by the following events:

- Loss of Phase
- Under-voltage or Over-voltage
- Phase Reversal
- Automatic Restart following an interruption

Voltage Drop - An allowance must be made for voltage drop in the customer wiring between the meter location and the terminals of the customer's equipment. Where a customer chooses to install his or her own service extension, PMLD strongly advises that such installations adhere to the minimum size and maximum distance specifications.

Voltage Sensitive Equipment - Certain types of utilization equipment, such as computers and x-ray machines, may be highly sensitive to transient voltage variations. PMLD recommends that customers with such equipment install auxiliary devices to filter out transient over-voltages or to regulate service voltages with additional precision.

11. Discontinuance of Service / Nonpayment:

A. Unsafe wiring, fraud, or theft: PMLD may discontinue service without notice if a Customer's wiring is found to be in a dangerous or unsafe condition or as is necessary to protect PMLD from fraud or theft. Service shall not be resumed until the Town of Princeton's Wiring Inspector certifies to PMLD that any dangerous or unsafe condition has been corrected and all wiring is in accordance with the applicable laws and regulations.

B. Unsatisfactory Equipment: PMLD may discontinue service and remove its equipment if, in its judgment, the equipment has become unsatisfactory for further service due to deterioration, civil commotion, vandalism, state of war, explosion, fire, storm, flood, lightning, or any other cause reasonably beyond PMLD's control. Customer may be required to pay the applicable charges for the remainder, in any, of the applicable term of service.

C. Access to Premises: Subject to the provisions of M.G.L., Chapter 164 and applicable DTE regulations, if any Customer, directly or indirectly, prevents or hinders any employee or agent of PMLD from entering a premises for the purposes of making an examination, removing meters for the purpose of work relating to supply or regulation of supply, or for the purpose of ascertaining the quantity of electricity consumed or supplied, such Customer shall be subject to termination of service.

D. Non-Payment of Charges: If a Customer defaults on payments due to PMLD, service may be discontinued in accordance with DTE Regulations 220 CMR 25.00-25.05, to the extent that such regulation is applicable. PMLD shall not restore service until the Customer has:

1. Made an Application for Service and paid all bills due for service previously furnished; and
2. Made a satisfactory deposit to insure payment of future bills; and
3. Paid the costs of reconnection of the premises for which service has been discontinued.

PMLD has the right to terminate service if a bill is not paid within (45) days of receipt. Notice must be rendered to the customer at least seventy-two (72) hours but no more than fourteen (14) days prior to said termination. Termination may be effected between the hours of eight (8:00) AM and four (4:00) PM, Monday through Thursday. The customer will be informed of their rights and responsibilities, in writing, with the notice of termination.

If a customer electric service is terminated, PMLD must collect the amount due from the customer plus a reconnect fee, before the electric service is reconnected. PMLD will charge customers a \$50.00 reconnect fee to reconnect a terminated electric service during normal business hours. PMLD will charge customers a \$250.00 reconnect fee to reconnect a terminated electric service after normal business hours.

PMLD shall not be responsible or liable for loss or damage to any person or property resulting from disconnection of service regardless of whether service is disconnected at the Customer's request or by PMLD and regardless of whether the Customer owns the premises to which service has been supplied.

In the event of an actual or threatened shortage of energy supplies or resources, PMLD may, in its sole discretion, curtail, allocate, or interrupt electric service to any Customer or Customers, if PMLD determines, in its sole discretion, that any part of the generation, transmission or distribution systems PMLD utilizes may be threatened by a condition that may affect its ability to continue to supply electric service of sufficient quality, quantity and reliability.

Although PMLD will make every effort to make necessary repairs and changes to its system without having to suspend the delivery of service, PMLD reserves the right to suspend service in order to make repairs or changes.

12. Collection:

The Customer is responsible for any collection costs, including court costs and attorneys' fees associated with any unpaid balances, meter tampering, theft of services, fraud or otherwise.

13. Limitations of Liability:

The Town of Princeton, PMLD, and all of their respective agents and employees shall be afforded the maximum exemption of limitations of liability available under applicable laws and regulations arising on account of their actions or omissions relating directly or indirectly any provision of electrical service. Without limiting the generality of the foregoing, and except to the extent otherwise expressly provided in M.G.L. Chapter 258:

Neither the Town of Princeton, nor PMLD nor any of their respective agents or employees shall be liable to any person:

A. For any failure by PMLD to supply electric service or for any interruption in the supply of or delay in the restoration of such service.

B. For any damage to any person (including personal injury or death) or any damage to any property, directly or indirectly, arising as a result of the electric service provided by PMLD, the presence of PMLD's apparatus or equipment on any Customer's premises, or any acts or omissions of PMLD.

C. For discontinuance of electrical service to any Customer who fails to comply with, or perform any of the Customer's obligations under these Terms and Conditions, applicable laws and regulations, or other agreements with PMLD.

D. The discontinuance of electrical service if any equipment or apparatus of any Customer interferes with service provided by PMLD or with the delivery of service to other Customers or interferes with the integrity of PMLD's system.

E. For any variation, or interruption in electrical service including without limitation, any such variation or interruption because of abnormal or reduced voltage, emergency load reduction programs, blackouts, or any causes beyond the reasonable control of PMLD, including, but not limited to, accidents, war, civil commotion, acts of God, labor difficulties, acts of Customers, or acts of any public authority.

14. Inspection:

Approval by the Town of Princeton Wiring Inspector for electric service is required before service can be initiated to any new, or newly wired or rewired building, structure or residence.
